Highway 5 – Grindstone Creek Bridge Utility Relocation Class
Environmental Assessment and Conceptual Design

Appendix D – 1

Public Information Centre #1

Notice of Commencement

November 2015
**Highway 5 Grindstone Creek**  
**Bridge Utility Relocation**  
**Schedule "B" Class Environmental Study**

**Project Background**  
The City of Hamilton has initiated a Schedule 'B' Class Environmental Assessment (EA) study for the Highway 5 Grindstone Creek Utility Relocation and Conceptual design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of the future bridge rehabilitation activities. This study includes public and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study a project File documenting the planning and decision making process followed, will be prepared and made available for public review.

**The Study Process**  
This Study will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

**Public Information Centre (PIC) No. 1**  
Two (2) PIC sessions will be held in association with this Study. The PIC No. 1 is scheduled for:

- **Date:** November 5, 2015  
- **Time:** 6:00 pm to 8:00 pm  
- **Location:** Knox Presbyterian Church  
  80 Mill Street North, Waterdown, ON L0R 2H0

**We would like to hear from you**  
We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

**Winston Wang, M. A. Sc., P. Eng.**  
Project Manager

Highway 5 – Grindstone Creek Bridge Utility Relocation Class
Environmental Assessment and Conceptual Design

Appendix D – 4

Public Information Centre #1

Public Consultation Display

November 2015
Welcome to the Public Open House for
The City Of Hamilton
Utility Relocation Schedule “B” Class Environmental Assessment

Public Information Centre #1

November 5, 2015
6:00 pm to 8:00 pm
Knox Presbyterian Church
80 Mill Street North
Waterdown, Ontario
Welcome to the Public Open House for The City Of Hamilton Utility Relocation Schedule “B” Class Environmental Assessment

The objective of this Class Environmental Assessment (EA) is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing utilities (water, wastewater, hydro, telecommunications utilities, etc.) as part of the future bridge rehabilitation activities.

**Purpose of Tonight’s Meeting**
Tonight’s Information Centre provides an opportunity for participants to review and provide comments on the work completed to date for this project. The staff of the City of Hamilton and the members of the Project Team are available to answer any questions that you may have about the project details and how the project may impact you.
The focus of the study is the Highway 5 Dundas Street (Vinegar Hill) bridge spanning Grindstone Creek and the utilities that run beside, beneath, and within the bridge.
This study is being undertaken as a Schedule B project under the Municipal Class Environmental Assessment (EA) Process. The flow chart illustrates the key steps to be undertaken as part of the Class EA process.

**Municipal Class Environmental Assessment Process**

- **Background data collection and interpretation**
- **Define project problems/opportunities**
- **Determination of existing conditions**
- **Develop list of alternatives and evaluation criteria**
- **Evaluate alternatives and identify recommended solutions**
- **Select preferred solution**
- **Produce EA Report and file for 30-day review period**

**Public Information Centre #1**

**Public Information Centre #2**

We are here
Definition of the Problem

Constructed in 1966, the Highway 5 Grindstone Creek bridge in Waterdown is reaching the end of its life span. The City of Hamilton will initiate reconstruction or rehabilitation of the bridge within 10 years. Prior to the commencement of work, this Class EA will identify and evaluate the alternative solutions to permit the replacement and/or potential relocation of existing utilities (water, wastewater, hydro, telephone, etc.) as part of the future bridge rehabilitation works.

Completing these options will require making potential arrangements including consultation with approval agencies, new bridge construction, and land purchasing. Current City land ownership can be seen in the figure on the right.
Existing Infrastructure

Existing Utilities
- 500mm Ø sanitary forcemain
- 200mm Ø insulated asbestos cement pipe watermain supported below the deck
- 250mm Ø sanitary sewer
- Bell telecommunications
  - 8 embedded 108mm diameter Bell ducts in the north sidewalk
  - 89mm diameter Bell duct supported on the southern exterior girder that was installed in 2009
- One (1) 76mm diameter electrical duct (transite) in each sidewalk

Other Infrastructure Notes
- Existing pumping station approximately 300m upstream
- Sanitary system is relatively new
- Watermain - 1 of 4 feeds to the east side of Waterdown
- CP Rail infrastructure, includes CP communications lines and Fiber-optic located approximately 5 feet from the edge of the railway tie/rail
**Existing Environmental Conditions**

In 2015, Dougan and Associates completed a natural heritage feature characterization of lands within 120 metres of the bridge over Grindstone Creek. Supporting studies included surveys for breeding birds, reptiles, amphibians, odonates, vegetation communities, flora, fish, and fish habitat as well as an assessment of Significant Wildlife Habitat. In addition, available background information from the City of Hamilton, Conservation Halton, and Ministry of Natural Resources and Forestry (MNRF) were reviewed.

**Key Findings**

**Biophysical Surveys**
- 11 common species of breeding birds were recorded.
- All of the 3 vegetation communities recorded within the study area are common in Southern Ontario.
- Of the 109 species of flora documented, 4 are considered locally significant.
- Eastern Gartersnake was the only reptile species found in the study area.
- Frogs and toads are not breeding within the study area; red-backed salamanders are present in the forest north east of the bridge.
- 3 common species of odonates (dragonflies and damselflies) were recorded, indicating that minimal breeding habitat is present in the study area.
- Fish habitat in the vicinity of Bridge 451 exhibits low-medium fish diversity.

**Natural Heritage Assessment**
- Natural heritage features/functions associated with the study area include: Significant Wildlife Habitat, Fish Habitat, and potentially Significant Valleylands (pictured, right).
- A portion of the study area is designated as Escarpment Natural Area and is subject to the Niagara Escarpment Plan.

**Recommendations and Next Steps**

The preferred option under the EA will take into consideration the natural heritage features and functions of the surrounding environment and will seek to avoid, minimize, and mitigate potential impacts to the ecological form and function of natural heritage features.
A Stage 1: Archaeological Background Research report for the Grindstone Creek bridge study area was completed in 2015 by Historic Horizon Inc. This stage of the archaeological assessment involves background research and property inspection, in order to determine the potential for the presence of archaeological heritage resources and known cultural heritage resources.

