

*This Project is about more than a road. It also addresses, in a holistic way, remediation of the Red Hill Creek, stormwater quantity and quality and combined sewer overflow concerns, and the ecological, recreational and cultural needs of the surrounding community.*

***"This Project will be designed and built in the most environmentally sensitive way possible."***

*-Impact Assessment and Design Process Summary Report*

**RED HILL VALLEY**

**more than a road**  
**PROJECT**

**Hamilton**

## Why Do We Need It?

### Transportation/Safety

- Completes "ring road" system
- 195-427 less accidents on local roads around the RHVP
- \$3 million-\$7.5 million in collision savings

### Environmental

- Tree replacement 15:1 ratio
- Wetlands replacement 2:1 ratio
- Habitat replacement 1:1 ratio
- Creek realignment using natural channel design

### Economic

- Over \$1 billion in assessment (at full development)
- Approximately 14,000 jobs created (at full development)
- Potential of \$11.9 million in additional tax revenue generated by North Glanbrook Industrial Park alone (at full development)

### Cultural/Recreational

- Interpretive Centre (suggested)
- Improvements to Red Hill Valley Trail
- Changes to some existing parks
- Possible overlooks and interpretive nodes

## Costs

(\$200 million to complete)

Province= \$125 million

City= \$75 million

2005 Taxpayer contribution to Red Hill and Linc= \$20

(2005 percentage of individual taxes to Red Hill Valley Project and Lincoln Alexander Parkway = 0.9%)

## The Elements of the Red Hill Valley Project

- ◆ 8km Expressway
- ◆ 7km Red Hill Creek Re-Alignment
- ◆ 23 Stormwater Management Ponds
- ◆ 2km Combined Sewer Overflow Pipe
- ◆ Landscape Management Plan
- ◆ Environmental Management Plan
- ◆ Community Relations Program
- ◆ 25 Final Technical Reports
- ◆ 1 Impact Assessment Summary Document
- ◆ Red Hill Creek Watershed Studies
- ◆ Fact Sheets
- ◆ Newsletters/Neighbour's Guides
- ◆ 10 Draft City/Six Nations Agreements
