Dear Brian,

I have been made aware that there is any opportunity to stop the addition of fluoride to our drinking water in Hamilton, and I am therefore contacting you to express my strong support for stopping the fluoridation.

I have taken some time to examine the scientific information, and have found, among other things, that fluoride in water can harm fish and other aquatic life. I therefore urge the council to end fluoridation in Hamilton. This will not only protect the environment, it will also save the city in millions for fluoridation equipment.

Sincerely,

Dr. Patricia Chow-Fraser
