**Description** The roadway has become surface deficient and is in need of rehabilitation strategies such as resurfacing and base repairs to improve ridability and public safety. This is intended to improve related levels of service while preserving the asset from further deterioration and reducing ongoing maintenance costs. Condition assessment of subsurface appurtenances are completed and cleared.

**Description** The roadway has become surface deficient and is in need of rehabilitation strategies such as resurfacing and base repairs to improve ridability and public safety. This is intended to improve related levels of service while preserving the asset from further deterioration and reducing ongoing maintenance costs. Condition assessment of subsurface appurtenances are completed and cleared.

**Description** In accordance with the Local and Collector Road Asset Preservation Strategy, the roadways within this neighbourhood have become surface deficient and are in need of resurfacing and base repairs. This will extend the life of the roadways, improve the level of service, increase safety, reduce risk and liability, and reduce maintenance costs. The proposed project listing, compiled on a neighbourhood basis, shall create attractive contract packages for the paving industry. This may result in potential cost savings and maximize the overall cost effectiveness of program delivery. CPMS 10780

**Description** The roadway has become surface deficient and is in need of resurfacing and base repairs to improve ride-ability and public safety. This is intended to improve the level-of-service while preserving the asset from further deterioration, as well as reducing ongoing maintenance costs. Works will include the roadway and associated on/off ramps. Condition assessment of subsurface appurtenances are completed and cleared.

**Description** To conduct a detailed pavement condition inspection of the Expressway and Arterial road network (approximately 1,700 lane-kilometres) on a 2-year cycle, and inspection of the City's remaining Collector and Local road network (approximately 4800 lane-kilometres) on a 4-year cycle, beginning in 2023. This will result in a network-wide condition inspection (approximately 6500 lane-kilometres) every 4 years. Results of the inspections to be utilized for reporting and benchmarking, and as input into prioritization of future capital road rehabilitation projects.

**Description** Based on the inspections that have been completed, it has been determined that the existing retaining wall structure that supports Wilson St E, has become deficient and is in need of replacement. This is intended to reduce the risk to public safety while maintaining continuity of the road network. CPMS 11676

**Description** Based on the OSIM bridge inspection and additional investigations completed, it has been determined that the existing bridge structure has become deficient and is in need of rehabilitation. This is intended to reduce the risk to public safety while maintaining continuity of the road network. Work to be coordinated with the minor rehabilitation work to the adjacent Bridge 318 - Claremont Ac, over James Mountain Rd. CPMS 11642

**Description** Based on the inspections that have been completed, it has been determined that the existing retaining wall structure that supports Arkledun Avenue, has become deficient and is in need of replacement. This is intended to reduce the risk to public safety while maintaining continuity of the road network. CPMS 11577

**Description** To construct security barrier and add features to City Hall that enhance public safety related to public gatherings. Council to approve this project in report of PW xxx "Proposed City Hall Forecourt Security Enhancements" on October 14, 2020. We propose that funding be reallocated from the 2021 Entertainment Block to this project.

**Comments** Approved at March 22 at PW committee PW20064(a).

**Description** The roadway has become surface deficient and is in need of rehabilitation. This will be a road reconstruction project with road urbanization (Waterloo St. to the east end) and will be coordinated with watermain replacement. This will improve the level-of-service, increase safety and reduce maintenance costs. CPMS 11644

**Description** Trails Masterplan programming and partial initiative implementation. Prioritization of initiatives pending finalization of Master Plan update in 2016. 2023 and 2024 - completion of the Trails MP update in coordination with Transportation Master Plan, to determine priorities. Future work to be determined through the study and will be updated in future year budget detail sheets. Funds shown on this sheet represent placeholders only.

