References

Acronyms, Abbreviations, Definitions

Acronym, Abbreviation	Definition
APEC	Area of Potential Environmental Concern; Means the area on, in or under a Project Area where one or more contaminants are potentially present, as determined through the Assessment of Past Uses, including through: (a) identification of past or present uses on, in or under the Project Area, and (b) identification of potentially contaminating activity. (O. Reg. 153/04; with modification to include Project Area reference)
APU	Assessment of Past Uses
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes
COPC	Contaminants of Potential Concern
Dillon	Dillon Consulting Limited
EC	Electrical Conductivity
EPA	Environmental Protection Act
ERIS	Environmental Risk Information Services
Excess Soil	Means soil, crushed rock or soil mixed with rock or crushed rock, that has been excavated as part of a project and removed from the project area for the project. (O. Reg. 406/19)
ha	Hectare
ICC	Industrial/Commercial/Community Property Use
km	kilometre
L	Litre
m	Metre(s)
m^3	Cubic Metre(s)
m ASL	Metres above Sea Level
m bgs	Metres below ground surface
MECP	Ontario Ministry of Environment, Conservation and Parks
PAHs	Polycyclic Aromatic Hydrocarbons
PCA	Potentially Contaminating Activity; Means a use or activity set out in Column A of Table 2 in Schedule D that is occurring or has occurred in a Project Area. (O. Reg. 153/04; with modification to include Project Area reference)
PCBs	Polychlorinated Biphenyls
PHCs	Petroleum Hydrocarbons

Acronym, Abbreviation	Definition
Project	Means any project that involves the excavation of soil and includes, (a) any form of development or site alteration, (b) the construction, reconstruction, erecting or placing of a building or structure of any kind, (c) the establishment, replacement, alteration or extension of infrastructure, or (d) any removal of liquid soil or sediment from a surface water body. (O. Reg. 406/19)
Project Area	Means, in respect of a project, a single property or adjoining properties on which the project is carried out. (O. Reg. 406/19)
Project Leader	Means, in respect of a project, the person or persons who are ultimately responsible for making decisions relating to the planning and implementation of the project. (O. Reg. 406/19)
QP	*Qualified Person*
Reg.	Regulation
Rock	Means a naturally occurring aggregation of one or more naturally occurring minerals that is 2 millimetres or larger in size or that does not pass the US #10 sieve. (O. Reg. 406/19)
RSC	Records of Site Condition
SAP	Sampling and Analysis Plan
SAR	Sodium Absorption Ratio
SCR	Soil Characterization Report
Soil	Means unconsolidated naturally occurring mineral particles and other naturally occurring materials resulting from the natural breakdown of rock or organic matter by physical, chemical or biological processes that are smaller than 2 millimetres in size or that pass the US #10 sieve. (O. Reg. 406/19)
Soil Rules	Refers to the “Rules for Soil Management and Excess Soil Quality Standards” under “Ontario Regulation 406/19 – On-Site and Excess Soil Management”
SPA	Source Protection Area
Study Area	The lands within 100 metres of the Project Area boundaries.
TSSA	Technical Standards and Safety Authority
VOCs	Volatile Organic Compounds
WHPA	Wellhead Protection Area

Executive Summary

Dillon Consulting Limited (Dillon) was retained by the City of Hamilton (The City) to assist with the planning for, and compliance with, the regulatory requirements of Ontario Regulation 406/19 – On-Site and Excess Soil Management (O.Reg. 406/19) as part of the Municipal Class Environmental Assessment for improvements to the road right-of-way (ROW) at Rymal Road between Upper James Street and Dartnall Road in Hamilton, Ontario (the "Project Area").

The Project that is the subject of this Assessment of Past Uses (APU) includes the excavation of approximately 76,000 m^3 of soil from the Project Area; however, as the project has not reached the design development phase, the anticipated volume of excess soils generated may change. Soil removal details were not known at the time of preparation of this document, however it is likely that the Project would be subject to file a notice on the excess soils Registry.

The definition of 'Project Area' with respect to this assessment refers to a property or adjoining properties on which the project is carried out. The Project Area for this APU consists of a portion of City-owned public rights-of-way including Rymal Road between Upper James Street and Dartnall Road with minor property takings at select sites in Hamilton, Ontario. The location of the Project Area is shown on Figure 1.

The current property use within the Project Area is largely considered to be community land use comprised of public roads within rights of way. The surrounding properties within the APU Study Area (lands within 100 m of the Project Area boundaries) included residential, commercial, industrial, parkland, and institutional land uses.

As a result of the records review and site reconnaissance visit, the following Potentially Contaminating Activities (PCAs) were identified within the Project Area.

PCA #	PCA Item (Per O.Reg. 153/04 Schedule D, Table 2)	Location of PCA	Description of the Potentially Contaminating Activity	Contributing to an APEC (Rationale, if No)
PCA 1	30. Importation of Fill Material of Unknown Quality	In the Project Area; Under roadways.	Fill material of unknown quality likely imported to the Project Area	Yes
PCA 2	Other: Reported Spills	Within the Project Area	Various spill records within the project area mainly petroleum-derived products.	Yes

PCA #	PCA Item (Per O.Reg. 153/04 Schedule D, Table 2)	Location of PCA	Description of the Potentially Contaminating Activity	Contributing to an APEC (Rationale, if No)
PCA 3	Other: application of de-Icing agents.	Roads and paved surfaces within the Project Area.	Application of de-icing agents to road/paved surfaces.	Yes
PCA 4	Other: spills; Other: application of de-icing agents; 28, 30,	Within the Study Area in several locations to the north, west, east and south of the Project Area.	Various spill records within the Study Area, mainly petroleum-derived products, several records for USTs at extensive commercial property uses of lands adjacent to the Project Area.	Yes
PCA 5	10, 12, 32, 33, 34, 49, 57, 58.	Within the eastern portion of the Study Area.	Extensive industrial and commercial property use of lands adjacent to the Project Area with numerous PCAs identified.	Yes
PCA 6	37	Within a location in the eastern portion of the Study Area.	Operation of dry-cleaning equipment where chemicals are used was identified.	Yes

Potentially Contaminating Activity as provided in Schedule D of O.Reg. 153/04 as amended:

- 10. Commercial Autobody Shops
- 12. Concrete, Cement, and Lime Manufacturing
- 28. Gasoline and Associated Products Storage in Fixed Tanks
- 30. Importation of Fill of Unknown Quality
- 32. Iron and Steel Manufacturing and Processing
- 33. Metal Treatment, Coating, Plating and Finishing
- 34. Metal Fabrication
- 37. Operation of Dry-Cleaning Equipment (where chemicals are used)
- 49. Salvage Yard, including automobile wrecking
- 57. Vehicles and Associated Parts Manufacturing
- 58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners

Although agricultural areas have been historically present at the majority of the Study Area, no orchards were visible. Therefore, the intensive pesticide use and accumulation in the soil is unlikely, and PCA 40 (Pesticides [including Herbicides, Fungicides and Anti-Fouling Agents] Manufacturing, Processing, Bulk Storage and Large-Scale Applications) has not been included as a PCA related to the Project Area.

The Areas of Potential Environmental Concern (APECs) identified for the Project Area are summarized below.

