

# NOTICE OF COMPLETION

## MID-SPENCER CREEK/GREENSVILLE RURAL SETTLEMENT AREA SUBWATERSHED STUDY CLASS ENVIRONMENTAL ASSESSMENT

### THE STUDY

The Hamilton Water Division undertook the Mid-Spencer Creek/Greensville Rural Settlement Area (RSA) Subwatershed Study following the Class Environmental Assessment (EA) process in order to determine the recommended strategies for stormwater management, natural heritage, groundwater and domestic water supply. The objective of the study is to provide a basis for the protection, maintenance and enhancement of surface water and groundwater quantity and quality. The resulting plan provides recommendations as to where, and how, future development activity can safely occur so as to minimize flood risks, stream erosion, degradation of water quality and negative impacts on natural systems, including groundwater. The Subwatershed Study phases were conducted as a Master Plan and the study was completed following Approach 1 under the Municipal Engineers Association (MEA) Municipal Class Environment Assessment Act (Class EA) process (October 2000, amended 2007 & 2011) and addresses Phases 1 and 2 of the EA process for any Schedule 'B' projects that are identified and outlines additional work that will be required to implement Schedule 'C' projects.

This study addresses the Stormwater Management and the Domestic Water Supply components as part of the EA process. The Stormwater Management preferred alternative is defined as Low Impact Development Source Control and Traditional Measures which best meets the requirements related to flooding, erosion and water balance. The Domestic Water Supply preferred alternative was selected based on the impact to the environment, capacity of groundwater resources, consistency with existing policy and the objective to provide a better level of service to the homes serviced by municipal well. It recommends the application of individual services (wells and septic systems) on future lots and to add a backup well to the existing Greensville Municipal Well.

| Preferred Alternative | Municipal Class Environmental Assessment Schedule |
|-----------------------|---|
| Municipal Backup Well | Schedule C  |
| Stormwater Wet Ponds  | Schedule B  |

### PUBLIC REVIEW PERIOD

A Project File report describing the planning process followed and the conclusions has been completed and has been placed on public record for a review period starting June 30, 2016 and ending August 15, 2016. It will be available for review at:

### PUBLIC COMMENT PROCESS

If after reviewing the document, you have questions or concerns regarding this project, please contact the following staff:

#### Marco Silverio, M.Sc.

Project Manager  
 City of Hamilton  
 77 James Street North, Suite 400  
 Hamilton, ON L8R 2K3  
 Phone: 905-546-2424 ext. 6099  
 Fax: 905-546-4491  
 Email: Marco.Silverio@hamilton.ca

If concerns regarding this project cannot be resolved in discussion with the City of Hamilton, a person or party may request that the Minister of the Environment and Climate Change make an order for the project to comply with Part II of the Environmental Assessment Act (referred to as a Part II Order), which addresses individual Environmental Assessments. The Minister must receive the request in writing by August 15, 2016 at the address below, and a copy must also be sent to the City Project Manager. If no requests are received by this date the City will proceed with this project as outlined in the Project File Report.

Minister of the Environment and Climate Change  
 77 Wellesley Street West, 11th Floor, Ferguson Block  
 Toronto, ON M4V 2T5

Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record.

This Notice Issued on June 30 & July 7, 2016.