Description

In 2010, the Provincial Government announced the cancellation of the Ontario Bus Replacement Program. As a result of the cancellation the Transit Bus Replacement funding is deficient by \$3.7 million. Therefore it is being recommended that the shortfall be funded from the Federal Gas Tax Revenues (\$3 M) and from the Capital Levy Contribution (\$0.7 M). For the period 2020 through 2026, ICIP funding will negate the need for Federal Gas Tax funding. It is recommended that the Capital Levy Contribution of \$0.7M be maintained

**Description** The roadway has become structurally deficient and is in need of reconstruction. This will improve the level-of-service, increase safety and reduce maintenance costs. This project is to be coordinated with sewer upgrades. CPMS 11641. Also, to do so in coordination with similar urbanization projects on Highland Rd W (CPMS 11325) and Byron (CPMS 11766)

| Comments    | The Green Fleet Strategy & Action plan is used to fund the cost premium for electric vehicles, consultation services for infrastructure requirements for charging stations and the purchase of charging stations. This aligns to Term of Council priorities ant the accelerated Climate Change Action Strategy goal of a 50% reduction in total corporate greenhouse gas emissions from the 2005 baseline by 2030, to achieve a 55% reduction by the end of 2026 and the Green Fleet Strategy Report & Action Plan (PW03147(d)) (City Wide) report submitted and approved by Council in June 2021 |

**Description** To complete detailed design and construction for a new Recreation Centre and Pool in Waterdown. The project relates to strategic plan initiative Healthy and Safe Communities (Hamilton is a safe and supportive city where people are active, healthy and have a high quality of life).

**Comments** Construction Management/CM project delivery model (10% of estimated construction value needed to award the CM). Size and scale increase (55,000-70,000 sq. ft range under review). High level order of magnitude cost is ~\$1000/sq. ft. Feasibility/Class D costing is expected in Q4 2025.

|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b> | To complete detailed design and construction for a new Recreation Centre and Pool in Binbrook/Glanbrook. The project relates to strategic plan initiative Healthy and Safe Communities (Hamilton is a safe and supportive city where people are active, healthy and have a high quality of life).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Comments</b>    | Construction Management/CM project delivery model (~10% of construction funds are needed to award the CM). Order of magnitude costing at this time is ~\$1000 per sq/ft (55,000 - 70,000 sq. ft facility is currently under review). The project feasibility/high level costing is expected in Q4 2025 (delayed from Q3 2025 due to the HOWEA strike). In Q1 2026 (target) a Council report is forthcoming in response to the Councilor's April 30 2025 motion re: servicing implications to the preferred site (4300 Binbrook Road). Note: construction funds are delayed 2 years after design funds given Recreation DC/development charge debt concerns flagged by the DC team. As the project advances, if the construction funds required can be leveraged sooner staff will make those adjustments in future yearly budget cycles. |

### Expenditure By Asset Component

| Asset Components          | Share | Previously Approved | Forecast Budget | Total Budget |

**Description** To complete detailed design and construction for a new Recreation Centre and Pool in Winona. The fully accessible facility will contain a gymnasium, pool and youth and seniors' spaces.

**Comments** Construction Management/CM project delivery model (~10% of construction funds are required upfront to award the CM). The facility size is anticipated to be approximately 70,000 to 100,000 sq. ft \*(~\$1000 per sq. ft). Staff will continue to explore infrastructure grant opportunities to help fund the project.

## Expenditure By Asset Component

| Asset Components          | Share | Previously Approved | Forecast Budget | Total Budget |
|---------------------------|-------|---------------------|-----------------|--------------|
| Recreation/Aquatic Centre | 100%  | 1,950,000           | 83,580,000      | 85,530,000   |
|                           |       |                     |                 | 85,530,000   |

**Description** Redesign/redevelop outdoor pool. Pool will be approaching normal functional lifespan of an outdoor pool. Replacement is required. Additional expansion is being planned.

**Comments** -Council referred item through approved motion September 8 at PW Committee, with cost subsidized by half from area ratings reserve: <https://pub-hamilton.escribemeetings.com/filestream.ashx?DocumentId=380199>.

-This project supports the Council Priority Safe & Thriving Neighborhoods with respect to increasing accessible public washrooms.

-This project supports the following Council Priority:  
Sustainable Economic & Ecological Development as it relates to the acceleration of City’s response to climate change.

This project also supports Hamilton’s Climate Action Strategy Implementation, specifically Appendix “B” to Report PED23222 notes the following:  
-CCIAP Action 6.2: Explore opportunities to expand current cooling & warming centre programming and interventions.

**Description** These funds are for minor roadway projects that require sudden scheduling throughout the year due to emergency/urgent issues. This allows immediate action resulting in improved overall operation and safety. These funds are also used to offset unforeseen utility restorations and land acquisition.