APEC #	Location of APEC within Project Area	Potentially Contaminating Activity*	Contaminants of Potential Concern (COPC) to Soil
APEC 1	Entire Project Area	On-Site PCAs: 30. Importation of Fill Material of Unknown Quality, and Other: road de-icing activities.	M&I PHCs BTEX PAHs
APEC 2	Western, central and Eastern Portions of Project Area	Other: reported spills	M&I PHCs BTEX PAHs
APEC 3	Eastern Portions of Project Area	Off-Site PCAs: Other: Spills, Other: de-icing activities, 10, 12, 28, 30, 32, 33, 34, 37, 49, 57, 58. Refer to Section 6.2. within report for details.	M&I PHCs VOCs PAHs PCBs

*Potentially Contaminating Activity as provided in Schedule D of *O.Reg. 153/04* as amended, where applicable

M&I – includes the following parameter groups:

- Metals – Ba, Be, B, Cd, Cr, Co, Cu, Pb, Mo, Ni, Ag, Tl, U, V, Zn
- B – HWS – Boron, Hot Water Soluble
- As, Sb, Se – Arsenic, Antimony, Selenium (hydride metals)
- Cr (VI) – Hexavalent Chromium
- Hg – Mercury
- CN^- - Cyanide
- EC – Electrical Conductivity
- SAR – Sodium Adsorption Ratio
- pH
- PAHs – Polycyclic Aromatic Hydrocarbons
- PCBs – Polychlorinated Biphenyls
- PHCs – Petroleum Hydrocarbons Fractions 1 to 4
- VOCs – Volatile Organic Compounds

Given the extensive industrial/commercial property use of the lands adjacent to the Project Area and the limited historical search (i.e., no city directories), the associated PCAs have been grouped together, and therefore contribute to a single APEC, covering the Project Area. See Figure 3 for the extents of the PCAs, and Figure 4 for the APECs.

Our evaluation of the information obtained for the Project Area during the APU indicates that there is potential presence of impacts to soil in the Project Area. This is related to the fill imported to the Project Area to construct the roads and/or ROWs, as well as spills that occurred on the Project Area and application of de-icing agents to the road surfaces. In addition, the current and historical land uses of the surrounding properties also indicate the potential for environmental impacts to the Project Area soils.

It is recommended that the Contaminants of Potential Concern (COPC) identified in this APU are investigated further with a Sampling Analysis Plan (SAP) and Soil Characterization Report (SCR) prior to the planned construction works.

This report was prepared by Dillon for the sole benefit of the City of Hamilton. The material in it reflects Dillon's best judgment in light of the information available at the time of preparation. Any use which a third party makes of this report, or any reliance on or decisions made based on it, are the responsibilities of such third parties. Dillon accepts no responsibility for damages, if any, suffered by any third party as a result of actions or decisions made based on this report.

1.0 Introduction

Dillon Consulting Limited (Dillon) was retained by the City of Hamilton (The City) to assist with the planning for compliance with regulatory requirements of *Ontario Regulation 406/19 – On-Site and Excess Soil Management* (O.Reg. 406/19) as part of the Municipal Class Environmental Assessment for improvements and widening to the road at Rymal Road between Upper James Street and Dartnall Road in Hamilton, Ontario (the "Project Area").

1.1 Project Area Information

The Project that is the subject of this Assessment of Past Uses (APU) includes the excavation of approximately 76,000 m^3 of soil from the Project Area; associated with the widening of the road to a five-lane section and installation of a new storm sewer system. However, as the project has not reached the design development phase, the anticipated volume of excess soils generated may change. It is likely that the Project would be subject to file a notice on the excess soils Registry.

Since the Project is an infrastructure project, it may be exempt from certain requirements of O.Reg. 406/19, however, some form of soil characterization will be required to facilitate the off-site management of excess soil from the Project Area.

The definition of 'Project Area' with respect to this assessment refers to a property or adjoining properties on which the project is carried out. The Project Area for this APU consists of a portion of Rymal Road between Upper James Street and Dartnall Road in Hamilton, Ontario, as well as portions of adjoining properties that are potentially being acquired for the purpose of widening of the road, providing active transportation facilities, and accommodating utility relocations. The location of the Project Area is shown on Figure 1.

The current property use within the Project Area is largely considered to be community land use comprised of public roads and rights of way. The surrounding properties within the APU Study Area (lands within 100 m of the Project Area boundaries) included residential, industrial, parkland, institutional, and commercial land uses.

Property information for the Project Area is summarized in Table 1.

Table 1: Property Information Summary for the Project Area

Municipal Addresses	No Municipal address associated with the Project Area
Property Identification Numbers (PINs)	Parts of 169300038, 169290083, 169280259, 169240185, 169230021, 169200576, 169190010, 169140246, 169130282, 169120042 (municipal roadway). Adjoining properties to be acquired for purposes of widening of the road have not been determined yet.
Approximate Area of Project Area	Approximately 22 hectares (ha)
General Description	The Project Area consists of portions of Rymal Road East, a major three-lane arterial road, including gravel/grassed municipal rights-of-way. The extents of the Project Area are displayed on Figure 1. The Project Area is surrounded by residential, industrial, commercial, institutional, and community land use.
Location Coordinates	431151.46 (N), 795223.46 (W) (approximate centroid of the Project Area)
Legal Instruments	There are no known Environmental Compliance Approvals, by-law, agreements or permits that apply to soil management within the Project Area.
Owner	The Regional Municipality of Hamilton-Wentworth

The Project Leader(s) and Qualified Person(s) on the Project are provided in Table 2.

Table 2: Project Leader and Qualified Person Contact Information

Role	Contact Information
Project Leader	Megan Salvucci, MCIP, RPP – Senior Project Manager Infrastructure Programming and Planning Infrastructure Renewal Engineering Services Public Works, City of Hamilton (905) 546-2424 Ext.2732 Megan.Salvucci@hamilton.ca
Qualified Person	Jeff Carson Dillon Consulting Limited 12 James St N #401, Hamilton, ON L8R 2J9 Email: jcarson@dillon.ca Tel: 905-901-2912 ext. 3433 Type of License(s): P.Eng.

1.2 Standards and Limiting Conditions

This APU was conducted in general accordance with the requirements of Section B of the document "*Rules for Soil Management and Excess Soil Quality Standards*" (the Soil Rules), as per O.Reg. 406/19 made under the Environmental Protection Act (EPA). This APU was not conducted to support the filing of a Record of Site Condition, under *Ontario Regulation 153/04 – Record of Site Condition* (O.Reg. 153/04). In addition, this APU does not include sample collection, analysis, or measurement, and is not intended to be a definitive investigation of contamination or other environmental concerns at the Project Area.

2.0 Scope of Investigation

This APU was conducted in general accordance with the applicable requirements of Section B of the Soil Rules which also refers, as applicable, to requirements under Sections 27 and 29, and Schedule D of O. Reg. 153/04.

An APU is defined as a systematic qualitative process to determine whether a particular Project Area is, or may be subject to, actual or potential contamination. As described in the Soil Rules, the specific objectives of the APU are:

- To develop a preliminary determination of the likelihood that one or more contaminants have affected soil or rock in a location where soil or crushed rock is to be excavated within the Project Area;
- To identify areas of potential environmental concern (APECs) within the Project Area and to determine if locations where soil or crushed rock is to be excavated could have been affected by a potentially contaminating activity (PCA); and,
- To identify the contaminants of potential concern (COPCs) to determine the focus of the Sampling and Analysis Plan, if APECs are identified.

The APU scope of work consisted of reviewing and evaluating records and documenting the review and evaluation of findings in the APU report where relevant, to the Project Area and Study Area. Per Schedule D of O.Reg. 153/04 the following records were reviewed as part of the APU:

- Environmental source information (including Environmental Risk Information Services [ERIS] Ltd. Environmental Databases);
- Technical Standards and Safety Authority (TSSA) records;
- Aerial photographs (ERIS);
- Physical environment data and mapping;
- MECP well records;
- Municipal drinking water supply and groundwater protection areas; and,
- Ministry of the Environment, Conservation and Parks (MECP) Water Well Record Database.

Records required under Schedule D of O.Reg. 153/04 that were not reviewed for this APU were deemed not necessary based on the opinion of the Qualified Person (QP). These deviations and associated rationale discussions are documented below, as per the Soil Rules Section B, Subsection 1.(9)4. The following also identifies potential information gaps created as a result of the deviations, and a description of how the data gaps will be addressed in the preparation of the Sampling and Analysis Plan (SAP) to satisfy the objectives of the excess soil characterization.