**Archaeological Findings**

**Key Findings**

- The study area has intermittent archaeological potential in part of the creek ravine, around remaining 19th century buildings, and under old parking areas (as illustrated by green shading in the figure).
- A search of the Ontario Sites Database shows 42 registered archaeological sites or finds spots within a one kilometre radius of the bridge, the majority being of Aboriginal origin.
- 19th century structures include:
  - Probable mills on the islands north and south of the bridge,
  - The Vances' house and barn, and
  - A structure on the east bank of the ravine.

**Recommendations and Next Steps**

The proposed works will not result in subsurface impacts and therefore the Stage 2 archaeological assessment would not have to be completed before the conclusion of this study. This study will make a recommendation as to whether a Stage 2 study is required for areas that may have subsurface impacts.
After this Public Information Centre the study team will consider verbal and written comments in order to refine the project problems and opportunities.

The next Public Information Centre (PIC #2) will be held in Spring, 2016. At PIC #2, alternatives to address the problems and opportunities will be presented, along with criteria to evaluate the alternatives. You will be notified of Public Information Centre #2.

For more information on this project, or to submit your comments or feedback, and to be placed on our mailing list, please contact:

Re: Notice of Commencement
Schedule ‘B’ Municipal Class Environmental Assessment Study for the
Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design

Dear «Title» «LastName»:

The City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment study (Class EA) for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge rehabilitation activities.

We have enclosed for your information a copy of the Notice of Commencement, which will appear in the XXXX on October X and October X, 2015, as well as in the Hamilton Spectator on October X and October X, 2015. If your agency/office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by November X, 2015.

For further information or if you wish to provide input regarding this project, please contact the undersigned at 905-546-2424 ext. 4092 or via email at (winston.wang@hamilton.ca).

Yours truly,

Winston Wang, M. A. Sc., P. Eng.
Project Manager, Water & Wastewater Planning
Thank you for your participation in this study.

Highway 5 – Grindstone Creek Bridge Utility Relocation Class
Environmental Assessment and Conceptual Design

Appendix D – 7

Public Information Centre #1

Agency Communications

November 2015
Hi Winston,

As per the action item from the meeting, I am forwarding you the info that was provided to us by our consultant. We did not confirm the validity of what was reported, but we are sending the info to you for consideration.

“There are 8 embedded 108mm diameter Bell ducts in the north sidewalk and one 76mm diameter electrical duct (transite) in each sidewalk according to the 1966 drawings. There is an 89mm diameter Bell duct supported on the southern exterior girder that was installed in 2009. There is also a sanitary sewer forcemain and an insulated asbestos cement pipe watermain supported below the deck (500mm diameter and 250mm diameter respectively).”

Hope some of this info helps.

Hi Dave,  

Please find the Notice of Commencement and Response Form in one file attached. When you mail out the Stakeholder Letter, please include this pdf file. In the meantime, I will send out this NOC shortly based on those names highlighted in yellow in the Master List. Any questions, please let me know.  

Thanks,  
Winston

Good Afternoon Jennifer,

As per discussion in this morning’s meeting, the contact person for Haudenosaunee Chiefs Council is Hohahes (Mr./Mrs./Ms.) Hill Leroy, Secretary to Haudenosaunee Conferacy Chiefs Council. Address is 2634 6th Line RR2, Oshweken, ON N0A 1M0, 905-765-1749. Please help us contact this Aboriginal group for further consultation purpose.

Also, please see the attached Notice of Commencement and PIC 1 (revised), which will be put on the Flamborough Review shortly.

If you have any questions, please let me know.

Thanks,

Winston Wang, M.A.Sc., P. Eng.

Utility Relocation Schedule "B" Class Environmental Assessment

Project Background

The City of Hamilton has initiated a Schedule “B” Class Environmental Assessment (EA) for the relocation of utilities located on the Highway 5 bridge spanning Grindstone Creek and the Canadian Pacific Railway in Waterdown. The purpose of this Class EA is to identify and evaluate alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities to facilitate yet to be designed future bridge rehabilitation activities. This study includes public, First Nations and Aboriginal Peoples, and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study, a Project File documenting the planning and decision making process followed, will be prepared and made available for public review.

The Study Process

This Study will follow the planning and design process as defined in the Municipal Engineers Association-Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 1

Two (2) PIC sessions will be held in association with this study. PIC No. 1 is scheduled for:

Date: November 5, 2015
Time: 6:00 pm to 8:00 pm
Location: Knox Presbyterian Church, 80 Mill Street North, Waterdown, ON L0R 2H0

We would like to hear from you

We are interested in hearing any comments or concerns you may have with respect to this project. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

Winston Wang, M. A. Sc., P. Eng.
Project Manager, City of Hamilton
77 James Street North, Suite 400 Hamilton, ON L8R 2K3
Phone: 905-546-2424 ext. 4092 Fax: 905-546-4491
Email: Winston.Wang@hamilton.ca

Please contact the Project Manager regarding disability accommodation requirements.

This Notice issued on October 29 and November 5, 2015.
Good Afternoon Dave,

In order to track down notice to First Nations, as suggested by Udo, I need to call those First Nations people (not the First Nations NGO’s as suggested by Sharon). Please verify the project summary script in the form. I included potential solutions in it. If those potential solutions are not appropriate, I can take them out. Please provide me with your thoughts on this.

Thanks,

Winston Wang, M.A.Sc., P. Eng.

Aboriginal People Engagement Phone Tracking Form

1. Project Summary Script:

This Grindstone Bridge Utility Relocation Class EA is to identify and evaluate the alternative solutions to permit potential relocation of the exiting water, wastewater, hydro and telecommunication utilities on the bridge for future bridge rehabilitation or replacement. The alternative solutions include, but not limited to the following:

- Utilities stay on existing bridge (Do Nothing Approach)
- Utilities go buried below railway track
- Utilities go on a dedicated bridge above railway track
- Others

2. Questionnaire:

a). Did you receive a letter from the City of Hamilton regarding this Class EA project consultation to your organization?  YES  NO

b). Are you interested in continued participation in the consultation in the future?  YES  NO

c). What are the concerns or interest you may have regarding this project?

