Scope & Outcomes
Policy Review

- Governed by multiple layers of policy
  - UNESCO World Biosphere Reserve Designation
  - Provincial Policy
  - Regional Policy
  - Municipal Policy & By-laws
Provincial Policy: Greenbelt Plan

- Protects natural and agricultural lands from Niagara Region to Northumberland County.
- Identifies where development can and cannot occur.
- States that lands found within the Niagara Escarpment Area are governed by the Niagara Escarpment Plan Policies.
Regional Policy: Niagara Escarpment Plan

• Goal is to protect unique environment of Niagara Escarpment.
• Outlines policies on land use and criteria for development under the plan including Escarpment Natural Areas and Urban Area.
Niagara Escarpment Plan: Escarpment Natural Areas

• Goal is to maintain the natural areas delineated within the Plan including:
  – Stream valleys, wetlands, natural areas, cultural heritage features;
  – Encourage recreation and education;
  – Maintain and enhance landscape quality.

• Permitted uses include:
  – Existing uses, single residential units, non-intensive recreation activities and forest management.
Niagara Escarpment Plan: Urban Areas

• Municipal land which has already encroached on the Niagara Escarpment Plan Boundary.
• Goal is to minimize impact and further encroachment on Escarpment.
• Development should not adversely affect the Escarpment visually or environmentally.
Niagara Escarpment Plan: Development Criteria

- Criteria for development within the Plan including:
  - Protection of steep slopes and ravines (no disturbance or vegetation removal);
  - Setbacks from watercourses;
  - Protection of wildlife habitat;
  - Forest Management through implementing authority.
Municipal Policy:
City of Hamilton Official Plan

• Study area falls within *Natural Area* in Official Plan, Schedule A
  – Permitted uses include active & passive parks, recreation or community centres or historic sites, pedestrian connections, marinas, cemeteries and/or management areas (forest, fish and wildlife).

• Study area also within the *Core Areas*, Schedule B
  – Policy states that vegetation removal and encroachment into *Core Areas* shall *generally* not be permitted.
City of Hamilton: By-laws & Policies

• Public Tree Protection By-law (No. 15-125)
  – No person shall injure, destroy or permit the injury or destruction of public trees in any way including: pruning any part of the tree, affecting root structure, working within drip line, fastening items to the tree, altering tree protection etc.

• Tree Preservation and Sustainability Policy
  – Removals should be avoided but, if deemed necessary, require a permit application to be issued by Director.
  – Permit applications should contain the following information: reasons for removal, species of trees to be removed, diameter at breast height measurement and photographs of the trees to be removed. Applicants are required to pay for removals or provide for replacements prior to the permit being issued.
Summary

• Tree removal permit application to be submitted to Director for approval. Permit requires the following information and actions:
  – Reasons for tree removal;
  – Species of trees to be removed;
  – Diameter at breast height measurement for trees to be removed;
  – Prior to Permit issuance, applicant must pay for removal or arrange for replacement of trees of similar species.

• Once approval granted, plan for removals shall be brought before Niagara Escarpment Commission for their final approval as they are the Niagara Escarpment Plan implementing authority.

Potential Vistas – Ward 8
Constraints

• Steep slopes and erosion of the Escarpment.
• Significant limitations within the policies.
• Safety concerns regarding the maintenance of vistas.
• Financial capacity for capital and ongoing operational costs.
Emerging Opportunities

• Sustainable forest management - strategic ‘one at a time’ removal of invasive species and hazard trees.
• Strengthen the slopes along the brow.
• Maximize urban forest contribution on the brow (private + public lands).
• Minimize visual impacts from the valley.
• Improve trail experience with strategic vistas.
Project Overview
Principles

• Protect and enhance the natural features (slopes, forest, habitats) in the Niagara Escarpment Plan lands.
• Improve the urban forest in the Niagara Escarpment Plan lands.
• Minimize the impact and further encroachment of urban development on the Escarpment environment.
• Ensure that further visual intrusion of the urban area on the Escarpment is minimized.
Discussion Questions

1. What about this area do you value most? What concerns about this project do you have?
2. What are the most important elements that should be considered when selecting views along the Mountain Brow right-of-way?
3. What are the most important and impressive views to be protected along the Mountain Brow right-of-way and why?
4. Where should new open views along the Mountain Brow right-of-way be located and why?
5. What open spaces should be protected as natural areas along the Mountain Brow and why?
Discussion Questions

6. Other comments?