The current use of the Project Area is community land use. As such, the SAP will assess the Project Area for the associated COPCs (i.e., minimum parameters required in Section B, subsection 2.(14) of the Soil Rules), and additional COPC parameters associated with the roadway use. Minimum COPC parameters required for an SAP include electrical conductivity (EC), sodium adsorption ratio (SAR), metals, petroleum hydrocarbons (PHCs), and benzene, toluene, ethylbenzene and xylenes (BTEX).
A summary of records not reviewed as part of this APU and the rationale for the deviations is as follows:

- Fire Insurance Plans (FIPs), Property Underwriter's Reports (PURs), Property Underwriter's Plans (PUPs):
  - FIPs available for the City of Hamilton are from the years 1898 and 1911. However, neither of these plans include the Project Area. Consequently, FIPs, PURs or PUPs relevant to the Project Area are not available for review; and
  - Other records (i.e., aerial photographs, environmental source information) reviewed through the APU are considered to be sufficient to assess the on-Site historical and current uses to identify appropriate PCAs, APECs, and associated COPCs. Development of the SAP to address on-Site community and industrial use COPCs, are considered sufficient to mitigate the potential Study Area information gap related to this type of record.
- Chain-of-title searches:
  - Current property ownership records available through Geowarehouse (a web-based Property Information Source), were reviewed. Detailed chain of title records are not expected to provide information that substantially changes the QP interpretation of on-Site PCAs, APECs or COPCs identified through other records, or establishing first developed use; and
  - This deviation is not anticipated to result in a significant information gap for the Project Area, and this type of record does not apply to the Project Area.
- Ministry of Environment, Conservation and Parks (MECP) records and public inventories:
  - Publicly-available MECP information (i.e., MECP incidents, orders, spills and offences), are included in the ERIS database package, and were reviewed as part of the APU. MECP Freedom of Information (FOI) records are not expected to provide information that substantially changes the QP interpretation of on-Site PCAs, APECs or COPCs identified through other records; and
  - This deviation is not anticipated to result in a significant information gap for the Project Area, and the records do not apply to the Study Area.
- Site Interviews and Site operating records:
  - Since the Project Area consists of municipal roadways and rights-of-way, interviews with MTO representatives are not expected to provide any relevant information related to the identification of potential PCAs, and Site operating records are not anticipated to exist for the Project Area;
  - City Directories were not reviewed as the City was not able to provide this information. It was considered that the ERIS report included business/industry directory records necessary for the purposes of this limited APU;

- The records reviewed as part of the APU are considered to be sufficient to assess the on-site historical and current uses to identify appropriate PCAs, APECs, and associated COPCs; and
- This deviation is not anticipated to result in a significant information gap for the Project Area, and these types of activities do not apply to the Study Area. As PCAs from industrial activities including spills and fuel tanks along the project were identified, PCOC associated with these PCAs were identified and applied across the project area as an APEC. City directories may help refine these APECs.

3.0 Records Review

A records review was completed to obtain and review records pertaining to the Project Area and properties within the Study Area. Information was reviewed from the following sources, if available at the time of reporting:

3.1 General

3.1.1 Study Area Determination

The Study Area for this APU was defined as the lands within 100 m of the Project Area boundaries. The Project Area means, in respect of a project, a single property or adjoining properties on which the Project is carried out.

Based on a review of the current and historical land uses in the Project Area and surrounding properties, topography and groundwater flow direction, the QP considered the area within 100 m from the Project Area boundary sufficient to identify PCAs and APECs.

3.1.2 First Developed Land Use Determination

Based on information provided in the records reviewed, the Project Area has been primarily comprised of municipal roadways (eastern portion of Rymal Road) sometime between 1932 and 1937, alongside agricultural land. The Project Area is currently an active roadway (community use).

3.1.3 Fire Insurance Plans

Fire Insurance Plans (FIPs) were not available for the Project or Study Area. Refer to Section 2.0 for details of this deviation.

3.1.4 Chain of Title

Obtaining a chain of title for the Project Area was not completed for this APU as the Project Area is an active roadway. Refer to Section 2.0 for further details of this deviation.

3.1.5 City Directories

A search of City Directories for the Project Area was not conducted as part of this APU as the City of Hamilton did not have city directory information available at this time. City directories may identify additional PCAs not presented from other historical sources (i.e. ERIS); however, a conservative approach was applied inferring potential PCAs identified were applied across the project area. A City directory search may assist in defining /reducing the APECs identified.

3.1.6 Previous Environmental Reports

Several previous environmental reports relevant to the Project Area were made available by The City for review. The environmental reports and associated PCAs are summarized in Table 3.

Table 3: Environmental Reports Summary

Report Title	Author and Report Date	Purpose/Scope of Work	Relevant Findings	PCA Details
Geotechnical Investigation, Proposed 400 mm diameter Watermain Installation and Road Widening, Rymal Road East Between Dartnall Road and Nebo Road, Hamilton, Ontario	Landtek Limited Consulting Engineers, March 31, 2014	To determine subsurface conditions during watermain installation, provide design and construction recommendations for trench backfill and compaction, and identify chemical characteristics of subsoils and suitability for reuse as trench backfill. Landtek completed four boreholes to inform on subsurface conditions and collect samples for analysis. Soil management considerations, pavement considerations, and subgrade conditions are discussed.	Report discusses observations and analytical results from four boreholes collected along the south side of Rymal Road East between Dartnall Road and Nebo Road Overburden soils were a mixture of organic silty clay and fill materials comprised of silty clay, broken limestone, and silty sand. Subsurface soils were comprised of glaciolacustrine clay and silt overlying relatively shallow dolostone bedrock. Refusal (bedrock) was encountered between 1.5 – 3.8 mbgs. Groundwater was not encountered during drilling. Soil samples were analyzed for metals and inorganic parameters. The following parameter concentrations exceeding the applicable Environmental standards (MECP Table 3 Industrial/Commercial/Community) were reported: Electrical Conductivity (EC) and Sodium Adsorption Ration (SAR) at three of four boreholes noted to likely be related to winter road salt use and not an adverse health risk. Zinc was identified at one location. If soils are planned to be removed off site it was recommended that further soil quality characterization be completed.	#30 – Importation of fill material of unknown quality Report notes fill material present in boreholes completed.

Report Title	Author and Report Date	Purpose/Scope of Work	Relevant Findings	PCA Details
Report No. Gtr_1326: Geo-Environmental Investigation, Road Reconstruction And Municipal Service Replacement, Upper James Street, Hamilton, ON	AMEC Earth & Environmental, April 2, 2008	To carry out a Geo-Environmental Investigation for a proposed upgrade of municipal services as well as road re-construction along Upper James Street in Hamilton. The section of Upper James Street under investigation is from Stone Church Rd E to Rymal Rd E. AMEC completed seven boreholes to inform existing geotechnical conditions and to inform recommendations regarding excavation methods, trench backfill requirements and reuse/management of excavated soils.	The primary focus area of this report is along Upper James Street, however some of the work is at the Rymal Road E/Upper James Street intersection. Subsurface conditions include pavement structure (0.1 – 0.25 m) underlain by granular road base (fill) up to 2.2 mbgs, underlain silty clay to clayey silt and sand. Water was not encountered. Six of eight samples submitted for laboratory analysis for metals, VOCs, PHCs, exceeded MOE Table 3 standards for one or more inorganic parameters including SAR and EC. All seven samples analyzed for VOCs and PHCs were below Table 3 standards.	#30 – Importation of fill material of unknown quality Report notes fill material present in boreholes completed.
Geotechnical and GPR Investigation of Various Roads, Hamilton, ON	AMEC Earth & Environmental, November, 2007	The investigation consisted of a ground penetrating radar (GPR) survey on selected roads for pavement details. No environmental observations were noted.	A location on Upper James Street consisted of 14 cm of material that was determined to be a bituminous fill.	#30 – Importation of fill material of unknown quality
Geotechnical Investigation GTR – 1223 Christie Neighbourhood, City of Hamilton, Ontario	Terraprobe Limited, March 2, 2007	Work carried out for the design improvements to sections of roadway located southeast of Rymal Road and Upper James Street, to determine subsurface soil and groundwater conditions.	Boreholes penetrated flexible pavement underlain by fill, and clayey silt, silt and silty clay. Groundwater was reportedly between 0.8 and 2.6 mbgs in some boreholes. Samples recovered were compared to Table 1 and 3 ICC and exceedances for EC and SAR were noted in 27 out of 31 samples. One of 27 samples identified exceedance for zinc.	#30 – Importation of fill material of unknown quality

