West 5th Street Municipal Class Environmental Assessment

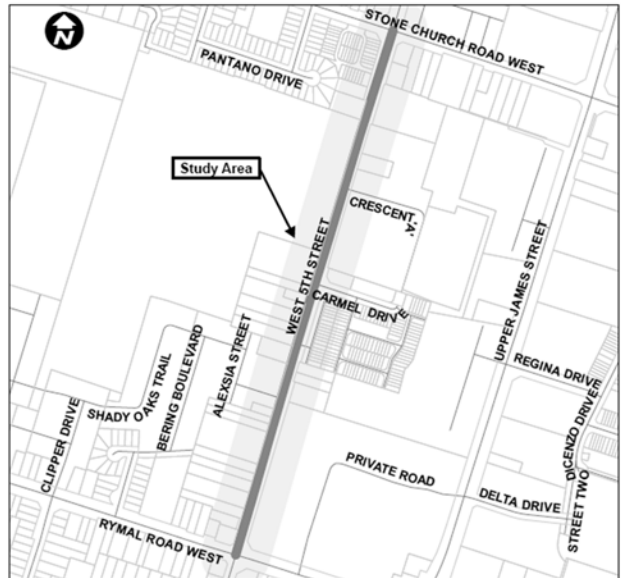

Notice of Study Commencement and Public Information Centre #1

The Study

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Process

This project is being carried out as a Schedule C project under the Municipal Engineers Association *Municipal Class Environmental Assessment* (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024). The purpose of the first Public Information Centre (PIC) will review the problem/opportunity statement, the alternative solutions, and the recommended solution. A second PIC will be held at a later date to review the project's alternative designs and the associated evaluation process.

How to Participate

In-Person Public Information Centre	Review Materials Online
<p>DATE: Thursday, January 16, 2025 TIME: 6:00 p.m. – 8:00 p.m. (open house format) LOCATION: Westmount Recreation Centre, 35 Lynbrook Dr, Hamilton, ON L9C 2K6</p> <p>The PIC will be a drop-in style session where information will be provided about the project. Project team members will be available to answer questions.</p>	<p>Visit the project webpage anytime from January 14th, 2025, to view the information display panels. Following the live event, a recorded presentation will also be posted. Materials are available 24 hours a day, 7 days a week.</p> <p>The project website is: www.hamilton.ca/West5thEA</p>

If you have any accessibility requirements to review the PIC materials and provide comments, please contact the City Project Manager below.

This Notice will be issued January 3rd, 2025, and January 10th, 2025, in the Hamilton Spectator.

Crime Stoppers tips ‘absolutely invaluable,’ says Norfolk’s top cop

Non-profit charity helps police by passing along anonymous information about crimes

J.P. ANTONACCI
LOCAL JOURNALISM INITIATIVE
REPORTER

Norfolk County’s top cop calls Crime Stoppers an “absolutely invaluable” crime-fighting partner, and the numbers bear that out.

In 2023, the Haldimand-Norfolk chapter of the worldwide non-profit charity took in nearly 400 anonymous tips about alleged criminal activity in the two rural counties.

Those tips led to 18 arrests, 94 charges laid and drugs worth \$77,200 taken off the streets.

“It’s pretty amazing how often a Crime Stoppers tip makes a difference,” Insp. Andy Tait, Norfolk’s OPP detachment commander, told The Spectator on Monday during a ceremony at Simcoe town hall to mark Crime Stoppers Month.

Crime Stoppers takes tips by phone at 1-800-222-TIPS (8477) or online at helpsolve-crime.com. Residents can share information on everything from murders and violent crimes to traffic offences, animal cruelty and suspicious fires.

Tait said tips have helped Norfolk officers arrest drug traffickers, recover stolen cars and other property, and find those responsible for violent assaults.

Sometimes a tip submitted to Crime Stoppers will clue police into a crime that had not been previously reported, he added.

“There’s constant communication back and forth, and constant sharing,” Tait said of the rapport between his department and Crime Stoppers coordinator Aimee Bernardo, who works out of the Norfolk detachment and keeps in close touch with investigators.

Tipsters can rest assured they will always remain anonymous, Crime Stoppers board member Ken Schaus told The Spectator.

“We don’t have call display. We don’t want to know who they are,” Schaus said.

Calls are not recorded, and tipsters will not be asked to testify in court or reveal their identity to investigators or Crime Stoppers. That right to anonymity is enshrined in a Supreme Court decision protecting Crime Stoppers informants from being compelled to unmask themselves.

The charity offers a cash reward of up to \$2,000 for information leading to an arrest or charge.

“Once it gets to court, it’s out of our control,” Schaus said by way of explaining why tipsters can still get paid even if the accused is not convicted.

Once a tip comes in — most are still made by phone, Schaus said — the tipster is assigned a reference number they can use to check the status of the investigation by calling back or visiting the Crime Stoppers website.

If they are eligible for a reward, they are given instructions to visit a local business and provide a code number and reference colour.

They are then handed an envelope of cash without ever having to state their name.

That cash comes in from donations and fundraisers, such as an upcoming buffet dinner at Boston Pizza in Simcoe on Jan. 21, where half of the \$20 ticket goes to Crime Stoppers.

The promise of a reward inspires some tipsters, but Schaus said most people are motivated by a higher purpose.

“A lot of the calls we get, they’re not doing it for the money,” he said. “They want to stop crime.”

Where to warm up in Brant County

CELESTE
PERCY-BEAUREGARD
LOCAL JOURNALISM INITIATIVE
REPORTER

Brant County has recently been hit with some bitterly cold days. Here’s where to warm up when the mercury dips.

When glacial weather moves into the county, community centres, library branches and customer service centres offer a warm reprieve for those in need — but they have to head to nearby Brantford for overnight emergency shelter.

“I do think it will be time soon for the county to have its own emergency shelter space,” Coun. Lukas Oakley told The Spectator by email in December.

More folks in the county are “actively and visibly experiencing homelessness” than in the past, he said.

Most have connected with the shared social services in Brantford, though a few have “moved along” without connecting to services, Oakley said.

City staff are reviewing their homelessness plan and use of emergency shelter space — including whether there is a need to increase the number of beds or establish an emergency shelter in the county, Heather Carvalho, a spokesperson for the city, told The Spectator in December.

The social services committee is expected to receive a report in the next few months.

County residents who need a warm space can visit:

■ The Burford (26 Park Ave.) and Paris (66 Grand River St. N.) customer service offices on weekdays between 8:30 a.m. to 4:30 p.m.

■ These local community centres — call directly for opening hours, which may stretch into the evening, dependent on rentals.

■ Brant Sports Complex (944 Powerline Rd., Paris) — 519-442-1944
■ Burford Community Centre (14 Potter Dr., Burford) — 519-449-5611
■ Gaukel Memorial Community Centre (7 Gaukel Dr., St. George) — 519-448-1831
■ Syl Apps Community Centre (51 William St., Paris) — 519-442-3342

■ The County of Brant Public Library — the branches have differing operating schedules, call directly for details.

■ Burford branch (24 Park Ave.) — 519-449-5371
■ Glen Morris branch (474 East River Rd.) — 519-740-2122
■ Paris branch (12 William St.) — 519-442-2433
■ Scotland-Oakland branch (281 Oakland Rd.) — 519-446-0181
■ St. George branch (78 Main St. N.) — 519-448-1300

For more information about Brant County warming centres, visit brant.ca/WarmingCentres.

For emergency shelter, contact the intake line at 1-888-621-0034 or email housing@soarcs.com.

Hamilton-area education stories to watch in 2025

Trustee transparency, student food insecurity, 10-year high for public board staff sick days among issues

KATE MCCULLOUGH
REPORTER

Halfway through the school year, Hamilton-area boards have already made a number of headlines.

A closer look at a higher-than-average number of employee sick days, an upcoming trustee election and a contentious investigation are just some of the stories on The Spectator's radar.

Look for more on these issues in 2025:

Ward 4 trustee byelection

Eligible electors will vote in a new Ward 4 trustee in early January to replace longtime board member Ray Mulholland.

The 52-year trustee retired in September at the age of 90 following a months-long leave.

Ward residents can cast a ballot to fill the vacant board seat in-person on Jan. 4 and 5 from 10 a.m. to 6 p.m. and Jan. 6 from 10 a.m. to 8 p.m. Polling stations will be set up at Rosedale Arena and Seniors Centre, Sir Winston Churchill Recreation Centre and BGC Hamilton-Halton, and each will have accessible machines.

Residents can also vote online from Jan. 2 to 6.

Growing sick days among board employees

The number of employee sick days at Hamilton's public school board has hit a 10-year high, with staff taking an average of more than three weeks off last year.

The Hamilton-Wentworth District School Board reported employees, including teachers, principals, administrative staff and custodians, called in sick an average of 16.85 days in 2023-24, an increase from the previous year's 16.31.

Board staff attribute this in part to employees' increased caution around spreading illness and mental-health challenges.

But personal illness days have been climbing for nearly a decade, except two years during the pandemic from 2019 to 2021, increasing by about 3.5 days since 2015.

Meanwhile, Toronto boards have hired private investigators to look into misuse of sick days, and teachers at both public and Catholic boards have lost their jobs as a result.

Glimmer of hope in student achievement

Some Hamilton schools improved EQAO math by more than 30 per cent, a suggestion that efforts to buck a trend of poor results in the hard-won subject are working.

High-priority schools — those identified by the board as needing extra support, and typically in lower-income neighbourhoods — in particular have seen dramatic increases.

Meanwhile, results across the province have for the most part remained static or dropped.

Now, as educators work to ensure this year's cohorts have adequately grasped concepts ahead of the standardized tests, it remains to be seen whether the 2024 results were an outlier

or the start of an upward trend.

Food insecurity among kids as funding looms

A Hamilton-area school nutrition program says they hope to learn more about the local rollout of the national food program early in the new year.

The province struck in November a \$108.5-million deal with the federal government to feed 160,000 Ontario kids for free. Funding under the new national food program will be rolled out over three years, starting in the 2024-25 school year.

Tastebuds manager Bhairavi Kumar told The Spectator it's "encouraging news," and she hopes to get specifics by January.

Meanwhile, demand, which already exceeded capacity, "has continued to grow," she said in a Dec. 13 email.

The organization was forced last year to cancel several programs after one-time provincial funding in 2022-23 wasn't renewed, prompting students to campaign to bring it back.

Food insecurity levels among students are at a "critical level," Hamilton-based Food4Kids, which distributes weekend take-home weekend food packages to families, said in a Dec. 12 post.

In response, the organization has added four new Hamilton schools to its roster, bringing its total to 83.

Last year, the organization reported a wait list of about 100 kids, even after it had already added 13 schools in 2020-21, exceeding for the first time its maximum capacity.

Investigation prompted by travelling trustees

The province is set to begin its investigation into the Brant Haldimand Norfolk Catholic District School Board's spending following a contentious art-buying trip to Europe.

Education Minister Jill Dunlop vowed ministry officials would conduct a governance review of the board after The Spectator revealed the extent of a trip four trustees took to Italy over the summer, spending \$50,000 on travel, accommodations and meals and \$70,000-plus worth of religious art they purchased for new schools.

Dunlop called it an "appalling" misuse of public dollars in a December release announcing Aaron Shull, a lawyer with expertise in public-sector transparency, accountability and stewardship of public funds, as the reviewer.

Trustee fights board accusations of bullying

Barred trustee Carol Ann Sloat awaits the decision of an appeal in her fight against the Grand Erie District School Board after being accused of "bullying" and "toxic behaviour." In December, the board announced its intent to appeal an earlier ruling in Sloat's favour from the divisional court.

RESIDENT LETTER

Date: January 2nd, 2025

Dear Resident

**NOTICE OF STUDY COMMENCEMENT & PUBLIC INFORMATION CENTRE #1
West 5th Street, City of Hamilton
Municipal Class Environmental Assessment**

The City of Hamilton has initiated an Environmental Assessment to look at transportation improvement options along West 5th Street between Stone Church Road and Rymal Road. The road improvements are being planned as a Schedule C Municipal Class Environmental Assessment (EA) project under the Municipal Engineers Association *Municipal Class Environmental Assessment* document (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024).

Please find enclosed the Notice of Study Commencement & Public Information Centre #1 for the West 5th Street Municipal Class Environmental Assessment.

Sincerely,

A handwritten signature in black ink, appearing to read "Olivia Stanciu".

Olivia Stanciu, M.Sc., PMP
Project Manager, Capital Infrastructure Planning

Good morning,

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) to address transportation challenges along West 5th Street (Stone Church Road West to Rymal Road West). On Thursday, January 16th, 2025, we will be holding the project's first Public Information Centre. Further information can be found in the attached document or on our EngageHamilton page: <https://engage.hamilton.ca/West5thEA>.

Thank you!

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)
Project Manager – Capital Infrastructure Planning
Infrastructure Renewal
Public Works
Engineering Services, City of Hamilton

K.2.2 Notifications PIC 2

West 5th Street Municipal Class Environmental Assessment

Public Information Centre #2

The Study

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Process

This project is being carried out as a Schedule C project under the Municipal Engineers Association *Municipal Class Environmental Assessment* (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024). The purpose of the second Public Information Centre (PIC) is to present the alternative designs and the associated evaluation process.

Near the end of the project, an Environmental Study Report (ESR) will be prepared to document the EA process, consultation activities, and the evaluation. The ESR will be presented for a 30-day public review at that time.

How to Participate

In-Person Public Information Centre	Review Materials Online
<p>DATE: Tuesday, June 3, 2025 TIME: 6:00 p.m. – 8:00 p.m. (open house format) LOCATION: Westmount Recreation Centre, 35 Lynbrook Dr, Hamilton, ON L9C 2K6</p> <p>The PIC will be a drop-in style session where information will be provided about the project. Project team members will be available to answer questions.</p>	<p>Visit the project webpage anytime from June 2nd, 2025, to view the information display panels. Also, a recorded presentation will be posted. Materials are available 24 hours a day, 7 days a week. Comments can be provided until June 17th, 2025.</p> <p>The project website is: www.hamilton.ca/West5thEA</p>

Information will be collected in accordance with the Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record.

This Notice will be issued May 23rd, 2025, and May 30th, 2025, in the Hamilton Spectator.

WEEKEND PLANNER

GO TO A BALL GAME AND MORE LOCAL EVENTS

CHEYENNE BHOLLA
REPORTER

Hamilton will get a break from rain and clouds in time for events happening this weekend. Here's what you can get up to this weekend:

Hamilton Cardinals
Take your family out to the ball game this Sunday at 2 p.m. Hamilton Cardinals will face Guelph Royals in the Intercounty Baseball League at Bernie Arbour Memorial Stadium, located at 1100 Mohawk Rd. E., Hamilton. Doors open at 1 p.m. Tickets are \$12. Go to hamiltoncardinals.com for more information.

Ghost Walks
There are still spots open for a Ghost Walk in Dundas on Saturday evening. Attendees will learn about ghosts, murders and mobsters in Dundas's history. Tickets are \$15 for adults or \$13.50 for children 13 years old

SPECTATOR FILE PHOTO

Saturday and Sunday will be warm — a high of 17 C.
and younger. The tour will happen at Grafton Square at 2 King St. W. For more information, go to ghostwalks.com.

War of 1812 tour
Go on a historical adventure at the Hamilton Cemetery, once Burlington Heights, a British Military stronghold from 1813 to 1815. On Saturday at 10 a.m., participants should meet their tour guide at the cemetery gatehouse at 777 York Blvd. The free tour is an hour long.

CATHIE COWARD/THE HAMILTON SPECTATOR

Hamilton Cardinals will face Guelph Royals in the ICL at Bernie Arbour Memorial Stadium.

For more information, go to hamilton.ca/things-do.

Boats in the Park
Hamilton Civic Museums will host the free event on Saturday at 11 a.m. The event will feature radio-controlled model boats and tours of the museum. The Hamilton Museum of

Steam and Technology is located at 900 Woodward Ave., Hamilton. For more information, go to hamiltoncivicmuseums.ca.

Forge FC
Hamilton's Canadian Premier League team will compete with the Cavalry FC at Hamilton Stadium on Saturday. The

game is at 4 p.m. The stadium is located at 64 Melrose Ave. N. Tickets range from \$19 to \$75. To buy tickets, go to canpl.ca/forgefc.

Heritage plant sale
Looking for interesting plants? Then, peruse through a collection of heirloom annuals and perennials. Hamilton Civic Museums will host the plant sale on Saturday from noon to 4 p.m. The free event will be held at Dundurn Castle and Park, which is located at 610 York Blvd., Hamilton. For more information, go to hamiltoncivicmuseums.ca.

Pro wrestling
Pro Wrestling Ontario will return to the Germania Club of Hamilton at 863 King St. E. on Saturday. The event will feature open-weight champion Jonny Deluca versus Tarik in a last-man-standing match and trios champion the Foundation versus the Trophy Hunters. The event starts at 6:30 p.m. Tickets range from \$10 to \$30. Go to theonewhoknocks.eventbrite.com for more details.

Comedy variety show
Marc Hallworth, Kari Johnson, Lindsay Endersby and Gavin Stephens are a few acts to be featured at the Staircase Theatre on Friday. Smooth Comedy runs from 8 to 10 p.m. at 27 Dundurn St. N., in the theatre's Bright Room. For more information, go to staircasehamilton.com. Tickets are \$20.

Outdoor escape room
Questo is hosting an outdoor escape room on Saturday from 10 a.m. to 4 p.m. Each session lasts about 90 minutes. One ticket, which is \$40, allows up to six participants. Locations are sent out prior to the event. Attendees will be led by the escape room's app. For more details and tickets, go to questoapp.com.

Espresso and milk-steaming class
ECS Coffee in Burlington will host an interactive event teaching attendees how to make an espresso and steam milk on Saturday at 11 a.m. The two-hour class will teach about different espresso beans, grinding techniques and creating latte art. Tickets are \$10. Go to ecscoffee.com/pages/classes-events. The café is located at 3100 Harvester Rd., Unit 6, Burlington.

The making of bubble tea
Learn how to make bubble tea at downtown Hamilton's the Alley on Saturday from noon to 1 p.m. Workers will show attendees how to make different drinks. The shop is located at 1050 King St. W., Unit 5, Hamilton. Tickets are \$10 on eventbrite.ca. Those who can't make the event, can book a time by emailing alleycateringhamilton@gmail.com. WEEKEND PLANNER

FIND PLENTY OF LOCAL EVENTS THIS WEEKEND

CHEYENNE BHOLLA
REPORTER

Environment Canada forecasts a mix of rain showers and sun in Hamilton this weekend. Saturday will see a high of 17 C and sunny conditions, before moving into Sunday's high of 17 C and a mix of sunny, cloudy and rainy conditions. On Friday, the agency forecasts a high of 13 C and a chance of showers. Despite the prediction, several events will happen rain or shine. Here is what you can get up to this weekend:

Handmade in Canada market
■ Craftadian features hand-made goods from more than 65 Canadian makers, including art, jewelry, handbags, candles, prints and knitwear. The event is on Saturday from 10 a.m. to 4 p.m. and will feature music from DJ Julie Fazooli. Go to Ron Joyce Centre at 4350 South Service Rd., Burlington. Admission is \$5 online at craftadian.ca/burlington or at the door.

Arts Burlington Spring Sale
■ The Art Gallery of Burlington will host a spring sale featuring carving and wood arts, paintings, pottery, sculptures and photography from more than 100 artists. The sale runs on Saturday and Sunday from 10 a.m. to 5 p.m. Admission is free.

Hamilton's Stone Age Walking Tour
■ Bill King will host the first free walking tour of its eighth season on Sunday. This time around, the theme is 19th century "Golden Age of Stone" in Hamilton. The tour will start at King Street West and John Street at 10 a.m.

Hamilton Cardinals baseball
■ Watch the Hamilton Cardinals face the Chatham-Kent Barnstormers and enjoy a night of music at Bernie Arbour Memorial Stadium on Friday at 7:35 p.m. The stadium is located in Mohawk Sports Complex at 1100 Mohawk Rd. E., Hamilton. Gates open at 6:30 p.m. Buy \$12 tickets at hamiltoncardinals.com.

Free zumba at Lime Ridge Mall
■ The mall is hosting free zumba classes every Friday from 9 to 9:45 a.m. Go to 999 Upper Wentworth St. in Hamilton in the mall's upper level centre court to attend. To register for the event, go to eventbrite.ca.

Hammer City Roller Derby Season 20
■ Two local roller derby teams will compete on Saturday against Toronto teams. The first game is the HCRD Pier Pressure against Toronto Roller Derby Toxins at 5 p.m. For the second, HCRD Dundurn Hassle will go up against the Toronto Roller Derby at 7:30 p.m. Bring your own chairs to the game at Coronation Arena at 81 Macklin St. N., Hamilton. Tickets are \$15. To buy, go to hammercityrollerderby.ca.

Hamilton Pro Wrestling Mayhem 6
■ Pro wrestling comes to the Germania Club of Hamilton at 863 King St. E. on Friday at 7 p.m. Tickets are \$20 on eventbrite.ca.

Hamilton Tiger-Cats
■ On Saturday, the Hamilton Tiger-Cats will kick off against the Toronto Argonauts at 7 p.m. in Hamilton Stadium. For tickets, go to ticketmaster.ca.

Discovery at the Fishway
■ On Friday, May 23 at 2:30 p.m., Royal Botanical Gardens staff will help migrating fish to their spawning grounds in Cootes Paradise. The Fishway is at the outlet of

the marsh, a short walk from Princess Point accessed along the Desjardins Trail. The operation lasts about 30 minutes. For more details, go to rbg.ca/plants-conservation/nature-sanctuaries/fishway.

City of Burlington Touch-a-truck
■ On Saturday from 11 a.m. to 2 p.m. families can take a tour of city vehicles, including a Burlington transit bus, street sweeper, snowplow, fire truck and Zamboni. There will be a snowplow and backhoe simulator at the event. Forestry staff will also give away a limited number of trees on a first-come, first-served basis. The pop-up is part of the city's 10-year downtown revitalization strategy in an effort to gather insights about community aspirations, unmet needs and future opportunities. The event will happen rain or shine at Mainway Recreation Centre at 4015 Mainway, Burlington.

THE HAMILTON SPECTATOR FILE PHOTO

On Friday at 2:30 p.m., Royal Botanical Gardens staff will help migrating fish to their spawning grounds in Cootes Paradise.

A competition for It's Your Festival 2025 performers
■ Sunday from 1:30 to 6:30 p.m. is the second annual New Music Expo Stage where five bands will compete for a spot on the Gage Park's George R. Robinson Bandshell during the

late June, early July festival. Local music and entertainment industry figures will choose the winning band, who will receive a gift package and a broadcast-ready EP recording session at Hamilton's Boxo Studio. The fundraiser event will hap-

pen at Stonewalls Restobar at 339 York Blvd., Hamilton. Advance tickets are \$15 or \$20 at the door. To buy, go to stonewallshamilton.com/events. CHEYENNE BHOLLA IS A REPORTER AT THE HAMILTON SPECTATOR. CBHOLLA@THESPEC.COM

K3: Public Information Centre 1

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West

Municipal Class Environmental Assessment

City of Hamilton

Public Information Centre

January 16, 2025

Welcome to the Public Information Centre

The goals of this Public Information Centre are to:

- Introduce the project and why it is being undertaken
- Provide an overview of the process that this study is following
- Provide a summary of the Problems and Opportunities
- Present existing conditions within the study area
- Answer questions and provide an opportunity to get involved

Comments received will be used to help identify the approach for improvements within the study area.

Land Acknowledgement

The City of Hamilton is situated upon the traditional territories of the Erie, Neutral, Huron-Wendat, Haudenosaunee and Mississaugas. This land is covered by the Dish With One Spoon Wampum Belt Covenant, which was an agreement between the Haudenosaunee and Anishinaabek to share and care for the resources around the Great Lakes. We further acknowledge that this land is covered by the Between the Lakes Purchase, 1792, between the Crown and the Mississaugas of the Credit First Nation.

Today, the City of Hamilton is home to many Indigenous people from across Turtle Island (North America) and we recognize that we must do more to learn about the rich history of this land so that we can better understand our roles as residents, neighbours, partners and caretakers.

Project Overview

What are we doing?

The City of Hamilton is planning for road reconstruction of West 5th Street, from Stone Church Road West to Rymal Road West.

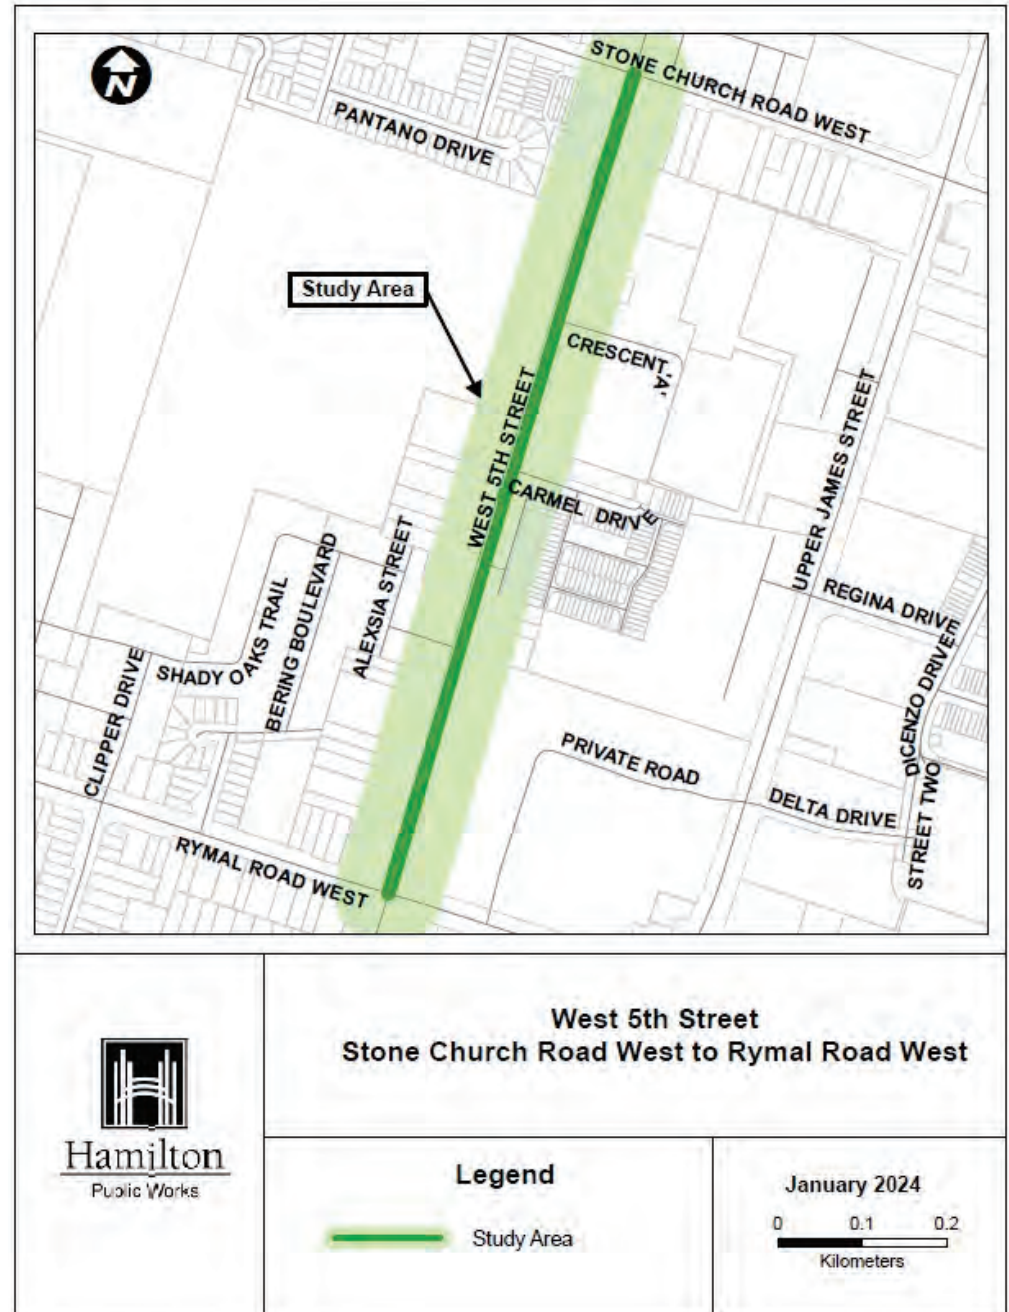

Why are we doing it?

The improvements are to support future growth and corridor needs for both the community and Hamilton.

What does the study include?

The EA will consider a “complete streets” solution to improve traffic, active transportation, transit, street trees, and stormwater management throughout the corridor.

The corridor is shown on the map.

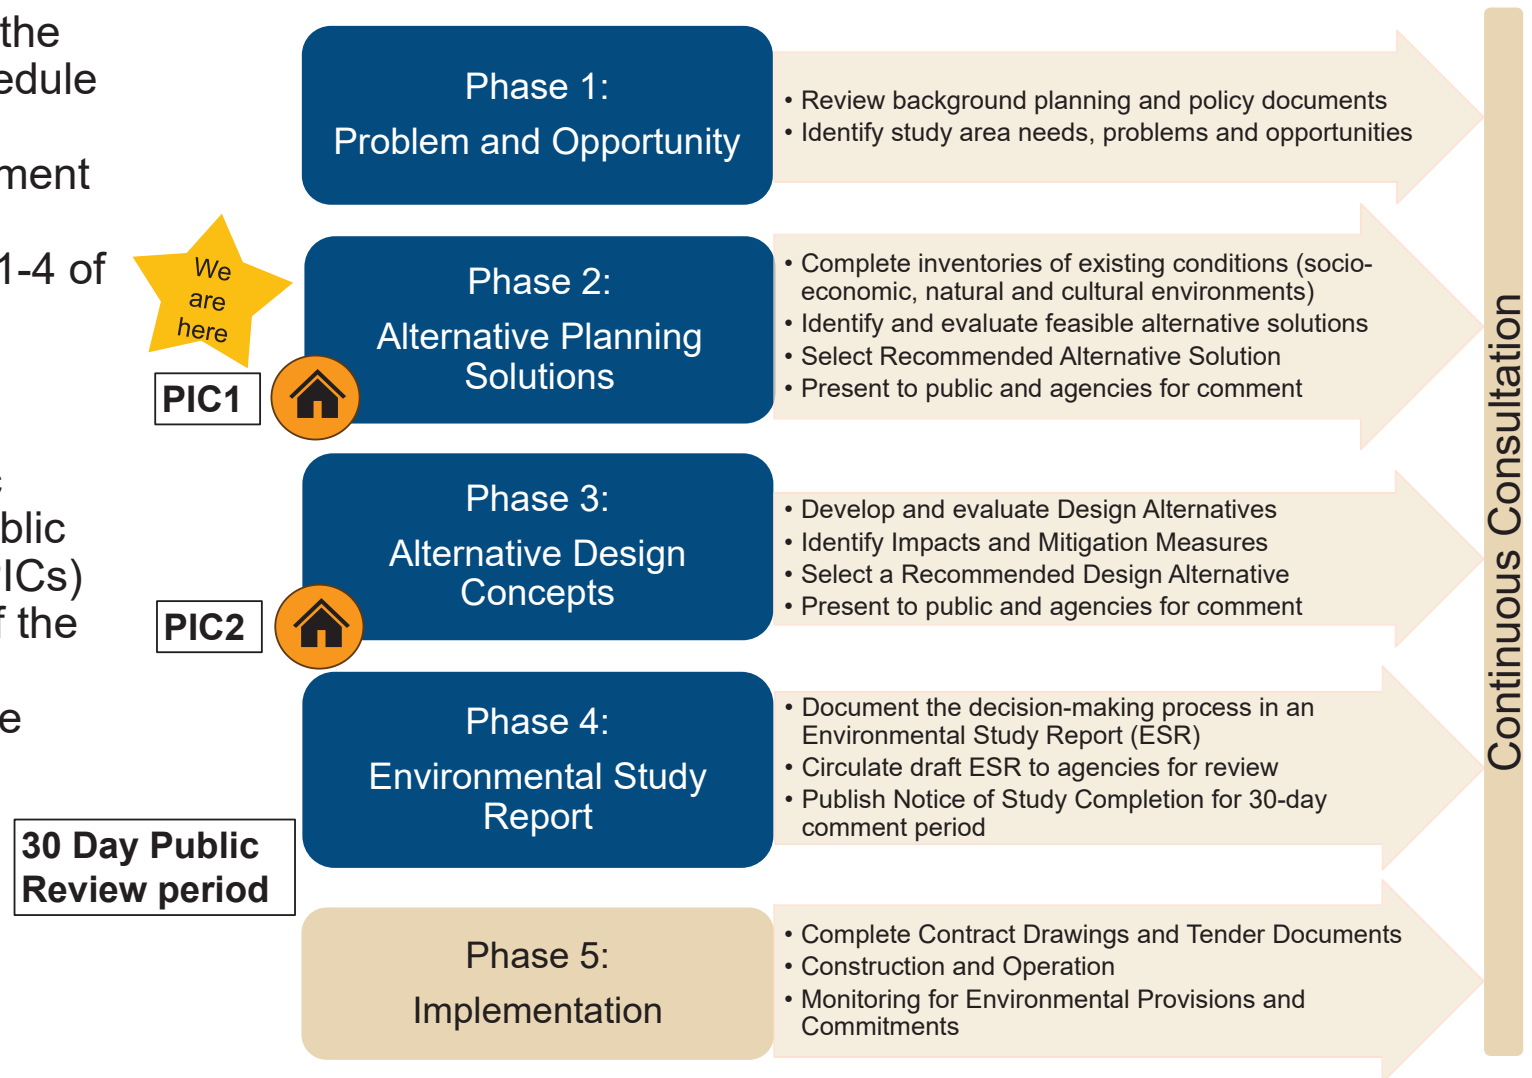

Municipal Class EA Process

The Municipal Class EA study process frames the planning and implementation of municipal infrastructure.