1. Project Summary Script:

This Grindstone Bridge Utility Relocation Class EA is to identify and evaluate the alternative solutions to permit potential relocation of the exiting water, wastewater, hydro and telecommunication utilities on the bridge for future bridge rehabilitation or replacement. The alternative solutions include, but not limited to the following:

- Utilities stay on existing bridge (Do Nothing Approach)
- Utilities go buried below railway track
- Utilities go on a dedicated utility bridge
- Others

2. Questionnaire:

a). Did you receive a letter from the City of Hamilton regarding this Class EA project consultation to you or your organization? **YES**  **NO**

b). Are you interested in continued participation in the consultation in the future?  **YES**  **NO**

c). What are the concerns or interest you may have regarding this project?

Traffic control issue. You know people live in Reynolds St. William Street and very concerned about road closure. You may be aware now that every day, traffic jams over 200 meters on both sides of the bridge during rush hours. It's a bad idea to close the bridge. Even though there is a bypass @ Parkside Br, it is too far from Dundas Street. Proper traffic control should be prepared before any road closure.

Aboriginal People Engagement Phone Tracking Form

1. Project Summary Script:

This Grindstone Bridge Utility Relocation Class EA is to identify and evaluate the alternative solutions to permit potential relocation of the exiting water, wastewater, hydro and telecommunication utilities on the bridge for future bridge rehabilitation or replacement. The alternative solutions include, but not limited to the following:

- Utilities stay on existing bridge (Do Nothing Approach)
- Utilities go buried below railway track
- Utilities go on a dedicated bridge above railway track
- Others

2. Questionnaire:

a). Did you receive a letter from the City of Hamilton regarding this Class EA project consultation to your organization? YES  NO

b). Are you interested in continued participation in the consultation in the future? YES  NO

c). What are the concerns or interest you may have regarding this project?

Get the appropriate staff for response.

Subject: Hydro One Comments on Highway 5 Grinstone Creek Bridge Utility Relocation and Conceptual Design

Good Afternoon Winston,

This is to acknowledge that we have received your letter dated October 9, 2015 about the City of Hamilton’s Schedule ‘B’ Municipal Class Environment Assessment study (Class EA) for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design.

Based on the map as you have highlighted, we can confirm that there is no Hydro One’s transmission facilities in your study area. Therefore Hydro One Networks Inc. (HONI) has no concern on this project. As for the distribution facilities, as HONI is not the utility service provider, we would suggest you contact the local area distribution supplier about the project affecting low voltage distribution facilities.

Should you have questions, please contact Joan Zhao at (905) 946-6230 or via e-mail joan.zhao@hydroone.com.

Sincerely,
Brandon Gaffoor

Re: Notice of Commencement and Public Information Centre (PIC) #1
Schedule ‘B’ Municipal Class Environmental Assessment Study for the
Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design

Dear Mr. Oriotis:

The City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment study (Class EA) for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge rehabilitation activities.

We have enclosed for your information a copy of the Notice of Commencement, which will appear in the Flamborough Review on October 29 and November 5, 2015. If your agency/office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by November 5, 2015.

For further information or if you wish to provide input regarding this project, please contact the undersigned at 905-546-2424 ext. 4092 or via email at (winston.wang@hamilton.ca).

Yours truly,

Winston Wang, M. A. Sc., P. Eng.
Project Manager, Water & Wastewater Planning
Highway 5 Grindstone Creek
Bridge Utility Relocation
Schedule "B" Class Environmental Study

Project Background
The City of Hamilton has initiated a Schedule 'B' Class Environmental Assessment (EA) study for the Highway 5 Grindstone Creek Utility Relocation and Conceptual design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of the future bridge rehabilitation activities. This study includes public and agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study a project file documenting the planning and decision making process followed, will be prepared and made available for public review.

The Study Process
This Study will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 1
Two (2) PIC sessions will be held in association with this Study. The PIC No. 1 is scheduled for:

Date: November 5, 2015
Time: 6:00 pm to 8:00 pm
Location: Knox Presbyterian Church
80 Mill Street North,
Waterdown, ON L0R 2H0

We would like to hear from you
We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will be become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

| Hamilton Harbour RAP          | ☒     |

Member of Conservation Ontario
Proposal
It is Conservation Halton’s understanding that the purpose of this EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of the future bridge rehabilitation activities.

Ontario Regulation 162/06
As stated within the Notice of Commencement, the bridge traverses a tributary of Grindstone Creek and the hazard lands associated with that watercourse including valleylands and floodplain. Conservation Halton’s regulation limit in this area is 15 metres from the limit of the greatest hazard associated with Grindstone Creek. As such, a portion of the subject area is regulated by Conservation Halton pursuant to Ontario Regulation 162/06.

Please note, development within Conservation Halton’s regulated area can be restricted and, in some cases, not permitted subject to Conservation Halton’s regulatory policies as approved by the Board of Directors. For development that meets Conservation Halton’s policies, Ontario Regulation 162/06 requires that a Permit be obtained from Conservation Halton prior to development, interference with wetlands or alterations to shorelines and watercourses.

MNR/MMAH/CA MOU
Conservation Halton’s mandate pursuant to Ontario Regulation 162/06 includes regulating development in hazardous areas such as flooding, erosion, unstable soil and unstable bedrock (karst). Comments pertaining to these categories will be provided under the heading Ontario Regulation 162/06 upon review of the first submission.

CA/Hamilton MOA
Within Conservation Halton’s Memorandum of Agreement with the City of Hamilton, staff have a responsibility to provide technical input on a number of issues. Based on a review of the brief description of works proposed, staff can confirm the following areas of interest: Endangered and Threatened Species, Significant Valleylands, Significant Wildlife Habitat, Fish and Fish Habitat, Sensitive Surface Water Features and Stormwater Management.

Hamilton Harbour Remedial Action Plan
Grindstone Creek is a tributary that outlets into Hamilton Harbour. As such, any proposed development is reviewed in the context of the HHRAP strategies.

Conclusion
In summary, Conservation Halton looks forward to our continued involvement in the project process, up to and including project implementation.

Staff trust the above is of assistance and would be pleased to meet with the Town to discuss our comments, should that be required.