Report Title	Author and Report Date	Purpose/Scope of Work	Relevant Findings	PCA Details
Geotechnical Investigation – Phase II Proposed Watermain, Sewer and Road Reconstruction Hamilton, Ontario	Soil-Mat Engineers & Consultants Ltd., December 12, 2003	Work carried out to support watermain and sewer replacements at various roadway sections including Rymal Road West to Upper James Street. 21 boreholes were advances	In sections of Rymal Road West, from West 5th Street to Upper James Street: pavement structure approximately 150 mm over granular base of 450 – 900 mm of compact to dense crushed stone, underlain a clayey silt to silty clay fill up to depths of 2.2 mbgs. Groundwater was not encountered.	#30 – Importation of fill material of unknown quality
Geotechnical Investigation Oakdale Estates Rymal Road, Hamilton, Ontario	PetoMacCallum Ltd. Consulting Engineers, May, 1988	Work completed in support for a residential subdivision on a parcel northeast of Rymal Road and Upper Wellington Street. 16 boreholes were advanced to depths ranging 4.4 to 8.1 mbgs.	The subsurface stratigraphy consisted of topsoil overlying clay and silt till. Bedrock was inferred at depths ranging 4.4 to 8 mbgs. No environmental testing was completed.	None

3.2 Environmental Source Information

3.2.1 ERIS Database Report

An ERIS report was obtained for the Study Area on November 6, 2023, and is presented in Appendix B. ERIS is a commercial information service used to search federal, provincial, and private databases for environmental information. Descriptions of the search radius and each of the databases searched by ERIS are included in their report presented in Appendix B. It should be noted that the extent of the historical information available varies with each database and the information in the databases is only current to what is publicly available to ERIS.

Environmentally significant information identified in reference to the Project Area is summarized in Table 4 below based on the results provided by the ERIS database report.

Table 4: Summary of ERIS Database Report Findings – Project Area

Database	Address	Summary of Findings	PCAs Identified
SPL (Ontario Spills)	Rymal Road and Upper James Street Intersection	• 113 L of herbicide released to land and storm sewer from a tank in a truck was reported on January 1993.	• Other: Spill of herbicides
	Rymal Road and Upper James Street Intersection	• 300 L of diesel fuel released to the road and ditch due to a collision/accident on October 23, 1994. Soil contamination confirmed, "contractor cleaning up" however, details of clean up methods were not reported.	• Other: Spill of petroleum product
	Rymal Road and Springside Drive Intersection	• 90 L of hydraulic oil was released on December 12, 2010. Soil contamination was confirmed. No more details were provided.	• Other: Spill of petroleum product
	Rymal Road and Upper Wentworth Street	• 1000 L of petroleum oil was released from a vehicle on December 22, 2006. No more details were provided.	• Other: Spill of petroleum product
	Rymal Road and Upper Wentworth Street	• 300 L of diesel fuel was released from "Bruce R. Transport" to a ditch on December 28, 1993. No more details were provided.	• Other: Spill of petroleum product
	Rymal Road and Upper Wentworth Street	• 10 L of hydraulic oil was released from a truck/trailer overturn to a ditch on May 17, 1992. Possible surface water pollution. No more details were provided.	• Other: Spill of petroleum product
	Rymal Road and Miles Road	• 500 L of diesel fuel was released from a vehicle to a ditch on December 2010 due to an accident. No more details were provided.	• Other: Spill of petroleum product
	Rymal Road and Upper Ottawa Street	• 95 L of hydraulic oil was released to the soil and water on July 2004. Possible contamination reported.	• Other: Spill of petroleum product
	Rymal Road and Nebo Road	• 40 L of gasoline was released from a vehicle due to human error in June 2017. No more details were provided.	• Other: Spill of petroleum product
	Rymal Road and Nebo Road	• 500 L of transmission oil was released from a transformer (Horizon Utilities) due to human error to the land on October 2017 No more details were provided.	• Other: Spill of PCBs

Database	Address	Summary of Findings	PCAs Identified
	Rymal Road and Dartnall Road	• 20 L of engine oil was released from a transport truck on March 2011. Confirmed soil and groundwater contamination was reported.	• Other: Spill of petroleum product
	Rymal Road and Dartnall Road	• 5 L of transmission oil was released from a pole transformer due to a system leak in May 1992. No more details were provided.	• Other: Spill of PCBs
	Various locations at Project Area	• Other minor spill records were reported within the Project Area. For spill details, refer to ERIS report in Appendix B.	• None
GEN (Ontario Regulation 347 Waste Generators Summary)	390 Nebo Road.	• Two waste generator records were identified for the Project Area for Hannon Auto Wrecker and include the following wastes: waste oils and lubricants waste oils under generator No. ON1356000 from at least 1990 to 1998.	• Other: Hazardous Waste Generator

Additional records returned for the Project Area include pipeline incidents, however no details were provided, as well as borehole and water well information systems records, certificates of approval, environmental registries, environmental compliance approvals, and historical ERIS searches. These records were not identified as contributing to potentially contaminating activities (PCAs) related to the project area.

Environmentally significant information identified in reference to the surrounding properties is summarized in Table 5 below based on the results provided in the ERIS database report.

Table 5: Summary of ERIS Database Report Findings – Study Area

Database	Address	Summary of Findings	PCAs Identified
DTNK (Delisted Fuel Tanks)	1020 Rymal Road TransCanada Pipelines 18 m south of the Project Area	• Private fuel tank; expired March 2012 • Private fuel tank; expired July, 2020	28: Gasoline and Associated Products Storage in Fixed Tanks
	1600 Upper James Road 15 m north from the Project Area	• Key Waynes Esso expired May 2012-2013 • Key Waynes Esso liquid fuel tank; expired July 2020	28: Gasoline and Associated Products Storage in Fixed Tanks
	5 Rymal Road 2 m south of the Project Area	• 1140430 Ontario Inc. Fuel safety piping; expired March 2012	28: Gasoline and Associated Products Storage in Fixed Tanks
	1625 Upper James Street 15 m south of the Project Area	• Olegs Dadockins liquid fuel tank; removed in 2009; expired July 2020 • Olegs Dadockins fuel facility; expired March 2012 – May 2013	28: Gasoline and Associated Products Storage in Fixed Tanks
	654 Rymal Road East 10 m south of the Project Area	• Sam Guerriero Service Centre, liquid fuel tank; expired July 2020	28: Gasoline and Associated Products Storage in Fixed Tanks
	1333 Rymal Road East Immediately north of the Project Area	• The pool shoppe town, propane refill centre; expired March 2012	28: Gasoline and Associated Products Storage in Fixed Tanks
	1157 Rymal Road East 29 m north of the Project Area	• FAH enterprises (Olco Petroleum) liquid fuel tank; expired July 2020	28: Gasoline and Associated Products Storage in Fixed Tanks
	1360 Rymal Road East 29 m south of the Project Area	• Hamilton RV centre, propane refill centre; expired March 2012	28: Gasoline and Associated Products Storage in Fixed Tanks