**Description** The roadway has become surface deficient and is in need of resurfacing maintenance activities. This is intended to improve the level-of-service while also preserving the asset from further deterioration. Condition assessment of subsurface appurtenances has been completed and cleared. The budget also includes media costs for road closures, sign maintenance, and installation of new signs and post.

**Description** the Ontario Structure Inspection Manual (OSIM). As per the MTO, municipalities are mandated to perform detailed visual inspections on all bridges and culverts >=3 metres in span, in accordance with OSIM. During even years, structures in the lower City, as well as railway and expressway related structures, will be inspected (i.e. 155 structures in 2016). During odd years, structures in the upper City, as well as outlying areas and rural areas, will be inspected (i.e. 210 structures in 2017).

**Description** To fund Engineering Services staffing costs through capital for work on road related capital projects, both in-year and future. In the past, these charges were built into in-year approved capital projects on a pro-rated basis. In order to provide more transparency and capture staffing costs for future works in a more accurate way, these staffing costs are now reflected in this project and removed from all other individual Engineering Services projects.

**Description** Acquire updated air photos, update the City's Digital Terrain Model (DEM) and mapping of road edges, sidewalks, building footprints etc. This supports the study of Storm water issues, supports operating and capital programs, assists in land development reviews. Develop and Maintain Horizontal ( Lat / Long) and Vertical (Elevation) control networks across the City to allow correct data integration and alignment of ground based surveys with the City's mapping program.

**Description** Funding to support preservation maintenance applications (eg. Single surface treatments, slurry seals, micro-surfacing, asphalt overlays, mill and pave resurfacings) to sustain minimum maintenance standards for safe public use and to prolong infrastructure life expectancy. Work shall include repairs to both roadway surfaces, multi-use paths, and asphalt walkways within the City road allowance.

**Description** To perform minor maintenance works to structure elements that improves pedestrian and vehicular safety and extends the life of the structure (i.e. structure cleaning, railing system maintenance, painting, erosion control, drainage, vehicular and pedestrian hazards etc.).

**Comments**

2023 Program Includes:  
General bridge maintenance at various locations as identified in the Bridge Management System  
- Annual Bridge Cleaning  
- Minor Maintenance repairs as required

Description

To ensure guide rail systems in the City conform to existing regulations and standards. Funding will be used for the replacement of guide rail that is substandard and/or damaged through hit and run incidents as well as the installation of new systems as defined by other City departments thereby reducing liability and increasing public safety.

Comments

Increase \$200,000 for 2024 for Ridge Rd guide rail safety enhancements.  
Replace damaged and install new sections of guiderail as determined.

**Description** To provide a preventative maintenance program for roads that are approximately 3-6 years old. This will be using routing and sealing or mastic seal to extend the service life of the road. Road assessments are typically completed following the winter season in spring, and locations are identified then due to the freeze/thaw cycle. The work is typically completed in the fall when temperatures are cooler.

Description

This program in in partnership with Planning to count and record active transportation numbers, specifically cycling and pedestrians. Program has grown since inception and there is greater demand to expand program and to maintain the program.

Annual fee for data transmission  
Battery replacements  
Annual Maintenance program  
Management of data services

**Description** To perform minor rehabilitation and/or resurfacing at rail crossings in conjunction with governing rail authorities to improve safety and ridability. An annual comprehensive review by applicable railway authorities will determine annual locations and priority listing. Demand on this program is directly related to the rail authorities (Federal/private) annual budgets.

**Description** To fund the collection of traffic volume, speed and classification information across the city required for both short and long-range planning, for response to neighborhood and arterial traffic concerns and for the city-wide Traffic Signal Retiming projects. Data will also be used for higher order transit evaluations, safety studies, Municipal Act classifications, prioritization of Capital projects and other special projects. Includes Cordon Count projects every five years.

**Description** Allocated funding for surface and subsurface infrastructure projects that require the disposal of contaminated soils or excessive rock and/or soil removal, as well as granular quantity overruns due to removal of soil and/or rock. This allows immediate action resulting in improved overall operation and increased service levels.

**Description** In accordance with the Local and Collector Road Asset Preservation Strategy, the roadways within this neighbourhood have become surface deficient and are in need of resurfacing and base repairs. This will extend the life of the roadways, improve the level of service, increase safety, reduce risk and liability, and reduce maintenance costs. The proposed project listing, compiled on a neighbourhood basis, shall create attractive contract packages for the paving industry. This may result in potential cost savings and maximize the overall cost effectiveness of program delivery.