Best Regards,

KatieJane Harris

Utility Relocation Schedule “B”
Class Environmental Assessment

Project Background
The City of Hamilton has initiated a Schedule “B” Class Environmental Assessment (EA) for the relocation of utilities located on the Highway B bridge spanning Grisdale Creek and the Canadian Pacific Railway in Waterdown. The purpose of this Class EA is to identify and evaluate alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro, and telecommunications utilities to facilitate yet to be designed future bridge rehabilitation activities. This study includes native, First Nations and Aboriginal Peoples, and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study, a Project File documenting the planning and decision making process followed, will be prepared and made available for public review.

The Study Process
This Study will follow the planning and design process as defined in the Municipal Engineers Association - Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 1
Two (2) PIC sessions will be held in association with this study. PIC No. 1 is scheduled for:
- Date: November 5, 2015
- Time: 6:00 pm to 8:00 pm
- Location: Knox Presbyterian Church, 80 Mill Street North, Waterdown, ON L8R 2H0

We would like to hear from you
We are interested in hearing any comments or concerns you may have with respect to this project. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

Please contact the Project Manager regarding disability accommodation requirements.

This Notice issued on October 29 and November 5, 2015.

Police Services Board chairman welcomes ban on random checks

by Laura Lessie

The chair of Hamilton’s police services board says he “absolutely” agrees with the Minister of Community Safety and Correctional Services’ plan to outlaw arbitrary, random street checks by the end of the year.

Lloyd Ferguson said the service is on the same page as Yasir Naqvi, who delivered a public statement opposing “any arbitrary or random stops by police simply to collect information when there are no grounds or reason to do so.”

“You get to be a police reason and the police are trained what to look for,” Ferguson said on Oct. 23, after watching a YouTube video of Naqvi’s comments in the legislature. “This is what the Hamilton police already practice.”

Naqvi’s declaration was made during an Oct. 22 debate in the legislature, which saw MPPs from across the province speak out against street checks, also known as carding. At the time, they were considering a private member’s motion from an NDP MPP to ban arbitrary and random street checks.

“We have heard from the community that street checks, by definition, are arbitrary as well as discriminatory and therefore cannot be regulated, they must simply be ended,” said Naqvi, who at the beginning of the summer started a province-wide consultation on how to regulate street checks. “The province agrees that these types of stops must end.”

Naqvi’s statement also came after the Hamilton police services board unanimously passed a motion prohibiting random street checks the same day.

“‘Street checks without a clear purpose are prohibited.’”

Mayor Fred Eisenberger

City of Hamilton

who has insisted interactions with the public are critical to effective policing, “absolutely” supported the motion.

“Our police officers must not activate any of their policing authorities based on race. . . . We do not train our officers to participate in the random, indiscriminate stopping of our citizens for information based on race or any of the [see Police pg. 15]

Hello Winston,

Here are cultural heritage comments for the Hwy 5 Grindstone Creek Bridge Utility Relocation EA.

Let me know if you have any questions. Thanks!

Chelsey Tyers
Cultural Heritage Planner
Development Planning, Heritage and Design
City of Hamilton
Phone: 905.546.2424 ext. 1202
E-mail: chelsey.tyers@hamilton.ca

From: Chelsey Tyers, Cultural Heritage Planner

Date: November 3, 2015  
File: N/A

Subject: Cultural Heritage Comments Regarding Highway 5 Grindstone Bridge Utility Relocation Class EA and Conceptual Design

Archaeology:

The subject property meets five (5) of the ten criteria used by the City of Hamilton and Ministry of Tourism, Culture and Sport for determining archaeological potential:

1) Within 300 metres of a primary watercourse or permanent waterbody, 200 metres of a secondary watercourse or seasonal waterbody, or 300 metres of a prehistoric watercourse or permanent waterbody;
2) In an area of sandy soil in areas of clay or stone;
3) In areas of pioneer EuroCanadian settlement;
4) Along historic transportation routes; and
5) Within a property designated under the Ontario Heritage Act.

These criteria define the subject area as having archaeological potential. As such an archaeological assessment should be conducted to determine if there are any archaeological concerns.

Staff have reviewed the Stage 1 Archaeological Background Study Report (P042-0438-2015) and concur with the portions of the study area that require a Stage 2 archaeological assessment. Staff request a copy of the letter from the Ministry of Tourism, Culture and Sport when available.

Built Heritage:

The subject study area boundary includes properties that are located within the Mill Street Heritage Conservation District, designated under Part V of the Ontario Heritage
Act, and a “protected heritage property” under the Provincial Policy Statement. The heritage attributes of a Heritage Conservation District generally comprise the exterior of all buildings and structures, streetscapes and landscapes.

The properties that fall within the study area boundary include:

- 5 Mill Street South
- 11 Mill Street South
- 15 Mill Street South
- 327 Dundas Street East
- 6 Mill Street north

Any impact upon these protected heritage properties should be considered during the Environmental Study and all negative impact mitigated.

Re: Environmental Assessment Study for the Highway 5 Grindstone Creek Bridge

In response to your correspondence(s) dated October 9, 2015, please be advised that our Engineering Design Department have reviewed the information concerning the above noted Consent Application and our comment are as follows:

- We have No objection(s).
- Please be advised, Horizon Utilities would like to be involved in planning for this project.

However, we would like to stipulate the following:

- Do not excavate within two metres of hydro poles and anchors.
- Excavation within one metre of underground hydro plant is not permitted unless approval is granted by a Horizon Utilities representative and is present to provide direct supervision. Cost associated with this task shall be at the owner's expense.
- Horizon Utilities must be contacted if the removal, isolation or relocation of existing plant is required, all cost associated with this work will be at the owners expense.
- CALL BEFORE YOU DIG, arrange for underground hydro cable locate(s) before beginning construction by contacting Ontario One Call @ 1-800-400-2255.
- Clearances from Overhead and Underground existing electrical distribution system must be maintained in according to:
  - Ontario Building Code (1997) Section 3.1 (3.1.18.1)
  - Electrical Safety Code Rule 75-312
  - Occupational Health and Safety Act (OH&SA) - Construction Projects (Electrical Hazards)
  - CAN/CSA-C22.3 No. 1-10, Overhead System
  - C22.3 No. 7-10 Underground Systems
We trust that you will find this information satisfactory and that the information contained within will be provided to the owner of this project. Should you have any questions regarding this response, please contact Paul Wardell at 905-522-6611 ext 4724 in our Engineering Design Department.