Database	Address	Summary of Findings	PCAs Identified
	927 Rymal Road East 12 m north of the Project Area	• Pioneer Energy, expired March 2012	28: Gasoline and Associated Products Storage in Fixed Tanks
	1177 Rymal Road East 28 m north of the Project Area	• Nebo Auto centre, fuel tank; expired March 2012 – May 2013 • Nebo Auto centre, UST; expired July 2020	28: Gasoline and Associated Products Storage in Fixed Tanks
FST (Fuel Storage Tank)	1020 Rymal Road TransCanada Pipelines 18 m north of the Project Area	• Gasoline fibre glass single wall UST • Diesel fibre glass single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
	1600 Upper James Road 15 m north from the Project Area	• Gasoline steel single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
	5 Rymal Road 2 m south of the Project Area	• Husky Oil Operations, gasoline station; 36,700 L gasoline single wall UST • Husky Oil Operations, gasoline station; 50,000 diesel single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
	1625 Upper James Street 15 m south of the Project Area	• Olegs Dadockins, 22,700 L gasoline single wall UST (later Dykstra Shell) • Olegs Dadockins, 22,700 L diesel single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
	654 Rymal Road 10 m south of the Project Area	• Sam Guerriero Service Centre, 22,700 L gasoline single wall UST • Sam Guerriero Service Centre, 22,700 L diesel single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
	1157 Rymal Road East 29 m north of the Project Area	• FAH enterprises 22,700 L gasoline single wall UST • FAH enterprises 22,700 L diesel single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks

Database	Address	Summary of Findings	PCAs Identified
	927 Rymal Road East 12 m north of the Project Area	• Pioneer Petroleum gas station, 6 - 22,700 L gasoline single wall USTs	28: Gasoline and Associated Products Storage in Fixed Tanks
	1177 Rymal Road East 28 m north of the Project Area	• Nebo Auto centre, 36,370 L gasoline single wall UST • Nebo Auto centre, 27,280 L gasoline single wall UST • Nebo Auto centre, 22,730 L gasoline single wall UST • Nebo Auto centre, 122,750 L gasoline single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
	1200 Rymal Road East Approximately 30 m south of the Project Area	• 2531083 Ontario Inc. 50,000 L diesel and gasoline double wall USTs • 2531083 Ontario Inc. 100,000 L gasoline double wall USTs	28: Gasoline and Associated Products Storage in Fixed Tanks
	1600 Upper James Road 15 m north from the Project Area	• Mac's convenience, 22,700 L gasoline single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
FSTH (Fuel Storage Tank – Historic)	308 Rymal Road East 25 m south of the Project Area	• City of Hamilton fleet services, 9,000 L, 45,000 gasoline single wall UST	28: Gasoline and Associated Products Storage in Fixed Tanks
	Other locations	• Duplicated entries from addresses listed in the FST database above	None
GEN (Ontario Regulation 347 Waste Generators Summary)	Multiple	• 294 Waste Generator records were identified for the Study Area. For a complete listing of waste types within the project and Study Areas, refer to the ERIS Report provided in Appendix B.	Other: Hazardous Waste Generator
PRT (Private and Retail Fuel Storage Tanks)	Other locations	• Duplicated entries from addresses listed in the FST database above	None

Database	Address	Summary of Findings	PCAs Identified
REC (O. Reg. 347 Waste Receivers Summary	1318 Rymal Road East 11 m south of the Project Area	• Walters Welding was listed under Receiver Number RR1770 for the years 1987-1990, 1992, 2006-2008. No more details were provided	58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils.
ANDR (Anderson's Waste Disposal Sites)	Rymal Road East and Nebo	• Nebo & Rymal Junkyard	49: Salvage Yard, Including automobile wrecking.
SCT (Scott's Manufacturing Directory)	1318 Rymal Road East 11 m south of the Project Area	• Walters Inc. under NAICS codes for ornamental and architectural metal product manufacturing; machine shops, and plate work and fabricated structural product manufacturing.	32: Iron and Steel Manufacturing and Processing, 33: Metal Treatment, Coating, Plating and Finishing,
	1308 Rymal Road East 11 m south of the Project Area	• Erik Cabinets Ltd. And Oz under NAICS codes for office and store fixtures, partitions, shelving, and lockers; and wood office furniture	None
	676 Rymal Road East 20 m south of the Project Area; and 1380 Rymal Road East 20 m southeast of the Project Area	• Mountain Memorials under NAICS codes for concrete product manufacturing, non-metallic mineral product manufacturing; glassware, crockery, and pottery distributors; electrical wiring and construction supplies distributors, specialty-line building supplies distributors.	12: Concrete, Cement and Lime Manufacturing
	1315 Rymal Road East 5 m north of the Project Area	• Parsons Precast Inc. under NAICS codes for concrete product manufacturing, specialty-line building supplies distributors, ornamental and architectural metal product manufacturing	12: Concrete, Cement and Lime Manufacturing, 32: Iron and Steel Manufacturing and Processing, 33: Metal Treatment, Coating, Plating and Finishing
	55 Rymal Road East 60 m north of the Project Area	• Praxair Air Canada Inc. under NAICS codes for chemicals and allied products.	8: Chemical Manufacturing, Processing and Bulk Storage

Database	Address	Summary of Findings	PCAs Identified
	1632 Upper Ottawa Street 100 m south of the Project Area	• Bar Hydraulics Inc. for metal valve manufacturing	32: Iron and Steel Manufacturing and Processing, 33: Metal Treatment, Coating, Plating and Finishing,
	1368 Rymal Road East 20 m south of the Project Area	• Nando's Trailer Manufacturing, under NAICS code for motor home, travel trailer and camper manufacturing	57: Vehicles and Associated Parts Manufacturing
PES (Pesticide register)	1112 Rymal Road East 23 m south of the Project Area	• 637506 Ontario Ltd. Dicam Landscaping	40: Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
	1550 Upper James Street 15 m north of the Project Area	• Fortinos and other vendors at this same address (Shoppers Drug Mart, RONA, Zia Syed Drug Mart)	40: Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
SPL (Ontario Spills)	81 Rymal Road East 10 m north of the Project Area	• Unknown volumes of diesel fuel and fire depressing foam released from fire bus to a ditch in April 2006. No more details were provided.	Other: Spill of Petroleum Products
	308 Rymal Road East 17 m south of the Project Area	• Unknown volume of diesel fuel released from motor vehicle to the land in March 2022. No more details were provided. • Unknown volume of oil additives released to the surface water and land in April 2020. Oily sheen observed on stormwater pond. No more details were provided.	Other: Spill of Petroleum Products
	662 Rymal Road East 30 m south of the Project Area	• 100 L of diesel fuel released from a vehicle tank to the land due to equipment failure on November, 2018.	Other: Spill of Petroleum Products

Database	Address	Summary of Findings	PCAs Identified
	1049 Rymal Road East 30 m north of the Project Area	• 20 L of gasoline released from a resident's vehicle tank to the land and storm sewer due to equipment failure in August 1990.	Other: Spill of Petroleum Products
	1160 Rymal Road East 7 m north of the Project Area	• 910 L of chlorine pool chemicals released to the land and water due to vandalism in May 2004.	Other: Reported Spills of Various Quantities and Materials to Roadways
	1575 Upper Ottawa Road 95 m north of the Project Area	• 225 L of vegetable oil released from a Tank at Harvey's restaurant to the land due to equipment failure in May 2017. • 376 L of cooking oil released from a Tank at Harvey's restaurant to the land in May 2017. • 100 L of paint released from a drum to asphalt and surface water while unloading. Record indicates "no impact".	Other: Reported Spills of Various Quantities and Materials to Roadways
Unplottable	Various addresses within, or adjacent to the Study Area	• Fifty unplottable records included Compliance and Conviction, Delisted Fuel Tanks, waste generators, Private retail fuel tanks, TSSA historic incidents, and Ontario Spills. See Appendix B for details at the end of the ERIS report.	None

Additional records returned for the Study Area include borehole and water well information system records, certificates of approval, environmental registries, environmental compliance approvals, and historical ERIS searches. These types of records were not identified as contributing to potentially contaminating activities (PCAs) related to the Project Area.

3.2.2 Online Database Sources

Online database sources were searched for additional records of historical property use within the project area or study area that may attribute to a PCA. A summary of the findings is presented in Table 6 below:

Table 6: Online Database Searches

Source Information	Comments
Waste Disposal Site Inventory, June 1991 https://archive.org/details/wastedisposalsit00ontauoft	No records for waste disposal sites were identified in the database for the Project Area or the Study Area. However, a municipal transfer station "Mountain Transfer Station" is located at 37 Kilbride Rd., approximately 130 m south of the Project Area.
Inventory of Coal Gasification Plant Waste Sites, Volume II, April 1987 https://archive.org/details/inventoryofcoalg02ontauoft/page/n13/mode/2up	No records for coal gasification plant wastes sites were identified for the Project Area or the Study Area.
Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, Volume II, November 1988 https://archive.org/details/inventoryofindus02ontauoft	No records for industrial sites producing or using coal tar and related tars were identified for the Project Area or the Study Area.