**Description** The roadway requires an elevation increase to prevent flooding from adjacent wetlands. This will improve the level-of-service, increase safety and reduce maintenance costs, and eliminate road closures due to flooding. This project requires preliminary assessments and studies, as well as approvals from external agencies. CPMS 11691

**Description** Metrolinx has initiated watermain installation works along Wentworth St. The City will coordinate the resurfacing of the two side street approaches (Nightingale St and King William St) with the Metrolinx works. Coordinating the resurfacing of the two approaches is a cost-effective method as it may result in cost-savings through traffic control and mobilization costs. This project is coordinated with watermain replacement. Subject to Metrolinx funding. CPMS 11259

**Description** The roadway has become surface deficient and is in need of resurfacing and base repairs. This will extend the life of the roadway, improve the level-of-service, increase safety and reduce maintenance costs. This is a boundary road shared between the City of Hamilton and the Town of Milton. Milton is leading the design and construction of this project. This funding is for Hamilton's 50% cost-share of the road works to be reimbursed to Milton. CPMS #11710

**Description** Ongoing research and development of methods/technologies/policies to improve the operation systems and public participation in the City's waste management programs. This includes waste composition studies, program research and analysis. Planned projects for 2023-2026 include a social marketing study to determine basis of resident behaviour, continuing waste audits (curbside, truck, facility), implementing new initiatives for the City's multi-residential program, recycling in Parks and updating programs in preparation for the implementation of Waste Free Ontario Act changes such as the blue box transition, tires, electronics and batteries programs.

**Description** In accordance with the recommendations of the Solid Waste Management Master Plan (SWMMP). Work in 2023-2026 will includes: completing the action items established in the 5 year SWMMP waste diversion objectives and planning Hamilton's new long-term SWMMP. Work in this project also includes any other work to improve our diversion rate requiring consideration / investigation, Waste Free Ontario Act, municipal partnerships, etc.

**Description** The continued development of Stage 3 waste disposal area of the Glanbrook Landfill Site. This work will include all final design of waste disposal cells, engineering and survey, approvals with the Ministry of Environment, Conservation and Parks, clay storage and procurement if required, construction supervision and construction of the new waste disposal cells. This is a multi-year project that will last until the final closure of the Glanbrook Landfill Site, estimated to be at the end of 2046. This project will include closure of the site. Construction to include clay excavation and relocation for later use, installation of liner and leachate collection system, landfill gas collection system, storm water detention ponds, ditches, final cover with topsoil and vegetation.

Description

Due to constant growth of Horticulture managed assets citywide over the last 10 years, the section requires increased accommodations for front line and administrative staff, the current building is aging and will require renovation or reconstruction. Feasibility study being completed in 2022/23 to determine cost estimates for renovation or demolition/construction. Funding in 2023 would support engineering and consulting to prepare for upgrades in 2025.

Comments

**Description** To provide equipment required to comply with Legislated program requirements for emission and safety inspections. Replacement of Fleet shop equipment (e.g. hoists, compressors, cranes, oil tanks, etc.), when it meets its expected life or when required repairs exceed the remaining value of the asset and where replacement makes economic sense. For the acquisition of vehicle and equipment repair specialty diagnostic equipment.

**Comments** Central Fleet provides repair and maintenance services to various City client groups and is responsible for approx. 1,350 City owned vehicles and equipment currently serviced from 8 locations with tool asset inventory alone valued at \$0.87 million.

**Description** In 2015 a consulting study was undertaken to review the City of Hamilton Cemetery program needs. The City of Hamilton Cemeteries Section is a unique program within the City of Hamilton. A total of 69 municipal cemeteries are managed and maintained by City staff. To meet the needs of existing and future residents, as well as manage the capital and operating budget, an updated review by a specialized consulting firm will provide guidance and recommendations for the program. Funding may also be used to support master planning work if feasible.