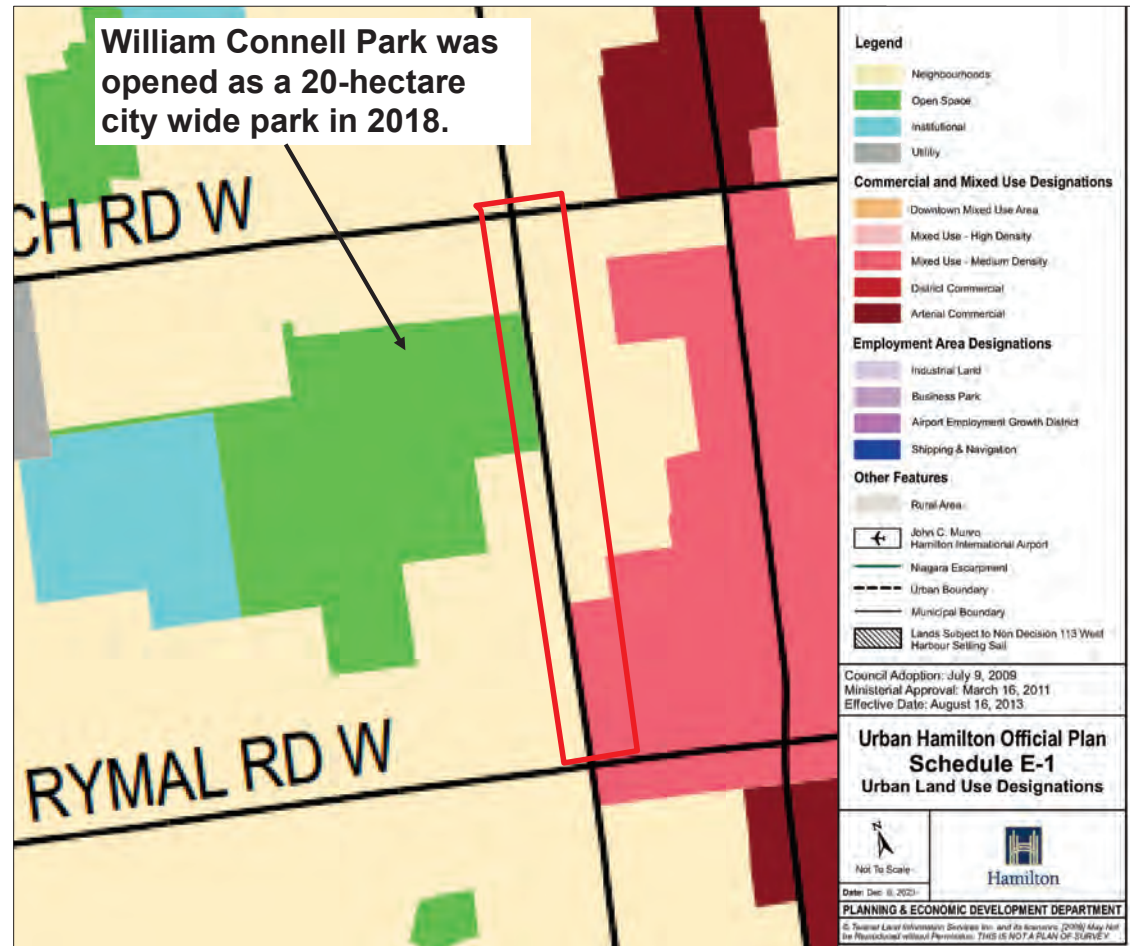

This study is following the requirements of a Schedule C Municipal Class Environmental Assessment (EA), including the completion of Phases 1-4 of the process shown.

The study includes opportunities for public input, including two Public Information Centres (PICs) and a 30-day review of the Environmental Study Report at the end of the project.

Existing Conditions - Land Use Context

- The **City of Hamilton Official Plan (Urban Official Plan, 2022)** has three land use designations along West 5th Street.
 - Neighbourhoods - residential uses.
 - Open Space - William Connell Park
 - Mixed-Used Medium Density areas
- The Provincial Policy Statement (PPS, 2024) encourages growth in urban settlement areas to make efficient use of land and natural resources
- The current width of the right of way on West 5th Street in the study area south of Stone Church Road is 26.2 m.

Hamilton Urban Official Plan – Land Use Designations (Sch. E-1)

Existing Conditions – West 5th Street Previous Studies

- West 5th Street was recommended to be reconstructed in the **South Mountain Area Transportation Master Plan** (SMATMP 2000, reviewed in 2006). An urban cross-section (30 m road allowance) and widening was proposed (from 2 to 3 lanes to accommodate a centre turning lane) to be developed after the William Connell Park was developed (park completed in 2018).
- A Stormwater management pond was added as part of the **Mewburn and Sheldon Master Servicing Plan (2004)** and added with the park development.
- The 2018 Transportation Master Plan/ Cycling Master Plan, and the Hamilton Accelerated Active Transportation Master Plan (2024-2028, approved 2024) also upholds the need for a Bicycle lane to be included in the road reconstruction.

**The SMATMP Master Plan is over 10 years old.
The EA will seek to re-confirm the preferred plan for reconstructing West 5th Street.**

Problem & Opportunity

West 5th Street from Stone Church Road West to Rymal Road West is currently a rural cross-section road surrounded by urban growth. The study area has inadequate transportation to accommodate transportation needs, and there are discontinuous sidewalks and no cycling facilities. Previous studies have indicated a desire to reconstruct the street within the study area.

The segment of West 5th Street is experiencing significant neighbourhood changes from the recently-built William Connel City-Wide Park as well as new higher-density developments. Improvements to West 5th Street are required to accommodate existing and future transportation needs for pedestrians, cyclists, transit, and vehicles.

The City is seeking alternatives to implement a "complete streets" approach to enhance multimodal transportation, improve safety, increase tree canopy coverage, and support economic, social, and cultural connectivity in this rapidly evolving area. Improvements will also be evaluated to determine the preferred approach for traffic as well as active transportation (e.g., bike lanes, sidewalks, multi-use paths).

Transportation

Existing Conditions

West 5th Street is a north-south oriented two-lane road classified as a minor arterial road with a speed limit of 50 km/h.

Road Traffic

- Traffic volume is currently estimated at approximately 50-60% corridor capacity in its current configuration. Opportunities to improve intersection operations exist. Traffic forecasts are being developed as part of the traffic study to estimate traffic growth on the corridor.

Pedestrian Facilities

- A sidewalk is provided along sections of the east side of West 5th Street. The surface of the majority of the sidewalk is asphalt concrete, and some is in poor condition.

Cycling Facilities

- There is no dedicated cycling infrastructure within the study corridor. Existing cyclists using this corridor currently must share lanes with vehicles.

Public Transit Service

- The study corridor is not served by any transit routes and have no dedicated bus stops within its length.
- Transit routes on Stone Church Road West, Rymal Road West, and Upper James Street are accessible from residences within the study corridor.

Transportation Level of Service

Existing Conditions

The existing corridor was also reviewed to determine how well the modes of travel are functioning. The corridor has discontinuous sidewalks and lacks dedicated cycling infrastructure, which resulted in a poor Multi-Modal Level of Service (LOS) for those elements below.

Mode of Travel	Summary of LOS
Transit 	N/A No transit on West 5 th Street
Bicycles 	Poor No dedicated cycling infrastructure
Pedestrians 	Poor Discontinuous sidewalks throughout corridor
Automobiles 	Good - Fair Low lane utilization, short delays
Trucks 	Good - Fair Unimpeded movement, short delays

Natural Environment

Existing Conditions

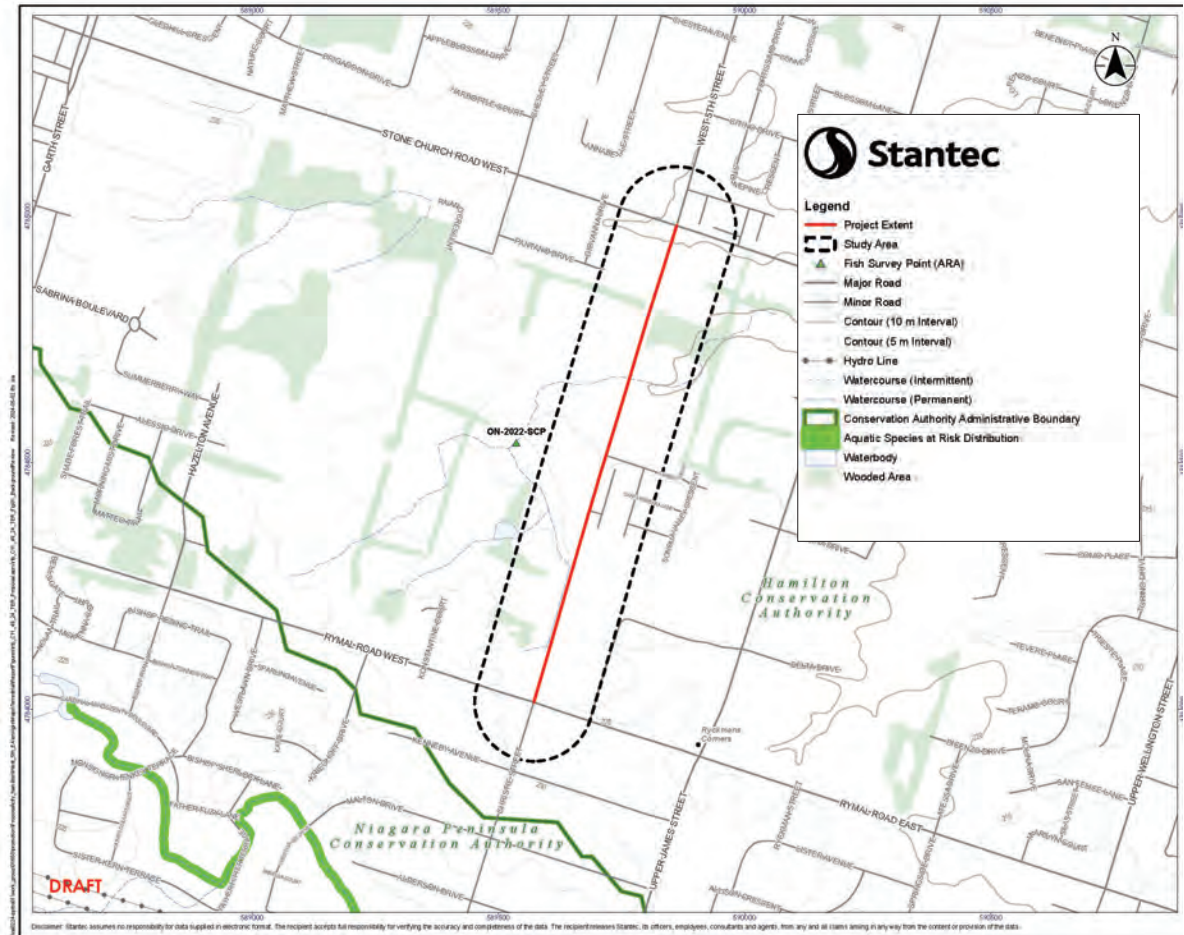

Completed Environmental Fieldwork

- Aquatic/Fish existing conditions inventory – October 17, 2024
- Tree inventory – October 24, 2024
- A Stage 1 Archaeological Assessment was completed on October 17, 2024. Recommendations for further study are pending.

Initial Results

- Woodlands and Conservation Authority Regulatory Areas are present
- Existing trees within the corridor
- No direct fish habitat is present. An intermittent watercourse was identified on background mapping. Stormwater feature is not connected to fish-bearing watercourses
- Roadside ditches on both sides are shallow with manicured grass on the west and small Phragmites (invasive species) patch to the east

Additional environmental fieldwork for migratory birds and consideration of Species at Risk (SAR) will be completed Spring/Summer 2025.

Alternative Solutions

The following high level Alternative Solutions may be considered for this corridor:

Do Nothing / Limited Development

No improvements would be undertaken, only regular maintenance and minor planned improvements will be in place. The City could also consider policy changes such as implementing restrictions on development in the areas adjacent to the study area to prevent increased traffic congestion on the existing network.

Operational Improvements

Implement localized measures to improve transit, active transportation, and localized roadway improvements to optimize accessibility and safety. These improvements can include cycling lanes, sidewalks, and crosswalks/crossrides.

Improve Other Roadways

Widen/enhance municipal roads other than West 5th Street to improve capacity and operations and provide congestion relief on existing facilities through additional lanes to increase the performance of the transportation network.

Improve West 5th Street

Widen/enhance West 5th Street to include a continuous (e.g. 3 lane cross-section) or intermittent left-turn lanes to improve traffic operations and safety given future travel demand. The right-of-way would be designed to accommodate pedestrians, cyclists, transit, vehicles, and commercial vehicles.

Alternative Solutions

The following Alternative Solutions were compared to assess their ability to address the problems and opportunities identified within the study area:

Evaluation Factors	Do Nothing / Limited Development	Operational Improvements	Improve Other Roadways	Improve West 5th Street
Natural Environment	Most Preferred	Moderately Preferred	Moderately Preferred	Moderately Preferred
Transportation/ Engineering	Least Preferred - no improvements to West 5 th Street	Most Preferred	Least Preferred	Most Preferred
Cultural Environment	Most Preferred	Moderately Preferred	Moderately Preferred	Moderately Preferred
Socio-Economic Environment	Least Preferred – does not align with Official Plan	Most Preferred	Moderately Preferred	Most Preferred
Financial	Least preferred - costly to maintain older infrastructure without improvement	Most Preferred	Least Preferred	Most Preferred
Summary	Least Preferred  Does not address the needs and opportunities for the study area. Do not carry forward.	Most Preferred  Partially Addresses the needs and opportunities for the study area. Carry forward.	Least Preferred  Does not address the needs and opportunities for the study area. Do not carry forward.	Most Preferred  Addresses the needs and opportunities for the study area. Carry forward.

Recommended Solutions

The following Alternative Solutions will be carried forward for further consideration in Phase 3 of the Class EA process (Alternative Designs) and evaluated using the factors and criteria presented:

- **Operational Improvements:** Implement localized measures to improve transit, active transportation, and roadway improvements to optimize accessibility and safety. These can include cycling lanes, sidewalks, and strategically located mid block crosswalks/crossrides.
- **Improve West 5th Street:** Widen/enhance West 5th Street to include a continuous (e.g. 3 lane cross-section) or intermittent left-turn lanes to improve traffic operations and safety given future travel demand. Update to an urban cross section with storm sewers. The right-of-way would be designed to accommodate pedestrians, cyclists, transit, vehicles, and commercial vehicles.

The actual cross-section configuration is subject to evaluation and refinements during the next steps (Phases 3 & 4) of the EA process

The addition of street trees will be reviewed in conjunction with other design elements such as sidewalks and utilities.

Example of the configuration of West 5th Street, north of Stone Church Road (Source: Google Streetview, 2024)

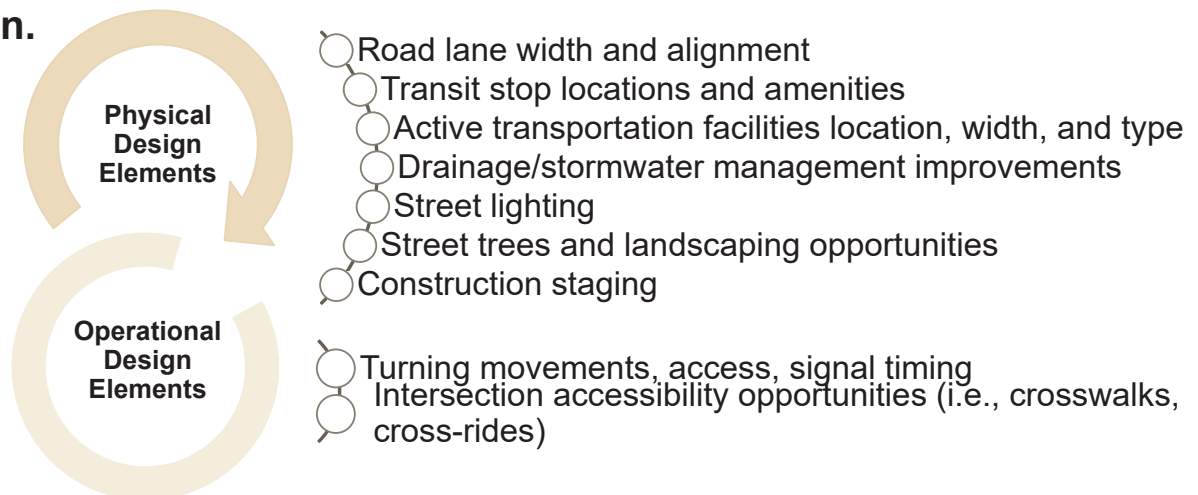

Complete Streets Concept

- To accommodate the additional demand, design strategies from the City of Hamilton's *Complete Streets Design Guidelines* may be adopted in the future design of this corridor.
- The "Complete Streets" concepts seek to incorporate roadways for cars, as well as cycling and pedestrian infrastructure.
- **Alternatives will be developed and evaluated for West 5th Street as part of this study. The final cross-section, which may include the addition of turn lanes and/or a Two-Way Left-Turn Lane (TWLTL), will vary based on the evaluation.**

Example of a cross-section from the *Hamilton Complete Streets Design Guidelines*.

Complete Streets considerations

Evaluation Criteria

During the next phase of the project, the Alternatives will be assessed using the factors and criteria below at the Alternative Designs phase. Comments received from agencies, stakeholders, Indigenous Nations and members of the public will be integrated as required.

Socio-Economic Environment

- Impacts to business operations
- Noise impacts
- Property and access
- Aesthetics & complete livable better streets
- Compatibility with existing and proposed developments

Natural Environment

- Vegetation and wildlife
- Water resources
- Air quality
- Climate change
- Stormwater management

Transportation/Engineering

- Accommodate future travel demands (capacity) for all modes
- Safety for all users (vehicles, pedestrians and cyclists)
- Public transit service
- Road network compatibility / connectivity
- Response times / access for emergency vehicles

Cultural Environment

- Archaeological resources
- Built heritage / cultural landscape resources

Financial

- Cost (i.e., capital cost, operational costs)

Next Steps

Following this PIC, the project team will complete the next steps below:

Review and respond to comments received

Continue to engage Indigenous Nations, and consult with the public and agencies

Confirm the Preferred Solution

Develop and evaluate Alternative Designs for the Preferred Solution

Complete technical studies

The Alternative Designs and project team recommendations will be presented at PIC 2, tentatively scheduled for Spring 2025.

Thank you!

Thank you for participating in this PIC for the West 5th Street Municipal Class Environmental Assessment study. Your feedback is valuable and appreciated. The displays will be added to the project website at: www.hamilton.ca/West5thEA

Transcript Public Information Centre #1 – January 16, 2025

Slide 1: Title Page

No text.

Slide 2: Welcome!

Welcome to the first Public Information Centre (or PIC) for the West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West. This project is a Municipal Class Environmental Assessment located within the City of Hamilton.

The purpose of this PIC is to:

- Introduce the project and why it is being undertaken
- Provide an overview of the process that this study is following
- Provide a summary of the Problems and Opportunities
- Present existing conditions within the study area
- Answer questions and provide an opportunity to get involved

We are interested in hearing from you. After reviewing the information in this presentation, we would appreciate your comments and feedback. Contact information is provided on the last slide if you have any questions that you wish to discuss with a member of the project team. Your input is important to us!

Slide 3: Land Acknowledgement

Before we begin with presenting the project details, it is important to acknowledge the Indigenous peoples who have had a long association with the land upon which the project and the City of Hamilton area located:

The City of Hamilton is situated upon the traditional territories of the Erie, Neutral, Huron-Wendat, Haudenosaunee and Mississaugas. This land is covered by the Dish With One Spoon Wampum Belt Covenant, which was an agreement between the Haudenosaunee and Anishinaabek to share and care for the resources around the Great Lakes. We further acknowledge that this land is covered by the Between the Lakes Purchase, 1792, between the Crown and the Mississaugas of the Credit First Nation.

Today, the City of Hamilton is home to many Indigenous people from across Turtle Island (North America) and we recognize that we must do more to learn about the rich history of this land so that we can better understand our roles as residents, neighbours, partners and caretakers.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 4: Project Overview

To better understand the project, we are answering the following three questions.

1. what are we doing,
2. why are we doing it, and
3. what does the study area include?

To answer the first, the City of Hamilton is planning for road reconstruction of West 5th Street, from Stone Church Road West to Rymal Road West.

Why are we doing it?

The purpose of this Municipal Class Environmental Assessment study is to support future growth and corridor needs for both the community and Hamilton.

What does the study include?

The EA will consider a “complete streets” solution to improve traffic, active transportation, transit, street trees, and stormwater management throughout the corridor.

The corridor is shown on the map which shows West 5th Street from Stone Church Road West to Rymal Road West. For the purposes of this PIC, we will refer to the corridor as only West 5th Street.

Slide 5: Municipal Class EA Process

The Municipal Class Environmental Assessment, or EA process, is a five-phase planning process that is approved under the *Ontario Environmental Assessment Act*. All Municipalities in Ontario are required to complete a Municipal Class EA when planning major infrastructure projects.

This project is being planned as a Schedule ‘C’ project, which means it includes Phase 1 through Phase 4 of the EA planning process. Following the EA, the project would proceed to Phase 5 implementation.

These phases of the EA process are summarized:

- Phase 1 includes reviewing background planning and policy documents and identifying the problem or opportunity
- Phase 2 involves completing inventories of the existing conditions (socio-economic, natural, and cultural environments)
- At the end of phase 2, we are developing and evaluating alternative solutions
- identifying the preferred solution

We are currently in Phase 2 of the study. This PIC is presenting the identification and evaluation of alternative solutions for public review and comment.

Following this PIC, the project enters Phase 3 which includes identifying the preferred alternative designs - which are alternative ways of implementing the preferred solution

In Phase 4 we will document the decision-making process in an Environmental Study Report (ESR) for the public and stakeholders to review and comment

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Continuous stakeholder engagement is part of the EA process, and comments or questions are encouraged at any time. The study includes opportunities for public input, including two Public Information Centres (PICs) and a 30-day review of the Environmental Study Report at the end of the project.

Slide 6: Existing Conditions – Land Use Context

The study area consists of primarily neighbourhood areas which serve residential land uses within the City. Open Space is present at William Connell Park, which was opened in 2018. Mixed-Use Medium Density areas are located to the east and south of the study area, primarily associated with the Rymal Road West Corridor and Upper James Street commercial areas. A figure is provided which shows the Official Plan land use context from the Urban Official Plan.

The 2024 Provincial Policy Statement encourages growth in urban settlement areas to make efficient use of land and natural resources.

The City of Hamilton Official Plan protects a future West 5th Street right of way width of 30.480 m within the study area to account for future improvements.

Slide 7: West 5th Street Previous Studies

West 5th Street was recommended to be reconstructed in the *South Mountain Area Transportation Master Plan* (SMATMP 2000, reviewed in 2006). An urban cross-section (30 m road allowance) and widening was proposed (from 2 to 3 lanes to accommodate a centre turning lane) to be developed after the William Connell Park was developed (park completed in 2018).

A stormwater management pond was added as part of the *Mewburn and Sheldon Master Servicing Plan* (2004) and added with the park development. The local drainage context along West 5th Street will be reviewed to consider the road reconstruction in relation to this nearby infrastructure.

The *2018 Transportation Master Plan/ Cycling Master Plan*, and the *Hamilton Accelerated Active Transportation Master Plan (2024-2028, approved 2024)* also upholds the need for a Bicycle lane to be included in the road reconstruction.

The SMATMP Master Plan is older than 10 years old. EAs in Ontario are only valid for a 10 year time period.

The EA will seek to confirm the preferred plan for reconstructing West 5th Street. The current study will also consider the potential to incorporate the recommendations from the recent Master Plans for this area.

Slide 8: Problem & Opportunity Statement

The Problem and Opportunity statement is developed to provide an overview of the issues to be addressed, as well as potential outcomes that may be achieved.

There are two primary issues that need to be addressed:

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

- West 5th Street from Stone Church Road West to Rymal Road West is currently a rural cross-section road surrounded by urban growth. The study area has inadequate transportation to accommodate transportation needs, and there are discontinuous sidewalks and no cycling facilities. Previous studies have indicated a desire to reconstruct the street within the study area.
- The segment of West 5th Street is experiencing significant neighbourhood changes from the recently-built William Connel City-Wide Park as well as new higher-density developments. Improvements to West 5th Street are required to accommodate existing and future transportation needs for pedestrians, cyclists, transit, and vehicles.

This presents an opportunity for the City to address the above infrastructure needs and to accommodate the need to add additional modes of transportation to the corridor.

- The City is seeking alternatives to implement a "complete streets" approach to enhance multimodal transportation, improve safety, increase tree canopy coverage, and support economic, social, and cultural connectivity in this rapidly evolving area. Improvements will also be evaluated to determine the preferred approach for traffic as well as active transportation (e.g., bike lanes, sidewalks, multi-use paths).

Slide 9: Transportation Existing Conditions

The project team reviewed the transportation existing conditions according to four key factors:

- Road Traffic
- Pedestrian Facilities
- Cycling Facilities, and
- Public Transit Services

Road traffic volume is currently estimated at approximately 50-60% corridor capacity in its current configuration. Opportunities to improve intersection operations exist. Traffic forecasts are being developed as part of the traffic study to estimate traffic growth on the corridor.

Pedestrian facilities are limited. A sidewalk is provided along sections of the east side of West 5th Street. The surface of the majority of the sidewalk is asphalt concrete, and some is in poor condition.

There is no dedicated cycling infrastructure within the study corridor. Existing cyclists using this corridor currently must share lanes with vehicles.

Finally, the study corridor is not served by any transit routes. Transit routes are provided on nearby streets only.

A map is provided on this slide which shows the location of signalized intersections to the north and South of the study area on Rymal Road West and Stone Church Road West. There is one unsignalized intersection mid-corridor.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 10: Transportation Existing Conditions Level of Service

A Traffic Study was completed to review available data for the West 5th Street study area. The existing corridor was reviewed to determine how well the modes of travel are functioning. The corridor has discontinuous sidewalks and lacks dedicated cycling infrastructure, which resulted in a poor Multi-Modal Level of Service (LOS) for those elements.

Infrastructure for bicycles scored poor due to the lack of dedicated infrastructure. The existing sidewalk configuration is poor since there are gaps between them and they are discontinuous. Transit infrastructure is not present.

Automobile and truck movements are considered “good to fair” due to low lane utilization and short delays. This identifies that there is a not a lack of capacity within the existing road network to be addressed.

Slide 11: Natural Environment Existing Conditions

The EA process includes the review of existing natural, cultural, and socio-economic environments that must be considered during the development and assessment of alternatives.

Environmental fieldwork is underway, with some natural and aquatic fall investigations completed. A tree inventory and a Stage 1 archaeological assessment were conducted this fall to assist with future evaluation of alternatives.

The map on this slide shows the results of the preliminary review of natural heritage features where woodlands and Conservation Authority Regulated Areas are present. An intermittent watercourse was identified on background mapping. It is not considered direct fish habitat based on preliminary work to date. The stormwater feature is not connected to fish-bearing watercourses.

Roadside ditches on both sides are shallow with manicured grass on the west and small Phragmites (invasive species) patch to the east.

Additional environmental investigations will be completed in Spring/Summer 2025.

Slide 12: Alternative Solutions

This EA study is considering alternatives for the improvement of the West 5th Street corridor. Four alternative solutions were considered for this project. The alternatives are:

Do Nothing / Limited Development: No improvements would be undertaken. Only regular maintenance and planned improvements will be in place. Development opportunities may be limited over time as the road quality degrades and traffic congestion increases on the existing network.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Operational Improvements: Implement localized measures to improve transit, active transportation, and localized roadway improvements to optimize accessibility and safety. These improvements can include cycling lanes, sidewalks, and crosswalks/crossrides.

Improve Other Roadways: Widen/enhance municipal roads other than West 5th Street to improve capacity and operations and provide congestion relief on existing facilities through additional lanes to increase the performance of the transportation network.

Improve West 5th Street: Widen/enhance West 5th Street to include a continuous (e.g. 3 lane cross-section) or intermittent left-turn lanes to improve traffic operations and safety given future travel demand. The right-of-way would be designed to accommodate pedestrians, cyclists, transit, vehicles, and commercial vehicles.

Slide 13: Alternative Solutions

This slide shows the comparison of alternative solutions identified within the study area. It also identifies how well the potential alternatives address the needs and opportunities of this study.

Do Nothing/ Limited Development: This alternative does not offer improvements to West 5th Street and it does not address road condition or infrastructure needs. The natural and cultural environment categories are shown as most preferred, however this is due to there being no improvements which does not satisfy the City's goal to improve the road corridor. The alternative cannot satisfy the problem/opportunity statement, and it is not carried forward for further evaluation.

Operational Improvements: This is considered a most preferred alternative. There are potential operational improvements that can be made to improve connectivity and transit along the corridor which satisfies the transportation/engineering category. Mitigation measures are anticipated to be available for local natural and cultural environment improvements. The alternative addresses infrastructure needs, which may reduce long-term financial maintenance. Operational Improvements has potential to satisfy the problem/opportunity statement.

Improve Other Roadways: This is a least preferred option. Potential for natural, cultural or socio-economic changes are identified as moderate on West 5th Street as primary impacts would occur elsewhere to minimize changes on West 5th Street. However, congestion relief elsewhere does not change the need to improve connectivity along West 5th Street or to address existing road conditions. Potentially higher costs to upgrade higher capacity nearby roads would make this option cost prohibitive. The alternative cannot satisfy the problem/opportunity statement, and it is not carried forward for further evaluation.

Improve West 5th Street: This is a most preferred alternative. The alternative addresses the problem and opportunity statement by making local road improvements, while it also has the potential to address connectivity for many modes of travel. Mitigation measures are anticipated to be available for local natural and cultural environment improvements. The alternative addresses infrastructure needs, which may reduce long-term financial maintenance. Improving West 5th Street has potential to satisfy the problem/opportunity statement.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 14: Recommended Solutions

The following Alternative Solutions will be carried forward for further consideration in Phase 3 of the Class EA process (Alternative Designs) and evaluated using the factors and criteria presented:

- **Operational Improvements:** Implement localized measures to improve transit, active transportation, and roadway improvements to optimize accessibility and safety. These improvements can include cycling lanes, sidewalks, and strategically located mid block crosswalks/crossrides.
- **Improve West 5th Street:** Widen/enhance West 5th Street to include a continuous (e.g. 3 lane cross-section) or intermittent left-turn lanes to improve traffic operations and safety given future travel demand. Update to an urban cross section with storm sewers. The right-of-way would be designed to accommodate pedestrians, cyclists, transit, vehicles, and commercial vehicles.

These two alternatives will be carried forward to Phase 3 of the EA study: Development of Design Alternatives for further evaluation of potential road layouts.

The nearby road cross section of West 5th Street north of Stone Church Road is shown as an example of a continuous centre turn lane. The actual cross-section or need for a continuous turn lane is subject to evaluation and refinements during the next steps (Phase 3 and 4) of the EA process. The addition of street trees will be reviewed in conjunction with the other design elements such as sidewalks and utilities.