The online database searches did not reveal any potentially contaminating activities within the Project or Study Areas.

3.2.3 Technical Standards and Safety Authority

TSSA information concerning the presence of petroleum storage tanks, fuel spill records, accidents or fuel-related incidents which may be registered for the Project Area or surrounding properties was requested through email between August 1st to 9th, 2024.

Fuel records were found in the current database for the following properties located within the Study Area:

- 1157 Rymal Road East: 4 listings for expired liquid fuel tanks / gasoline station;
- 1177 Rymal Road East: 11 listings for expired liquid fuel tanks / gasoline station;
- 1245 Rymal Road East: 1 listing for active cylinder exchange;

- 1315 Rymal Road East: 1 listing for active fuel service appliance;
- 1333 Rymal Road East: 2 listings for expired propane tank refill centre;
- 927 Rymal Road East: 7 listings for liquid fuel tank / gasoline station and 4 listings for active propane tank / propane refill centre;
- 505 Rymal Road East: 1 listing for active fuel service cylinder exchange and 1 listing for expired fuel service cylinder exchange;
- 55 Rymal Road East: 1 listing for expired propane tank refill centre; and 1 listing for active ED elevator;
- 675 Rymal Road East: 1 listing for active elevating device (ED) elevator;
- 905 Rymal Road East: 1 listing for active ED elevator;
- 1324 Rymal Road East: 4 listings for active liquid fuel tank / gasoline station and cylinder exchange; and,
- 1360 Rymal Road East: 2 listings for expired propane tank and propane refill centre.

Formal request for additional details on these records were not submitted as is not anticipated to result in a significant information gap for the Project Area.

A copy of the correspondence and records are presented in Appendix A.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Aerial photographs were obtained from the National Air Photo Library (NAPL) for the year 1934, from the City of Hamilton/NAPL for the years 1949, 1967, and 1990, from McMaster University Library Historical Portal for 1954, and 1999; and from Google Earth for 1985, and 2022. A summary of the review of the available aerial photography is presented in the following Table 7. Note that the resolution and scale of the aerial photos does not allow for high-detail analysis of the entire study area.

Table 7: Summary of Aerial Photographs

Date	Original Scale	Source	Project Area Description	Study Area Description	PCA Details
1934	Unknown	National Air Photo Library	Project Area appears to be comprised of an inferred dirt road. The resolution of the photograph is too low to discern additional details.	The surrounding area to the north, south, east and west appears to be agricultural land, and forested land. The resolution of the photograph is too low to discern additional details.	None
1949	Unknown	City of Hamilton/ National Air Photo Library	The Project Area is comprised by a road.	The Study Area to the north, south, east, and west is comprised by agricultural fields. In a few of the agricultural parcels, inferred residential dwellings associated with agricultural fields are noted. Arboreal vegetation is also noted in some central portions of the Study Area.	None
1954	Unknown	McMaster University Library – Historical Hamilton Portal	Project Area appears similar to the 1949 aerial photo.	The surrounding area appears similar to the 1949 aerial photo, with additional residential areas that have been developed to the western portion of the Study Area. The resolution of the photograph is too low to discern additional details.	None

Date	Original Scale	Source	Project Area Description	Study Area Description	PCA Details
1967	Unknown	City of Hamilton/ National Air Photo Library	Project Area appears similar to the 1954 aerial photo.	Several new developments are noted throughout the Study Area to the north, east, south, and west. Disturbed soils are noted specifically in some areas in the eastern and central portions of the Study Area (present day industrial and commercial land uses). Additional residential dwellings and subdivisions have also been constructed along Rymal Road.	None
1985	N/A	Google Earth	Project Area appears similar to the 1967 aerial photo.	Additional development is observed throughout the Study area, specifically in the eastern portion. The resolution of the photograph is too low to discern additional details.	None
1990	Unknown	City of Hamilton/ National Air Photo Library	Project Area appears similar to the 1985 aerial photo.	Industrial and commercial land uses are noted in more detail at the eastern portion of the Study Area, including metal works, storage and junkyards. Additional warehouse buildings with parking lots are noted to the southeast. A railway is noted at the eastern portion, traversing the Project Area and Study Area from north to south. Disturbed soils are noted as we move to the central eastern portion. Some green areas remain in the vicinity of residential subdivisions. A few agricultural fields and vegetated areas remain to the	30. Importation of Fill of Unknown Quality Aerial photographs indicate disturbed soil and soil piles were present along central portions of the Project Area, indicating fill may have been brought to the Project Area. 34. Metal fabrication

Date	Original Scale	Source	Project Area Description	Study Area Description	PCA Details
				central portion of the Study Area, among newer residential areas	49. Salvage Yard, Including automobile wrecking Aerial photographs indicate industrial areas at the eastern portions of the Study Area with large quantities of metal piping and other associated materials along with car wrecking activities.
1999	N/A	McMaster University Library – Historical Hamilton Portal	Project Area appears to be comprised of a road.	Additional residential, inferred commercial development is observed throughout the Study Area.	None
2009	N/A	Google Earth	Project Area appears similar to the 1999 aerial photo.	Additional developments with paved parking areas can be observed north and south of the Project Area. Additional residential subdivisions have been developed to the south.	None

In summary, the review of historical aerial photographs indicated the following:

- The Project Area land use consisted historically of roadways since at least 1934;
- The Project Area currently consists of community land use as roadways and/or Rights-of-Way; and,
- The Study Area historical land use consisted of agricultural and rural residential land, more recently uses consists of commercial, industrial, community, institutional and parkland land uses.

Copies of the historical aerial photographs are presented in Appendix C.

3.3.2 Topography, Hydrology and Geology

Topographic mapping obtained from Ontario Ministry of Natural Resources and Forestry identifies the elevation of the Project Area ranges between approximately 200 m above sea level (m ASL) near the east boundary, to approximately 225 m ASL at the west boundary. Topography of the Study Area appears to be gently rolling hills to hilly, with multiple points of high and low ground elevations, but generally slopes downward to the east and north towards Lake Ontario.

Based on the topographic gradient in the vicinity of the Project Area, the regional groundwater flow direction is inferred to be east to northeast, towards Lake Ontario, located approximately 8.7 kilometres (km) to the north. Local shallow groundwater flow may also be influenced by subsurface utilities and the drainage features located at the Project Area (i.e., ditches and/or underground utility conduits).

The surficial geology of the Project Area consists of fine-textured glaciolacustrine deposits of silt and clay, minor sand and gravel (massive to well laminated) at the majority of the Project Area; and till of clay to silt-textured till (derived from glaciolacustrine deposits or shale) at a western portion of the Project Area. The Study Area surficial geology also consists of silt and clay, minor sand and gravel, and clay to silt-textured till with bedrock escarpment at the north and east. A bedrock quarry was identified approximately 400 north of the Project Area. The thickness of overburden in the vicinity of the Project Area varies however is generally considered relatively shallow as per previous geotechnical investigations, where bedrock was encountered between 1.5 – 3.8 mbgs and between 4.4 – 8 mbgs.

Based on records obtained from the Natural Resources Canada; Geological Survey of Canada, the bedrock geology in the Project Area as well as Study Area is sandstone, shale, dolostone and siltstone of the Guelph Formation.

3.3.3 Fill Materials

Fill material of unknown quality is inferred to be located beneath the roadways and/or ROWs.

3.3.4 Water Bodies and Areas of Natural Significance, and Groundwater Information

Descriptions of the waterbodies, areas of natural significance and groundwater information for the Study Area is outlined in Table 8.