Sincerely,

Scott Beaudrie
Supervisor, Engineering Design
Attached to this email, please find an acknowledgement letter which provides some guidance for undertaking the EA study.

Best Regards,

Barb Slattery, EA/Planning Coordinator
Ministry of the Environment and Climate Change
West Central Region
(905) 521-7864
November 5, 2015

Mr. W. Wang
Water and Wastewater Planning
Hamilton Water Division, Public Works Department
77 James Street North, Suite 400
Hamilton, Ontario
L8R 2K3

Dear Mr. Wang:

Re: Response to Notice of Commencement
Schedule “B” MEA Study
Highway 5 Grindstone Creek Bridge Utility Relocation

This letter is our response to the Notice of Commencement for the above noted project. This response acknowledges that the City of Hamilton has indicated that its study is following the Schedule “B” process under the MEA Class EA in order to identify, evaluate and determine the preferred alternative for addressing the state of this bridge and associated infrastructure. Thank you for the opportunity to comment on this project.

Based on the information submitted, we have identified the following key project details with respect to the proposed undertaking:

As this is a water crossing, the following may be relevant:

- If the construction involves any dewatering, storage or diversion of water in excess of 50,000 litres per day a Permit to Take Water is required from this office. This could include dewatering behind coffer dams, diversion of creek flow to allow work in the dry, or creation of a settling pond.

- Guidance on nearshore construction and dredging may be obtained from this Ministry's Guidelines for Evaluating Construction Activities Impacting on Water Resources dated January 1995 and Evaluating Construction Activities Impacting on Water Resources, Part III A, Part III B, and Part III C dated February 1994. Where dredging is required, consideration should be given to appropriate storage, handling, dewatering and disposal of excavated material.

- Appropriate mitigation measures should be considered prior to construction. For example: machinery should not operate directly in a watercourse; refuelling of all vehicles and equipment should be done away from watercourses; adequate
erosion and sedimentation controls must be incorporated into the planning and construction for the project; the time of excavation to restoration must be kept to a minimum; disturbed shoreline should be stabilized as soon as possible; removal of vegetation from the right-of-way should be kept to a minimum; materials removed and stockpiled such as excavated soil, sediment and backfill material must be placed above the high water mark and contained in a manner to ensure sediment does not enter the waterway; all fill must be composed of clean, coarse material acceptable for open water disposal. Long term erosion and water quality impairment must not occur as a result of this project.

- Tarpaulins, traps or enclosures should be used during bridge demolition to prevent debris from entering the watercourse. Any debris inadvertently dropped in the water must be collected and deposited onshore in an approved location expeditiously. Cutting or drilling fluids must be prevented from entering the watercourse and must be properly disposed of.

- Any fill must be in accordance with this Ministry’s Fill Quality Guidelines for Lakefilling in Ontario.

- Waste materials generated during the course of construction must be handled in accordance with this Ministry's Protocol for the Management of Excess Materials in Road Construction and Maintenance. The principles of this protocol are included in OPSS 180.

- All spills that could potentially cause damage to the environment should be reported to the Spills Action Centre of the Ministry of Environment and Energy at 1-800-268-6060.

Also, depending upon the bridge’s age, it is strongly recommended that you ensure that a Notice of Commencement has been sent to the Ministry of Tourism, Culture and Sport to ensure that you are advised of any requirements that may be triggered due to age, for the assessment of heritage and cultural resource value.

**Consultation with First Nation and Métis Communities**

Your proposed project may have the potential to affect Aboriginal communities who hold or claim Aboriginal or treaty rights protected under Section 35 of Canada’s Constitution Act 1982. The Crown has a duty to consult First Nation and Métis communities when it knows about established or credibly asserted Aboriginal or treaty rights, and contemplates decisions or actions that may adversely affect them.

Although the Crown remains responsible for ensuring the adequacy of consultation with potentially affected Aboriginal communities, it may delegate procedural aspects of the consultation process to project proponents.
The environmental assessment process requires proponents to consult with interested persons and government agencies, including those potentially affected by the proposed project. This includes a responsibility to conduct adequate consultation with First Nation and Métis communities. The Ministry relies on consultation conducted by proponents when it assesses the Crown's obligations and directs proponents during the regulatory process. Where the Crown's duty to consult is triggered in relation to your proposed project, the Ontario Ministry of the Environment is delegating the procedural aspects of rights-based consultation to you through this letter.

Steps that you may need to take in relation to Aboriginal consultation for your proposed project are outlined in the attached “Aboriginal Consultation Information” document. Please complete the checklist contained there, and keep related notes as part of your consultation record. Doing so will help you assess your project’s potential adverse effects on Aboriginal or treaty rights.

You must contact the Director, Environmental Approvals Branch if you have reason to believe that your proposed project may adversely affect an Aboriginal or treaty right, consultation has reached an impasse, or if a Part II Order request is anticipated. The Ministry will then assess the extent of any Crown duty to consult in the circumstances, and will consider whether additional steps should be taken and what role you will be asked to play in them.

Should you or any members of your project team have any questions regarding the material above, please contact me at (905) 521-7864 or at Barbara.slattery@ontario.ca

Yours truly,

Barbara Slattery
EA/Planning Coordinator

cc. Clarissa Whitelaw, HDO
ABORIGINAL CONSULTATION INFORMATION

Consultation with Interested Persons under the Ontario Environmental Assessment Act

Proponents subject to the Ontario Environmental Assessment Act are required to consult with interested persons, which may include First Nations and Métis communities. In some cases, special efforts may be required to ensure that Aboriginal communities are made aware of the project and are afforded opportunities to provide comments. Direction about how to consult with interested persons/communities is provided in the Code of Practice: Consultation in Ontario’s Environmental Assessment Process available on the Ministry’s website:

As an early part of the consultation process, proponents are required to contact the Ontario Ministry of Aboriginal Affairs’ Consultation Unit and visit Aboriginal Affairs and Northern Development Canada’s Aboriginal and Treaty Rights Information System (ATRIS) to help identify which First Nation and Métis communities may be interested in or potentially impacted by their proposed projects.