Slide 15: Complete Streets Concept

To accommodate the additional demand, design strategies from the City of Hamilton's *Complete Streets Design Guidelines* may be adopted in the future design of this corridor. The "Complete Streets" concepts seek to incorporate roadways for cars, as well as cycling and pedestrian infrastructure.

Complete Streets concept considerations include Physical and Operational Design elements.

Physical Design elements consist of:

- Road lane width and alignment
- Transit stop locations and amenities
- Active transportation facilities location, width, and type
- Drainage/stormwater management improvements
- Street lighting
- Street tree opportunities
- Construction staging

Operational Design elements consist of:

- Turning movements, access, signal timing
- Intersection accessibility opportunities (i.e., crosswalks, cross-rides)

Alternatives will be developed and evaluated for West 5th Street as part of this study. The final cross-section, which may include the addition of turn lanes and/or a Two-Way Left-Turn Lane (TWLTL), will vary based on the evaluation.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 16: Evaluation Criteria

During the next phase of the project, the Alternatives will be assessed using the factors and criteria below at the Alternative Designs phase. Comments received from agencies, stakeholders, Indigenous Nations and members of the public will be integrated as required.

Categories include Socio-Economic Environment, Natural Environment, Transportation and Engineering, Cultural Environment, and Financial considerations. Various sub-factors are shown which will help expand upon these categories and address the EA requirements.

Slide 17: Next Steps

Following this PIC, the project team will complete the next steps below:

- Review and respond to comments received
- Continue to engage Indigenous Nations, and consult with the public and agencies
- Confirm the Preferred Solution
- Develop and evaluate Alternative Designs for the Preferred Solution
- Complete technical studies. These studies include the Stage 1 archaeological assessment, the terrestrial and aquatic investigations, drainage investigation, and traffic improvement analysis.

The Alternative Designs and project team recommendations will be presented at PIC 2, tentatively scheduled for May 2025.

Slide 18: Thank you!

Thank you for participating in this PIC for the West 5th Street Municipal Class Environmental Assessment study. Your feedback is valuable and appreciated.

Contact information is provided on the slide for the City of Hamilton and the project manager for Stantec Consulting Limited. You can also visit the project website for more information at:
www.hamilton.ca/west5thea

Following this PIC, the displays will be posted to the City of Hamilton website where you can also find the contact information and email addresses to provide comments to the project team.

Thank you once again for your interest in this study.

COMMENT FORM

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West

Public Information Centre 1, Westmount Recreation Centre

Thursday, January 16, 2025, 6:00 pm – 8:00 pm

Thank you for attending this Public Information Centre. Please provide your comments and use the back of this sheet if you need more space. Visit the project website at www.hamilton.ca/West5thEA for project information or to submit additional comments. The PIC displays will also be available on the project website.

Do you have any comments on the existing conditions or evaluation presented?

Do you have any comments on the preferred Alternative, or any other comments?

Would love to see dedicated bike lane, similar to Rymal (East & West of Bath), as well as on the west side of Bath.

Please leave your completed comment sheet in the drop box provided or submit to the project team by **January 30, 2025** to:

Isaac Bartlett, Project Manager – Sr. Associate, Transportation

Public Comments			
Anonymous	January 16, 2025 Comment Form – PIC1	Would love to see dedicated bike lane, similar to Rymal (East and West of Garth), as well as on the west side of Garth.	Noted by the project team
Anonymous	January 30, 2025 Comment Form online	Please add a sidewalk on West 5th so it is possible to walk to the William Connell Park without walking on the street.	Noted by the project team
Anonymous	January 22, 2025 Comment Form online	As a local resident I am highly supportive of a complete streets approach with protected cycling infrastructure suitable for All Ages and Abilities on this segment of West 5 th West 5 th between Stone Church and Rymal provides access to William Connell Park, which is fantastic City-Wide Park that is currently difficult to access except by car. There is also immense potential in forming part of a continuous cycling network along West 5 th for North-South travel, connecting to Mohawk College and the Keddy Access Trail. In addition, it provides a nearby parallel route to Upper James – this is unique to Hamilton Mountain's road grid and represents a great opportunity to create a strong active transportation backbone to support new development in the area. The Recreational Trails Master Plan also proposes an east-west connection that will intersect West 5 th within this block. All in all, I am very excited at the prospect of complete streets on the West/ Central Mountain, and hope to see it come to fruition.	Noted by the project team
	January 10, 2025 Olivia Stanciu call with [REDACTED]	Telephone call summary I talked to the resident of [REDACTED] Her complaint mostly is regarding the property tax increase, which I've asked her to reach out to the City's Tax Dept. Regarding the West 5th EA, she wants sidewalk on her side of the property, as she feels unsafe on the road when walking. I will file this comment for the sidewalk part.	Telephone call completed.
Matthew LeBlanc, MCIP, RPP (representative of M. Valvasori) <i>Planner</i> 3 Studebaker Place, Unit 1, Hamilton, ON L8L 0C8 (905) 546-1087 C: (905) 467-6334 Email: mleblanc@urbansolutions.info	January 9, 2025 Email	Good afternoon, Hope you enjoyed your holidays! Please see the attached letter prepared by our office on behalf of the owner of 1177, 1183, and 1187 West 5th Street, in relation to the West 5th Street Municipal Class Environmental Assessment project currently underway. As requested in the Letter, please kindly advise when you have availability for a quick meeting to discuss the EA process in relation to the subject lands. Matt (copied) and I are planning to attend the Public Information Centre Meeting on January 16th, so we will see you then! Urban Solutions Letter (January 9, 2025) regarding City of Hamilton Council Bylaw 23-188 (via ZAC-22-047) which permitted the development of a 10 storey multiple dwelling building on the site. Information was provided regarding the holding provision. The letter identified the City issued a Conditional Site Plan for the site on September 12, 2024.	Meeting held regarding the property. The discussion occurred regarding the zoning amendment – which is final and in place. The EA is looking at the potential of urbanization for the storm sewer within the corridor; we look at any recommendation to update the stormsewer within the corridor and the traffic study recommendation for a turning lane in the centre. Sanitary upgrades might be considered before the construction for EA will start, but not part of this EA.

		The letter requested a meeting regarding this property.	
James Thomas. CPT, HBA Planner A. J. Clarke and Associates Ltd. 25 Main Street West, Suite 300, Hamilton, ON L8P 1H1 Phone: (905) 528-8761 james.thomas@ajclarke.com	December 19, 2024/ December 20, 2024 Email	<p>Good afternoon,</p> <p>My name is James Thomas, a planner with A.J. Clarke & Associates Ltd. I am currently drafting a Planning Justification Report and preparing submission of a Zoning By-law Amendment for lands fronting this section of West 5th.</p> <p>While I understand this is early in the process, I hope that I may be able to obtain some of the information that will be presented on January 16th ahead of time as I will be out of the country on the date of the public meeting. I intend to have the complete submission in by the end of January, so the quicker I can evaluate some of the proposed designs the better.</p> <p>Our transportation consultant provided very high-level expected improvements from this anticipated EA within their Transportation Impact Study – to the best of their knowledge. This included the likelihood of extending the cycling infrastructure, sidewalks, a likely middle turning lane, and the current Concept Plan for a proposed transit line along West 5th. We also received formal consultation comments from public works in January 2024 that the City was intending on tarting construction in 2026.</p> <p>December 20, 2024: Morning, Olivia, Thank you for getting back. It would seem the Public Works comments provided in our FC Document were a bit hasty as they stated “West 5th Street is scheduled to be reconstructed and urbanized in 2026. Nonetheless, I will be looking to get as much info as I can when it’s available to ensure appropriate design, development, and timelines. Happy Holidays!</p>	<p>Response December 19, 2025</p> <p>Good morning James, Thank you for reaching out! We are presently in Phase 2 of the EA process, establishing alternative solutions to improve West 5th. Currently there are no designs. After the first PIC, we will be moving to Phase 3, which will be developing alternative designs. For information about the project, please visit the project’s website at www.hamilton.ca/West5thEA. The PIC panels will be published around January 13th, 2025.</p> <p>We are looking at improving traffic, active transportation, transit, and stormwater management for this corridor. This EA is scheduled to be completed by the end of 2025. Then the project will be moving to detailed design, which will take 2 years to be completed. So construction will most likely start in 2028, if no delays are to happen. If you have any questions, please don’t hesitate to reach out to me.</p> <p>Thank you! Kind regards,</p>

UNCLASSIFIED / NON CLASSIFIÉ

Greetings,

Thank you for your correspondence. **Can you please update your mailing list and remove us from paper mailings? Digital enquiries and notices can be directed to this email address.**

Please note Transport Canada does not require receipt of all Individual or Class EA related notifications. We request that project proponents self-assess whether their project:

1. Will interact with a federal property and/or waterway by reviewing the Directory of Federal Real Property, available at www.tbs-sct.gc.ca/dfrp-rbif/; **and**
2. Will require approval and/or authorization under any Acts administered by Transport Canada* available at <http://www.tc.gc.ca/eng/acts-regulations/menu.htm>.

Proposed projects that will occur on federal property (including reserve lands or lands owned by federal departments other than Transport Canada) will be subject to an Impact Assessment per Section 82 of the *Impact Assessment Act, 2019* prior to exercising a federal power (including full or

partial funding), and/or performing a function or duty (e.g. regulatory approval or issuance of a lease) in relation to that project.

If the criteria above do not apply, Transport Canada's Environmental Assessment program should not be included in any further correspondence, and future notifications will not receive a response. If there is a role under the program, correspondence should be forwarded to: EnviroOnt@tc.gc.ca with a **brief description of Transport Canada's expected role**.

*Below is a summary of the most common Acts that apply to projects in an Environmental Assessment context:

- **Canadian Navigable Waters Act (CNWA)** – the Act applies primarily to works constructed or placed in, on, over, under, through, or across navigable waters set out under the Act. The Navigation Protection Program administers the CNWA through the review and authorization of works affecting navigable waters. Information about the Program, CNWA and approval process is available at: <http://www.tc.gc.ca/eng/programs-621.html>. Inquiries can be directed to NPPONT-PPNONT@tc.gc.ca or by calling (519) 383-1863.
- **Railway Safety Act (RSA)** – the Act provides the regulatory framework for railway safety, security, and some of the environmental impacts of railway operations in Canada. The Rail Safety Program develops and enforces regulations, rules, standards and procedures governing safe railway operations. Additional information about the Program is available at: <https://www.tc.gc.ca/eng/railsafety/menu.htm>. Inquiries can be directed to RailSafety@tc.gc.ca or by calling (613) 998-2985.
- **Transportation of Dangerous Goods Act (TDGA)** – the transportation of dangerous goods by air, marine, rail and road is regulated under the TDGA. Transport Canada, based on risks, develops safety standards and regulations, provides oversight and gives expert advice on dangerous goods to promote public safety. Additional information about the transportation of dangerous goods is available at: <https://www.tc.gc.ca/eng/tdg/safety-menu.htm>. Inquiries can be directed to TDG-TMDOntario@tc.gc.ca or by calling (416) 973-1868.
- **Aeronautics Act** – this Act and the associated Canadian Aviation Regulations (CARs) govern civil aviation in Canada. Transport Canada should be notified of projects involving aerodromes and associated structures, or activities that could affect aviation safety. Elevated structures, such as wind turbines and communication towers, are examples of projects that must be assessed for lighting and marking requirements in accordance with the CARs. Transport Canada also has an interest in projects that have the potential to cause interference between wildlife and aviation activities. One example would be waste facilities, which may attract birds into commercial and recreational flight paths. Additional guidance can be found in the *Land Use In The Vicinity of Aerodromes* publication, available at: <https://www.tc.gc.ca/eng/civilaviation/publications/tp1247-menu-1418.htm>. Information about Transport Canada's Civil Aviation program can be found at: <https://tc.canada.ca/en/aviation>. Inquires can be directed to aviation.ont@tc.gc.ca or by calling 1 (800) 305-2059 / (416) 952-0230.

Please advise if additional information is needed.

MCM File : 0022642
Proponent : City of Hamilton
Subject : Type of EA – Schedule C – Notice of Commencement and Public Information #1
Project : West 5th Street (Stone Church Road West to Rymal Road West)
Location : Hamilton, Ontario

Dear Olivia Stanciu:

Thank you for providing the Ministry of Citizenship and Multiculturalism (MCM) with the Notice of Commencement for the above-referenced project.

MCM's interest in this project relates to its mandate of conserving Ontario's cultural heritage, which includes:

- archaeological resources, including land and marine;
- built heritage resources, including bridges and monuments; and
- cultural heritage landscapes.

Under the EA process, the proponent is required to determine a project's potential impact on known (previously recognized) and potential cultural heritage resources.

Project Summary

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Identifying Cultural Heritage Resources

While some cultural heritage resources may have already been formally identified, others may be identified through screening and evaluation.

Archaeological Resources

Our records indicate that a Stage 1 archaeological assessment (under Project Information Form number P394-0127-2024) has been initiated. We recommend that the licensed archaeologist submit the report to MCM prior to the issuance of the notice of completion.

Please note that archaeological concerns have not been fully addressed until reports have been entered into the Ontario Public Register of Archaeological Reports ('the Register') where those reports recommend that:

1. the archaeological assessment of the project area is complete and
2. all archaeological sites identified by the assessment are either of no further cultural heritage value or interest (as per Section 48(3) of the Ontario Heritage Act) or that mitigation of impacts has been accomplished through excavation or an avoidance and protection strategy.

Approval authorities and/or proponents should wait to receive the MCM's written confirmation that the archaeological assessment report(s) has been entered into the Register before issuing a decision or proceeding with any ground disturbing activities. The letter will also indicate either that there are no further concerns for impacts to archaeological resources or articulate next steps to mitigate those concerns.

Proponents must follow the recommendations of the archaeological assessment report(s). MCM recommends that further stages of archaeological assessment (if recommended) be undertaken as early as possible during detailed design and prior to any ground disturbing activities.

Built Heritage Resources and Cultural Heritage Landscapes

The Ministry's [Criteria for Evaluating Potential for Built Heritage Resources and Cultural Heritage Landscapes](#) should be completed to help determine whether this EA project may impact known or potential built heritage resources and/or cultural heritage landscapes.

If there is potential for built heritage resources and/or cultural heritage landscapes within the project area, then a Cultural Heritage Report: Existing Conditions and Preliminary Impact Assessment should be undertaken for the entire study area during the planning phase and will be summarized in the EA Report. This study will:

1. Describe the existing baseline cultural heritage conditions within the study area by identifying all known or potential built heritage resources and cultural heritage landscapes, including a historical summary of the study area. The Ministry has developed a screening checklist that may assist with this exercise: [Criteria for Evaluating for Potential Built Heritage Resources and Cultural Heritage Landscapes](#).
2. Identify preliminary potential project-specific impacts on the known and potential built heritage resources and cultural heritage landscapes that have been identified. The report should include a description of the anticipated impact to each known or potential built heritage resource or cultural heritage landscape that has been identified.
3. Recommend measures to avoid or mitigate potential negative impacts to known or potential built heritage resources and cultural heritage landscapes. The proposed mitigation measures are to inform the next steps of project planning and design.

Given that this project covers a large study area, MCM recommends that the Cultural Heritage Report is carried out so that step 1 described above is undertaken early in the planning process. Then, steps 2 and 3 can be undertaken once the preferred alternatives have been selected.

Cultural Heritage Reports will be undertaken by a qualified person who has expertise, recent experience, and knowledge relevant to the type of cultural heritage resources being considered and the nature of the activity being proposed.

Community input should be sought to identify locally recognized and potential cultural heritage resources. Sources include, but are not limited to, municipal heritage committees, historical societies and other local heritage organizations.

Cultural heritage resources are often of critical importance to Indigenous communities. Indigenous communities may have knowledge that can contribute to the identification of cultural heritage resources, and we suggest that any engagement with Indigenous communities includes a discussion about known or potential cultural heritage resources that are of value to them.

Environmental Assessment Reporting

All technical cultural heritage studies and their recommendations are to be addressed and incorporated into EA projects. Please advise MCM whether any technical cultural heritage studies will be completed for this EA project, and provide them to MCM before issuing a Notice of Completion. If screening has identified no known or potential cultural heritage resources, or no impacts to these resources, please include the completed checklists and supporting documentation in the EA report or file.

Please note that the responsibility for administration of the *Ontario Heritage Act* and matters related to cultural heritage have been transferred from the Ministry of Tourism, Culture and Sport (MTCS) to the Ministry of Citizenship and Multiculturalism (MCM). Individual staff roles and contact information remain unchanged. Please continue to send any notices, report and/or documentation **via email only** to both Karla Barboza and myself.

- Karla Barboza, Team Lead - Heritage | Heritage Planning Unit (Citizenship and Multiculturalism) | 416-660-1027 | karla.barboza@ontario.ca
- Dan Minkin, Heritage Planner | Heritage Planning Unit (Citizenship and Multiculturalism) | 416.786.7553 | dan.minkin@ontario.ca

Thank you for consulting MCM on this project and please continue to do so throughout the EA process. If you have any questions or require clarification, please do not hesitate to contact me.

Sincerely,

Dan Minkin
Heritage Planner
dan.minkin@ontario.ca

Copied to: Isaac Bartlett, Stantec

It is the sole responsibility of proponents to ensure that any information and documentation submitted as part of their EA report or file is accurate. The Ministry of Citizenship and Multiculturalism (MCM) makes no representation or warranty as to the completeness, accuracy or quality of the any checklists, reports or supporting documentation submitted as part of the EA process, and in no way shall MCM be liable for any harm, damages, costs, expenses, losses, claims or actions that may result if any checklists, reports or supporting documents are discovered to be inaccurate, incomplete, misleading or fraudulent.

Should previously undocumented archaeological resources be discovered, they may be a new archaeological site and therefore subject to Section 48(1) of the *Ontario Heritage Act*. The proponent or person discovering the archaeological resources must cease alteration of the site immediately and engage a licensed consultant archaeologist to carry out an archaeological assessment, in compliance with Section 48(1) of the *Ontario Heritage Act*.

The *Funeral, Burial and Cremation Services Act, 2002*, S.O. 2002, c.33 requires that any person discovering human remains must cease all activities immediately and notify the police or coroner. If the coroner does not suspect foul play in the disposition of the remains, in accordance with *Ontario Regulation 30/11* the coroner shall notify the Registrar, Ontario Ministry of Public and Business Service Delivery, which administers provisions of that Act related to burial sites. In situations where human remains are associated with archaeological resources, the Ministry of Citizenship and Multiculturalism should also be notified (at archaeology@ontario.ca) to ensure that the archaeological site is not subject to unlicensed alterations which would be a contravention of the *Ontario Heritage Act*.

Subject: West 5th St EA - Notice of Commencement and PIC#1

CAUTION -- EXTERNAL E-MAIL - Do not click links or open attachments unless you recognize the sender.

Good morning,

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) to address transportation challenges along West 5th Street (Stone Church Road West to Rymal Road West). On Thursday, January 16th, 2025, we will be holding the project's first Public Information Centre. Further information can be found in the attached document or on our webpage:
<https://www.hamilton.ca/West5thEA>.

Thank you!

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)

Re: **West 5th Street EA**
City of Hamilton
Municipal Class Environmental Assessment, Schedule C
Acknowledgement of Notice of Commencement

Dear Project Team,

This letter is in response to the Notice of Commencement for the above noted project. The Ministry of the Environment, Conservation and Parks (MECP) acknowledges that the City of Hamilton (proponent) has indicated that the study is following the approved environmental planning process for a Schedule C project under the Municipal Class Environmental Assessment (Class EA).

The **updated (August 2022)** attached "Areas of Interest" document provides guidance regarding the ministry's interests with respect to the Class EA process. Please address all areas of interest in the EA documentation at an appropriate level for the EA study. Proponents who

address all the applicable areas of interest can minimize potential delays to the project schedule. Information is provided at the end of the Areas of Interest document relating to the Notice of Completion.

The Crown has a legal duty to consult Aboriginal communities when it has knowledge, real or constructive, of the existence or potential existence of an Aboriginal or treaty right and contemplates conduct that may adversely impact that right. Before authorizing this project, the Crown must ensure that its duty to consult has been fulfilled, where such a duty is triggered. Although the duty to consult with Aboriginal peoples is a duty of the Crown, the Crown may delegate procedural aspects of this duty to project proponents while retaining oversight of the consultation process.

The proposed project may have the potential to affect Aboriginal or treaty rights protected under Section 35 of Canada's *Constitution Act* 1982. Where the Crown's duty to consult is triggered in relation to the proposed project, **the MECP is delegating the procedural aspects of rights-based consultation to the proponent through this letter.** The Crown intends to rely on the delegated consultation process in discharging its duty to consult and maintains the right to participate in the consultation process as it sees fit.

Based on information provided to date and the Crown's preliminary assessment the proponent is required to consult with the following communities who have been identified as potentially affected by the proposed project:

- Mississaugas of the Credit
- Six Nations of the Grand River (both elected and Haudenosaunee Confederacy Chiefs Council (HCCC) / Haudenosaunee Development Institute (HDI))
 - both the elected council and HCCC claim to represent the Six Nations Community. The HCCC is the traditional council and the SNGR elected was established by Canada pursuant to the Indian Act, 1924.

Steps that the proponent may need to take in relation to Aboriginal consultation for the proposed project are outlined in the "[Code of Practice for Consultation in Ontario's Environmental Assessment Process](#)". Additional information related to Ontario's Environmental Assessment Act is available online at: www.ontario.ca/environmentalassessments.

Please also refer to the attached document "A Proponent's Introduction to the Delegation of Procedural Aspects of consultation with Aboriginal Communities" for further information, including the MECP's expectations for EA report documentation related to consultation with communities.

The proponent must contact the Director of Environmental Assessment Branch (EABDirector@ontario.ca) under the following circumstances after initial discussions with the communities identified by the MECP:

- Aboriginal or treaty rights impacts are identified to you by the communities;
- You have reason to believe that your proposed project may adversely affect an Aboriginal or treaty right;
- Consultation with Indigenous communities or other stakeholders has reached an impasse; or
- A Section 16 Order request is expected based on impacts to Aboriginal or treaty rights

The MECP will then assess the extent of any Crown duty to consult for the circumstances and will consider whether additional steps should be taken, including what role you will be asked to play should additional steps and activities be required.

A draft of the report should be sent directly to me prior to the release of the final report through the issuance of the Notice of Completion, allowing a minimum of 30 days for the ministry's technical reviewers to provide comments on the draft report.

Please also ensure a copy of the Notice of Completion is sent to the ministry's West Central Region EA notification email account (eanotification.wcregion@ontario.ca) after the draft report and Notice of Completion is reviewed and finalized.

Should you or any members of your project team have any questions regarding the material above, please contact me at joan.delvillarcuicas@ontario.ca.

Sincerely,

Joan Del Villar Cuicas
Regional Environmental Planner – West Central Region
Project Review Unit, Environmental Assessment Branch

Cc: Gamble, Jeremy, Hamilton District Office, MECP
Neil Hannington, Hamilton Distrust Office, MECP

Enclosed: Areas of Interest

Attached: Client's Guide to Preliminary Screening for Species at Risk

A Proponent's Introduction to the Delegation of Procedural Aspects of Consultation with Aboriginal Communities

AREAS OF INTEREST (v. August 2022)

It is suggested that you check off each section after you have considered / addressed it.

Planning and Policy

- Applicable plans and policies should be identified in the report, and the proponent should describe how the proposed project adheres to the relevant policies in these plans.
 - Projects located in MECP Central, Eastern or West Central Region may be subject to [A Place to Grow: Growth Plan for the Greater Golden Horseshoe \(2020\)](#).
 - Projects located in MECP Central or Eastern Region may be subject to the [Oak Ridges Moraine Conservation Plan \(2017\)](#) or the [Lake Simcoe Protection Plan \(2014\)](#).
 - Projects located in MECP Central, Southwest or West Central Region may be subject to the [Niagara Escarpment Plan \(2017\)](#).
 - Projects located in MECP Central, Eastern, Southwest or West Central Region may be subject to the [Greenbelt Plan \(2017\)](#).
 - Projects located in MECP Northern Region may be subject to the [Growth Plan for Northern Ontario \(2011\)](#).
- The [Provincial Policy Statement \(2020\)](#) contains policies that protect Ontario's natural heritage and water resources. Applicable policies should be referenced in the report, and the proponent should describe how the proposed project is consistent with these policies.
- In addition to the provincial planning and policy level, the report should also discuss the planning context at the municipal and federal levels, as appropriate.

Source Water Protection

The *Clean Water Act*, 2006 (CWA) aims to protect existing and future sources of drinking water. To achieve this, several types of vulnerable areas have been delineated around surface water intakes and wellheads for every municipal residential drinking water system that is located in a source protection area. These vulnerable areas are known as a Wellhead Protection Areas (WHPAs) and surface water Intake Protection Zones (IPZs). Other vulnerable areas that have been delineated under the CWA include Highly Vulnerable Aquifers (HVAs), Significant Groundwater Recharge Areas (SGRAs), Event-based modelling areas (EBAs), and Issues Contributing Areas (ICAs). Source protection plans have been developed that include policies to address existing and future risks to sources of municipal drinking water within these vulnerable areas.

Projects that are subject to the Environmental Assessment Act that fall under a Class EA, or one of the Regulations, have the potential to impact sources of drinking water if they occur in designated vulnerable areas or in the vicinity of other at-risk drinking water systems (i.e. systems that are not municipal residential systems). MEA Class EA projects may include

activities that, if located in a vulnerable area, could be a threat to sources of drinking water (i.e. have the potential to adversely affect the quality or quantity of drinking water sources) and the activity could therefore be subject to policies in a source protection plan. Where an activity poses a risk to drinking water, policies in the local source protection plan may impact how or where that activity is undertaken. Policies may prohibit certain activities, or they may require risk management measures for these activities. Municipal Official Plans, planning decisions, Class EA projects (where the project includes an activity that is a threat to drinking water) and prescribed instruments must conform with policies that address significant risks to drinking water and must have regard for policies that address moderate or low risks.

- In October 2015, the MEA Parent Class EA document was amended to include reference to the Clean Water Act (Section A.2.10.6) and indicates that proponents undertaking a Municipal Class EA project must identify early in their process whether a project is or could potentially be occurring with a vulnerable area. **Given this requirement, please include a section in the report on source water protection.**
 - The proponent should identify the source protection area and should clearly document how the proximity of the project to sources of drinking water (municipal or other) and any delineated vulnerable areas was considered and assessed. Specifically, the report should discuss whether or not the project is located in a vulnerable area and provide applicable details about the area.
 - If located in a vulnerable area, proponents should document whether any project activities are prescribed drinking water threats and thus pose a risk to drinking water (this should be consulted on with the appropriate Source Protection Authority). Where an activity poses a risk to drinking water, the proponent must document and discuss in the report how the project adheres to or has regard to applicable policies in the local source protection plan. This section should then be used to inform and be reflected in other sections of the report, such as the identification of net positive/negative effects of alternatives, mitigation measures, evaluation of alternatives etc.
- While most source protection plans focused on including policies for significant drinking water threats in the WHPAs and IPZs it should be noted that even though source protection plan policies may not apply in HVAs, these are areas where aquifers are sensitive and at risk to impacts and within these areas, activities may impact the quality of sources of drinking water for systems other than municipal residential systems.
- In order to determine if this project is occurring within a vulnerable area, proponents can use [Source Protection Information Atlas](#), which is an online mapping tool available to the public. Note that various layers (including WHPAs, WHPA-Q1 and WHPA-Q2, IPZs, HVAs, SGRAs, EBAs, ICAs) can be turned on through the “Map Legend” bar on the left. The mapping tool will also provide a link to the appropriate source protection plan in order to identify what policies may be applicable in the vulnerable area.

- For further information on the maps or source protection plan policies which may relate to their project, proponents must contact the appropriate source protection authority. **Please consult with the local source protection authority to discuss potential impacts on drinking water. Please document the results of that consultation within the report and include all communication documents/correspondence.**

More Information

For more information on the *Clean Water Act*, source protection areas and plans, including specific information on the vulnerable areas and drinking water threats, please refer to [Conservation Ontario's website](#) where you will also find links to the local source protection plan/assessment report.

A list of the prescribed drinking water threats can be found in [section 1.1 of Ontario Regulation 287/07](#) made under the *Clean Water Act*. In addition to prescribed drinking water threats, some source protection plans may include policies to address additional "local" threat activities, as approved by the MECP.

Climate Change

The document "[Considering Climate Change in the Environmental Assessment Process](#)" (Guide) is part of the Environmental Assessment program's Guides and Codes of Practice. The Guide sets out the MECP's expectation for considering climate change in the preparation, execution and documentation of environmental assessment studies and processes. The guide provides examples, approaches, resources, and references to assist proponents with consideration of climate change in EA. Proponents should review this Guide in detail.

- **The MECP expects proponents of Class EA projects to:**
 1. Consider during the assessment of alternative solutions and alternative designs, the following:
 - a. the project's expected production of greenhouse gas emissions and impacts on carbon sinks (climate change mitigation); and
 - b. resilience or vulnerability of the undertaking to changing climatic conditions (climate change adaptation).
 2. Include a discrete section in the report detailing how climate change was considered in the EA.

How climate change is considered can be qualitative or quantitative in nature and should be scaled to the project's level of environmental effect. In all instances, both a project's impacts on climate change (mitigation) and impacts of climate change on a project (adaptation) should be considered.

- The MECP has also prepared another guide to support provincial land use planning direction related to the completion of energy and emission plans. The "[Community Emissions Reduction Planning: A Guide for Municipalities](#)" document is designed to educate stakeholders on the municipal opportunities to reduce energy and greenhouse gas emissions, and to provide guidance on methods and techniques to incorporate consideration of energy and greenhouse gas emissions into municipal activities of all types. We encourage you to review the Guide for information.

Air Quality, Dust and Noise

- If there are sensitive receptors in the surrounding area of this project, a quantitative air quality/odour impact assessment will be useful to evaluate alternatives, determine impacts and identify appropriate mitigation measures. The scope of the assessment can be determined based on the potential effects of the proposed alternatives, and typically includes source and receptor characterization and a quantification of local air quality impacts on the sensitive receptors and the environment in the study area. The assessment will compare to all applicable standards or guidelines for all contaminants of concern.
Please contact this office for further consultation on the level of Air Quality Impact Assessment required for this project if not already advised.
- If a quantitative Air Quality Impact Assessment is not required for the project, the MECP expects that the report contain a qualitative assessment which includes:
 - A discussion of local air quality including existing activities/sources that significantly impact local air quality and how the project may impact existing conditions;
 - A discussion of the nearby sensitive receptors and the project's potential air quality impacts on present and future sensitive receptors;
 - A discussion of local air quality impacts that could arise from this project during both construction and operation; and
 - A discussion of potential mitigation measures.
- As a common practice, "air quality" should be used an evaluation criterion for all road projects.
- Dust and noise control measures should be addressed and included in the construction plans to ensure that nearby residential and other sensitive land uses within the study area are not adversely affected during construction activities.
- The MECP recommends that non-chloride dust-suppressants be applied. For a comprehensive list of fugitive dust prevention and control measures that could be applied, refer to [Cheminfo Services Inc. Best Practices for the Reduction of Air Emissions from Construction and Demolition Activities](#) report prepared for Environment Canada. March 2005.

- The report should consider the potential impacts of increased noise levels during the operation of the completed project. The proponent should explore all potential measures to mitigate significant noise impacts during the assessment of alternatives.

Ecosystem Protection and Restoration

- Any impacts to ecosystem form and function must be avoided where possible. The report should describe any proposed mitigation measures and how project planning will protect and enhance the local ecosystem.
- Natural heritage and hydrologic features should be identified and described in detail to assess potential impacts and to develop appropriate mitigation measures. The following sensitive environmental features may be located within or adjacent to the study area:
 - Key Natural Heritage Features: Habitat of endangered species and threatened species, fish habitat, wetlands, areas of natural and scientific interest (ANSIs), significant valleylands, significant woodlands; significant wildlife habitat (including habitat of special concern species); sand barrens, savannahs, and tallgrass prairies; and alvars.
 - Key Hydrologic Features: Permanent streams, intermittent streams, inland lakes and their littoral zones, seepage areas and springs, and wetlands.
 - Other natural heritage features and areas such as: vegetation communities, rare species of flora or fauna, Environmentally Sensitive Areas, Environmentally Sensitive Policy Areas, federal and provincial parks and conservation reserves, Greenland systems etc.

We recommend consulting with the Ministry of Natural Resources and Forestry (MNRF), Fisheries and Oceans Canada (DFO) and your local conservation authority to determine if special measures or additional studies will be necessary to preserve and protect these sensitive features. In addition, for projects located in Central Region you may consider the provisions of the Rouge Park Management Plan if applicable.