Table 8: Summary of Water Bodies, Areas of Natural Significance and Groundwater Information

Topic	Source	Description
Surface Water Bodies	Ministry of Natural Resources and Forestry (MNRF) Make a Map: Natural Heritable Area https://www.ontario.ca/page/make-natural-heritage-area-map	Surface water was not identified within the Project Area. A stormwater management pond, which receives runoff from Rymal Road sewers, is located approximately 225 metres east of the Project Area (south of the Mount Albion Conservation Area). Tributaries of Hannon Creek, which forms the headwaters of Red Hill Creek, are located east and north of Dartnall Road, immediately east of Project Area. See Figure 1.
Wetlands	MNRF Make a Map: Natural Heritage Area https://www.ontario.ca/page/make-natural-heritage-area-map	No Provincially Significant marshes and swamps were identified at the Project Area or Study Area according to the MNRF mapping.
Areas of Natural Significance	MNRF Make a Map: Natural Heritage Area https://www.ontario.ca/page/make-natural-heritage-area-map	Based on the MNRF mapping, no Areas of Natural Significance are located within the Project Area or the Study Area.
Well-Head Protection Areas	MECP Source Protection Information Atlas https://www.ontario.ca/page/source-protection	According to the MECP Source Protection Information Atlas, the Project Area is located within the Halton-Hamilton Source Protection Region.
Potable Water Supply	Ontario Water Well Records https://www.ontario.ca/page/map-well-records	A search of the online Ontario Water Well Records database indicated a large amount of wells within the Project Area; this may indicate that some properties are serviced with individual supply wells.

3.4 Site Operating Records

Dillon did not obtain Site operating records as part of this APU as the Project Area is currently an active roadway. Refer to Section 2.0 for further details of this deviation.

4.0 Interviews

Interviews were not conducted as part of this APU as the Project Area is currently an active roadway,. Refer to Section 2.0 for further details of this deviation.

5.0 Site Reconnaissance

The following section details the site reconnaissance completed by Dillon on August 13, 2024.

5.1 General Requirements

The Site reconnaissance was completed by Lourdes Ortega, B.Eng., of Dillon, on August 13, 2024, between 2:00 pm and 3:00 pm. The weather at the time of the Site reconnaissance was partially cloudy, with a temperature of 24ºC.

At the time of Site reconnaissance, the Project Area appeared to be an active roadway. Photographs taken during the Site reconnaissance are presented in Appendix D. The Project Area location is presented in Figure 1. The Site observations were made from the public roadway only and did not include visits to the interior of any buildings.

5.2 Specific Observations at the Project Area

The Project Area is bounded by the properties as described in Table 9 below.

Table 9: Surrounding Land Use

Direction	Description
North	Residential, commercial, industrial, institutional, agricultural
East	Commercial, parkland
South	Residential, commercial, industrial, parkland, agricultural
West	Residential, commercial

The Project and Study Areas are shown on Figure 1 and surrounding land uses are illustrated on Figure 2.

The Project Area was observed to be roadways and portions of other parcels. The ground cover of the Project Area consisted of asphalt covered roads, shoulders, sidewalks, portions of parking areas, grassed and vegetated areas.

The surface drainage appeared to be managed by the City through a series of catch basins on both sides of the road. Fill placement was assumed below the road surface.

The surrounding land uses is primarily residential, commercial, industrial, institutional, with some small areas deemed agricultural. Commercial areas consist of vehicle sales, supermarkets, commercial plazas, gas stations, service and maintenance centres, and others. Institutional uses include a cemetery, and a catholic church. Industrial areas include a concrete manufacturer and other historical industrial uses at the eastern part of the Study Area.

6.0 Review and Evaluation of Information

The following section provides a review and evaluation of information obtained through historical reports, online searches, other documentation, and the Site reconnaissance.

6.1 Current and Past Uses

The current and past uses of the property are summarized by approximate dates in Table 10 below:

Table 10: Current and Past Property Use

Date	Ownership	Property Use Description
<1934 to 1981	Unknown	Aerial photographs indicate the land was used as a roadway.
1981 to present	The Regional Municipality of Hamilton-Wentworth	The Project Area is currently used as an active roadway comprised by portions of Rymal Road East, a major two-lane arterial road, including gravel/grassed municipal rights-of-way.

6.2 Potentially Contaminating Activities

Ten PCAs were identified at the Project Area and Study Area. The PCAs identified on the Project Area and Study Area are described in Table 11. The PCAs are shown on Figure 3.

Table 11: Potentially Contaminating Activities on the Project Area

PCA #	PCA Item (Per O.Reg. 153/04 Schedule D, Table 2)	Location of PCA	Description of the Potentially Contaminating Activity	Contributing to an APEC (Rationale, if No)
PCA 1	30. Importation of Fill Material of Unknown Quality	In the Project Area; Under roadways.	Fill material of unknown quality likely imported to the Project Area	Yes
PCA 2	Other: Reported Spills	Within the Project Area	Various spill records within the project area mainly petroleum-derived products.	Yes
PCA 3	Other: application of de-Icing agents.	Roads and paved surfaces within the Project Area.	Application of de-icing agents to road/paved surfaces.	Yes
PCA 4	Other: spills; Other: application of de-icing agents; 28, 30,	Within the Study Area in several locations to the north, west, east and south of the Project Area.	Various spill records within the Study Area, mainly petroleum-derived products, several records for USTs at extensive commercial property uses of lands adjacent to the Project Area including gas stations.	Yes
PCA 5	10, 12, 32, 33, 34, 49, 57, 58.	Within the Study Area to the eastern portion of the Project Area.	Extensive industrial and commercial property use of lands adjacent to the Project Area with numerous PCAs identified.	Yes
PCA 6	37	Within a location in the eastern portion of the Study Area.	Operation of dry-cleaning equipment where chemicals are used was identified.	Yes

Potentially Contaminating Activity as provided in Schedule D of O.Reg. 153/04 as amended:

- 10. Commercial Autobody Shops
- 12. Concrete, Cement, and Lime Manufacturing
- 28. Gasoline and Associated Products Storage in Fixed Tanks
- 30. Importation of Fill of Unknown Quality
- 32. Iron and Steel Manufacturing and Processing
- 33. Metal Treatment, Coating, Plating and Finishing
- 34. Metal Fabrication
- 37. Operation of Dry-Cleaning Equipment (where chemicals are used)
- 49. Salvage Yard, including automobile wrecking
- 57. Vehicles and Associated Parts Manufacturing
- 58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners

The Project Area is largely surrounded by an area developed with residential, industrial and/or commercial land uses. Lands to the west-southwest consist of industrial/commercial land uses, while the area to the south and northwest are agricultural.

The records review and site reconnaissance activities indicated that PCAs exist within the Study Area that may potentially have an environmental impact on the soils within the project area. PCAs identified in relation to the project property are as follows:

- Other: Reported Spills of Various Quantities and Materials to Roadways;
- Other: Application of De-Icing Agents to Roadways and Paved Surfaces;
- 10. Commercial Autobody Shops;
- 12. Concrete, Cement and Lime Manufacturing;
- 28. Gasoline and Associated Products Storage in Fixed Tanks;
- 30. Importation of Fill of Unknown Quality;
- 32. Iron and Steel Manufacturing and Processing;
- 33. Metal Treatment, Coating, Plating and Finishing;
- 34. Metal fabrication;
- 37. Operation of Dry-Cleaning Equipment (where chemicals are used);
- 49. Salvage Yard, Including automobile wrecking;
- 57. Vehicles and Associated Parts Manufacturing; and,
- 58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners.

Given the extensive industrial/commercial property use of the lands adjacent to the Project Area, those areas have been grouped together as a single PCA (PCA 5) and contribute to a single APEC, covering the eastern portion of the Project Area.

Although agricultural areas have been historically present at the majority of the Study Area, no orchards were visible. Therefore, intensive pesticide use and accumulation in the soil is unlikely, and PCA 40 (Pesticides [including Herbicides, Fungicides and Anti-Fouling Agents] Manufacturing, Processing, Bulk Storage and Large-Scale Applications) has not been included as a PCA related to the Project Area.