ATRIS can be accessed through the Aboriginal Affairs and Northern Development Canada website:

http://sidait-atria.aadnc-aandc.gc.ca/atria_online/

For more information in regard Aboriginal consultation as part of the Environmental Assessment process, refer to the Ministry’s website:

www.ontario.ca/government/environment-assessments-consulting-aboriginal-communities

You are advised to provide notification directly to all of the First Nation and Métis communities who may be interested in the project. You should contact First Nation communities through their Chief and Band Council, and Metis communities through their elected leadership.

Rights-based consultation with First Nation and Métis Communities

Proponents should note that, in addition to requiring interest-based consultation as described above, certain projects may have the potential to adversely affect the ability of First Nation or Métis communities to exercise their established or credibly asserted Aboriginal or treaty rights. In such cases, Ontario may have a duty to consult those Aboriginal communities.

Activities which may restrict or reduce access to unoccupied Crown lands, or which could result in a potential adverse impact to land or water resources in which harvesting rights are exercised, may have the potential to impact Aboriginal or treaty rights. For assistance in determining whether your proposed project could affect these rights, please refer to the attached “Preliminary Assessment Checklist: First Nation and Métis Community Interest.”

If there is likely to be an adverse impact to Aboriginal or treaty rights, accommodation may be required to avoid or minimize the adverse impacts. Accommodation is an outcome of consultation and includes any mechanism used to avoid or minimize adverse impacts to Aboriginal or treaty rights and traditional uses. Solutions could include mitigation such as...
adjustments in the timing or geographic location of the proposed activity. Accommodation may in certain circumstances involve the provision of financial compensation, but does not necessarily require it.

For more information about the duty to consult, please see the Ministry’s website at:

www.ontario.ca/government/duty-consult-aboriginal-peoples-ontario

The proponent must contact the Director, Environmental Approvals Branch if a project may adversely affect an Aboriginal or treaty right, consultation has reached an impasse, or if a Part II Order or an elevation request is anticipated; the Ministry will then determine whether the Crown has a duty to consult.

The Director of the Environmental Approvals Branch can be notified either by email with the subject line “Potential Duty to Consult” to EAASIBGen@ontario.ca or by mail or fax at the address provided below:

<table>

Delegation of Procedural Aspects of Consultation

Proponents have an important and direct role in the consultation process, including a responsibility to conduct adequate consultation with First Nation and Métis communities as part of the environmental assessment process. This is laid out in existing environmental assessment codes of practice and guides that can be accessed from the Ministry’s environmental assessment website at

www.ontario.ca/environmentalassessments

The Ministry relies on consultation conducted by proponents when it assesses the Crown’s obligations and directs proponents during the regulatory process. Where the Crown’s duty to consult is triggered, various additional procedural steps may also be asked of proponents as part of their delegated duty to consult responsibilities. In some situations, the Crown may also become involved in consultation activities.

Ontario will have an oversight role as the consultation process unfolds but will be relying on the steps undertaken and information you obtain to ensure adequate consultation has taken place. To ensure that First Nation and Métis communities have the ability to assess a project’s potential to adversely affect their Aboriginal or treaty rights, Ontario requires proponents to undertake certain procedural aspects of consultation.

The proponent’s responsibilities for procedural aspects of consultation include:

- Providing notice to the elected leadership of the First Nation and/or Métis communities (e.g., First Nation Chief) as early as possible regarding the project;
• Providing First Nation and/or Métis communities with information about the proposed project including anticipated impacts, information on timelines and your environmental assessment process;

• Following up with First Nation and/or Métis communities to ensure they received project information and that they are aware of the opportunity to express comments and concerns about the project. If you are unable to make the appropriate contacts (e.g. are unable to contact the Chief) please contact the Environmental Assessment and Planning Coordinator at the Ministry's appropriate regional office for further direction.

• Providing First Nation and/or Métis communities with opportunities to meet with appropriate proponent representatives to discuss the project;

• Gathering information about how the project may adversely impact the relevant Aboriginal and/or Treaty rights (for example, hunting, fishing) or sites of cultural significance (for example, burial grounds, archaeological sites);

• Considering the comments and concerns provided by First Nation and/or Métis communities and providing responses;

• Where appropriate, discussing potential mitigation strategies with First Nation and/or Métis communities;

• Bearing the reasonable costs associated with these procedural aspects of consultation, which may include providing support to help build communities’ capacity to participate in consultation about the proposed project.

• Maintaining a Consultation Record to show evidence that you, the proponent, completed all the steps itemized above or at a minimum made meaningful attempts to do so.

• Upon request, providing copies of the Consultation Record to the Ministry. The Consultation Record should:
  o summarize the nature of any comments and questions received from First Nation and/or Métis communities
  o describe your response to those comments and how their concerns were considered
  o include a communications log indicating the dates and times of all communications; and
  o document activities in relation to consultation.

Successful consultation depends, in part, on early engagement by proponents with First Nation and Métis communities. Information shared with communities must be clear, accurate and complete, and in plain language where possible. The consultation process must maintain sufficient flexibility to respond to new information, and we trust you will make all reasonable efforts to build positive relationships with all First Nation and Métis communities contacted. If you need more specific guidance on Aboriginal consultation steps in relation to your proposed project, or if you feel consultation has reached an impasse, please contact the Environmental Assessment and Planning Coordinator at the Ministry's appropriate regional office.
In addition to other interests, some main concerns of First Nation and Métis communities may pertain to established or asserted rights to hunt, gather, trap, and fish – these activities generally occur on Crown land or water bodies. As such, projects related to Crown land or water bodies, or changes to how lands and water are accessed, may be of concern to Aboriginal communities.

Please answer the following questions and keep related notes as part of your consultation record. “Yes” responses will indicate a potential adverse impact on Aboriginal or treaty rights.