| Comments    | <p>Implements the Ten Year Local Transit Strategy to design &amp; construct a new Transit Maintenance Storage Facility (MSF) on acquired property at Wentworth Street North. The existing Transit Maintenance and Storage Facility (MSF) at 2200 Upper James was opened in 1983 is currently operating well above its practical capacity. A new MSF will be needed in the short term (3 to 5 years). Feasibility studies for the new facility are complete. Design of the new MSF, site servicing, due diligence and enabling works are ongoing 2017 to 2019. Partial funding is available from the Federal Public Transit Infrastructure Fund, and is assumed to be received in year one of the project (i.e.: 2020)</p> <p>In October 2016, Council approved Report FCS16083, authorizing Transit staff to submit an application to the Province for projects totalling \$72,978,408 to be considered for Federal funding under Phase 1 of the Public Transit Infrastructure Fund (PTIF). This included approval of a financing strategy to fund the City's matching contribution of \$36,489,204 through the Tax Supported Capital Budget. The Design, Planning and Site Preparation of the new Maintenance &amp; Storage Facility (MSF) in lower Hamilton was one the approved projects.</p> <p>The City applied for project modifications in December 2017 and received approval from the Province in March 2018 to reallocate the funds for existing projects. In July 2018, Council approved re-appropriating the City's debt financing related to PTIF Phase 1 projects per Report PW18054. The MSF project total budget was revised to \$22,000,000.</p> <p>The existing Transit MSF located at 2200 Upper James was opened in 1983 is currently operating well above its practical capacity. The need for a new facility is critical to Transit's operations and the new MSF project implements the recommendations in the Ten Year Local Transit Strategy which aligns with a number of key policy documents including:</p> <ul style="list-style-type: none"> <li>- Hamilton Transportation Master Plan (2007),</li> <li>- The Big Move Regional Transportation Plan (2008),</li> <li>- Improving Health by Design in The Greater Toronto-Hamilton Area – A report of Medical Officers of Health in the GTHA (2014), and,</li> <li>- Urban Hamilton Official Plan (2009).</li> </ul> |

### Expenditure By Asset Component

| Asset Components | Share | Previously Approved | Forecast Budget | Total Budget |

**Description** The Generator Compliance Testing and Upgrades Program addresses the requirements for the City to maintain compliance with CSA Code B139 including the completion of 10-year comprehensive inspections and the assessment and completion of equipment/site upgrades. In 2016, Cole Engineering was retained to conduct a code compliance assessment of the City's diesel generator facilities. The deficiencies identified in this report will be addressed through various site/equipment upgrades to be undertaken in 2020/2021. Additionally, comprehensive inspections are required on a 10 year basis as per O.Reg 213/01 in order to receive/maintain Fuel Delivery Certificates for diesel generator sites which will take place in 2025/2026. This program will repeat on a 10 year cycle.

**Description** The Ten Year Local Transit Strategy identifies the need to develop terminals along express bus routes. Limeridge mall is a current terminal that requires redevelopment (agreement expires in 2017) and greater enhancement as the T-Line express bus evolves. Project will construct a new transit terminal at the SW corner of the CF Lime Ridge Mall complex directly adjacent to Upper Wentworth. Project will include new transit platform and bus bays, road works on Upper Wentworth to support transit priority, as well as, Operator comfort building, customer amenities such as shelters, benches, bike storage, PRESTO equipment and wayfinding. Project is fundamental to supporting the goals of TYLTS and (Re)envision.

**Description** Due to the phasing of the construction process, the new public-spaces on Piers 5-8 will remain in transition in terms of their use, for several years. Some could easily be transitioned into places for temporary programming as an interim use, adding public, recreational, and commercial uses to the sites temporarily. These could take the form of simple grassed areas on the water’s edge, to spaces to accommodate food trucks or small-scale market vendors, as well as spaces for temporary structures for larger-scale vendors to provide year-round programming. Staff have also identified that the initial West Harbour capital plan did not specifically identify interim projects. Staff would retain the services of animation and programming expertise to plan and execute a program for the Piers 6, 7 and 8 areas for 2023-2026.

**Description** Installation of a 250 kW roof mounted solar voltaic system at Harry Howell Arena in 2023 and a 265kW roof mounted solar voltaic system at Morgan Firestone designed in 2024 and installed in 2025. Should the grant funding not be realized the project will not proceed.

**Comments** All capital expenditures to be repaid to Energy reserve and then savings to operating budgets. Used Simple payback method for calculation.
