

## HOW TO USE MAPQUEST ROUTE PLANNER

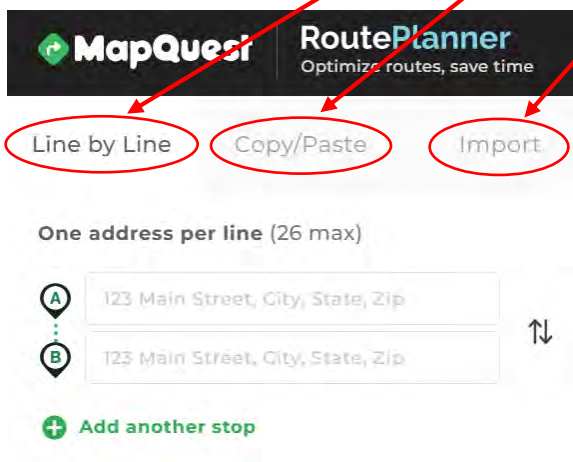

Have a lot of stops? Route Planner can optimize your route, so you spend less time driving and more time doing. Provide up to 26 locations and Route Planner will optimize, based on your preferences, to save you time and gas money.

**Step 1:** Go to [www.mapquest.com](http://www.mapquest.com)

**Step 2:** Navigate mouse towards 3 lines and then select *Route Planner* in the dropdown menu

**Step 3:** Select either *Line by Line*, *Copy/Paste*, or *Import* and enter desired addresses

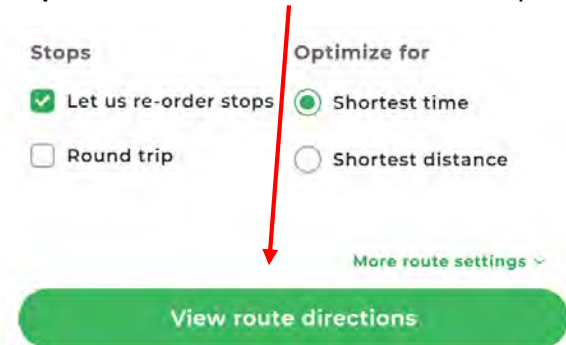

If using **line by line**, you will enter each address manually on a separate line (see picture)

If using **copy/paste**, you can copy a list of addresses and paste them into the box (one address per line)

If using **import**, select and upload the file with addresses

**Step 4:** Press *view route directions* once all your addresses are entered

If you're looking for the quickest, most efficient route, ensure the boxes *let us re-order stops* & *shortest time* are both checked