Where you have identified that your project may trigger rights-based consultation through the following questions, you should arrange for a meeting between you and the Environmental Assessment and Planning Coordinator at the Ministry's appropriate regional office to provide an early opportunity to confirm whether Ontario’s duty to consult is triggered and to discuss roles and responsibilities in that event.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Are you aware of concerns from First Nation and Métis communities about your project or a similar project in the area? The types of concerns can range from interested inquiries to environmental complaints, and even to land use concerns. You should consider whether the interest represents on-going, acute and/or widespread concern.</td>
<td></td>
</tr>
<tr>
<td>2. Is your project occurring on Crown land, or is it close to a water body? Might it change access to either?</td>
<td></td>
</tr>
<tr>
<td>3. Is the project located in an open or forested area where hunting or trapping could take place?</td>
<td></td>
</tr>
<tr>
<td>4. Does the project involve the clearing of forested land?</td>
<td></td>
</tr>
<tr>
<td>5. Is the project located away from developed, urban areas?</td>
<td></td>
</tr>
<tr>
<td>6. Is your project close to, or adjacent to, an existing reserve? Projects in areas near reserves may be of interest to the First Nation and Métis communities living there.</td>
<td></td>
</tr>
<tr>
<td>7. Will the project affect First Nations and/or Métis ability to access areas of significance to them?</td>
<td></td>
</tr>
<tr>
<td>8. Is the area subject to a land claim? Information about land claims filed in Ontario is available from the Ministry of Aboriginal Affairs; information about land claims filed with the federal government is available from Aboriginal Affairs and Northern Development Canada.</td>
<td></td>
</tr>
<tr>
<td>9. Does the project have the potential to impact any archaeological sites?</td>
<td></td>
</tr>

To Whom It May Concern,

The City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment (Class EA) study for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge rehabilitation activities.

We have enclosed for your information a copy of the Notice of Commencement and Public Information Centre (PIC) 1, which will appear in the Flamborough Review on October 29 and November 5, 2015. If you or your office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by **November 5, 2015**.

RE: MTCS file #: 0003811
Proponent: City of Hamilton
Subject: Notice of Commencement
Highway 5 Grindstone Creek Bridge Utility Reocation and Conceptual Design
Location: City of Hamilton, Ontario

Dear Mr. Wang:

Thank you for providing the Ministry of Tourism, Culture and Sport (MTCS) with the Notice of Commencement for your project. MTCS’s interest in this EA project relates to its mandate of conserving Ontario’s cultural heritage, which includes:

- Archaeological resources, including land-based and marine;
- Built heritage resources, including bridges and monuments; and,
- Cultural heritage landscapes.

Under the EA process, the proponent is required to determine a project’s potential impact on cultural heritage resources.

While some cultural heritage resources may have already been formally identified, others may be identified through screening and evaluation. Aboriginal communities may have knowledge that can contribute to the identification of cultural heritage resources, and we suggest that any engagement with Aboriginal communities includes a discussion about known or potential cultural heritage resources that are of value to these communities. Municipal Heritage Committees, historical societies and other local heritage organizations may also have knowledge that contributes to the identification of cultural heritage resources.

Archaeological Resources
Your EA project may impact archaeological resources and you should screen the project with the MTCS Criteria for Evaluating Archaeological Potential to determine if an archaeological assessment is needed. MTCS archaeological sites data are available at archaeologicalsites@ontario.ca. If your EA project area exhibits archaeological potential, then an archaeological assessment (AA) should be undertaken by an archaeologist licenced under the OHA, who is responsible for submitting the report directly to MTCS for review.

Built Heritage and Cultural Heritage Landscapes
The MTCS Criteria for Evaluating Potential for Built Heritage Resources and Cultural Heritage Landscapes should be completed to help determine whether your EA project may impact cultural heritage resources. The Clerk for the City of Hamilton can provide information on property registered or
designated under the *Ontario Heritage Act*. Municipal Heritage Planners can also provide information that will assist you in completing the checklist.

If potential or known heritage resources exist, MTCS recommends that a Heritage Impact Assessment (HIA), prepared by a qualified consultant, should be completed to assess potential project impacts. Our Ministry’s [Info Sheet #5: Heritage Impact Assessments and Conservation Plans](#) outlines the scope of HIAs. Please send the HIA to MTCS for review, and make it available to local organizations or individuals who have expressed interest in heritage.

**Environmental Assessment Reporting**

All technical heritage studies and their recommendations are to be addressed and incorporated into EA projects. Please advise MTCS whether any technical heritage studies will be completed for your EA project, and provide them to MTCS before issuing a Notice of Completion. If your screening has identified no known or potential cultural heritage resources, or no impacts to these resources, please include the completed checklists and supporting documentation in the EA report or file.

Thank you for consulting MTCS on this project; please continue to do so through the EA process, and contact me for any questions or clarification.

Sincerely,

Dan Minkin
Heritage Planner

Dear Mr. Wang,

Re: Information on the Canadian Environmental Assessment Act, 2012

Thank you for your correspondence regarding Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design.

The Canadian Environmental Assessment Act, 2012 (CEAA 2012) focuses federal environmental reviews on projects that have the potential to cause significant adverse environmental effects in areas of federal jurisdiction and applies to physical activities described in the Regulations Designating Physical Activities (the Regulations). Based on the information provided, your project does not appear to be described in the Regulations. Kindly review the Regulations to confirm applicability to the proposed project.

According to section 25 (c) of the Regulations the construction, operation, decommissioning and abandonment of a new all-season public highway that requires a total of 50 km or more of new right of way may require a Federal Environmental Assessment.

If you believe the project is not subject to a federal environmental assessment, and do not submit a project description, we kindly request that you remove the Agency from your distribution list. If you have questions, please get in touch with our office through the switchboard at 416-952-1576. The attachment that follows provides web links to useful legislation, regulation, and guidance documents.

Sincerely,

Anjala Puvananathan
Director, Ontario Region
Canadian Environmental Assessment Agency

Attachment – Useful Legislation, Regulation, and Guidance Documents
Attachment – Useful Legislation, Regulation, and Guidance Documents

For more information on CEAA 2012, please access the following links on the Canadian Environmental Assessment Agency’s (the Agency) website:

Overview of CEAA 2012
http://www.ceaa.gc.ca/default.asp?lang=En&n=16254939-1

Regulations Designating Physical Activities, and Prescribed Information for a Description of a Designated Project Regulations
http://www.ceaa.gc.ca/default.asp?lang=En&n=9EC7CAD2-1

If your project is in a federally designated wildlife area or migratory bird sanctuary please check section 1 of the Regulations, which details the designated projects specific to those locations.

If it appears that CEAA 2012 may apply to your proposed project, you must provide the Agency with a description of the proposed project. Please see the link below to the Agency’s guide to preparing a project description.