Species at Risk

- The Ministry of the Environment, Conservation and Parks has now assumed responsibility of Ontario's Species at Risk program. Information, standards, guidelines, reference materials and technical resources to assist you are found at <https://www.ontario.ca/page/species-risk>.
- The Client's Guide to Preliminary Screening for Species at Risk (Draft May 2019) has been attached to the covering email for your reference and use. Please review this document for next steps.

- For any questions related to subsequent permit requirements, please contact SAROntario@ontario.ca.

Surface Water

- The report must include enough information to demonstrate that there will be no negative impacts on the natural features or ecological functions of any watercourses within the study area. Measures should be included in the planning and design process to ensure that any impacts to watercourses from construction or operational activities (e.g. spills, erosion, pollution) are mitigated as part of the proposed undertaking.
- Additional stormwater runoff from new pavement can impact receiving watercourses and flood conditions. Quality and quantity control measures to treat stormwater runoff should be considered for all new impervious areas and, where possible, existing surfaces. The ministry's [Stormwater Management Planning and Design Manual \(2003\)](#) should be referenced in the report and utilized when designing stormwater control methods. **A Stormwater Management Plan should be prepared as part of the Class EA process** that includes:
 - Strategies to address potential water quantity and erosion impacts related to stormwater draining into streams or other sensitive environmental features, and to ensure that adequate (enhanced) water quality is maintained
 - Watershed information, drainage conditions, and other relevant background information
 - Future drainage conditions, stormwater management options, information on erosion and sediment control during construction, and other details of the proposed works
 - Information on maintenance and monitoring commitments.
- Ontario Regulation 60/08 under the *Ontario Water Resources Act* (OWRA) applies to the Lake Simcoe Basin, which encompasses Lake Simcoe and the lands from which surface water drains into Lake Simcoe. If a proposed sewage treatment plant is listed in Table 1 of the regulation, the report should describe how the proposed project and its mitigation measures are consistent with the requirements of this regulation and the OWRA.
- Any potential approval requirements for surface water taking or discharge should be identified in the report. A Permit to Take Water (PTTW) under the OWRA will be required for any water takings that exceed 50,000 L/day, except for certain water taking activities that have been prescribed by the Water Taking EASR Regulation – *O. Reg. 63/16*. These prescribed water-taking activities require registration in the EASR instead of a PTTW. Please review the [Water Taking User Guide for EASR](#) for more information. Additionally, an

Environmental Compliance Approval under the OWRA is required for municipal stormwater management works.

Groundwater

- The status of, and potential impacts to any well water supplies should be addressed. If the project involves groundwater takings or changes to drainage patterns, the quantity and quality of groundwater may be affected due to drawdown effects or the redirection of existing contamination flows. In addition, project activities may infringe on existing wells such that they must be reconstructed or sealed and abandoned. Appropriate information to define existing groundwater conditions should be included in the report.
- If the potential construction or decommissioning of water wells is identified as an issue, the report should refer to Ontario Regulation 903, Wells, under the OWRA.
- Potential impacts to groundwater-dependent natural features should be addressed. Any changes to groundwater flow or quality from groundwater taking may interfere with the ecological processes of streams, wetlands or other surficial features. In addition, discharging contaminated or high volumes of groundwater to these features may have direct impacts on their function. Any potential effects should be identified, and appropriate mitigation measures should be recommended. The level of detail required will be dependent on the significance of the potential impacts.
- Any potential approval requirements for groundwater taking or discharge should be identified in the report. A Permit to Take Water (PTTW) under the OWRA will be required for any water takings that exceed 50,000 L/day, with the exception of certain water taking activities that have been prescribed by the Water Taking EASR Regulation – *O. Reg. 63/16*. These prescribed water-taking activities require registration in the EASR instead of a PTTW. Please review the [Water Taking User Guide for EASR](#) for more information.
- Consultation with the railroad authorities is necessary wherever there is a plan to use construction dewatering in the vicinity of railroad lines or where the zone of influence of the construction dewatering potentially intercepts railroad lines.

Excess Materials Management

- In December 2019, MECP released a new regulation under the Environmental Protection Act, titled “On-Site and Excess Soil Management” (O. Reg. 406/19) to support improved management of excess construction soil. This regulation is a key step to support proper management of excess soils, ensuring valuable resources don’t go to waste and to provide clear rules on managing and reusing excess soil. New risk-based standards referenced by

this regulation help to facilitate local beneficial reuse which in turn will reduce greenhouse gas emissions from soil transportation, while ensuring strong protection of human health and the environment. The new regulation is being phased in over time, with the first phase in effect on January 1, 2021. For more information, please visit <https://www.ontario.ca/page/handling-excess-soil>.

- The report should reference that activities involving the management of excess soil should be completed in accordance with O. Reg. 406/19 and the MECP's current guidance document titled "[Management of Excess Soil – A Guide for Best Management Practices](#)" (2014).
- All waste generated during construction must be disposed of in accordance with ministry requirements.

Contaminated Sites

- Any current or historical waste disposal sites should be identified in the report. The status of these sites should be determined to confirm whether approval pursuant to Section 46 of the EPA may be required for land uses on former disposal sites. We recommend referring to the [MECP's D-4 guideline](#) for land use considerations near landfills and dumps.
 - Resources available may include regional/local municipal official plans and data; provincial data on [large landfill sites](#) and [small landfill sites](#); Environmental Compliance Approval information for waste disposal sites on [Access Environment](#).
- Other known contaminated sites (local, provincial, federal) in the study area should also be identified in the report (Note – information on federal contaminated sites is found on the Government of Canada's [website](#)).
- The location of any underground storage tanks should be investigated in the report. Measures should be identified to ensure the integrity of these tanks and to ensure an appropriate response in the event of a spill. The ministry's Spills Action Centre must be contacted in such an event.
- Since the removal or movement of soils may be required, appropriate tests to determine contaminant levels from previous land uses or dumping should be undertaken. If the soils are contaminated, you must determine how and where they are to be disposed of, consistent with *Part XV.1 of the Environmental Protection Act* (EPA) and Ontario Regulation 153/04, Records of Site Condition, which details the new requirements related to site assessment and clean up. Please contact the appropriate MECP District Office for further consultation if contaminated sites are present.

Servicing, Utilities and Facilities

- The report should identify any above or underground utilities in the study area such as transmission lines, telephone/internet, oil/gas etc. The owners should be consulted to discuss impacts to this infrastructure, including potential spills.
- The report should identify any servicing infrastructure in the study area such as wastewater, water, stormwater that may potentially be impacted by the project.
- Any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste must have an Environmental Compliance Approval (ECA) before it can operate lawfully. Please consult with MECP's Environmental Permissions Branch to determine whether a new or amended ECA will be required for any proposed infrastructure.
- We recommend referring to the ministry's [environmental land use planning guides](#) to ensure that any potential land use conflicts are considered when planning for any infrastructure or facilities related to wastewater, pipelines, landfills or industrial uses.

Mitigation and Monitoring

- Contractors must be made aware of all environmental considerations so that all environmental standards and commitments for both construction and operation are met. Mitigation measures should be clearly referenced in the report and regularly monitored during the construction stage of the project. In addition, we encourage proponents to conduct post-construction monitoring to ensure all mitigation measures have been effective and are functioning properly.
- Design and construction reports and plans should be based on a best management approach that centres on the prevention of impacts, protection of the existing environment, and opportunities for rehabilitation and enhancement of any impacted areas.
- The proponent's construction and post-construction monitoring plans must be documented in the report, as outlined in Section A.2.5 and A.4.1 of the MEA Class EA parent document.

Consultation

- The report must demonstrate how the consultation provisions of the Class EA have been fulfilled, including documentation of all stakeholder consultation efforts undertaken during the planning process. This includes a discussion in the report that identifies concerns that were raised and **describes how they have been addressed by the proponent** throughout

the planning process. The report should also include copies of comments submitted on the project by interested stakeholders, and the proponent's responses to these comments (as directed by the Class EA to include full documentation).

- Please include the full stakeholder distribution/consultation list in the documentation.

Class EA Process

- If this project is a Master Plan: there are several different approaches that can be used to conduct a Master Plan, examples of which are outlined in Appendix 4 of the Class EA. **The Master Plan should clearly indicate the selected approach for conducting the plan**, by identifying whether the levels of assessment, consultation and documentation are sufficient to fulfill the requirements for Schedule B or C projects. Please note that any Schedule B or C projects identified in the plan would be subject to Section 16 Order Requests under the Environmental Assessment Act, although the plan itself would not be. **Please include a description of the approach being undertaken (use Appendix 4 as a reference).**
- If this project is a Master Plan: Any identified projects should also include information on the MCEA schedule associated with the project.
- The report should provide clear and complete documentation of the planning process in order to allow for transparency in decision-making.
- The Class EA requires the consideration of the effects of each alternative on all aspects of the environment (including planning, natural, social, cultural, economic, technical). The report should include a level of detail (e.g. hydrogeological investigations, terrestrial and aquatic assessments, cultural heritage assessments) such that all potential impacts can be identified, and appropriate mitigation measures can be developed. Any supporting studies conducted during the Class EA process should be referenced and included as part of the report.
- Please include in the report a list of all subsequent permits or approvals that may be required for the implementation of the preferred alternative, including but not limited to, MECP's PTTW, EASR Registrations and ECAs, conservation authority permits, species at risk permits, MTO permits and approvals under the *Impact Assessment Act*, 2019.
- Ministry guidelines and other information related to the issues above are available at <http://www.ontario.ca/environment-and-energy/environment-and-energy>. We encourage you to review all the available guides and to reference any relevant information in the report.

Notice of Completion

Once the EA Report is finalized, the proponent must issue a Notice of Completion providing a minimum 30-day period during which documentation may be reviewed and comment and input can be submitted to the proponent. The Notice of Completion must be sent to the appropriate MECP Regional Office email address.

The public can request a higher level of assessment on a project if they are concerned about potential adverse impacts to constitutionally protected Aboriginal and treaty rights. In addition, the Minister may issue an order on his or her own initiative within a specified time period. The Director (of the Environmental Assessment Branch) will issue a Notice of Proposed Order to the proponent if the Minister is considering an order for the project within 30 days after the conclusion of the comment period on the Notice of Completion. At this time, the Director may request additional information from the proponent. Once the requested information has been received, the Minister will have 30 days within which to make a decision or impose conditions on your project.

Therefore, the proponent cannot proceed with the project until at least 30 days after the end of the comment period provided for in the Notice of Completion. Further, the proponent may not proceed after this time if:

- a Section 16 Order request has been submitted to the ministry regarding potential adverse impacts to constitutionally protected Aboriginal and treaty rights, or
- the Director has issued a Notice of Proposed order regarding the project.

Please ensure that the Notice of Completion advises that outstanding concerns are to be directed to the proponent for a response, and that in the event there are outstanding concerns regarding potential adverse impacts to constitutionally protected Aboriginal and treaty rights, Section 16 Order requests on those matters should be addressed in writing to:

A PROPONENT'S INTRODUCTION TO THE DELEGATION OF PROCEDURAL ASPECTS OF CONSULTATION WITH ABORIGINAL COMMUNITIES

DEFINITIONS

The following definitions are specific to this document and may not apply in other contexts:

Aboriginal communities – the First Nation or Métis communities identified by the Crown for the purpose of consultation.

Consultation – the Crown's legal obligation to consult when the Crown has knowledge of an established or asserted Aboriginal or treaty right and contemplates conduct that might adversely impact that right. This is the type of consultation required pursuant to s. 35 of the *Constitution Act, 1982*. Note that this definition does not include consultation with Aboriginal communities for other reasons, such as regulatory requirements.

Crown – the Ontario Crown, acting through a particular ministry or ministries.

Procedural aspects of consultation – those portions of consultation related to the process of consultation, such as notifying an Aboriginal community about a project, providing information about the potential impacts of a project, responding to concerns raised by an Aboriginal community and proposing changes to the project to avoid negative impacts.

Proponent – the person or entity that wants to undertake a project and requires an Ontario Crown decision or approval for the project.

I. PURPOSE

The Crown has a legal duty to consult Aboriginal communities when it has knowledge of an existing or asserted Aboriginal or treaty right and contemplates conduct that may adversely impact that right. In outlining a framework for the duty to consult, the Supreme Court of Canada has stated that the Crown may delegate procedural aspects of consultation to third parties. This document provides general information about the Ontario Crown's approach to delegation of the procedural aspects of consultation to proponents.

This document is not intended to instruct a proponent about an individual project, and it does not constitute legal advice.

II. WHY IS IT NECESSARY TO CONSULT WITH ABORIGINAL COMMUNITIES?

The objective of the modern law of Aboriginal and treaty rights is the *reconciliation* of Aboriginal peoples and non-Aboriginal peoples and their respective rights, claims and interests. Consultation is an important component of the reconciliation process.

The Crown has a legal duty to consult Aboriginal communities when it has knowledge of an existing or asserted Aboriginal or treaty right and contemplates conduct that might adversely impact that right. For example, the Crown's duty to consult is triggered when it considers issuing a permit, authorization or approval for a project which has the potential to adversely impact an Aboriginal right, such as the right to hunt, fish, or trap in a particular area.

The scope of consultation required in particular circumstances ranges across a spectrum depending on both the nature of the asserted or established right and the seriousness of the potential adverse impacts on that right.

Depending on the particular circumstances, the Crown may also need to take steps to accommodate the potentially impacted Aboriginal or treaty right. For example, the Crown may be required to avoid or minimize the potential adverse impacts of the project.

III. THE CROWN'S ROLE AND RESPONSIBILITIES IN THE DELEGATED CONSULTATION PROCESS

The Crown has the responsibility for ensuring that the duty to consult, and accommodate where appropriate, is met. However, the Crown may delegate the procedural aspects of consultation to a proponent.

There are different ways in which the Crown may delegate the procedural aspects of consultation to a proponent, including through a letter, a memorandum of understanding, legislation, regulation, policy and codes of practice.

If the Crown decides to delegate procedural aspects of consultation, the Crown will generally:

- Ensure that the delegation of procedural aspects of consultation and the responsibilities of the proponent are clearly communicated to the proponent;
- Identify which Aboriginal communities must be consulted;
- Provide contact information for the Aboriginal communities;
- Revise, as necessary, the list of Aboriginal communities to be consulted as new information becomes available and is assessed by the Crown;
- Assess the scope of consultation owed to the Aboriginal communities;

- Maintain appropriate oversight of the actions taken by the proponent in fulfilling the procedural aspects of consultation;
- Assess the adequacy of consultation that is undertaken and any accommodation that may be required;
- Provide a contact within any responsible ministry in case issues arise that require direction from the Crown; and
- Participate in the consultation process as necessary and as determined by the Crown.

IV. THE PROPONENT'S ROLE AND RESPONSIBILITIES IN THE DELEGATED CONSULTATION PROCESS

Where aspects of the consultation process have been delegated to a proponent, the Crown, in meeting its duty to consult, will rely on the proponent's consultation activities and documentation of those activities. The consultation process informs the Crown's decision of whether or not to approve a proposed project or activity.

A proponent's role and responsibilities will vary depending on a variety of factors including the extent of consultation required in the circumstance and the procedural aspects of consultation the Crown has delegated to it. Proponents are often in a better position than the Crown to discuss a project and its potential impacts with Aboriginal communities and to determine ways to avoid or minimize the adverse impacts of a project.

A proponent can raise issues or questions with the Crown at any time during the consultation process. If issues or concerns arise during the consultation that cannot be addressed by the proponent, the proponent should contact the Crown.

a) What might a proponent be required to do in carrying out the procedural aspects of consultation?

Where the Crown delegates procedural aspects of consultation, it is often the proponent's responsibility to provide notice of the proposed project to the identified Aboriginal communities. The notice should indicate that the Crown has delegated the procedural aspects of consultation to the proponent and should include the following information:

- a description of the proposed project or activity;
- mapping;
- proposed timelines;
- details regarding anticipated environmental and other impacts;
- details regarding opportunities to comment; and
- any changes to the proposed project that have been made for seasonal conditions or other factors, where relevant.

Proponents should provide enough information and time to allow Aboriginal communities to provide meaningful feedback regarding the potential impacts of the project. Depending on the nature of consultation required for a project, a proponent also may be required to:

- provide the Crown with copies of any consultation plans prepared and an opportunity to review and comment;
- ensure that any necessary follow-up discussions with Aboriginal communities take place in a timely manner, including to confirm receipt of information, share and update information and to address questions or concerns that may arise;
- as appropriate, discuss with Aboriginal communities potential mitigation measures and/or changes to the project in response to concerns raised by Aboriginal communities;
- use language that is accessible and not overly technical, and translate material into Aboriginal languages where requested or appropriate;
- bear the reasonable costs associated with the consultation process such as, but not limited to, meeting hall rental, meal costs, document translation(s), or to address technical & capacity issues;
- provide the Crown with all the details about potential impacts on established or asserted Aboriginal or treaty rights, how these concerns have been considered and addressed by the proponent and the Aboriginal communities and any steps taken to mitigate the potential impacts;
- provide the Crown with complete and accurate documentation from these meetings and communications; and
- notify the Crown immediately if an Aboriginal community not identified by the Crown approaches the proponent seeking consultation opportunities.

b) What documentation and reporting does the Crown need from the proponent?

Proponents should keep records of all communications with the Aboriginal communities involved in the consultation process and any information provided to these Aboriginal communities.

As the Crown is required to assess the adequacy of consultation, it needs documentation to satisfy itself that the proponent has fulfilled the procedural aspects of consultation delegated to it. The documentation required would typically include:

- the date of meetings, the agendas, any materials distributed, those in attendance and copies of any minutes prepared;
- the description of the proposed project that was shared at the meeting;
- any and all concerns or other feedback provided by the communities;
- any information that was shared by a community in relation to its asserted or established Aboriginal or treaty rights and any potential adverse impacts of the proposed activity, approval or disposition on such rights;

- any proposed project changes or mitigation measures that were discussed, and feedback from Aboriginal communities about the proposed changes and measures;
- any commitments made by the proponent in response to any concerns raised, and feedback from Aboriginal communities on those commitments;
- copies of correspondence to or from Aboriginal communities, and any materials distributed electronically or by mail;
- information regarding any financial assistance provided by the proponent to enable participation by Aboriginal communities in the consultation;
- periodic consultation progress reports or copies of meeting notes if requested by the Crown;
- a summary of how the delegated aspects of consultation were carried out and the results; and
- a summary of issues raised by the Aboriginal communities, how the issues were addressed and any outstanding issues.

In certain circumstances, the Crown may share and discuss the proponent's consultation record with an Aboriginal community to ensure that it is an accurate reflection of the consultation process.

c) Will the Crown require a proponent to provide information about its commercial arrangements with Aboriginal communities?

The Crown may require a proponent to share information about aspects of commercial arrangements between the proponent and Aboriginal communities where the arrangements:

- include elements that are directed at mitigating or otherwise addressing impacts of the project;
- include securing an Aboriginal community's support for the project; or
- may potentially affect the obligations of the Crown to the Aboriginal communities.

The proponent should make every reasonable effort to exempt the Crown from confidentiality provisions in commercial arrangements with Aboriginal communities to the extent necessary to allow this information to be shared with the Crown.

The Crown cannot guarantee that information shared with the Crown will remain confidential. Confidential commercial information should not be provided to the Crown as part of the consultation record if it is not relevant to the duty to consult or otherwise required to be submitted to the Crown as part of the regulatory process.

V. WHAT ARE THE ROLES AND RESPONSIBILITIES OF ABORIGINAL COMMUNITIES' IN THE CONSULTATION PROCESS?

Like the Crown, Aboriginal communities are expected to engage in consultation in good faith. This includes:

- responding to the consultation notice;
- engaging in the proposed consultation process;
- providing relevant information;
- clearly articulating the potential impacts of the proposed project on Aboriginal or treaty rights; and
- discussing ways to mitigate any adverse impacts.

Some Aboriginal communities have developed tools, such as consultation protocols, policies or processes that provide guidance on how they would prefer to be consulted. Although not legally binding, proponents are encouraged to respect these community processes where it is reasonable to do so. Please note that there is no obligation for a proponent to pay a fee to an Aboriginal community in order to enter into a consultation process.

To ensure that the Crown is aware of existing community consultation protocols, proponents should contact the relevant Crown ministry when presented with a consultation protocol by an Aboriginal community or anyone purporting to be a representative of an Aboriginal community.

VI. WHAT IF MORE THAN ONE PROVINCIAL CROWN MINISTRY IS INVOLVED IN APPROVING A PROPONENT'S PROJECT?

Depending on the project and the required permits or approvals, one or more ministries may delegate procedural aspects of the Crown's duty to consult to the proponent. The proponent may contact individual ministries for guidance related to the delegation of procedural aspects of consultation for ministry-specific permits/approvals required for the project in question. Proponents are encouraged to seek input from all involved Crown ministries sooner rather than later.

Client's Guide to Preliminary Screening for Species at Risk

***Ministry of the Environment, Conservation and Parks
Species at Risk Branch, Permissions and Compliance
DRAFT - May 2019***

4.0 Check-List	9

1.0 Purpose, Scope, Background and Context

1.1 Purpose of this Guide

This guide has been created to:

- help clients better understand their obligation to gather information and complete a preliminary screening for species at risk before contacting the ministry,
- outline guidance and advice clients can expect to receive from the ministry at the preliminary screening stage,
- help clients understand how they can gather information about species at risk by accessing publicly available information housed by the Government of Ontario, and
- provide a list of other potential sources of species at risk information that exist outside the Government of Ontario.

It remains the client's responsibility to:

- carry out a preliminary screening for their projects,
- obtain best available information from all applicable information sources,
- conduct any necessary field studies or inventories to identify and confirm the presence or absence of species at risk or their habitat,
- consider any potential impacts to species at risk that a proposed activity might cause, and
- comply with the *Endangered Species Act* (ESA).

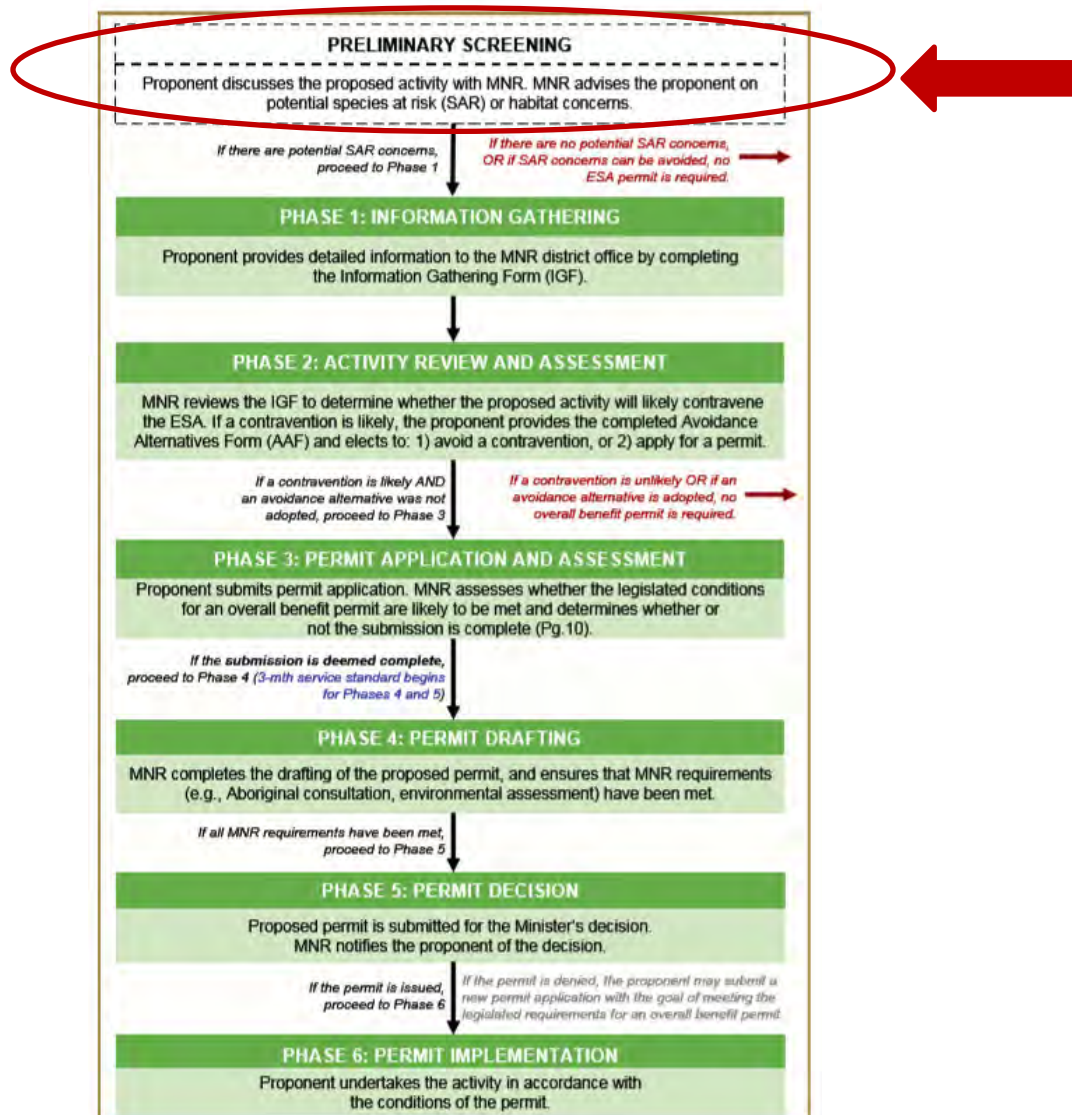

To provide the most efficient service, clients should initiate species at risk screenings and seek information from all applicable information sources identified in this guide, at a minimum, prior to contacting Government of Ontario ministry offices for further information or advice.

1.2 Scope

This guide is a resource for clients seeking to understand if their activity is likely to impact species at risk or if they are likely to trigger the need for an authorization under the ESA. It is not intended to circumvent any detailed site surveys that may be necessary to document species at risk or their habitat nor to circumvent the need to assess the impacts of a proposed activity on species at risk or their habitat. This guide is not an exhaustive list of available information sources for any given area as the availability of information on species at risk and their habitat varies across the province. This guide is intended to support projects and activities carried out on Crown and private land, by private landowners, businesses, other provincial ministries and agencies, or municipal government.

1.3 Background and Context

To receive advice on their proposed activity, clients must first determine whether any species at risk or their habitat exist or are likely to exist at or near their proposed activity, and whether their proposed activity is likely to contravene the ESA. Once this step is complete, clients may contact the ministry at SAROntario@ontario.ca to discuss the main purpose, general methods, timing and location of their proposed activity as well as information obtained about species at risk and their habitat at, or near, the site. At this stage, the ministry can provide advice and guidance to the client about potential species at risk or habitat concerns, measures that the client is considering to avoid adverse effects on species at risk or their habitat and whether additional field surveys are advisable. This is referred to as the “Preliminary Screening” stage. For more information on additional phases in the diagram below, please refer to the *Endangered Species Act Submission Standards for Activity Review and 17(2)(c) Overall Benefit Permits* policy available online at <https://www.ontario.ca/page/species-risk-overall-benefit-permits>. Please note: any reference to MNR in the diagram is replaced by MECP.

2.0 Roles and Responsibilities

To provide the most efficient service, clients should initiate species at risk screenings and seek information from all applicable information sources identified in this guide prior to contacting Government of Ontario ministry offices for further information or advice.

Step 1: Client seeks information regarding species at risk or their habitat that exist, or are likely to exist, at or near their proposed activity by referring to all applicable information sources identified in this guide.

Step 2: Client reviews and consider guidance on whether their proposed activity is likely to contravene the ESA (see section 3.4 of this guide for guidance on what to consider).

Step 3: Client gathers information identified in the checklist in section 4 of this guide.

Step 4: Client contacts the ministry at SAROntario@ontario.ca to discuss their preliminary screening. Ministry staff will ask the client questions about the main purpose, general methods, timing and location of their proposed activity as well as information obtained about species at risk and their habitat at, or near, the site. Ministry staff will also ask the client for their interpretation of the impacts of their activity on species at risk or their habitat as well as measures the client has considered to avoid any adverse impacts.

Step 5: Ministry staff will provide advice on next steps.

Option A: Ministry staff may advise the client they can proceed with their activity without an authorization under the ESA where the ministry is confident that:

- no protected species at risk or habitats are likely to be present at or near the proposed location of the activity; or
- protected species at risk or habitats are known to be present but the activity is not likely to contravene the ESA; or
- through the adoption of avoidance measures, the modified activity is not likely to contravene the ESA.

Option B: Ministry staff may advise the client to proceed to Phase 1 of the overall benefit permitting process (i.e. Information Gathering in the previous diagram), where:

- there is uncertainty as to whether any protected species at risk or habitats are present at or near the proposed location of the activity; or
- the potential impacts of the proposed activity are uncertain; or
- ministry staff anticipate the proposed activity is likely to contravene the ESA.

3.0 Information Sources

Land Information Ontario (LIO) and the Natural Heritage Information Centre (NHIC) maintain and provide information about species at risk, as well as related information about fisheries, wildlife, crown lands, protected lands and more. This information is made available to organizations, private individuals, consultants, and developers through online sources and is often considered under various pieces of legislation or as part of regulatory approvals and planning processes.

The information available from LIO or NHIC and the sources listed in this guide should not be considered as a substitute for site visits and appropriate field surveys. Generally, this information can be regarded as a starting point from which to conduct further field surveys, if needed. While this data represents best available current information, it is important to note that a lack of information for a site does not mean that species at risk or their habitat are not present. There are many areas where the Government of Ontario does not currently have information, especially in more remote parts of the province. The absence of species at risk location data at or near your site does not necessarily mean no species at risk are present at that location. On-site assessments can better verify site conditions, identify and confirm presence of species at risk and/or their habitats.

Information on the location (i.e. observations and occurrences) of species at risk is considered sensitive and therefore publicly available only on a 1km square grid as opposed to as a detailed point on a map. This generalized information can help you understand which species at risk are in the general vicinity of your proposed activity and can help inform field level studies you may want to undertake to confirm the presence, or absence of species at risk at or near your site.

Should you require specific and detailed information pertaining to species at risk observations and occurrences at or near your site on a finer geographic scale; you will be required to demonstrate your need to access this information, to complete data sensitivity training and to obtain a Sensitive Data Use License from the NHIC. Information on how to obtain a license can be found online at <https://www.ontario.ca/page/get-natural-heritage-information>.

Many organizations (e.g. other Ontario ministries, municipalities, conservation authorities) have ongoing licensing to access this data so be sure to check if your organization has this access and consult this data as part of your preliminary screening if your organization already has a license.

3.1 Make a Map: Natural Heritage Areas

The Make a Natural Heritage Area Map (available online at <https://www.ontario.ca/page/make-natural-heritage-area-map>) provides public access to natural heritage information, including species at risk, without the user needing to have Geographic Information System (GIS) capability. It allows users to view and identify generalized species at risk information, mark areas of interest, and create and print a custom map directly from the web application. The tool also shows topographic information such as roads, rivers, contours and municipal boundaries.

Users are advised that sensitive information has been removed from the natural areas dataset and the occurrences of species at risk has been generalized to a 1-kilometre grid to mitigate the risks to the species (e.g. illegal harvest, habitat disturbance, poaching).

The web-based mapping tool displays natural heritage data, including:

- Generalized Species at risk occurrence data (based on a 1-km square grid),
- Natural Heritage Information Centre data.

Data cannot be downloaded directly from this web map; however, information included in this application is available digitally through Land Information Ontario (LIO) at <https://www.ontario.ca/page/land-information-ontario>.

3.2 Land Information Ontario (LIO)

Most natural heritage data is publicly available. This data is managed in a large provincial corporate database called the LIO Warehouse and can be accessed online through the LIO Metadata Management Tool at <https://www.javacoeapp.lrc.gov.on.ca/geonetwork/srv/en/main.home>. This tool provides descriptive information about the characteristics, quality and context of the data. Publicly available geospatial data can be downloaded directly from this site.

While most data are publicly available, some data may be considered highly sensitive (i.e. nursery areas for fish, species at risk observations) and as such, access to some data maybe restricted.