6.3 Areas of Potential Environmental Concern

The APECs identified at the Project Area are summarized in Table 12. The APECs are shown in Figure 4.

Table 12: Areas of Potential Environmental Concern

APEC #	Location of APEC within Project Area	Potentially Contaminating Activity*	Contaminants of Potential Concern (COPC) to Soil
APEC 1	Entire Project Area	On-Site PCAs: 30. Importation of Fill Material of Unknown Quality, and Other: road de-icing activities.	M&I PHCs BTEX PAHs
APEC 2	Western, central and Eastern Portions of Project Area	Other: reported spills	M&I PHCs BTEX PAHs
APEC 3	Eastern Portions of Project Area	Off-Site PCAs: Other: Spills, Other: de-icing activities, 10, 12, 28, 30, 32, 33, 34, 37, 49, 57, 58. Refer to Section 6.2. above for details.	M&I PHCs VOCs PAHs PCBs

*Potentially Contaminating Activity as provided in Schedule D of *O.Reg. 153/04* as amended, where applicable

M&I – includes the following parameter groups:

- Metals – Ba, Be, B, Cd, Cr, Co, Cu, Pb, Mo, Ni, Ag, Tl, U, V, Zn
- B – HWS – Boron, Hot Water Soluble
- As, Sb, Se – Arsenic, Antimony, Selenium (hydride metals)
- Cr (VI) – Hexavalent Chromium
- Hg – Mercury
- CN^- - Cyanide
- EC – Electrical Conductivity
- SAR – Sodium Adsorption Ratio
- pH
- PAHs – Polycyclic Aromatic Hydrocarbons
- PCBs – Polychlorinated Biphenyls
- PHCs – Petroleum Hydrocarbons Fractions 1 to 4
- VOCs – Volatile Organic Compounds

7.0 Conclusions

As part of the scope of work completed for the Project Area during the APU, Dillon requested a search of environmental databases via ERIS and conducted a Site reconnaissance.

The Project Area has been historically used as agricultural and community land use (i.e. agricultural fields and roadways and/or ROWs). It is currently community land use, functioning as an active roadway and/or ROWs.

Our evaluation of the information obtained for the Project Area during the APU indicates that there is potential presence of impacts to soil on the Project Area related to the fill imported to the Project Area to construct the roads and/or ROWs as well as spills that occurred on the Project Area, and application of de-icing agents to the road surfaces. In addition, the current and historical land uses of the surrounding properties also indicate the potential for environmental impacts to Site soils.

It is recommended that the Contaminants of Potential Concern (COPC) identified in this APU are investigated further with a Sampling Analysis Plan (SAP) and Soil Characterization Report (SCR) prior to the planned construction works.

7.1 Qualified Person Declaration

The data review and report compilation for this APU was undertaken by Lourdes Ortega, B.Eng., and overseen by Jeff Carson, P.Eng.

Mr. Carson is a licensed Engineer with Professional Engineers Ontario with experience in conducting and supervising Phase One and Phase Two Environmental Site Assessments and is thus a qualified person as defined in Section 5 of O.Reg. 153/04.

The signature of the QP for this APU is presented in Section 8.0. By signing the report, the QP confirms that this APU is complete and accurate and meets the requirements of the Regulation and the Soil Rules to the best of the QP's knowledge.

8.0 Limitations

This report was prepared exclusively for the purposes, project and Site location outlined in the report. The report based on information provided to, or obtained by Dillon as indicated in the report, and applies solely to Site conditions and the regulatory and planning frameworks existing at the time of the Site investigation. Although a reasonable investigation was conducted by Dillon, Dillon's investigation was by no means exhaustive and cannot be construed as a certification of the absence of any contaminants from the Site. Rather, Dillon's letter represents a reasonable review of available information within an established work scope and schedule.

This report was prepared by Dillon for the sole benefit of our client, The City of Hamilton. The material in it reflects Dillon's best judgment in light of the information available to it at the time of preparation. Any use which a third party makes of this report, or any reliance on or decisions made based on it, are the responsibilities of such third parties. Dillon accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

Sincerely,

DILLON CONSULTING LIMITED

DATE: 2024-10-10

FILE LOCATION: K:\2020\203410\Product\Client\APU\203410_APU_03_PCAs_DDP.mxd

PCA Identifier	On-Site or Off-Site	PCA Number and Description
1	On-Site	#30. Importation of Fill Material of Unknown Quality – Fill likely imported to the Project Area under roadways.
2	On-Site	Other: Reported Spills – Various spill records within the project area mainly petroleum-derived products.
3	On-Site	Other: application of de-Icing agents – The application of de-icing salt for the purposes of vehicular and pedestrian safety has occurred on the Project Area that may have affected soil quality.
4	Off-Site	Other: spills; Other: application of de-icing agents #28. Gasoline and Associated Products Storage in Fixed Tanks #30. Importation of Fill Material of Unknown Quality – Various spill records within the Study Area, mainly petroleum-derived products, several records for USTs at extensive commercial property uses of lands adjacent to the Project Area.

PCA Identifier	On-Site or Off-Site	PCA Number and Description
5	Off-Site	#10. Commercial Autobody Shops #12. Concrete, Cement, and Lime Manufacturing #32. Iron and Steel Manufacturing and Processing #33. Metal Treatment, Coating, Plating and Finishing #34. Metal Fabrication #49. Salvage Yard, including automobile wrecking #57. Vehicles and Associated Parts Manufacturing #58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners – Extensive industrial and commercial property use of lands adjacent to the Project Area with numerous PCAs identified.
6	Off-Site	#37. Operation of Dry Cleaning Equipment (where chemicals are used)

Regulatory Correspondence

Ortega, Lou <lortega@dillon.ca>

TSSA Records Search Hamilton

Ortega, Lou <lortega@dillon.ca> Thu, Aug 1, 2024 at 1:42 PM
To: publicinformationservices@tssa.org

Good afternoon,

We are conducting an Assessment of Past Uses for a property in Hamilton, Ontario.

Does the TSSA have any records of fuel storage tanks or facilities for any of the following addresses?

- 1361 Rymal Rd E, Hamilton, ON L8W 3N1
- 145 Dartnall Rd, Hamilton, ON L8W 3N1

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property:	*Rymal Road Municipal Class EA* *Rymal Road between Upper James St and Dartnall Rd Hamilton ON*
Project No:	*20-3410*

Order Information:

Incident Cause: Discharge or Emission to Air
Incident Event:
Environment Impact: Not Anticipated
Nature of Impact: Air Pollution
Contaminant Qty:
System Facility Address:
Client Name: TransCanada PipeLines Limited
Client Type:
Call Report Locatn Geodata:
Contaminant Code:
Contaminant Name: NATURAL GAS (METHANE)
Contaminant Limit 1:
Contam Limit Freq 1:
Contaminant UN No 1:
Receiving Medium: Air
Receiving Environment:
Incident Reason: Gasket/Joint Failure - Any point of connection (Except Weld/Seam)
Incident Summary: Trans Canada Pipelines, valve leak, nat. gas to atm.
Activity Preceding Spill:

Municipality No:
Nature of Damage:
Discharger Report: 0
Material Group: Gases/Particulate

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Oct 2022

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Feb 28, 2022

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2021

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Feb 28, 2023

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Aug 2023

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Sep 2023

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Sep 30, 2023

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2022

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Feb 28, 2022

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Sep 30, 2023

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Sep 30, 2023

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Sep 30, 2023

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Sep 30, 2023

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2022

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jun 2023

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2020

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2023

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2021

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Oct 2022

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory 1993-2020: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2023

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Sep 30, 2023

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Sep 30, 2023

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Sep 30, 2023

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Aug 2023

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Feb 28, 2023

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests. This database includes spill incidents that occurred in March, May, June-October 2022, and January 2023 in addition to those listed in the Government Publication Date.

Government Publication Date: 1988-Dec 2021; see description

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2020

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Sep 30, 2023

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Mar 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