3.3 Additional Species at Risk Information Sources

- The Breeding Bird Atlas can be accessed online at <http://www.birdsontario.org/atlas/index.jsp?lang=en>
- eBird can be accessed online at <https://ebird.org/home>
- iNaturalist can be accessed online at <https://www.inaturalist.org/>
- The Ontario Reptile and Amphibian Atlas can be accessed online at <https://ontarionature.org/programs/citizen-science/reptile-amphibian-atlas>
- Your local Conservation Authority. Information to help you find your local Conservation Authority can be accessed online at <https://conservationontario.ca/conservation-authorities/find-a-conservation-authority/>

Local naturalist groups or other similar community-based organizations

- Local Indigenous communities
- Local land trusts or other similar Environmental Non-Government Organizations
- Field level studies to identify if species at risk, or their habitat, are likely present or absent at or near the site.
- When an activity is proposed within one of the continuous caribou ranges, please be sure to consider the caribou Range Management Policy. This policy includes figures and maps of the continuous caribou range, can be found online at <https://www.ontario.ca/page/range-management-policy-support-woodland-caribou-conservation-and-recovery>

3.4 Information Sources to Support Impact Assessments

- Guidance to help you understand if your activity is likely to adversely impact species at risk or their habitat can be found online at <https://www.ontario.ca/page/policy-guidance-harm-and-harass-under-endangered-species-act> and <https://www.ontario.ca/page/categorizing-and-protecting-habitat-under-endangered-species-act>
- A list of species at risk in Ontario is available online at <https://www.ontario.ca/page/species-risk-ontario>. On this webpage, you can find out more about each species, including where it lives, what threatens it and any specific habitat protections that apply to it by clicking on the photo of the species.

4.0 Check-List

Please feel free to use the check list below to help you confirm you have explored all applicable information sources and to support your discussion with Ministry staff at the preliminary screening stage.

- ✓ Land Information Ontario (LIO)
- ✓ Natural Heritage Information Centre (NHIC)
- ✓ The Breeding Bird Atlas
- ✓ eBird
- ✓ iNaturalist
- ✓ Ontario Reptile and Amphibian Atlas
- ✓ List Conservation Authorities you contacted: _____

- ✓ List local naturalist groups you contacted: _____

- ✓ List local Indigenous communities you contacted: _____

- ✓ List any other local land trusts or Environmental Non-Government Organizations you contacted: _____

- ✓ List and field studies that were conducted to identify species at risk, or their habitat, likely to be present or absent at or near the site: _____

- ✓ List what you think the likely impacts of your activity are on species at risk and their habitat (e.g. damage or destruction of habitat, killing, harming or harassing species at risk): _____

Engineering Services, City of Hamilton

From: Marks, Jody (MNR) <Jody.Marks@ontario.ca>
Sent: Friday, December 27, 2024 3:33 PM
To: Stanciu, Olivia <Olivia.Stanciu@hamilton.ca>
Subject: RE: West 5th St EA - Notice of Commencement & PIC

Hello Olivia,

The Ministry of Natural Resources (MNR) received the Notice of Commencement and PIC for the West 5th Street Class Environmental Assessment on December 19, 2024. Thank you for circulating this to our office.

MNR has prepared the attached **MNR Southern Region Information Package – For External Proponent Environmental Assessments** (Package) to help project proponents understand MNR's role as a commenting agency and interests related to environmental assessment within the Ministry's mandate. The Package also provides information on the Ministry's regulatory authority to issue authorizations, permits, licenses and/or approvals. The information provided is subject to change from time to time and it is the proponent's responsibility to ensure the information used to support project planning and compliance with *Environmental Assessment Act* requirements is current and accurate. It is the proponent's responsibility to be aware of, and comply with, all relevant federal or provincial legislation, municipal by-laws and/or other agency approvals.

Please note the ministry has not completed a screening of natural heritage or other resource values at this time. If no MNR interests are identified based on the information contained in this Package, there is no need to further circulate MNR as a commenting agency when undertaking consultation and review under the applicable EA process.

If you have identified any MNR interests in your project planning and require additional technical information, or if you have questions about the content of this Package, please feel free to contact me, or SR.planning@ontario.ca.

Thank you,

Jody Marks (*she/her*)
Regional Planner | Land Use Planning and Strategic Issues Section, Southern Region
Ministry of Natural Resources | Ontario Public Service
(249) 733-1376 | jody.marks@ontario.ca

Taking pride in strengthening Ontario, its places and its people

Please note: As part of providing [accessible customer service](#), if you have any accommodation needs, require communication supports, or alternate formats please let me

know.

From: Stanciu, Olivia <Olivia.Stanciu@hamilton.ca>

Subject: West 5th St EA - Notice of Commencement & PIC

CAUTION -- EXTERNAL E-MAIL - Do not click links or open attachments unless you recognize the sender.

Good morning,

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) to address transportation challenges along West 5th Street (Stone Church Road West to Rymal Road West). On Thursday, January 16th, 2025, we will be holding the project's first Public Information Centre. Further information can be found in the attached document or on our EngageHamilton page: <https://engage.hamilton.ca/West5thEA>.

Thank you!

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)

MNR SOUTHERN REGION INFORMATION PACKAGE – FOR EXTERNAL PROPONENT ENVIRONMENTAL ASSESSMENTS

MNR – SOUTHERN REGION – LUPSI

October 2024

How to Use This Information Package

Environmental Assessment (EA) is a planning and decision-making process used to promote environmentally responsible decision-making. In Ontario, this process is defined and is required pursuant to the *Environmental Assessment Act (EAA)*. The Ministry of Environment, Conservation and Parks (MECP) administers the *EAA*.

The Ministry of Natural Resources (MNR) may be asked by a proponent of a project subject to an EA or Class EA to participate as a commenting agency to ensure provincial interests within MNR's mandate are considered by the proponent in the project planning process.

Use of this Information Package "Package" is intended to help project proponents understand MNR's:

- role as a commenting agency and interests related to environmental assessment within the Ministry's mandate (refer Sections 1 through 8 of this document)
- regulatory authority to issue authorizations, permits, licenses and/or approvals (refer Appendix A – MNR Regulatory Role)

The information provided by MNR and the sources listed in this Package should not be considered exhaustive nor a substitute for consultation with other agencies, site visits and appropriate field studies. The information provided is subject to change from time to time and it is the proponent's responsibility to ensure the information used to support project planning and compliance with *EAA* requirements is current and accurate.

If no MNR interests are identified based on the information contained in this Package there is no need to further circulate MNR as a commenting agency when undertaking consultation and review under the applicable EA process. MNR Southern Region (via sr.planning@ontario.ca) may be contacted if there are any questions about the content of this Package or if specific technical information is required.

This Package is intended for use within MNR's Southern Region (SR) regional boundary only. To view the MNR SR regional boundary please see [Ministry of Natural Resources and Forestry work centres | ontario.ca](#).

<i>Crown Forest Sustainability Act</i>	12
Appendix B – Technical Guides	13

1. MNR Mandate

MNR has a mandate to protect Ontario's biodiversity while promoting economic opportunities in the resource sector and supporting outdoor recreation opportunities by:

- Sustainably managing Ontario's fish and wildlife resources.
- Leading the management of Ontario's public (also referred to as Crown) lands, including the beds of navigable waters, oil, gas, salt and aggregate resources, and access to Crown land for renewable energy projects.
- Ensuring the sustainable management of Ontario's Crown forests.
- Protecting people, property and communities from forest fires, floods, and droughts.
- Developing and applying geographic information to help manage the province's natural resources.

MNR's regulatory role is triggered when a project proponent seeks an approval under legislation administered by the Ministry. Information on the Ministry's regulatory role under applicable legislation can be found in Appendix A.

2. MNR Role as Commenting Agency

MNR's role as a commenting agency on projects subject to *EAA* requirements is to:

- Assist and enable project proponents to access relevant technical and scientific information within the scope of MNR's mandate.
- Provide legislative / regulatory / policy information and direction regarding interests within MNR's mandate.
- Support the identification and consideration of the potential effects of a project on matters within MNR's mandate.
- Identify where the project proponent may need to seek MNR approvals regarding the project.

3. Provincial Planning Policies

Provincial plans together with the *Provincial Policy Statement, 2024* (PPS) issued under section 3(1) of the *Planning Act*, provide policy direction on matters of provincial interest related to land use planning and development in Ontario. The PPS and provincial plans contain policies specific to infrastructure projects.

A summary of matters related to MNR's mandate within specific infrastructure-related provincial planning policies can be found below. Please note, this is not an exhaustive list of provincial policies that may apply to a project and other MNR mandated interests may be applicable. It is the project proponent's responsibility to review the provincial plans and PPS,

which may be amended from time to time, to determine policies applicable to the proposed project.

Provincial Plan Mapping

Mapping of provincial plan boundaries and natural heritage areas as defined in individual provincial plans is available to view or download through [Make A Map: Natural Heritage Areas](#) or Ontario GeoHub (GeoHub) - [Natural Heritage System Area](#).

Greenbelt Plan, 2017

Section 4.2.1.2 of the Greenbelt Plan contains policies which are designed to direct infrastructure away from, or where not possible, to minimize the impacts on the Natural Heritage and Water Resource Systems. It requires that new or expanding infrastructure “shall avoid *key natural heritage features, key hydrologic features or key hydrologic areas* unless need has been demonstrated and it has been established that there is no other reasonable alternative.”

Niagara Escarpment Plan (NEP), 2017

The NEP is administered by the Niagara Escarpment Commission, the government agency mandated to develop, interpret, and apply NEP policies that maintain and enhance the Niagara Escarpment’s unique environmental and landscape features. In addition to Make A Map: Natural Heritage Areas, mapping of NEP Escarpment Natural Areas and Escarpment Protection Areas may be obtained from your local municipality or the [Niagara Escarpment Commission](#).

Oak Ridges Moraine Conservation Plan (ORMCP), 2017

Section 41 of the ORMCP contains policies specific to the development of new or the upgrading/extension of existing infrastructure. This policy direction includes where development shall not be permitted unless specified criteria have been satisfied (including where applicable that there is no other reasonable alternative) and establishes required documentation to support infrastructure projects. Specific conditions apply to proposed infrastructure development within a natural core area and infrastructure crossings of key natural heritage features.

Lake Simcoe Protection Plan (LSPP), 2009

Policy 6.23-DP of the LSPP directs that development or site alteration in relation to infrastructure shall not be permitted within a key natural heritage feature, a key hydrologic feature or within a related vegetation protection zone unless the need for the project has been demonstrated through an Environmental Assessment or other similar environmental approval and it has been demonstrated there is no reasonable alternative. Some exceptions may apply.

4. Fish, Wildlife and Natural Heritage

MNR's natural heritage and natural resources geospatial data layers can be accessed through the ministry's [GeoHub](#) and [Natural Resources Data Access Requests | Ontario GeoHub](#). Please note, these Geospatial Ontario (formerly known as Land Information Ontario) GIS data layers available from MNR and the sources listed and linked on this webpage should not be considered as a substitute for site visits and appropriate field surveys. Generally, information available from MNR can be regarded as a starting point from which to conduct further field studies, if needed. While this data represents MNR's best available current information, it is important to note that a lack of information for a site does not mean that additional features and values are not present. There are many areas where MNR does not currently have information. On-site assessments can better verify site conditions, identify natural features and values and confirm presence of species at risk and/or their habitats.

The information below provides an overview of MNR's mandated interests in natural heritage to consider within the project study area. A detailed list of provincial technical guidance material used to identify significant natural heritage features in different landscapes can be found in Appendix B.

Fisheries

All permanent and intermittent watercourses and waterbodies have potential to contain fish habitat or contribute to fisheries resources. MNR is responsible for administering and enforcing the Ontario Fishery Regulations under the *Fisheries Act*.

When agency approvals are required for a proposed project, it is the responsibility of the authorizing regulatory agency to set any in-water work timing windows in their authorizations. These timing windows may be based on the [MNR's In-water Work Timing Window Guidelines](#).

Areas of Natural and Scientific Interest

The study area should be screened for the presence of Areas of Natural and Scientific Interest (ANSI). ANSIs are lands and waters containing features that are important for natural heritage protection, scientific study, and education. ANSIs are identified and confirmed by MNR based on their representation of Ontario's significant geological and natural heritage features and are categorized as either Earth Science or Life Science.

Wetlands

Study areas that contain unevaluated or unmapped wet features should be investigated for the presence of wetlands. Wetlands are lands that are seasonally or permanently covered by shallow water, as well as lands where the water table is close to the surface. Wetlands may

vary in their significance, and the four major types of wetlands are swamps, marshes, bogs, and fens.

As of January 1, 2023, MNR no longer reviews and confirms wetland evaluations. MNR's role with respect to wetland evaluation includes providing the provincial framework under which wetlands in Ontario are evaluated for significance ([OWES](#)), and uploading digital wetland boundary mapping and wetland status into the Geospatial Ontario database.

Significant Wildlife Habitat

Study areas which may contain significant wildlife habitat should be investigated for its presence or absence. Significant wildlife habitat may include features such as: seasonal concentration areas for wildlife species (e.g., snake hibernaculum), rare vegetation communities (e.g., tallgrass prairie), specialized habitats of wildlife (e.g., turtle nesting and over-wintering areas), habitats of species of conservation concern (e.g., Special Concern species as identified on the [Species at Risk in Ontario list](#)) and animal movement corridors (e.g., amphibian movement corridors). Provincially tracked species data (generalized to Natural Heritage Information Centre 1 km screening grid) can be viewed in [Natural Heritage Make a Map](#). Detailed geospatial data may be obtained through GeoHub via a data sharing agreement.

Please note, relying on online mapping tools only may not accurately reflect the presence or absence of significant wildlife habitat within the project study area. Surveys or additional site level assessment are often required to confirm presence or absence of natural heritage features and values.

Significant Woodlands

Project study areas that contain wooded areas should be investigated for the presence of significant woodlands. Significant woodlands are areas that are ecologically important in terms of features such as species composition, age of trees and stand history; functionally important due to their contribution to the broader landscape; or economically important. Local planning authorities are responsible for identifying significant woodlands in accordance with criteria established by MNR.

Significant Valleylands

Project study areas that occur in a valley or other landform depression that has water for some period of the year should be investigated for the presence of significant valleylands. The identification of valleyland significance is the responsibility of the local planning authority. MNR recommends criteria for determination of valleyland significance.

5. Natural Hazards

In Ontario, development is generally directed away from areas impacted by natural hazards to prevent risks from inappropriate development on and around these lands and to ensure that the risks to public health and safety are minimized. Keeping people and property out of harm's way is a cost-effective, socially responsible, and proactive approach to addressing natural hazards. Various policies and programs direct people and development outside of natural hazard areas.

Responsibility for natural hazard management and implementation of programs and policies for most natural hazards has been delegated to municipalities and Conservation Authorities (CA) where they exist. MNR supports implementation of natural hazard policies by local municipalities and CAs by providing a series of natural hazard technical guidelines (see Appendix B).

Hazardous Lands (flooding, erosion and dynamic beach hazards)

The project location should be reviewed for the presence of hazardous lands. These may include lands subject to flooding and/or erosion and dynamic beaches. These lands become hazardous when people and property locate in these areas. The local municipality and CA should be contacted for further guidance where required.

Special Policy Areas

Some localized areas of the province may be subject to an approved Special Policy Area (SPA), as defined by the PPS. If the study area is located within or adjacent to a SPA, special consideration for any impacts to the flood plain and site-specific SPA policies may be necessary. Any proposed change or modification to the official plan policies, land use designations or boundaries applying to SPA lands, requires joint approval by the Ministers of the Ministry of Municipal Affairs and Housing (MMAH) and MNR.

Local official plans may be reviewed to identify the presence of SPAs within the study area. MNR may have additional information regarding SPAs which can be made available upon request.

Where applicable, information should be identified at the EA stage regarding any expected changes to the floodplain or potential modifications to the SPA subject to provincial approval.

Hazardous Sites (unstable soils and bedrock)

The project location should be reviewed for the presence of hazardous sites. These may include unstable soils (sensitive marine clays [leda], organic soils) or unstable bedrock (karst topography). General information and mapping tools available to assist in identifying the

potential presence of hazardous sites (e.g., karst and organic soils) include, but are not limited to:

- [GeologyOntario \(gov.on.ca\)](http://GeologyOntario.gov.on.ca) is maintained by the Ministry of Mines and provides access to all Ontario Geological Survey maps, reports and digital datasets.
- [Wetland mapping](#)
- Soil information and mapping maintained by the Ministry of Agriculture, Food and Rural Affairs is available at [Soil Survey Complex \(GeoON\)](#) or [AgMaps](#)

Hazardous Forest Types for Wildland Fire

Project study areas containing wooded areas should be screened for the presence of hazardous forest types for wildland fire. Data to identify potential areas that meet this definition can be found in GeoHub - [Potential Hazardous Forest Types for Wildland Fire](#). Note that this data layer is based on forest type data at a coarse scale. Complete assessment of risk and determination of appropriate mitigation measures can only be done with confidence on a site-specific basis.

6. Oil, Gas and Salt Resources

Oil, gas or salt wells are regulated under the *Oil, Gas and Salt Resources Act*, and the supporting regulations and operating standards.

To help determine the presence of petroleum wells within the proposed project area, basic mapping information can be found through the [GeoHub](#) portal or the Ontario Oil, Gas and Salt Resources Library (www.ogsrlibrary.com). The 'Definitions and Terminology Guide' listed in the publications section on the library website may provide a better understanding of the well and resource information available.

The [Ontario Petroleum Institute](#) (OPI) is an industry association that can assist with retaining the services of a consultant who can provide information about the potential resources located below the property.

If any unanticipated petroleum wells or associated works are encountered during a project, the proponent should cease work immediately and contact MNR's Petroleum Operations Section (POS) to further understand the proponent's obligations under the *Oil, Gas and Salt Resources Act*. The POS may be contacted at POSRecords@ontario.ca or 519-873-4634. In the event of a spill, the project proponent should report it to the Spills Action Centre at 416-325-3000, 1-800-268-6060 (toll free), or 1-855-889-5775 (TTY).

7. Mineral Aggregate Resources

Mineral aggregate resources are usually sand, gravel, clay, earth and bedrock. They are used to make roads, subway tunnels, homes and other structures. Mineral aggregate resources are a non-renewable resource that exist in fixed locations.

MNR has an interest in protecting mineral aggregate resources from incompatible development so they may continue to be available for future extraction. Data to map known deposits of mineral aggregate resources is available from Geology Ontario at [GeologyOntario \(gov.on.ca\)](http://GeologyOntario.gov.on.ca).

Project proponents should consider mineral aggregate resources by screening for existing aggregate operations at [Find Pits and Quarries | ontario.ca](http://FindPitsandQuarries.ontario.ca), and consider any potential to preclude or hinder operations and the use of aggregate resource deposits through incompatible development.

8. Crown Lands, Lakes, Rivers and Forests

MNR manages public lands including the beds of most lakes and rivers. Some activities on shore lands (both public and private) are also managed by the MNR.

Public land boundaries (mapping is representative only) and applicable Crown land use policies can be viewed at [Crown Land Use Policy Atlas | ontario.ca](http://CrownLandUsePolicyAtlas.ontario.ca). Provincial parks and conservation reserves are managed by MECP under the *Provincial Parks and Conservation Reserves Act*.

MNR manages the health of Crown forests so they may continue to provide ecological, economic, and social benefits. Most of Ontario's Crown forests are managed by forest companies under 20-year Sustainable Forest Licences. These companies are responsible for working with government and others to prepare and implement a forest management plan for their licence area, monitoring compliance with the plan and renewing the forest after harvesting trees.

9. Conclusion

The list of interests within MNR's mandate described in this document is not exhaustive. For additional information on legislation and programs the ministry administers see [Ministry of Natural Resources | ontario.ca](http://MinistryofNaturalResources.ontario.ca).

If you have identified any MNR interests in your project planning and require additional information, please direct your specific questions to the designated Regional Planner for the project, or to SR.planning@ontario.ca.

Appendix A – MNR Regulatory Role

MNR's regulatory role is triggered when a project proponent seeks an approval under legislation administered by the Ministry. This Appendix provides information about some of the more commonly applicable approvals issued by MNR. Please note, MNR may not be able to confirm the requirement for an approval until a detailed project and site plan have been provided to the Ministry.

A proposal for an MNR approval may engage the ministry's duty to consult Indigenous peoples.

Where MNR is considering an application, the ministry must also ensure its own obligations under the *EAA* are satisfied prior to a final decision. Where an approval would dispose of rights to Crown Resources for a project that has already completed *EAA* requirements under another process, MNR will require written documentation from the applicant setting out how *EAA* requirements for the project have been met prior to MNR issuing any requested approval.

Fish and Wildlife Conservation Act

The *Fish and Wildlife Conservation Act*, 1997 regulates the relocation of fish and wildlife. Accordingly, should a project require:

- The relocation of fish outside of the work area, a [Licence to Collect Fish for Scientific Purposes](#) will be required.
- The relocation of wildlife outside of the work area (including amphibians, reptiles, and small mammals), will require a Wildlife Collector's Authorization.
- The destruction, taking or possession of any nests or eggs of species not protected by the *Migratory Birds Convention Act* (MBCA) or excluded under section 7(2) of the FWCA may also require a Wildlife Collector's Authorization.

To learn more about the management of Fish and Wildlife in Ontario, or to apply for permits or licenses, please visit the [Natural Resources Information Portal](#).

Aggregate Resources Act

The *Aggregate Resources Act* (ARA) is the primary legislative framework for regulating aggregate resource extraction in Ontario. The MNR administers the *ARA* and issues licenses, permits and approves amendments to existing approvals. Information on existing pits and quarries and when an aggregate permit or license may be required can be accessed from [MNR's Aggregates Section](#) or [GeoHub – Additional Resources](#)

Lakes and Rivers Improvement Act

The *Lakes and Rivers Improvement Act* (LRIA) provides the MNR with regulatory authority over the design, construction, operation, maintenance and safety of dams in Ontario. For

information regarding when a MNR approval may be required and how the LRIA is administered by the Ministry visit [Lakes and Rivers Improvement Act administrative guide | ontario.ca](#)

Public Lands Act

The use of public land and shore lands are regulated under the *Public Lands Act*. A work permit must be obtained from MNR to undertake certain activities on public land and shore lands. To occupy public lands in Ontario, you must receive prior approval from MNR unless the use is permitted by regulation. Visit [Natural Resources Information Portal](#) for information on when a permit or approval is required and how to submit an application.

Crown Forest Sustainability Act

Any activities that involve a proposal to cut Crown forest resources (e.g., trees on Crown land) may require approval under the *Crown Forest Sustainability Act, 1994*.

Appendix B – Technical Guides

The following technical guides are the province's best available information to support identification of significant natural heritage features in different landscapes:

- [Natural Heritage Reference Manual \(2010\)](#)
- [Greenbelt Technical Paper \(2005\)](#)
- [Oak Ridges Moraine Technical Paper 1 \(Natural Heritage Features\)](#)
- [Oak Ridges Moraine Technical Paper 2 \(Significant Wildlife Habitat\)](#)
- [Oak Ridges Moraine Technical Paper 7 \(Significant Woodlands\)](#)
- Lake Simcoe Protection Plan Technical Paper
- [Ontario Wetland Evaluation System \(OWES\)](#)
- [Significant Wildlife Habitat Technical Guide](#)
 - o [Ecoregion Criterion Schedules for the identification of Significant Wildlife Habitat](#)
 - [Ecoregion 5E](#)
 - [Ecoregion 6E](#)
 - [Ecoregion 7E](#)
 - o [Significant Wildlife Habitat Mitigation Support Tool \(MiST\)](#)

Other supporting information may be found at Ontario [GeoHub](#) or [Natural Resources Data Access Requests | Ontario GeoHub](#).

The following technical guides are the province's best available information to support implementation of MNR's interest in natural hazards (contact MNR to request pdf copies):

- Understanding Natural Hazards (2001)
- Special Policy Areas Procedures (2009)
- Technical Guide – River & Stream Systems: Flooding Hazard Limit (2002)
- Technical Guide – River & Stream Systems: Erosion Hazard Limit (2002)
- Great Lakes-St. Lawrence River Shorelines: Flooding, Erosion and Dynamic Beaches (2001)
- Technical Guide for Large Inland Lakes Shorelines: Flooding, Erosion and Dynamic Beaches (1996)
- Hazardous Sites Technical Guide (1996)
- [Technical Bulletin: Flooding Hazards: Data Survey and Mapping Specifications \(2023\)](#)
- [Wildland Fire Risk Assessment and Mitigation Reference Manual \(2017\)](#)

The following technical guide is the province's best available information supporting implementation of MNR's mandated interest in mineral aggregate resources (contact MNR to request pdf copy):

- Non-renewable Resources Training Manual (1997)

Subject: West 5th Street Municipal Class Environmental Assessment - Commenting Letter and Request for Meeting

You don't often get email from mleblanc@urbansolutions.info. [Learn why this is important](#)

Good afternoon Olivia and Isaac,

Hope you enjoyed your holidays!

Please see the attached Letter prepared by our office on behalf of the owner of 1177, 1183, and 1187 West 5th Street, in relation to the West 5th Street Municipal Class Environmental Assessment project currently underway.

As requested in the Letter, please kindly advise when you have availability for a quick meeting to discuss the EA process in relation to the subject lands. Matt (copied) and I are planning to attend the Public Information Centre Meeting on January 16th, so we will see you then!

Regards,

Matthew LeBlanc, MCIP, RPP

Planner

Subject: RE: West 5th Street - Public Contact

Hi Isaac,

I talked to the resident of 1150 West 5th St. Her complaint mostly is regarding the property tax increase, which I've asked her to reach out to the City's Tax Dept. Regarding the West 5th EA, she wants sidewalk on her side of the property, as she feels unsafe on the road when walking. I will file this comment for the sidewalk part.

Thank you!

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)

You don't often get email from james.thomas@ajclarke.com. [Learn why this is important](#)

Morning, Olivia,

Thank you for getting back. It would seem the Public Works comments provided in our FC Document were a bit hasty as they stated “West 5th Street is scheduled to be reconstructed and urbanized in 2026.

Nonetheless, I will be looking to get as much info as I can when it’s available to ensure appropriate design, development, and timelines.

Happy Holidays!

James Thomas. CPT, HBA

Sent: December 20, 2024 10:01 AM
To: James Thomas <james.thomas@ajclarke.com>; isaac.bartlett@hamilton.ca
Subject: RE: West 5th MCEA Information

Good morning James,

Thank you for reaching out!

We are presently in Phase 2 of the EA process, establishing alternative solutions to improve West 5th. Currently there are no designs. After the first PIC, we will be moving to Phase 3, which will be developing alternative designs. For information about the project, please visit the project's website at www.hamilton.ca/West5thEA. The PIC panels will be published around January 13th, 2025.

We are looking at improving traffic, active transportation, transit, and stormwater management for this corridor. This EA is scheduled to be completed by the end of 2025. Then the project will be moving to detailed design, which will take 2 years to be completed. So construction will most likely start in 2028, if no delays are to happen.

If you have any questions, please don't hesitate to reach out to me. Thank you!

Kind regards,

Subject: West 5th MCEA Information

External Email: Use caution with links and attachments

Good afternoon, Olivia and Isaac,

My name is James Thomas, a planner with A.J. Clarke & Associates Ltd.

I am currently drafting a Planning Justification Report and preparing submission of a Zoning By-law Amendment for lands fronting this section of West 5th.

While I understand this is early in the process, I hope that I may be able to obtain some of the information that will be presented on January 16th ahead of time as I will be out of the country on the date of the public meeting. I intend to have the complete submission in by the end of January, so the quicker I can evaluate some of the proposed designs the better.

Our transportation consultant provided very high-level expected improvements from this anticipated EA within their Transportation Impact Study – to the best of their knowledge. This included the likelihood of extending the cycling infrastructure, sidewalks, a likely middle turning lane, and the current Concept Plan for a proposed transit line along West 5th. We also received formal consultation comments from public works in January 2024 that the City was intending on starting construction in 2026.

I greatly appreciate your assistance on the matter,

James Thomas, CPT, HBA

K4: Public Information Centre 2

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West

Municipal Class Environmental Assessment

City of Hamilton

Public Information Centre

June 3, 2025

Welcome to the Public Information Centre

The goals of this Public Information Centre are to:

- Provide an update on the project
- Present a review of the Alternative Designs
- Identify the preliminary Preferred Design for comment
- Provide an opportunity to learn about the project and how to stay involved for future updates

Comments received will be used to help identify the approach for improvements within the study area.

Land Acknowledgement

The City of Hamilton is situated upon the traditional territories of the Erie, Neutral, Huron-Wendat, Haudenosaunee and Mississaugas. This land is covered by the Dish With One Spoon Wampum Belt Covenant, which was an agreement between the Haudenosaunee and Anishinaabek to share and care for the resources around the Great Lakes. We further acknowledge that this land is covered by the Between the Lakes Purchase, 1792, between the Crown and the Mississaugas of the Credit First Nation.

Today, the City of Hamilton is home to many Indigenous people from across Turtle Island (North America) and we recognize that we must do more to learn about the rich history of this land so that we can better understand our roles as residents, neighbours, partners and caretakers.

Project Overview

What are we doing?

The City of Hamilton is planning for road reconstruction of West 5th Street, from Stone Church Road West to Rymal Road West.

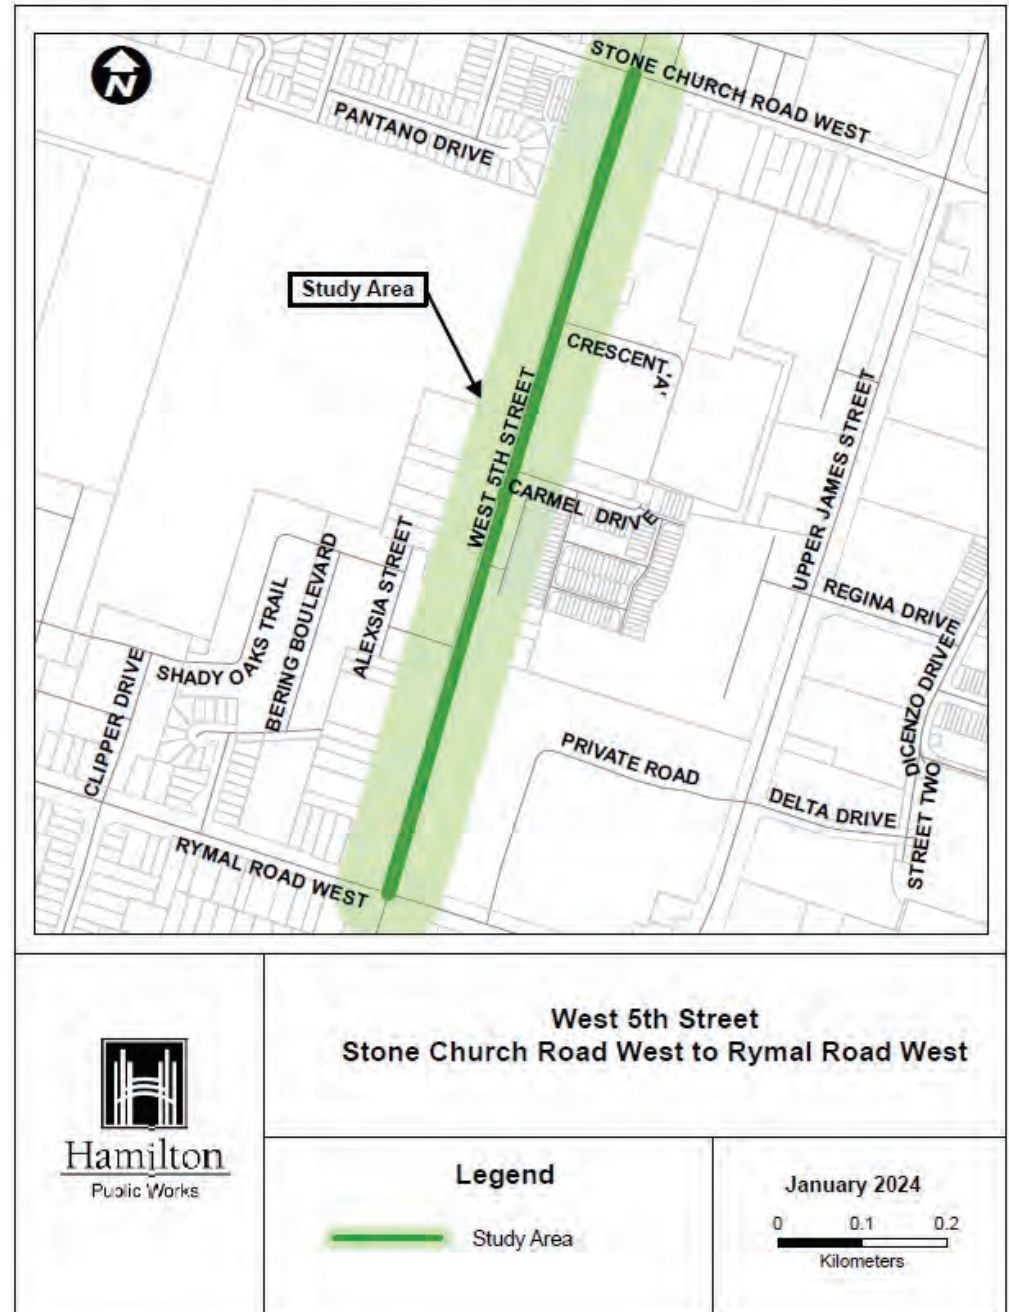

Why are we doing it?

The improvements are to support future growth and corridor needs for both the community and Hamilton.

What does the study include?

The EA will consider a “complete streets” solution to improve traffic, active transportation, transit, street trees, and stormwater management throughout the corridor.

The corridor is shown on the map.

Municipal Class EA Process

The Municipal Class EA study process frames the planning and implementation of municipal infrastructure.

This study is following the requirements of a Schedule C Municipal Class Environmental Assessment (EA), including the completion of Phases 1-4 of the process shown.

Phase 1 and 2 were discussed at the Public Information Centre #1 (PIC1) on January 16, 2025.

The project is now completing Phase 3 where Alternative Designs are evaluated towards implementing the preferred design.

After PIC2, Phase 3 studies will be finished, and Phase 4 (ESR) will be prepared.

Problem & Opportunity

West 5th Street from Stone Church Road West to Rymal Road West is currently a rural cross-section road surrounded by urban growth. The study area has inadequate transportation infrastructure to accommodate transportation needs, and there are discontinuous sidewalks and no cycling facilities. Previous studies have indicated a desire to reconstruct the street within the study area.

The segment of West 5th Street is experiencing significant neighbourhood changes from the recently-built William Connell Park as well as new higher-density developments. Improvements to West 5th Street are required to accommodate existing and future transportation needs for pedestrians, cyclists, transit, and vehicles.

The City is seeking alternatives to implement a "complete streets" approach to enhance multimodal transportation, improve safety, stormwater management, increase tree canopy coverage, and support economic, social, and cultural connectivity in this rapidly evolving area. Improvements will also be evaluated to determine the preferred approach for traffic as well as active transportation (e.g., bike lanes, sidewalks, multi-use paths).

Recommended Concept from PIC1

The following Alternative Solutions were carried forward for further consideration in Phase 3 of the Class EA process (Alternative Designs) and evaluated using the factors and criteria presented:

- **Operational Improvements:** Implement localized measures to improve transit, active transportation, and roadway improvements to optimize accessibility and safety. These can include cycling lanes, sidewalks, and strategically located mid block crosswalks/crossrides.
- **Improve West 5th Street:** Widen/enhance West 5th Street to include a continuous 3 lane cross-section, or intermittent left-turn lanes (where needed), to improve traffic operations and safety given future travel demand. Update to an urban cross section with storm sewers. The right-of-way would be designed to accommodate pedestrians, cyclists, transit, vehicles, and commercial vehicles.

The conceptual cross-section configuration is being presented as part of this phase (Phases 3 & 4) of the EA process

The addition of street trees will be reviewed in conjunction with other design elements such as sidewalks and utilities.

Example of the configuration of West 5th Street, north of Stone Church Road (Source: Google Streetview, 2024)

Complete Streets Concept

- To accommodate the varying needs of multi-modal users, design strategies from the City of Hamilton's *Complete Streets Design Guidelines* may be adopted in the future design of this corridor.
- The “Complete Streets” concepts seek to more equitably accommodate the needs of all modes of transportation (e.g., cars, buses, pedestrians, cyclists).
- Alternatives have been developed and evaluated for West 5th Street as part of this study. The proposed cross-section includes the addition of a Two-Way Left-Turn Lane (TWLTL), as evaluated at PIC#1.**

Example of a cross-section from the *Hamilton Complete Streets Design Guidelines*.

Complete Streets considerations

- Road lane width and alignment
- Transit stop locations and amenities
- Active transportation facilities location, width, and type
- Drainage/stormwater management improvements
- Street lighting
- Street trees and landscaping opportunities
- Construction staging
- Turning movements, access, signal timing
- Intersection accessibility opportunities (i.e., crosswalks, cross-rides)

Alternative Designs and Evaluation Criteria

During Phase 3 of the project, Alternatives are assessed using the factors and criteria below. Comments received from agencies, stakeholders, Indigenous Nations and members of the public are integrated as required.

Socio-Economic Environment

- Impacts to business operations
- Noise impacts
- Property and access
- Aesthetics & complete streets
- Compatibility with existing and proposed developments

Natural Environment

- Vegetation and wildlife
- Water resources
- Air quality
- Climate change
- Stormwater management

Transportation/Engineering

- Accommodate future travel demands (capacity) for all modes
- Safety for all users (vehicles, pedestrians and cyclists)
- Public transit service
- Road network compatibility / connectivity
- Response times / access for emergency vehicles

Cultural Environment

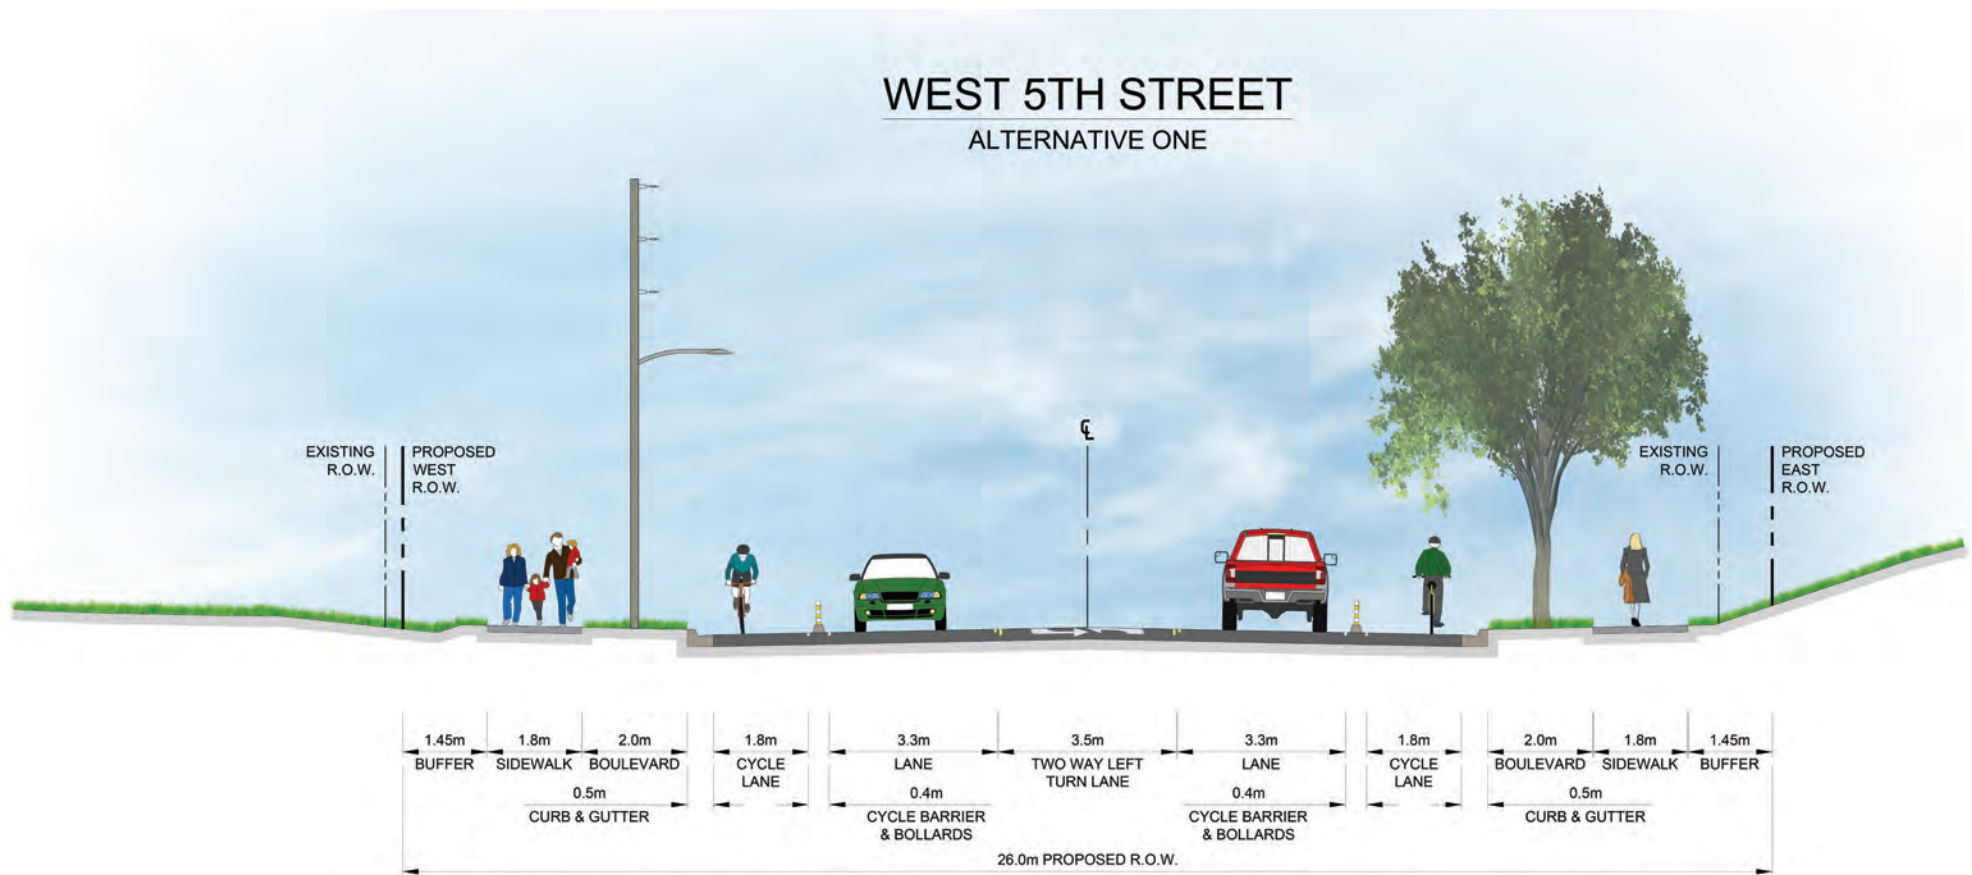

- Archaeological resources
- Built heritage / cultural landscape resources

Financial

- Cost (i.e., capital cost, operational costs)

Alternative 1: On Street Bicycle Facilities

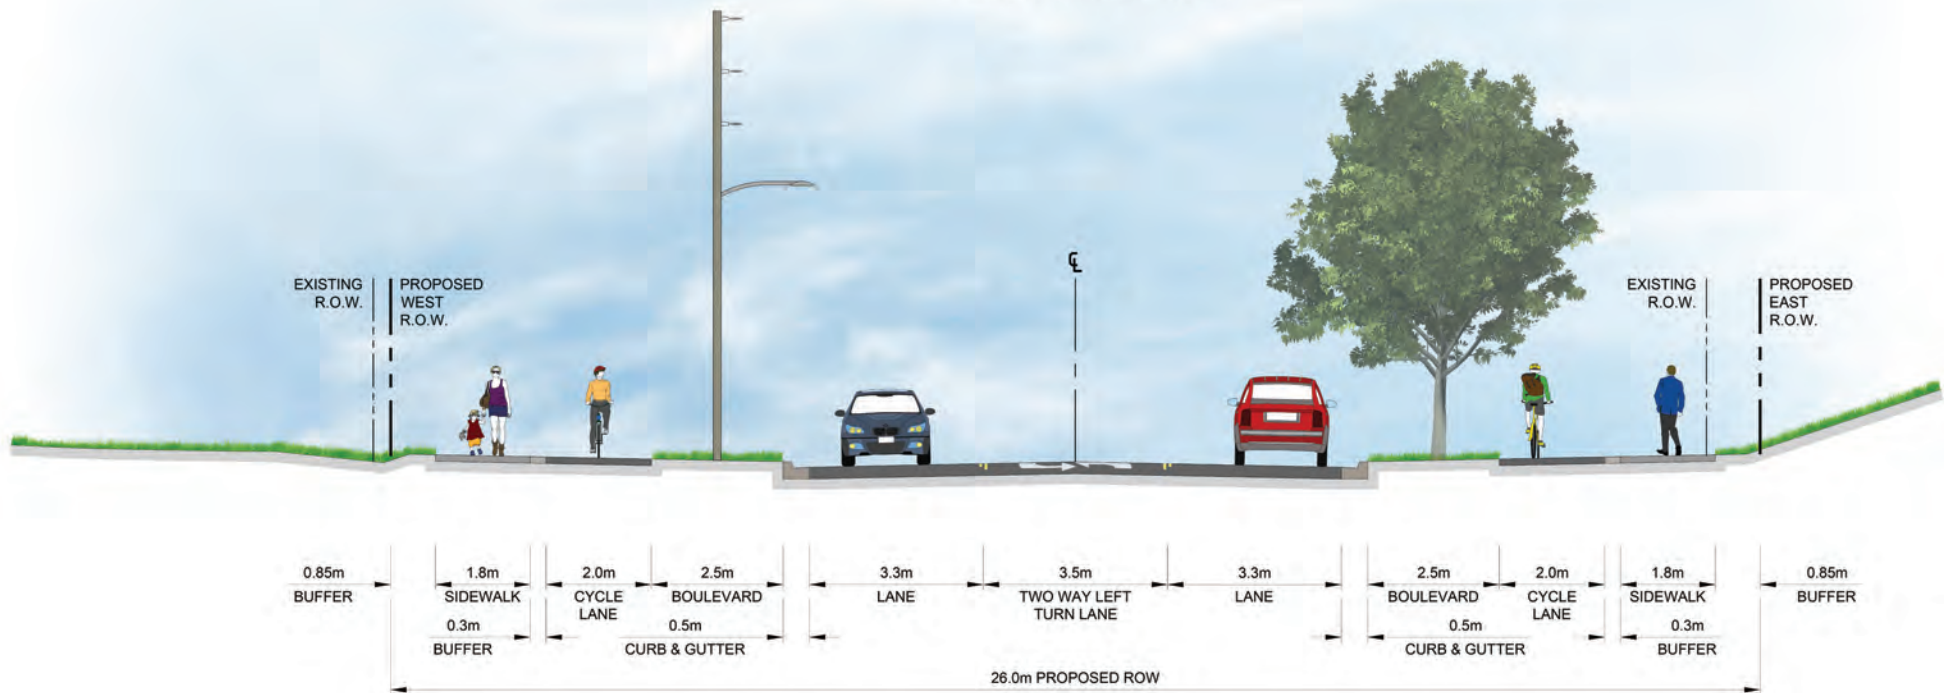

Alternative 1 includes on-street bicycle facilities, using a modified version of the typical connector cross-section from the Complete Streets Manual for a 26 m ROW. The road accommodates a 3.5 meter two-way left-turn lane to better accommodate traffic flow and access. The alternative is similar to West 5th Street to the north of Stone Church Road by providing 1.8 m bicycle lanes directly on the roadway and 1.8 m sidewalks in the boulevards, though it includes separation of the bike lanes to the vehicle lanes.

Alternative 2: Bicycle Facilities in Boulevards

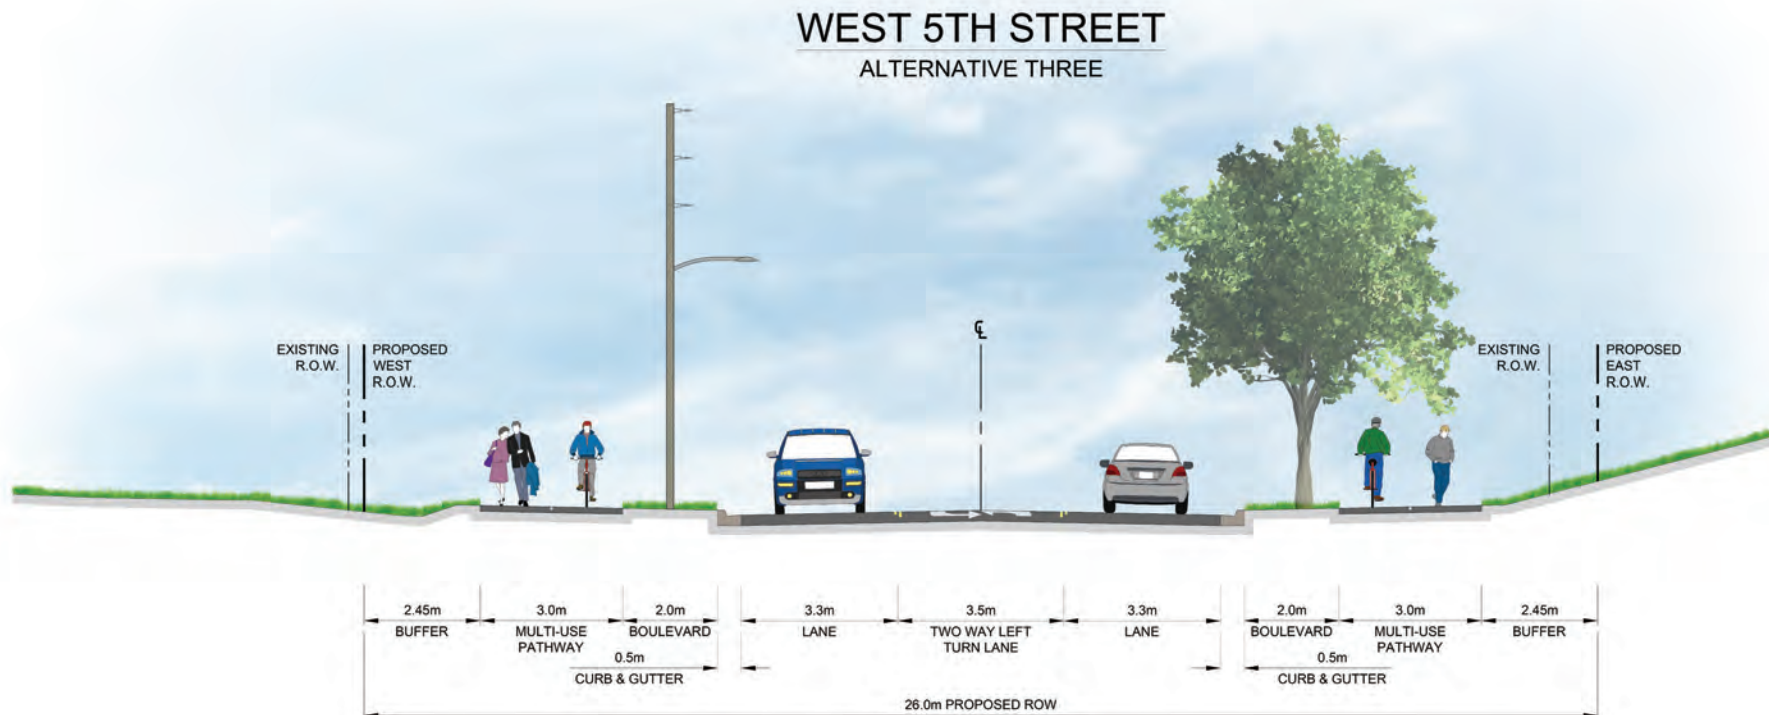

Alternative 2 uses a modified version of the typical connector cross-section from the Complete Streets Manual for a 26 m ROW. The road accommodates a 3.5 meter two-way left-turn lane to better accommodate traffic flow and access. A 2.0 m uni-directional cycle track and 1.8 m sidewalk is provided on both sides of West 5th Street, with a buffer zone for separation between the cycle track and sidewalk.

WEST 5TH STREET ALTERNATIVE TWO

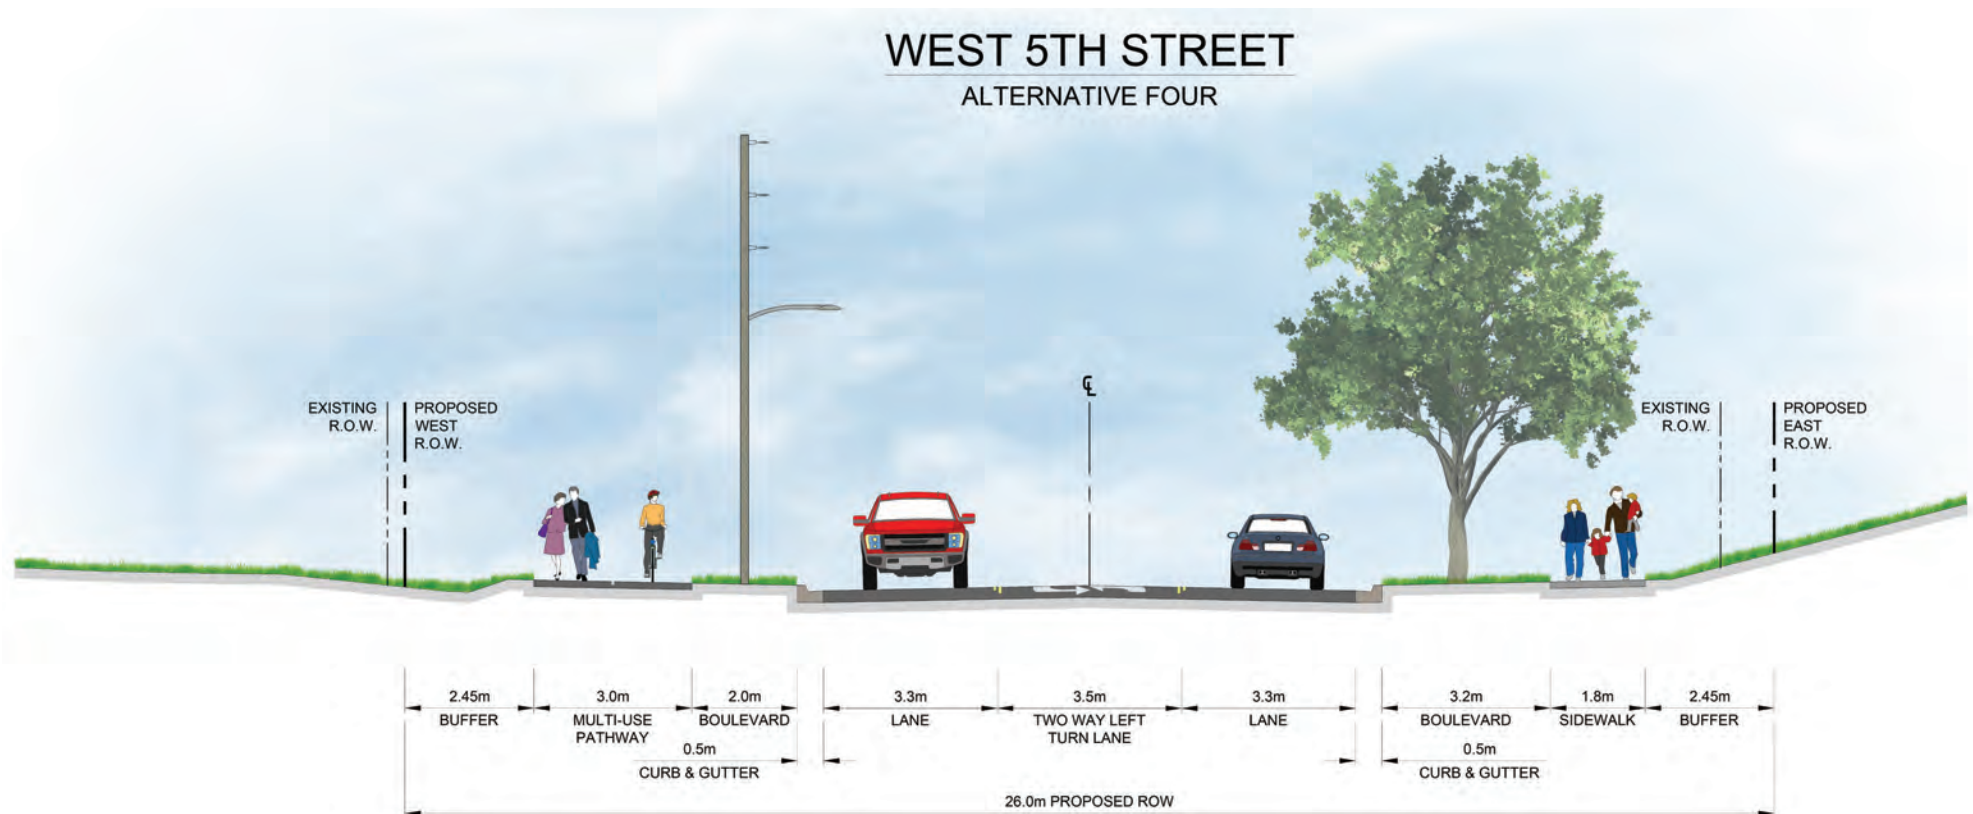

Alternative 3: Multi-Use Pathway (MUP) - Both sides of West 5th Street

Alternative 3 includes a modified version of the typical connector cross-section from the Complete Streets Manual for a 26 m ROW. The road accommodates a 3.5 meter two-way left-turn lane to better accommodate traffic flow and access. A 3.0 m Multi-Use Path (MUP) is included that provides a dedicated shared path for both cyclists and pedestrians. The MUP would be on both sides of the road in the boulevard in lieu of a sidewalk.

Alternative 4: Multi-Use Pathway (MUP) and Sidewalk

Alternative 4 features a modified cross-section from the Complete Streets Manual for a 26-meter right-of-way, incorporating a 3.5 meter two-way left-turn lane to improve traffic flow and access. It includes a 3.0-meter Multi-Use Path (MUP) on the west side for shared pedestrian and cyclist use on the same side as William Connell Park, and a separate 1.8-meter sidewalk on the east side dedicated to pedestrians. Additional pedestrian crossing points can be considered to facilitate access between the sidewalk and the MUP.

Alternative Designs Summary

The following Alternative Designs were compared to assess their ability to address the problems and opportunities identified within the study area:

Evaluation Factors	Alternative 1 On Street Bicycle Facilities	Alternative 2 Bicycle Facilities in Boulevards	Alternative 3 Multi-Use Pathways (MUP) on both sides	Alternative 4 Multi-Use Pathway and sidewalk
Transportation/Engineering	Least Preferred	Moderately Preferred	Moderately Preferred	Most Preferred
Cultural Environment	Most Preferred	Most Preferred	Most Preferred	Most Preferred
Socio-Economic Environment	Moderately Preferred	Moderately Preferred	Moderately Preferred	Most Preferred
Natural Environment	Least Preferred	Least Preferred	Moderately Preferred	Most Preferred
Financial	Most Preferred	Least Preferred	Moderately Preferred	Moderately Preferred
Summary				

Alternative 4: Multi-Use Pathway and Sidewalk is selected as the **Recommended Active Transportation Alternative** for the following reasons:

- Increases connectivity to William Connell Park for cyclists and pedestrians
- Provides the safest and most inclusive option for all users –physically separating cyclists and pedestrians from vehicle traffic and each other.
- Significantly enhances safety and accessibility for people of all ages and abilities, including families, children, and seniors by providing a sidewalk option.
- Minimizes construction challenges with a simple facility design and best preserves future access to the boulevard
- Best balances transportation safety with environmental considerations – increased road safety, less paved surfaces compared to other options, and allows for more tree planting within in the new 26 m right-of-way boundaries.

Environmental & Heritage

- Natural Environment

- Natural environment mapping was reviewed
- Fieldwork occurred in October 2024. Further investigations are ongoing (spring/summer 2025) and will be incorporated into the ESR
- Impacts and mitigation measures are being assessed within the proposed 26 m Right of Way

- Other Investigations

- Built heritage checklist to be included in the ESR
- Stage 1 Archaeology Assessment completed. Stage 2 investigations recommended for detailed design.

Mitigation Measures and Commitments for Detailed Design

Impacts resulting from this project will be minimized to the extent possible. Preliminary mitigation measures have been identified below, and will be further refined in the Environmental Study report and during detail design. Investigations are ongoing and will continue to help confirm environmental impacts, refine mitigation measures, and support obtaining required permits and approvals.

Natural Environment

Species surveys are being undertaken to identify wildlife present within the study area. Impacts to the existing natural environment will be minimized to the extent possible. Temporary barriers to avoid wildlife interactions will be installed during construction.

Utilities

Utility conflicts with the Preferred Solution will be determined. Relocations or mitigation measures will be completed in advance of construction through consultation with individual utility organizations.

Noise Impacts

The potential changes in traffic noise associated with the Preferred Solution is currently being reviewed. A Noise Assessment is being completed to determine if measures are required.

Tree Impacts

Appropriate erosion and sediment controls will be used, and temporary barriers to avoid unnecessary tree clearing will be installed during construction. Future tree plantings are considered in detailed design where space permits.

Next Steps

Following this PIC, the project team will complete the next steps below:

Review and respond to comments received at this PIC

Confirm the Preferred Design

Complete remaining technical studies and prepare ESR

30-day public comment period, review and respond to comments received, after which the project may proceed to Detailed Design

Thank you!

Thank you for participating in this PIC for the West 5th Street Municipal Class Environmental Assessment study. Your feedback is valuable and appreciated. The displays are added to the project website at: www.hamilton.ca/West5thEA

Please provide comments by filling out the comment form or by contacting a member of the project team below by June 17, 2025

Transcript Public Information Centre #2 – June 3, 2025

Slide 1: Title Page

No text.

Slide 2: Welcome!

Welcome to the second Public Information Centre (or PIC) for the West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West. This project is a Municipal Class Environmental Assessment located within the City of Hamilton.

The purpose of this PIC is to:

- Provide an update on the project
- Present a review of the alternative designs
- Identify the preliminary preferred solution for comment, and
- Provide an opportunity to learn about the project and how to stay involved for future updates

Your input is important to us!

After reviewing the information in this presentation, we would appreciate your comments and feedback. Contact information is provided on the last slide if you have any questions that you wish to discuss with a member of the project team.

Slide 3: Land Acknowledgement

Before we begin with presenting the project details, it is important to acknowledge the Indigenous peoples who have had a long association with the land upon which the project and the City of Hamilton is located.

The City of Hamilton is situated upon the traditional territories of the Erie, Neutral, Huron-Wendat, Haudenosaunee and Mississaugas. This land is covered by the Dish With One Spoon Wampum Belt Covenant, which was an agreement between the Haudenosaunee and Anishinaabek to share and care for the resources around the Great Lakes. We further acknowledge that this land is covered by the Between the Lakes Purchase, 1792, between the Crown and the Mississaugas of the Credit First Nation.

Today, the City of Hamilton is home to many Indigenous people from across Turtle Island (North America) and we recognize that we must do more to learn about the rich history of this land so that we can better understand our roles as residents, neighbours, partners and caretakers.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 4: Project Overview

To better understand the project, we are answering the following three questions.

1. what are we doing,
2. why are we doing it, and
3. what does the study area include?

To answer the first, the City of Hamilton is planning for road reconstruction of West 5th Street, from Stone Church Road West to Rymal Road West.

Why are we doing it?

The purpose of this Municipal Class Environmental Assessment study is to support future growth and corridor needs for both the community and Hamilton.

What does the study include?

The EA will consider a “complete streets” solution to improve traffic, active transportation, transit, street trees, and stormwater management throughout the corridor.

The map shows that the study area corridor is West 5th Street from Stone Church Road West to Rymal Road West. For the purposes of this PIC, we will refer to the corridor as West 5th Street.

Slide 5: Municipal Class EA Process

The Municipal Class Environmental Assessment, or EA process, is a five-phase planning process that is approved under the *Ontario Environmental Assessment Act*. All Municipalities in Ontario are required to complete a Municipal Class EA when planning major infrastructure projects.

This project is being planned as a Schedule ‘C’ project, which means it includes Phase 1 through Phase 4 of the EA planning process. Following the EA, the project would proceed to Phase 5 implementation.

These phases of the EA process are summarized:

- Phase 1 includes reviewing background planning and policy documents and identifying the problem or opportunity
- Phase 2 involves completing inventories of the existing conditions (socio-economic, natural, and cultural environments). Alternative solutions are evaluated and a preferred solution is identified.

Phase 1 and 2 were discussed at the first PIC held on January 16, 2025.

We are currently in Phase 3 of the study. This PIC includes identifying the preferred alternative designs - which are alternative ways of implementing the preferred solution.

In Phase 4 we will document the decision-making process in an Environmental Study Report (ESR). Continuous stakeholder engagement is part of the EA process, and comments or questions are encouraged at any time. The study includes opportunities for public input, including two Public Information Centres (PICs) and a 30-day review of the Environmental Study Report at the end of the project.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 6: Problem & Opportunity Statement

The Problem and Opportunity statement is developed to provide an overview of the issues to be addressed, as well as potential outcomes that may be achieved.

There are two primary issues that need to be addressed:

- West 5th Street from Stone Church Road West to Rymal Road West is currently a rural cross-section road surrounded by urban growth. The study area has inadequate transportation to accommodate transportation needs, and there are discontinuous sidewalks and no cycling facilities. Previous studies have indicated a desire to reconstruct the street within the study area.
- The segment of West 5th Street is experiencing significant neighbourhood changes from the recently-built William Connell Park, as well as new higher-density developments. Improvements to West 5th Street are required to accommodate existing and future transportation needs for pedestrians, cyclists, transit, and vehicles.

This presents an opportunity for the City to address the above infrastructure needs and to accommodate additional modes of transportation within the corridor.

- The City is seeking alternatives to implement a "complete streets" approach to enhance multimodal transportation, improve safety, stormwater management, increase tree canopy coverage, and support economic, social, and cultural connectivity in this rapidly evolving area. Improvements will also be evaluated to determine the preferred approach for traffic as well as active transportation (such as bike lanes, sidewalks, and multi-use paths).

Slide 7: Recommended Concept from PIC

The following Alternative Solutions were carried forward for further consideration in Phase 3 of the Class EA process (Alternative Designs) and evaluated using the factors and criteria presented:

- Operational Improvements:
 - Implement localized measures to improve transit, active transportation, and roadway improvements to optimize accessibility and safety. These can include cycling lanes, sidewalks, and strategically located mid-block crosswalks/crossrides.
- Improve West 5th Street:
 - Widen/enhance West 5th Street to include a continuous 3 lane cross-section, or intermittent left-turn lanes (where needed), to improve traffic operations and safety given future travel demand. Update to an urban cross section with storm sewers. The right-of-way would be designed to accommodate pedestrians, cyclists, transit, vehicles, and commercial vehicles.

An example of West 5th Street north of Stone Church Road is shown.

A conceptual cross section will be developed in Phase 3 and 4 of the EA process. The addition of street trees will also be reviewed in conjunction with design elements such as sidewalks and utilities.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 8: Complete Streets Concept

To accommodate the additional demand, design strategies from the City of Hamilton's *Complete Streets Design Guidelines* may be adopted in the future design of this corridor. The "Complete Streets" concepts seek to incorporate roadways for cars, as well as cycling and pedestrian infrastructure.

Complete Streets concept considerations include Physical and Operational Design elements.

Physical Design elements consist of:

- Road lane width and alignment
- Transit stop locations and amenities
- Active transportation facilities location, width, and type
- Drainage/stormwater management improvements
- Street lighting
- Street tree and landscaping opportunities
- Construction staging

Operational Design elements consist of:

- Turning movements, access, and signal timing
- Intersection accessibility opportunities (such as crosswalks and cross-rides)

Alternatives have been developed and evaluated for West 5th Street as part of this study. The proposed cross-section includes the addition of a Two-Way Left-Turn Lane (TWLTL), as evaluated at PIC#1.

Slide 9: Alternative Designs and Evaluation Criteria

During Phase 3 of the project, Alternatives are assessed using the factors and criteria below at the Alternative Designs phase. Comments received from agencies, stakeholders, Indigenous Nations and members of the public were be integrated as required.

Categories include Socio-Economic Environment, Natural Environment, Transportation and Engineering, Cultural Environment, and Financial considerations. Various sub-factors are shown which will help expand upon these categories and address the EA requirements.

Slide 10: Alternative 1 On Street Bicycle Facilities

Alternative 1: On Street Bicycle Facilities

Alternative 1 includes on-street bicycle facilities, using a modified version of the typical connector cross-section from the Complete Streets Manual for a 26 m ROW. The road accommodates a 3.5 meter two-way left-turn lane to better accommodate traffic flow and access. The alternative is similar to West 5th Street to the north of Stone Church Road by providing 1.8 m bicycle lanes directly on the roadway and 1.8 m sidewalks in the boulevards, though it includes separation of the bike lanes to the vehicle lanes.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

Slide 11: Alternative 2 Bicycle Facilities in Boulevard

Alternative 2: Bicycle Facilities in Boulevards

Alternative 2 uses a modified version of the typical connector cross-section from the Complete Streets Manual for a 26 m ROW. The road accommodates a 3.5 meter two-way left-turn lane to better accommodate traffic flow and access. A 2.0 m uni-directional cycle track and 1.8 m sidewalk is provided on both sides of West 5th Street, with a buffer zone for separation between the cycle track and sidewalk.

Slide 12: Alternative 3 Multi-Use Pathway (MUP)

Alternative 3: Multi-Use Pathway (MUP) – Both sides of West 5th Street

Alternative 3 includes a modified version of the typical connector cross-section from the Complete Streets Manual for a 26 m ROW. The road accommodates a 3.5 meter two-way left-turn lane to better accommodate traffic flow and access. A 3.0 m Multi-Use Path (MUP) is included that provides a dedicated shared path for both cyclists and pedestrians. The MUP would be on both sides of the road in the boulevard in lieu of a sidewalk.

Slide 13: Multi-use Pathway MUP and Sidewalk

Alternative 4: Multi-Use Pathway (MUP) and sidewalk

Alternative 4 features a modified cross-section from the Complete Streets Manual for a 26-meter right-of-way, incorporating a 3.5 meter two-way left-turn lane to improve traffic flow and access. It includes a 3.0-meter Multi-Use Path (MUP) on the west side for shared pedestrian and cyclist use on the same side as William Connell Park, and a separate 1.8-meter sidewalk on the east side dedicated to pedestrians. Additional pedestrian crossing points can be considered to facilitate access between the sidewalk and the MUP.

Slide 14: Alternative Designs Summary

The following Alternative Designs were compared to assess their ability to address the problems and opportunities identified within the study area.

A summary table is provided on this slide showing the four alternatives as a comparative evaluation.

Alternative 4: Multi-Use Pathway and sidewalk is selected as the **Recommended Active Transportation Alternative** for the following reasons:

- Increases connectivity to William Connell park for cyclists and pedestrians
- Provides the safest and most inclusive option for all users –physically separating cyclists and pedestrians from vehicle traffic and each other.

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

- Significantly enhances safety and accessibility for people of all ages and abilities, including families, children, and seniors.
- Minimizes construction challenges with a simple facility design and best preserves future access to the boulevard
- Best balances transportation safety with environmental considerations – increased road safety, less paved surfaces compared to other options, and allows for more tree planting within in the new 26 m right-of-way boundaries.

Slide 15: Environmental And Heritage

- Natural Environment
 - Natural environment mapping was reviewed
 - Fieldwork occurred in October 2024. Further investigations are ongoing (spring/summer 2025 and will be incorporated into the ESR
 - Impacts and mitigation measures are being assessed within the proposed 26 m Right of Way
- Other Investigations
 - A built heritage checklist will be included in the ESR
 - Stage 1 Archaeology Assessment completed. Stage 2 investigations recommended for detailed design.

Slide 16: Mitigation Measures and Commitments for Detailed Design

Impacts resulting from this project will be minimized to the extent possible. Preliminary mitigation measures have been identified below, and will be further refined in the Environmental Study report and during detail design. Investigations are ongoing and will continue to help confirm environmental impacts, refine mitigation measures, and support obtaining required permits and approvals.

Natural Environment

Species surveys are being undertaken to identify wildlife present within the study area. Impacts to the existing natural environment will be minimized to the extent possible. Temporary barriers to avoid wildlife interactions will be installed during construction.

Utilities

Utility conflicts with the Preferred Solution will be determined. Relocations or mitigation measures will be completed in advance of construction through consultation with individual utility organizations.

Noise Impacts

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West Municipal Class Environmental Assessment

The potential changes in traffic noise associated with the Preferred Solution is currently being reviewed. A Noise Assessment is being completed to determine if measures are required.

Tree Impacts

Appropriate erosion and sediment controls will be used, and temporary barriers to avoid unnecessary tree clearing will be installed during construction. Future tree plantings are considered in detailed design where space permits.

Slide 17: Next Steps

Following this PIC, the project team will complete the next steps below:

- Review and respond to comments received at this PIC
- Confirm the Preferred Design
- Complete remaining technical studies and prepare ESR
- 30-day public comment period
- review, and respond to comments received
- After these steps are done, the project may proceed to detailed design

Slide 18: Thank you!

Thank you for participating in this PIC for the West 5th Street Municipal Class Environmental Assessment study. Your feedback is valuable and appreciated.

Contact information is provided on the slide for the City of Hamilton and the project manager for Stantec Consulting Limited. You can also visit the project website for more information at:

www.hamilton.ca/west5thea

Following this PIC, the displays will be posted to the City of Hamilton website where you can also find the contact information and email addresses to provide comments to the project team.

Comments are requested to be sent by June 17, 2025.

Thank you once again for your interest in this study.

		once they close Stone Church to Rymal for construction, will I be able to get in there?		notification letter, please reach out to the construction project manager and they can let you know. Thank you! Kind regards.
James Thomas james.thomas@ajclarke.com	May 28, 2025 Email	<p>Good afternoon,</p> <p>I received the notice of the upcoming PIC #2. Unfortunately, yet again, I will be away. I understand that the materials will be posted for comment the week of this meeting but I was hoping to get a small window of knowledge as to:</p> <ol style="list-style-type: none">1. What forms of cross-sections would the roads be basing their design upon (i.e. "connector","urban avenue", etc). I do understand a middle turning lane and bike lanes have been appropriately identified already in the transportation master plans.2. Is there currently any desire or intent to allow for lay-by on-street parking in sections along West 5th? <p>If you would be able to provide any comment to the above, it would be greatly appreciated. Thank you very much.</p>	Added to mailing list Response provided May 29, 2025	<p>Good morning James,</p> <p>Thank you for your email! The panels will be posted on the project's website (www.hamilton.ca/West5thEA) on Monday. There will be a window for comments that will end on June 17th, 2025. West 5th is a connector road. The preferred alternative is a 3-lane cross-section (one lane in each direction with a TWLTL), with sidewalk on the east side and MUP on the west side of the road.</p> <p>There is no intent to allow for lay-by on-street parking for the length of the study area. I hope this information helps. Please let me know if you have any questions. Thank you!</p>
	June 3, 2025 PIC #2 Comment Sheet	<p>PIC #2 Comment Sheet</p> <ul style="list-style-type: none">• Move multi-use path to east side of street (side of plaza)	Added to mailing list	<p>Response sent by email September 11, 2025:</p> <p>Thank you for attending the Public Information Centre (PIC) for the West 5th Street corridor from Stone</p>

Contact Information	Date/ Type	Issue/Concern	Action Taken	Commitment/Response
		<ul style="list-style-type: none">• Single pedestrian ie sidewalk only to west side of street (side with houses)• Reason: cars pulling out of driveways more of a safety concern and crossing over multi-use path and blocking while waiting to get out of driveway• Cost saving – not having to purchase property		<p>Church Road to Rymal Road. Your suggestions regarding the location of the multi-use path and sidewalk, and traffic safety are appreciated.</p> <p>Since the PIC, the team has been refining the preliminary design for public safety based on the received comments. The size of the new centre two-way left turn lane is proposed to be reduced from 3.5 metres to 3 metres to limit potential misuse of the lane as a passing or through lane and from speeding. The refinements also better separate cycling and pedestrians by shifting one direction of cycling to the east side of West 5th Street and keeping one direction on the west side for better balance and connectivity.</p> <p>While the boulevard size does not allow a full car-length to wait between the cycletrack and the road, the change has some benefit to drivers exiting residential driveways since active transportation is less confined to one side, and bicycles are only coming from one direction.</p> <p>At the completion of the project, an Environmental Study Report will be posted on the project website for a 30 day comment period. Your contact information has been added to the mailing list for future updates. Thank you again for your input.</p>
	June 3, 2025 PIC #2 Comment Sheet	After living between Limeridge and Stone Church I find because the street section is straight. Vehicles will speed and right	Added to mailing list	<p>Response sent by email September 11, 2025:</p> <p>Thank you for attending the Public Information Centre for the West 5th Street corridor project. The project</p>

Contact Information	Date/ Type	Issue/Concern	Action Taken	Commitment/Response
		<p>turning vehicles turn way too fast because of the left turning lane.</p> <p>More mixed transit should be prioritized. I would recommend lowering the speed limit to even 35 km/ h to prioritize away from vehicular traffic. This would allow more safe access then giving drivers better options to access the park. Upper James and Garth offer already optimal vehicle travel.</p> <p>Sidewalks from concrete I don't find condusive for any user. The hard surface is a hard surface for pedestrians adding no shock for feet movement. The grooves aren't great for strollers or mobility devices.</p>		<p>limits are between Stone Church Road West and Rymal Road West, and do not extend to the area between Limeridge Road and Stone Church Road. However, we still appreciate your suggestions on vehicle speed and lane size.</p> <p>Since the PIC, the team has been refining the preliminary design for traffic safety based on comments received. The size of the new centre two-way left turn lane is proposed to be reduced from 3.5 metres to 3 metres to limit potential misuse of the lane as a passing or through lane and from speeding.</p> <p>Your comments regarding sidewalk concrete are noted by the project team. Sidewalk standards are set by the City of Hamilton to meet accessibility guidelines. Sidewalk design will be completed in detailed design.</p> <p>At the completion of the project, an Environmental Study Report will be posted on the project website for a 30 day comment period. Your contact information has been added to the mailing list for future updates. Thank you again for your input.</p>

Good afternoon, Olivia and Isaac,

I received the notice of the upcoming PIC #2. Unfortunately, yet again, I will be away.
I understand that the materials will be posted for comment the week of this meeting but I was hoping to get a small window of knowledge as to:

1. What forms of cross-sections would the roads be basing their design upon (i.e. "connector", "urban avenue", etc). I do understand a middle turning lane and bike lanes have been appropriately identified already in the transportation master plans.
2. Is there currently any desire or intent to allow for lay-by on-street parking in sections along West 5th?

If you would be able to provide any comment to the above, it would be greatly appreciated.

Thank you very much,

James Thomas. CPT,
Planner

Subject: RE: West 5th MCEA Information

Good morning James,

Thank you for reaching out!

We are presently in Phase 2 of the EA process, establishing alternative solutions to improve West 5th. Currently there are no designs. After the first PIC, we will be moving to Phase 3, which will be developing alternative designs. For information about the project, please visit the project's website at www.hamilton.ca/West5thEA. The PIC panels will be published around January 13th, 2025.

We are looking at improving traffic, active transportation, transit, and stormwater management for this corridor. This EA is scheduled to be completed by the end of 2025. Then the project will be moving to detailed design, which will take 2 years to be completed. So construction will most likely start in 2028, if no delays are to happen.

If you have any questions, please don't hesitate to reach out to me. Thank you!

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)

Subject: West 5th MCEA Information

External Email: Use caution with links and attachments

Good afternoon, Olivia and Isaac,

My name is James Thomas, a planner with A.J. Clarke & Associates Ltd.

I am currently drafting a Planning Justification Report and preparing submission of a Zoning By-law Amendment for lands fronting this section of West 5th.

While I understand this is early in the process, I hope that I may be able to obtain some of the information that will be presented on January 16th ahead of time as I will be out of the country on the date of the public meeting. I intend to have the complete submission in by the end of January, so the quicker I can evaluate some of the proposed designs the better.

Our transportation consultant provided very high-level expected improvements from this anticipated EA within their Transportation Impact Study – to the best of their knowledge. This included the likelihood of extending the cycling infrastructure, sidewalks, a likely middle turning lane, and the current Concept Plan for a proposed transit line along West 5th. We also received formal consultation comments from public works in January 2024 that the City was intending on starting construction in 2026.

I greatly appreciate your assistance on the matter,

James Thomas. CPT, HBA

Planner

Hello , thank you very much for your response.

I'm sorry, but I do not understand. All I need to know is if I want to go to the park once they close Stone Church to Rymal for construction, will I be able to get in there?

Good morning [REDACTED]

Thank you for your email!

Currently we are in the Environmental Assessment (EA) phase, which we aim to have it completed by Q1 2026. Once the EA is finalized, the project will move to the Detailed Design phase, which will take about 3 years. After that, it's Construction phase. Once the project reaches Construction phase, you will be notified on construction dates and closures.

I hope this answer helps. If you have any other questions, please don't hesitate to reach out to me.

Thank you!

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)

COMMENT FORM
West 5th Street Corridor Improvements from Stone Church Road West to Rymal
Road West
Public Information Centre 2, Westmount Recreation Centre
Tuesday June 3, 2025, 6:00 pm – 8:00 pm

Thank you for attending this Public Information Centre. Please provide your comments and use the back of this sheet if you need more space. Visit the project website at www.hamilton.ca/West5thEA for project information or to submit additional comments. The PIC displays will also be available on the project website.

Do you have any comments on the Alternative Designs Summary?

After living between Limeridge & Stonechurch I find because the street section is straight @ vehicles will speed and right turning vehicles turn way too fast because of the left turning lane.

More mixed transit should be prioritized. I would recommend lowering the speed limit to even 35 km/h to prioritize away from vehicular traffic. This would allow more safe access ^(possibly reducing car traffic in general) then giving drivers better options to access the park. Upper James/Garth offer already optimal vehicle travel.

Do you have any comments on the recommended Alternative 4?

Sidewalks made from concrete I don't find conducive for any users use. The hard surface is a hard surface for pedestrians - adding no shock for feet movement, the grooves aren't great for strollers or mobility devices (shock on chairs, wrists for walker devices).

Please leave your completed comment sheet in the drop box provided or submit to the project team **by June 17, 2025** to:

Isaac Bartlett, Project Manager – Sr. Associate, Transportation

Hello [REDACTED]

Thank you for attending the Public Information Centre for the West 5th Street corridor project. The project limits are between Stone Church Road West and Rymal Road West, and do not extend to the area between Limeridge Road and Stone Church Road. However, we still appreciate your suggestions on vehicle speed and lane size.

Since the PIC, the team has been refining the preliminary design for traffic safety based on comments received. The size of the new centre two-way left turn lane is proposed to be reduced from 3.5 metres to 3 metres to limit potential misuse of the lane as a passing or through lane and from speeding. Your comments regarding sidewalk concrete are also noted by the project team. Sidewalk standards are set by the City of Hamilton to meet accessibility guidelines. Sidewalk design will be completed in detailed design.

At the completion of the project, an Environmental Study Report will be posted on the project website for a 30 day comment period. Your contact information has been added to the mailing list for future updates. Thank you again for your input and interest in this project.

Regards,

David Kielstra, MA, EP, MCIP, RPP

West 5th Street Corridor Improvements from Stone Church Road West to Rymal Road West

Public Information Centre 2, Westmount Recreation Centre
Tuesday June 3, 2025, 6:00 pm – 8:00 pm

Thank you for attending this Public Information Centre. Please provide your comments and use the back of this sheet if you need more space. Visit the project website at www.hamilton.ca/West5thEA for project information or to submit additional comments. The PIC displays will also be available on the project website.

Do you have any comments on the Alternative Designs Summary?

more multi use path to east side of street (side of plaza)

~~more~~ single pedestrian ie sidewalk ^{only} to west side of street (side with houses)

Reason: 1) cars pulling out of driveways more of a safety concern crossing over multi use path & blocking while waiting to get out of driveway

Do you have any comments on the recommended Alternative 4?

a) cost saving - not having to purchase property.

Please leave your completed comment sheet in the drop box provided or submit to the project team **by June 17, 2025** to:

Isaac Bartlett, Project Manager – Sr. Associate, Transportation

Hello [REDACTED]

Thank you for attending the Public Information Centre (PIC) for the West 5th Street corridor from Stone Church Road to Rymal Road. Your suggestions regarding the location of the multi-use path and sidewalk, and traffic safety are appreciated.

Since the PIC, the team has been refining the preliminary design for public safety based on the received comments. The size of the new centre two-way turn lane is proposed to be reduced from 3.5 metres to 3 metres to limit potential misuse of the lane as a passing or through lane and from speeding. The refinements also better separate cycling and pedestrians by shifting one direction of cycling to the east side of West 5th Street and keeping one direction on the west side for better balance and connectivity.

While the boulevard size does not allow a full car-length to wait between the cycletrack and the road, the change has some benefit to drivers exiting residential driveways since active transportation is less confined to one side, and bicycles are only coming from one direction.

At the completion of the project, an Environmental Study Report will be posted on the project website for a 30 day comment period. Your contact information has been added to the mailing list for future updates. Thank you again for your input and interest in this project.

K5: Indigenous Correspondence

Indigenous Engagement Log for West 5th Street EA

The chart below contains a summary of Indigenous Nation Engagement for the West 5th Street EA. The process below is typical for that of a Municipal Class Environmental Assessment following the Schedule C process. During the two main notification stages, notices are sent via both mail and e-mail.

The Notices will also be posted in the Hamilton Spectator for two weeks for each notice and will be available on the project webpage.

It should be noted that MECP listed the following communities as the required contacts for engagement: Mississaugas of the Credit First Nation and Six Nations of the Grand River (Elected Council and Haudenosaunee Confederacy Chiefs Council with a copy to Haudenosaunee Development Institute). Through City practices, we have also established a practice to connect with the Huron-Wendat and Métis

Re: West 5th Street (Stone Church Road West to Rymal Road West) Municipal Class Environmental Assessment

Dear Tanya and Robin,

We are writing to bring to your attention an Environmental Assessment project that has been initiated for West 5th Street in the City of Hamilton.

The purpose of this project is to complete a Municipal Class Environmental Assessment (EA) for West 5th Street, between Stone Church Road West and Rymal Road West. A memo providing additional details on the project will be included with this letter.

As part of this project, a Stage 1 Archaeological Assessment will be completed. The draft Stage 1 report will be circulated to you for review and comment prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries. It is anticipated that the draft report will be available in early 2025.

A natural heritage assessment will also be completed as part of this project. We are still in the process of scoping the natural heritage requirements, but any field work would be initiated in Fall 2024. We plan to provide updates on the status of this and to provide more details once the scope and timing have been confirmed.

We will also be following the Municipal Class EA process to contact you at key stages of the planning process: during the development and evaluation of alternative solutions; during the development and evaluation of design alternatives; and upon completion of the final report. More details are provided in the accompanying memo.

We look forward to working with you on this project. Please let us know if you are interested in discussing this project in more detail, or have questions at any point during the project, and we would be pleased to arrange a phone call or virtual meeting.

Best regards,

A handwritten signature in black ink, appearing to read 'Olivia Stanciu', with a long horizontal flourish extending to the right.

From: Olivia Stanciu, Project Manager, City of Hamilton

Subject: West 5th Street Municipal Class Environmental Assessment – Project Summary

Project Overview

The purpose of the West 5th Street Municipal Class Environmental Assessment (EA) is to complete a Schedule C (Phases 3 and 4) Municipal Class EA for West 5th Street, between Stone Church Road West and Rymal Road West, in advance of planned road reconstruction. This study will address both transportation and stormwater/drainage Municipal Class EA requirements.

As part of this study, we will be identifying and evaluating options to improve/upgrade the transportation facilities within the study area including evaluating different road widening options, adding active transportation facilities such as sidewalks and cycling lanes, and urbanization (adding curbs and stormwater infrastructure).

The Municipal Class EA process is a planning a decision-making tool used by municipalities to plan and implement infrastructure projects. This process includes identifying a problem or opportunity, identifying alternative solutions to address the problem/opportunity, identifying alternative design concepts for the preferred solutions, and documenting the decision-making process.

Project start date: August 2024
Anticipated completion date: Q4 2025

Study Area

Background

Road improvements for West 5th Street have been recommended under both the South Mountain Area Transportation Master Plan (2000) and Mewburn Sheldon Master Servicing Plan (2004). Through planning discussions involving other upcoming municipal infrastructure projects, there is an opportunity to coordinate construction projects and support upcoming development.

Study Deliverables

The primary deliverable of this project will be a detailed report documenting the study process, key background studies, and ultimate study recommendations. Study recommendations will include, but may not be limited to the recommended cross section for the study area (e.g., number and width of travel and turning lanes, location and width of active transportation facilities, etc.), and stormwater management facilities. This report will be used to guide detailed design.

Current Status

In Q3 2024, the project completed the procurement process and a consultant has been obtained (Stantec). The background review for the project is in the process of being initiated.

Planned Points of Contact

An important part of the project is engagement. For this project, the engagement plan consists of both legislated contact points and additional involvement opportunities that we have deemed key. A high-level summary of the planned points of contact are provided below. The dates will be updated and refined as the study progresses.

- Provision of Project Summary (October 2024)
 - This is the current stage of the engagement plan.
- Provision of Draft Stage 1 Archaeological Assessment Report (Q4 2024)
- Provision of an Update on the Natural Heritage Assessment Scope and Schedule (Q4 2024)
- Notice of Study Commencement and Public Information Centre (PIC) #1 (Q1 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the alternative solutions for the project.
- Notice of PIC #2 (Q3 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the design alternatives for the project.
- Notice of Study Completion and Public Review (Q4 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - The final report and recommendations will be available for review.

For any questions or comments related to this project or process, please contact Olivia Stanciu (Olivia.Stanciu@hamilton.ca).

Hi Peter,

Thank you for confirming your interest in this project!

Enclosed please find the terms of reference that we send to the consultant to guide the natural heritage studies required. However, at this time, we have not yet determined how many seasons will be required to complete the inventory. This will be done as part of the project's startup work in consultation with our Natural Heritage staff. If you'd like, we can touch base with you after the consultant had a chance to complete a preliminary review.

Also, I confirm that you've been added to the mailing list.

If you have any other questions, please don't hesitate to reach out to me.

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)

West 5th Street Municipal Class Environmental Assessment

Notice of Study Commencement and Public Information Centre #1

The Study

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Process

This project is being carried out as a Schedule C project under the Municipal Engineers Association *Municipal Class Environmental Assessment* (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024). The purpose of the first Public Information Centre (PIC) will review the problem/opportunity statement, the alternative solutions, and the recommended solution. A second PIC will be held at a later date to review the project’s alternative designs and the associated evaluation process.

How to Participate

In-Person Public Information Centre	Review Materials Online
<p>DATE: Thursday, January 16, 2025</p> <p>TIME: 6:00 p.m. – 8:00 p.m. (open house format)</p> <p>LOCATION: Westmount Recreation Centre, 35 Lynbrook Dr, Hamilton, ON L9C 2K6</p> <p>The PIC will be a drop-in style session where information will be provided about the project. Project team members will be available to answer questions.</p>	<p>Visit the project webpage anytime from January 14th, 2025, to view the information display panels. Following the live event, a recorded presentation will also be posted. Materials are available 24 hours a day, 7 days a week.</p> <p>The project website is: www.hamilton.ca/West5thEA</p>

If you have any accessibility requirements to review the PIC materials and provide comments, please contact the City Project Manager below.

Re: West 5th Street (Stone Church Road West to Rymal Road West) Municipal Class Environmental Assessment

Dear Abby,

We are writing to bring to your attention an Environmental Assessment project that has been initiated for West 5th Street in the City of Hamilton.

The purpose of this project is to complete a Municipal Class Environmental Assessment (EA) for West 5th Street, between Stone Church Road West and Rymal Road West. A memo providing additional details on the project will be included with this letter.

As part of this project, a Stage 1 Archaeological Assessment will be completed. The draft Stage 1 report will be circulated to you for review and comment prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries. It is anticipated that the draft report will be available in early 2025.

A natural heritage assessment will also be completed as part of this project. We are still in the process of scoping the natural heritage requirements, but any field work would be initiated in Fall 2024. We plan to provide updates on the status of this and to provide more details once the scope and timing have been confirmed.

We will also be following the Municipal Class EA process to contact you at key stages of the planning process: during the development and evaluation of alternative solutions; during the development and evaluation of design alternatives; and upon completion of the final report. More details are provided in the accompanying memo.

We look forward to working with you on this project. Please let us know if you are interested in discussing this project in more detail, or have questions at any point during the project, and we would be pleased to arrange a phone call or virtual meeting.

Best regards,

Subject: West 5th Street Municipal Class Environmental Assessment – Project Summary

Project Overview

The purpose of the West 5th Street Municipal Class Environmental Assessment (EA) is to complete a Schedule C (Phases 3 and 4) Municipal Class EA for West 5th Street, between Stone Church Road West and Rymal Road West, in advance of planned road reconstruction. This study will address both transportation and stormwater/drainage Municipal Class EA requirements.

As part of this study, we will be identifying and evaluating options to improve/upgrade the transportation facilities within the study area including evaluating different road widening options, adding active transportation facilities such as sidewalks and cycling lanes, and urbanization (adding curbs and stormwater infrastructure).

The Municipal Class EA process is a planning a decision-making tool used by municipalities to plan and implement infrastructure projects. This process includes identifying a problem or opportunity, identifying alternative solutions to address the problem/opportunity, identifying alternative design concepts for the preferred solutions, and documenting the decision-making process.

Project start date: August 2024
Anticipated completion date: Q4 2025

Study Area

Background

Road improvements for West 5th Street have been recommended under both the South Mountain Area Transportation Master Plan (2000) and Mewburn Sheldon Master Servicing Plan (2004). Through planning discussions involving other upcoming municipal infrastructure projects, there is an opportunity to coordinate construction projects and support upcoming development.

Study Deliverables

The primary deliverable of this project will be a detailed report documenting the study process, key background studies, and ultimate study recommendations. Study recommendations will include but may not be limited to the recommended cross section for the study area (e.g., number and width of travel and turning lanes, location and width of active transportation facilities, etc.), and stormwater management facilities. This report will be used to guide detailed design.

Current Status

In Q3 2024, the project completed the procurement process and a consultant has been obtained (Stantec). The background review for the project is in the process of being initiated.

Planned Points of Contact

An important part of the project is engagement. For this project, the engagement plan consists of both legislated contact points and additional involvement opportunities that we have deemed key. A high-level summary of the planned points of contact are provided below. The dates will be updated and refined as the study progresses.

- Provision of Project Summary (October 2024)
 - This is the current stage of the engagement plan.
- Provision of Draft Stage 1 Archaeological Assessment Report (Q4 2024)
- Provision of an Update on the Natural Heritage Assessment Scope and Schedule (Q4 2024)
- Notice of Study Commencement and Public Information Centre (PIC) #1 (Q1 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the alternative solutions for the project.
- Notice of PIC #2 (Q3 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the design alternatives for the project.
- Notice of Study Completion and Public Review (Q4 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - The final report and recommendations will be available for review.

For any questions or comments related to this project or process, please contact Olivia Stanciu (Olivia.Stanciu@hamilton.ca).

West 5th Street Municipal Class Environmental Assessment

Notice of Study Commencement and Public Information Centre #1

The Study

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Process

This project is being carried out as a Schedule C project under the Municipal Engineers Association *Municipal Class Environmental Assessment* (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024). The purpose of the first Public Information Centre (PIC) will review the problem/opportunity statement, the alternative solutions, and the recommended solution. A second PIC will be held at a later date to review the project’s alternative designs and the associated evaluation process.

How to Participate

In-Person Public Information Centre	Review Materials Online
<p>DATE: Thursday, January 16, 2025 TIME: 6:00 p.m. – 8:00 p.m. (open house format) LOCATION: Westmount Recreation Centre, 35 Lynbrook Dr, Hamilton, ON L9C 2K6</p> <p>The PIC will be a drop-in style session where information will be provided about the project. Project team members will be available to answer questions.</p>	<p>Visit the project webpage anytime from January 14th, 2025, to view the information display panels. Following the live event, a recorded presentation will also be posted. Materials are available 24 hours a day, 7 days a week.</p> <p>The project website is: www.hamilton.ca/West5thEA</p>

If you have any accessibility requirements to review the PIC materials and provide comments, please contact the City Project Manager below.

Re: West 5th Street (Stone Church Road West to Rymal Road West) Municipal Class Environmental Assessment

Dear Cassidy,

We are writing to bring to your attention an Environmental Assessment project that has been initiated for West 5th Street in the City of Hamilton.

The purpose of this project is to complete a Municipal Class Environmental Assessment (EA) for West 5th Street, between Stone Church Road West and Rymal Road West. A memo providing additional details on the project will be included with this letter.

As part of this project, a Stage 1 Archaeological Assessment will be completed. The draft Stage 1 report will be circulated to you for review and comment prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries. It is anticipated that the draft report will be available in early 2025.

A natural heritage assessment will also be completed as part of this project. We are still in the process of scoping the natural heritage requirements, but any field work would be initiated in Fall 2024. We plan to provide updates on the status of this and to provide more details once the scope and timing have been confirmed.

We will also be following the Municipal Class EA process to contact you at key stages of the planning process: during the development and evaluation of alternative solutions; during the development and evaluation of design alternatives; and upon completion of the final report. More details are provided in the accompanying memo.

We look forward to working with you on this project. Please let us know if you are interested in discussing this project in more detail, or have questions at any point during the project, and we would be pleased to arrange a phone call or virtual meeting.

Best regards,

Olivia Stanciu

Hamilton

Public Works

Memorandum

Date: Thursday, October 3, 2024

To: Cassidy Shay Press, Branch Coordinator | Climate Change Advisor, Lands, Resources & Consultation (LRC) Branch, Métis Nation of Ontario

cc: Isaac Bartlett, Project Lead, Stantec

From: Olivia Stanciu, Project Manager, City of Hamilton

Subject: West 5th Street Municipal Class Environmental Assessment – Project Summary

Project Overview

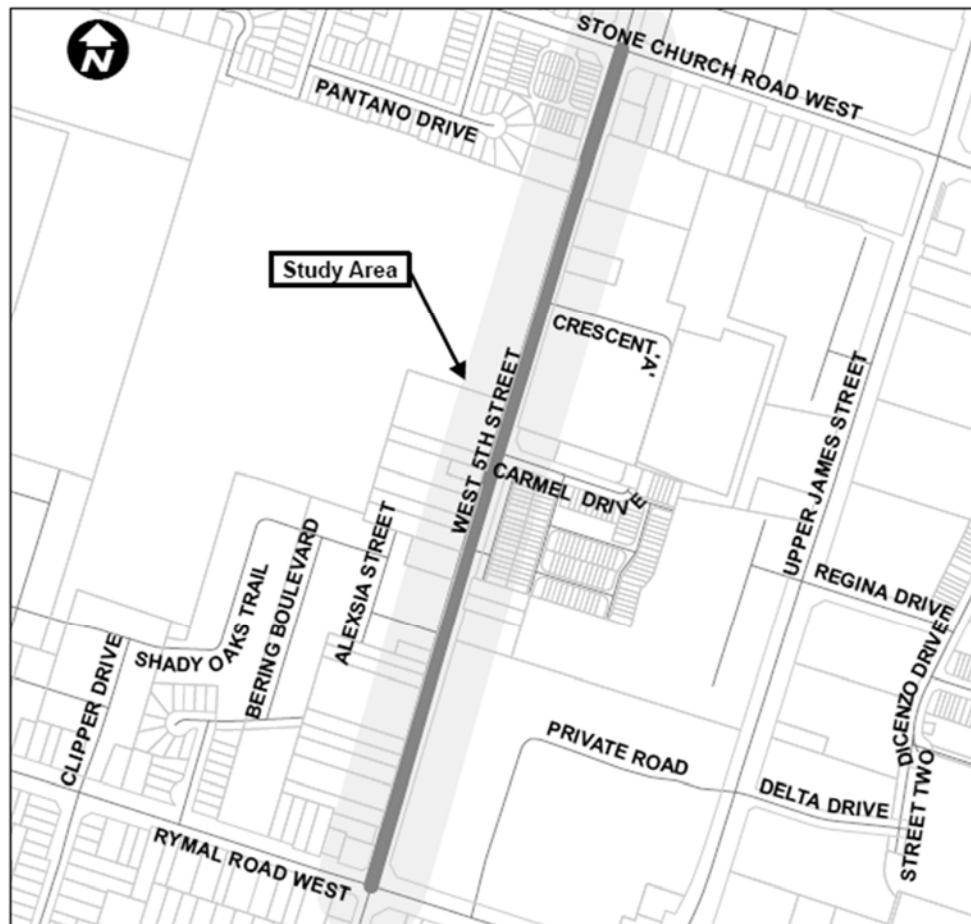

The purpose of the West 5th Street Municipal Class Environmental Assessment (EA) is to complete a Schedule C (Phases 3 and 4) Municipal Class EA for West 5th Street, between Stone Church Road West and Rymal Road West, in advance of planned road reconstruction. This study will address both transportation and stormwater/drainage Municipal Class EA requirements.

As part of this study, we will be identifying and evaluating options to improve/upgrade the transportation facilities within the study area including evaluating different road widening options, adding active transportation facilities such as sidewalks and cycling lanes, and urbanization (adding curbs and stormwater infrastructure).

The Municipal Class EA process is a planning a decision-making tool used by municipalities to plan and implement infrastructure projects. This process includes identifying a problem or opportunity, identifying alternative solutions to address the problem/opportunity, identifying alternative design concepts for the preferred solutions, and documenting the decision-making process.

Project start date: August 2024
Anticipated completion date: Q4 2025

Study Area

Background

Road improvements for West 5th Street have been recommended under both the South Mountain Area Transportation Master Plan (2000) and Mewburn Sheldon Master Servicing Plan (2004). Through planning discussions involving other upcoming municipal infrastructure projects, there is an opportunity to coordinate construction projects and support upcoming development.

Study Deliverables

The primary deliverable of this project will be a detailed report documenting the study process, key background studies, and ultimate study recommendations. Study recommendations will include, but may not be limited to the recommended cross section for the study area (e.g., number and width of travel and turning lanes, location and width of active transportation facilities, etc.), and stormwater management facilities. This report will be used to guide detailed design.

Current Status

In Q3 2024, the project completed the procurement process and a consultant has been obtained (Stantec). The background review for the project is in the process of being initiated.

Planned Points of Contact

An important part of the project is engagement. For this project, the engagement plan consists of both legislated contact points and additional involvement opportunities that we have deemed key. A high-level summary of the planned points of contact are provided below. The dates will be updated and refined as the study progresses.

- Provision of Project Summary (October 2024)
 - This is the current stage of the engagement plan.
- Provision of Draft Stage 1 Archaeological Assessment Report (Q4 2024)
- Provision of an Update on the Natural Heritage Assessment Scope and Schedule (Q4 2024)
- Notice of Study Commencement and Public Information Centre (PIC) #1 (Q1 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the alternative solutions for the project.
- Notice of PIC #2 (Q3 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the design alternatives for the project.
- Notice of Study Completion and Public Review (Q4 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - The final report and recommendations will be available for review.

For any questions or comments related to this project or process, please contact Olivia Stanciu (Olivia.Stanciu@hamilton.ca).

Re: West 5th Street (Stone Church Road West to Rymal Road West) Municipal Class Environmental Assessment

Dear Maxime and Tina,

We are writing to bring to your attention an Environmental Assessment project that has been initiated for West 5th Street in the City of Hamilton.

The purpose of this project is to complete a Municipal Class Environmental Assessment (EA) for West 5th Street, between Stone Church Road West and Rymal Road West. A memo providing additional details on the project will be included with this letter.

As part of this project, a Stage 1 Archaeological Assessment will be completed. The draft Stage 1 report will be circulated to you for review and comment prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries. It is anticipated that the draft report will be available in early 2025.

A natural heritage assessment will also be completed as part of this project. We are still in the process of scoping the natural heritage requirements, but any field work would be initiated in Fall 2024. We plan to provide updates on the status of this and to provide more details once the scope and timing have been confirmed.

We will also be following the Municipal Class EA process to contact you at key stages of the planning process: during the development and evaluation of alternative solutions; during the development and evaluation of design alternatives; and upon completion of the final report. More details are provided in the accompanying memo.

We look forward to working with you on this project. Please let us know if you are interested in discussing this project in more detail, or have questions at any point during the project, and we would be pleased to arrange a phone call or virtual meeting.

Best regards,

Subject: West 5th Street Municipal Class Environmental Assessment – Project Summary

Project Overview

The purpose of the West 5th Street Municipal Class Environmental Assessment (EA) is to complete a Schedule C (Phases 3 and 4) Municipal Class EA for West 5th Street, between Stone Church Road West and Rymal Road West, in advance of planned road reconstruction. This study will address both transportation and stormwater/drainage Municipal Class EA requirements.

As part of this study, we will be identifying and evaluating options to improve/upgrade the transportation facilities within the study area including evaluating different road widening options, adding active transportation facilities such as sidewalks and cycling lanes, and urbanization (adding curbs and stormwater infrastructure).

The Municipal Class EA process is a planning a decision-making tool used by municipalities to plan and implement infrastructure projects. This process includes identifying a problem or opportunity, identifying alternative solutions to address the problem/opportunity, identifying alternative design concepts for the preferred solutions, and documenting the decision-making process.

Project start date: August 2024
Anticipated completion date: Q4 2025

Study Area

Background

Road improvements for West 5th Street have been recommended under both the South Mountain Area Transportation Master Plan (2000) and Mewburn Sheldon Master Servicing Plan (2004). Through planning discussions involving other upcoming municipal infrastructure projects, there is an opportunity to coordinate construction projects and support upcoming development.

Study Deliverables

The primary deliverable of this project will be a detailed report documenting the study process, key background studies, and ultimate study recommendations. Study recommendations will include, but may not be limited to the recommended cross section for the study area (e.g., number and width of travel and turning lanes, location and width of active transportation facilities, etc.), and stormwater management facilities. This report will be used to guide detailed design.

Current Status

In Q3 2024, the project completed the procurement process and a consultant has been obtained (Stantec). The background review for the project is in the process of being initiated.

Planned Points of Contact

An important part of the project is engagement. For this project, the engagement plan consists of both legislated contact points and additional involvement opportunities that we have deemed key. A high-level summary of the planned points of contact are provided below. The dates will be updated and refined as the study progresses.

- Provision of Project Summary (October 2024)
 - This is the current stage of the engagement plan.
- Provision of Draft Stage 1 Archaeological Assessment Report (Q4 2024)
- Provision of an Update on the Natural Heritage Assessment Scope and Schedule (Q4 2024)
- Notice of Study Commencement and Public Information Centre (PIC) #1 (Q1 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the alternative solutions for the project.
- Notice of PIC #2 (Q3 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the design alternatives for the project.
- Notice of Study Completion and Public Review (Q4 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - The final report and recommendations will be available for review.

For any questions or comments related to this project or process, please contact Olivia Stanciu (Olivia.Stanciu@hamilton.ca).

Good morning,

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) to address transportation challenges along West 5th Street (Stone Church Road West to Rymal Road West). On Thursday, January 16th, 2025, we will be holding the project's first Public Information Centre. Further information can be found in the attached document or on our EngageHamilton page: <https://engage.hamilton.ca/West5thEA>.

West 5th Street Municipal Class Environmental Assessment

Notice of Study Commencement and Public Information Centre #1

The Study

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Process

This project is being carried out as a Schedule C project under the Municipal Engineers Association *Municipal Class Environmental Assessment* (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024). The purpose of the first Public Information Centre (PIC) will review the problem/opportunity statement, the alternative solutions, and the recommended solution. A second PIC will be held at a later date to review the project’s alternative designs and the associated evaluation process.

How to Participate

In-Person Public Information Centre	Review Materials Online
<p>DATE: Thursday, January 16, 2025</p> <p>TIME: 6:00 p.m. – 8:00 p.m. (open house format)</p> <p>LOCATION: Westmount Recreation Centre, 35 Lynbrook Dr, Hamilton, ON L9C 2K6</p> <p>The PIC will be a drop-in style session where information will be provided about the project. Project team members will be available to answer questions.</p>	<p>Visit the project webpage anytime from January 14th, 2025, to view the information display panels. Subject: West 5th Street Municipal Class Environmental Assessment – Project Summary

Project Overview

The purpose of the West 5th Street Municipal Class Environmental Assessment (EA) is to complete a Schedule C (Phases 3 and 4) Municipal Class EA for West 5th Street, between Stone Church Road West and Rymal Road West, in advance of planned road reconstruction. This study will address both transportation and stormwater/drainage Municipal Class EA requirements.

As part of this study, we will be identifying and evaluating options to improve/upgrade the transportation facilities within the study area including evaluating different road widening options, adding active transportation facilities such as sidewalks and cycling lanes, and urbanization (adding curbs and stormwater infrastructure).

The Municipal Class EA process is a planning a decision-making tool used by municipalities to plan and implement infrastructure projects. This process includes identifying a problem or opportunity, identifying alternative solutions to address the problem/opportunity, identifying alternative design concepts for the preferred solutions, and documenting the decision-making process.

Project start date: August 2024
Anticipated completion date: Q4 2025

Study Area

Background

Road improvements for West 5th Street have been recommended under both the South Mountain Area Transportation Master Plan (2000) and Mewburn Sheldon Master Servicing Plan (2004). Through planning discussions involving other upcoming municipal infrastructure projects, there is an opportunity to coordinate construction projects and support upcoming development.

Study Deliverables

The primary deliverable of this project will be a detailed report documenting the study process, key background studies, and ultimate study recommendations. Study recommendations will include, but may not be limited to the recommended cross section for the study area (e.g., number and width of travel and turning lanes, location and width of active transportation facilities, etc.), and stormwater management facilities. This report will be used to guide detailed design.

Current Status

In Q3 2024, the project completed the procurement process and a consultant has been obtained (Stantec). The background review for the project is in the process of being initiated.

Planned Points of Contact

An important part of the project is engagement. For this project, the engagement plan consists of both legislated contact points and additional involvement opportunities that we have deemed key. A high-level summary of the planned points of contact are provided below. The dates will be updated and refined as the study progresses.

- Provision of Project Summary (October 2024)
 - This is the current stage of the engagement plan.
- Provision of Draft Stage 1 Archaeological Assessment Report (Q4 2024)
- Provision of an Update on the Natural Heritage Assessment Scope and Schedule (Q4 2024)
- Notice of Study Commencement and Public Information Centre (PIC) #1 (Q1 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the alternative solutions for the project.
- Notice of PIC #2 (Q3 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - This stage will provide information on the design alternatives for the project.
- Notice of Study Completion and Public Review (Q4 2025)
 - This is a legislated point of contact, as per the Municipal Class EA process. This communication will be sent through mail, as well as email.
 - The final report and recommendations will be available for review.

Re: West 5th Street (Stone Church Road West to Rymal Road West) Municipal Class Environmental Assessment

Dear Todd,

We are writing to bring to your attention an Environmental Assessment project that has been initiated for West 5th Street in the City of Hamilton.

The purpose of this project is to complete a Municipal Class Environmental Assessment (EA) for West 5th Street, between Stone Church Road West and Rymal Road West. A memo providing additional details on the project will be included with this letter.

As part of this project, a Stage 1 Archaeological Assessment will be completed. The draft Stage 1 report will be circulated to you for review and comment prior to submission to the Ministry of Heritage, Sport, Tourism and Culture Industries. It is anticipated that the draft report will be available in early 2025.

A natural heritage assessment will also be completed as part of this project. We are still in the process of scoping the natural heritage requirements, but any field work would be initiated in Fall 2024. We plan to provide updates on the status of this and to provide more details once the scope and timing have been confirmed.

We will also be following the Municipal Class EA process to contact you at key stages of the planning process: during the development and evaluation of alternative solutions; during the development and evaluation of design alternatives; and upon completion of the final report. More details are provided in the accompanying memo.

We look forward to working with you on this project. Please let us know if you are interested in discussing this project in more detail, or have questions at any point during the project, and we would be pleased to arrange a phone call or virtual meeting.

Best regards,

Good Afternoon Ms Stanciu

We would be pleased to meet with you at your earliest convenience to discuss how and when Hamilton will begin to meet its engagement obligations on this project which we have indicated will impair infringe and interfere with established rights and interests.

Please advise if you have received a delegation from the Province of Ontario to undertake procedural aspects of engagement by way of the MCEA process.

I have asked Ms. Lumsdon to set up a meeting at your earliest convenience.

Regards,

Aaron Detlor

Good morning Todd,

I am writing to bring to your attention that a Schedule 'C' Municipal Class Environmental Assessment has been initiated for West 5th Street, between Stone Church Road West and Rymal Road West, in the City of Hamilton. Please find attached our introduction letter for your reference and further information.

Should you have any questions or would like to discuss, please do not hesitate to contact me.

Kind regards,

Olivia Stanciu, M.SC., PMP (she/her)

Good Morning Ms. Stanciu:

We can advise that this proposed project and process will impair the rights and interests of the Haudenosaunee as represented by the HCCC.

We would like to meet at your earliest convenience to determine how and when the City of Hamilton will meet its engagement obligations on this project.

Prior to that meeting could you please provide a copy of any delegation letter that you may have received from the Crown in relation to this project. Can you please also advise if a MCEA User Guide is available for the Municipal Class Environmental Assessment February 2024. Also please advise who is managing or in charge of this EA from the MECP.

I am also asking that you please publish this Notice of Commencement in the Turtle Island News and going forward that all Notices of Commencement for Schedule C and B projects be published in the Turtle Island News.

I have asked Ms. General to set up a meeting at our office at Six Nations for the earliest time available in 2025.

Regards,

Aaron Detlor

Engagement Schedule C Projects in the **Municipal Class Environmental Assessment (MCEA)** process.

Engagement requirements with Indigenous communities during **Schedule C projects** are outlined below, phase by phase, with specific quotations from the MCEA.

PHASE 1: Problem or Opportunity Identification

(Schedule C projects begin at **Phase 1**.)

Engagement Requirements

1. Early Identification and Notification:

- **Requirement:** Municipalities must identify potentially affected Indigenous communities and notify them at the start of the project.
- **Purpose:** To ensure Indigenous communities are informed and involved from the outset.
- **Quotation:**
 - “The proponent is required to identify and notify Indigenous communities who may be affected by the proposed undertaking during Phase 1 of a Schedule C project.” (*MCEA Manual, Page 2-3, Paragraph 4*)
- **Actions for Schedule C:**
 - Issue formal notices to Indigenous communities during Phase 1.
 - Work with the Ministry of the Environment, Conservation, and Parks (MECP) to identify relevant communities.

PHASE 2: Alternative Solutions

Engagement Requirements

2. Consultation and Dialogue:

- **Requirement:** Conduct meaningful consultations to consider Indigenous perspectives when identifying and evaluating alternative solutions.
- **Purpose:** To ensure Indigenous communities can influence the decision-making process.
- **Quotation:**
 - “Consultation is mandatory in Schedule C projects to ensure all affected stakeholders, including Indigenous communities, are given the opportunity to comment.” (*MCEA Manual, Page 2-4, Paragraph 2*)
- **Actions for Schedule C:**
 - Host consultation sessions tailored to Indigenous communities.
 - Provide project-specific materials in accessible formats.

3. Consideration of Indigenous Rights and Interests:

- **Requirement:** Assess potential impacts on Indigenous rights, lands, and resources when evaluating alternatives.

- **Purpose:** To identify culturally appropriate and environmentally sound solutions.
- **Quotation:**
- “Schedule C proponents must evaluate impacts on Aboriginal and treaty rights when developing and comparing alternative solutions.” (*MCEA Manual, Page 2-6, Paragraph 1*)
- **Actions for Schedule C:**
- Use Indigenous traditional knowledge to assess environmental impacts.
- Work with Indigenous communities to identify culturally significant areas.

PHASE 3: Alternative Design Concepts for the Preferred Solution

Engagement Requirements

4. Integration of Traditional Knowledge:

- **Requirement:** Incorporate Indigenous traditional knowledge into the design process to address environmental and cultural concerns.
- **Purpose:** To ensure designs are sensitive to Indigenous values and interests.
- **Quotation:**
- “In Schedule C projects, traditional knowledge should inform the design to mitigate environmental and cultural impacts.” (*MCEA Manual, Page 2-8, Paragraph 4*)
- **Actions for Schedule C:**
- Collaborate with Indigenous communities on design elements.
- Respect Indigenous cultural heritage during design.

5. Accommodation Measures:

- **Requirement:** Develop mitigation or accommodation measures to address adverse impacts identified during consultations.
- **Purpose:** To minimize harm and uphold commitments to Indigenous communities.
- **Quotation:**
- “Schedule C projects often require the implementation of accommodation measures to address potential conflicts.” (*MCEA Manual, Page 2-7, Paragraph 2*)
- **Actions for Schedule C:**
- Modify designs to reduce adverse effects on Indigenous lands and resources.

PHASE 4: Environmental Study Report (ESR)

Engagement Requirements

6. Documentation of Consultation Efforts:

- **Requirement:** Include a detailed record of all consultations with Indigenous communities in the ESR.

- **Purpose:** To demonstrate that consultation obligations have been met and to ensure transparency.
- **Quotation:**
- “For Schedule C projects, the Environmental Study Report must document all consultation efforts, including correspondence with Indigenous communities.” (*MCEA Manual, Page 2-9, Paragraph 3*)
- **Actions for Schedule C:**
- Summarize all communications and feedback from Indigenous communities.
- Explain how concerns were addressed in project planning.

7. Responding to Concerns:

- **Requirement:** Ensure Indigenous concerns documented in the ESR are addressed before proceeding.
- **Purpose:** To resolve outstanding issues before project implementation.
- **Quotation:**
- “Proponents must address unresolved concerns raised by Indigenous communities before submitting the Environmental Study Report for Schedule C projects.” (*MCEA Manual, Page 2-10, Paragraph 1*)
- **Actions for Schedule C:**
- Proactively respond to Indigenous concerns documented in the ESR.
- Update the ESR to reflect additional mitigation measures, if necessary.

PHASE 5: Implementation

Engagement Requirements

8. Monitoring and Follow-Up:

- **Requirement:** During implementation, monitor project impacts and engage Indigenous communities to address emerging issues.
- **Purpose:** To ensure that mitigation and accommodation measures are effective.
- **Quotation:**
- “Schedule C projects require post-implementation monitoring and continued engagement with Indigenous communities to evaluate the effectiveness of mitigation measures.” (*MCEA Manual, Page 2-11, Paragraph 2*)
- **Actions for Schedule C:**
- Include Indigenous representatives in monitoring activities.
- Share monitoring reports with Indigenous communities.

Summary of Responsibilities for Schedule C Projects

- **Phase 1:** Early identification and notification of Indigenous communities.

- **Phase 2:** Consultation, consideration of Indigenous rights, and inclusion of traditional knowledge in evaluating solutions.
- **Phase 3:** Collaboration on design concepts and implementation of accommodation measures.
- **Phase 4:** Comprehensive documentation of consultation efforts in the ESR.
- **Phase 5:** Monitoring and follow-up to ensure commitments are fulfilled.

Specific Quotation Sources:

1. *MCEA Manual, Page 2-3, Paragraph 4* — Early notification for Indigenous communities.
2. *MCEA Manual, Page 2-4, Paragraph 2* — Mandatory consultation in Schedule C projects.
3. *MCEA Manual, Page 2-6, Paragraph 1* — Consideration of Indigenous rights and impacts.
4. *MCEA Manual, Page 2-8, Paragraph 4* — Incorporation of traditional knowledge.
5. *MCEA Manual, Page 2-9, Paragraph 3* — Documentation requirements for the ESR.
6. *MCEA Manual, Page 2-10, Paragraph 1* — Addressing unresolved concerns in the ESR.
7. *MCEA Manual, Page 2-11, Paragraph 2* — Monitoring and follow-up obligations.

Good morning,

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) to address transportation challenges along West 5th Street (Stone Church Road West to Rymal Road West). On Thursday, January 16th, 2025, we will be holding the project's first Public Information Centre. Further information can be found in the attached document or on our EngageHamilton page: <https://engage.hamilton.ca/West5thEA>.

Thank you!

Kind regards,

Dear Todd Williams,

**NOTICE OF STUDY COMMENCEMENT & PUBLIC INFORMATION CENTRE #1
West 5th Street, City of Hamilton
Municipal Class Environmental Assessment**

The City of Hamilton has initiated an Environmental Assessment to look at transportation improvement options along West 5th Street between Stone Church Road and Rymal Road. The road improvements are being planned as a Schedule C Municipal Class Environmental Assessment (EA) project under the Municipal Engineers Association *Municipal Class Environmental Assessment* document (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024).

Please find enclosed the Notice of Study Commencement & Public Information Centre #1 for the West 5th Street Municipal Class Environmental Assessment.

Sincerely,

A handwritten signature in black ink, appearing to read "Olivia Stanciu".

West 5th Street Municipal Class Environmental Assessment

Notice of Study Commencement and Public Information Centre #1

The Study

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Process

This project is being carried out as a Schedule C project under the Municipal Engineers Association *Municipal Class Environmental Assessment* (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024). The purpose of the first Public Information Centre (PIC) will review the problem/opportunity statement, the alternative solutions, and the recommended solution. A second PIC will be held at a later date to review the project’s alternative designs and the associated evaluation process.

How to Participate

In-Person Public Information Centre	Review Materials Online
<p>DATE: Thursday, January 16, 2025</p> <p>TIME: 6:00 p.m. – 8:00 p.m. (open house format)</p> <p>LOCATION: Westmount Recreation Centre, 35 Lynbrook Dr, Hamilton, ON L9C 2K6</p> <p>The PIC will be a drop-in style session where information will be provided about the project. Project team members will be available to answer questions.</p>	<p>Visit the project webpage anytime from January 14th, 2025, to view the information display panels. Following the live event, a recorded presentation will also be posted. Materials are available 24 hours a day, 7 days a week.</p> <p>The project website is: www.hamilton.ca/West5thEA</p>

If you have any accessibility requirements to review the PIC materials and provide comments, please contact the City Project Manager below.

Engagement Schedule C Projects in the **Municipal Class Environmental Assessment (MCEA)** process.

Engagement requirements with Indigenous communities during **Schedule C projects** are outlined below, phase by phase, with specific quotations from the MCEA.

PHASE 1: Problem or Opportunity Identification

(Schedule C projects begin at **Phase 1.**)

Engagement Requirements

1.

Early Identification and Notification:

•

Requirement: Municipalities must identify potentially affected Indigenous communities and notify them at the start of the project.

•

Purpose: To ensure Indigenous communities are informed and involved from the outset.

•

Quotation:

•

“The proponent is required to identify and notify Indigenous communities who

may be affected by the proposed undertaking during Phase 1 of a Schedule C project.” (MCEA Manual, Page 2-3, Paragraph 4)

•

Actions for Schedule C:

•

Issue formal notices to Indigenous communities during Phase 1.

•

Work with the Ministry of the Environment, Conservation, and Parks (MECP) to identify relevant communities.

PHASE 2: Alternative Solutions

Engagement Requirements

2.

Consultation and Dialogue:

•

Requirement: Conduct meaningful consultations to consider Indigenous perspectives when identifying and evaluating alternative solutions.

•

Purpose: To ensure Indigenous communities can influence the decision-making process.

•

Quotation:

•

“Consultation is mandatory in Schedule C projects to ensure all affected stakeholders, including Indigenous communities, are given the opportunity to comment.” (MCEA Manual, Page 2-4, Paragraph 2)

•

Actions for Schedule C:

•

Host consultation sessions tailored to Indigenous communities.

•

Provide project-specific materials in accessible formats.

3.

Consideration of Indigenous Rights and Interests:

•

Requirement: Assess potential impacts on Indigenous rights, lands, and resources when evaluating alternatives.

•

Purpose: To identify culturally appropriate and environmentally sound solutions.

•

Quotation:

•

“Schedule C proponents must evaluate impacts on Aboriginal and treaty rights when developing and comparing alternative solutions.” (MCEA Manual, Page 2-6, Paragraph 1)

•

Actions for Schedule C:

•

Use Indigenous traditional knowledge to assess environmental impacts.

•

Work with Indigenous communities to identify culturally significant areas.

PHASE 3: Alternative Design Concepts for the Preferred Solution Engagement Requirements

4.

Integration of Traditional Knowledge:

•

Requirement: Incorporate Indigenous traditional knowledge into the design process to address environmental and cultural concerns.

•

Purpose: To ensure designs are sensitive to Indigenous values and interests.

•

Quotation:

•

“In Schedule C projects, traditional knowledge should inform the design to mitigate environmental and cultural impacts.” (MCEA Manual, Page 2-8, Paragraph 4)

•

Actions for Schedule C:

•

Collaborate with Indigenous communities on design elements.

•

Respect Indigenous cultural heritage during design.

5.

Accommodation Measures:

•

Requirement: Develop mitigation or accommodation measures to address adverse impacts identified during consultations.

•

Purpose: To minimize harm and uphold commitments to Indigenous communities.

•

Quotation:

•

“Schedule C projects often require the implementation of accommodation measures to address potential conflicts.” (MCEA Manual, Page 2-7, Paragraph 2)

•

Actions for Schedule C:

•

Modify designs to reduce adverse effects on Indigenous lands and resources.

PHASE 4: Environmental Study Report (ESR)

Engagement Requirements

6.

Documentation of Consultation Efforts:

•

Requirement: Include a detailed record of all consultations with Indigenous communities in the ESR.

•

Purpose: To demonstrate that consultation obligations have been met and to ensure transparency.

•

Quotation:

•

“For Schedule C projects, the Environmental Study Report must document all consultation efforts, including correspondence with Indigenous communities.” (MCEA Manual, Page 2-9, Paragraph 3)

•

Actions for Schedule C:

•

Summarize all communications and feedback from Indigenous communities.

•

Explain how concerns were addressed in project planning.

7.

Responding to Concerns:

•

Requirement: Ensure Indigenous concerns documented in the ESR are addressed before proceeding.

•

Purpose: To resolve outstanding issues before project implementation.

•

Quotation:

•

“Proponents must address unresolved concerns raised by Indigenous communities before submitting the Environmental Study Report for Schedule C projects.” (MCEA Manual, Page 2-10, Paragraph 1)

•

Actions for Schedule C:

•

Proactively respond to Indigenous concerns documented in the ESR.

•

Update the ESR to reflect additional mitigation measures, if necessary.

PHASE 5: Implementation

Engagement Requirements

8.

Monitoring and Follow-Up:

•

Requirement: During implementation, monitor project impacts and engage Indigenous communities to address emerging issues.

•

Purpose: To ensure that mitigation and accommodation measures are effective.

•

Quotation:

•

“Schedule C projects require post-implementation monitoring and continued engagement with Indigenous communities to evaluate the effectiveness of mitigation measures.” (MCEA Manual, Page 2-11, Paragraph 2)

•

Actions for Schedule C:

•

Include Indigenous representatives in monitoring activities.

•

Share monitoring reports with Indigenous communities.

Summary of Responsibilities for Schedule C Projects

•

Phase 1: Early identification and notification of Indigenous communities.

•

Phase 2: Consultation, consideration of Indigenous rights, and inclusion of traditional knowledge in evaluating solutions.

•

Phase 3: Collaboration on design concepts and implementation of accommodation measures.

•

Phase 4: Comprehensive documentation of consultation efforts in the ESR.

•

Phase 5: Monitoring and follow-up to ensure commitments are fulfilled.

Good morning.

-

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) to address transportation challenges along West 5th Street (Stone Church Road West to Rymal Road West). On Thursday, January 16th, 2025, we will be holding the project's first Public Information Centre. Further information can be found in the attached document or on our EngageHamilton page:<https://engage.hamilton.ca/West5thEA>.

-

Thank you!

-

Kind regards.

Dear Tracey,

**PUBLIC INFORMATION CENTRE #2
West 5th Street, City of Hamilton
Municipal Class Environmental Assessment**

The City of Hamilton has initiated an Environmental Assessment to look at transportation improvement options along West 5th Street between Stone Church Road and Rymal Road. The road improvements are being planned as a Schedule C Municipal Class Environmental Assessment (EA) project under the Municipal Engineers Association *Municipal Class Environmental Assessment* document (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024).

Please find enclosed the Public Information Centre #2 Notice for the West 5th Street Municipal Class Environmental Assessment.

Sincerely,

A handwritten signature in black ink, appearing to read "Olivia Stanciu".

West 5th Street Municipal Class Environmental Assessment

Public Information Centre #2

The Study

The City of Hamilton has initiated a Municipal Class Environmental Assessment (EA) process to develop and assess alternative solutions to improve transportation along West 5th Street (Stone Church Road West to Rymal Road West). The EA will assess options to improve traffic, active transportation, and stormwater management throughout the corridor.

Process

This project is being carried out as a Schedule C project under the Municipal Engineers Association *Municipal Class Environmental Assessment* (October 2000, as amended in 2007, 2011, 2015, 2023, and 2024). The purpose of the second Public Information Centre (PIC) is to present the alternative designs and the associated evaluation process.

Near the end of the project, an Environmental Study Report (ESR) will be prepared to document the EA process, consultation activities, and the evaluation. The ESR will be presented for a 30-day public review at that time.

How to Participate

In-Person Public Information Centre	Review Materials Online
<p>DATE: Tuesday, June 3, 2025 TIME: 6:00 p.m. – 8:00 p.m. (open house format) LOCATION: Westmount Recreation Centre, 35 Lynbrook Dr, Hamilton, ON L9C 2K6</p> <p>The PIC will be a drop-in style session where information will be provided about the project. Project team members will be available to answer questions.</p>	<p>Visit the project webpage anytime from June 2nd, 2025, to view the information display panels. Also, a recorded presentation will be posted. Materials are available 24 hours a day, 7 days a week. Comments can be provided until June 17th, 2025.</p> <p>The project website is: www.hamilton.ca/West5thEA</p>

If you have any accessibility requirements to review the PIC materials and provide comments, please contact the City Project Manager below.