Re: Notice of Commencement and Public Information Centre (PIC) #1  
Schedule ‘B’ Municipal Class Environmental Assessment Study for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design

Dear Ms. Knox:

The City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment study (Class EA) for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge rehabilitation activities.

We have enclosed for your information a copy of the Notice of Commencement, which will appear in the Flamborough Review on October 29 and November 5, 2015. If your agency/office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by **November 5, 2015**.

For further information or if you wish to provide input regarding this project, please contact the undersigned at 905-546-2424 ext. 4092 or via email at (winston.wang@hamilton.ca).

Yours truly,

Winston Wang, M. A. Sc., P. Eng.  
Project Manager, Water & Wastewater Planning

Highway 5 Grindstone Creek Bridge Utility Relocation Schedule "B" Class Environmental Study

Project Background
The City of Hamilton has initiated a Schedule 'B' Class Environmental Assessment (EA) study for the Highway 5 Grindstone Creek Utility Relocation and Conceptual design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of the future bridge rehabilitation activities. This study includes public and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study a project File documenting the planning and decision making process followed, will be prepared and made available for public review.

The Study Process
This Study will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 1
Two (2) PIC sessions will be held in association with this Study. The PIC No. 1 is scheduled for:

Date: November 5, 2015
Time: 6:00 pm to 8:00 pm
Location: Knox Presbyterian Church
80 Mill Street North,
Waterdown, ON L0R 2H0

We would like to hear from you
We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will be become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

Hi Melanie,
Since this project lies in a big area and there is no specific boundary for such a small patch in Shapefiles, please see the attached pdf file to get a clear picture where the study area is at. Basically it is the red line boundary in the pdf file, and the green boundary is the main focus, though.

Is this OK?

Winston

Hi Winston, I am not very familiar with this, but basically, just a simple layer that shows the exact boundaries of the area, this would suffice. Is that possible?

Good Morning Melanie,

Happy New Year!

I am wondering which layer(s) of the shapefiles you are interested in for the study area. Could you please be specific as the shapefiles are too large and we can only supply files in certain size?

Good Day mr. Wang, sorry for the delay in response, we are a very small team and we are overloaded. Concerning the attached letter and further to your call a few week ago, yes we are interested to and we would like to know if the shapefiles of the study area can be sent to us so that we can determine if we have any archaeological sites in the area or its buffer zone. Can we receive them please? Thank you,

Thanks for the update Winston. I trust that all of the necessary road infrastructure outlined in Councillor Partridge’s e-mail will be in place prior to the bridge replacement in 2018/2019. If this cannot be achieved, the City has a responsibility to advise its taxpayers at the Nov. 5th PIC.

Hello Brad,

Thank you for the email. I appreciate you taking the time to send your concerns regarding the timing of the replacement of the bridge on Dundas St., just east of Mill St. Waterdown. I’ll ask staff on this email to review the email below and respond with how the traffic mitigation will be handled, especially with the timing of the construction of the new East West Bypass corridors, North South Bypass Corridor and upgrade to Parkside Drive. As you have indicated, closing Dundas St. to replace the bridge would create traffic chaos in Waterdown where it is already an issue.

Note, we are in the process of setting up a public meeting for the bridge replacement for a date in November. I’ll ask that staff handling the Bypass projects also attend this public meeting as I know there will be lots of concerned residents.

Kind regards,

Judi

The city of Hamilton Lobbyist Registry is now in effect. Anyone who does not live or own a business in the Ward Councillors riding who wishes to communicate with that Councillor must first register as a Lobbyist. More information: www.hamilton.ca/lobbyistregistry

Hi Judy,

Hope all is well. I have just learned of the need to replace the Dundas St. bridge in 2018/2019. What assurances do the residents of Waterdown have that the proposed road infrastructure (i.e. Parkside Drive, Waterdown Rd. Mountain Brow) will be completed prior to the closure of Dundas Street? I would also like to know if the bridge replacement is time sensitive and whether it can be delayed until such time as 2 very large road projects are completed? Based on the timing in your newsletter, I would be very surprised if both projects can be completed in time.

One last concern Judi, with the Dundas Street closure, how will emergency services (e.g. fire, ambulance) can access to neighbourhoods east of the Grindstone Creek if there is an accident on Parkside Drive? How will the at-grade crossing of the CPR line be dealt with in the event that emergency vehicles need access? There are some serious potential logistical issues here that will need to addressed so that the residents can have some peace of mind moving forward. Thank you in advance for your consideration of these questions and concerns Judi.

Best regards,
Dear Residents,

Welcome to the September/October 2015 E-NEWS update. For the next few weeks, with Mayor Fred out of the country, I am honoured to be your Deputy Mayor representing the citizens of Hamilton.

Construction for the Waterdown Rotary Memorial Park Ice Loop began on Sept. 14. Everyone is invited to join me for a Ground Breaking BBQ Saturday September 19th at 11am. This is a free community celebration with the Waterdown Rotary Club to celebrate the Ice Loop, which will provide year-round seasonal activities for all ages from winter ice skating to summer rollerblading/basketball. I am pleased to see this project underway. See Community Events for more information.

All-day bus service has arrived. Waterdown’s Route 18 now features two-way pick-ups running every 30 minutes on weekdays with Saturday hours. See Community Updates for more details.

Waterdown Library and Flamborough Seniors Centre opening. The opening of the new Waterdown Library and Flamborough Seniors Recreation Centre will again be delayed for another six weeks. Although the opening is delayed, furnishings and other details are moving forward.

Carlisle Arena Upgrades. The Federal Government through MP David Sweet has announced funding for Carlisle and Beverley Arenas for new elevator towers. The elevator construction slated for 2016 will provide access for more people, especially our elderly and disabled, to enjoy community events. David Sweet was a huge help in securing this
funding, and we are all very grateful.

**New Stop Lights.** A stop light is being added to the Flamborough Centre intersection of Centre Road and Concession 6. The project has a projected completion date of mid-October. It will include a fully functioning light with wide ladder crosswalks for added pedestrian safety. The next phase of improvements will include sidewalks down to the elementary school in 2016. Flamborough Centre, Parent Council, Businesses and Residents in the area have been requesting much needed safety improvements, and I am pleased to see these improvements underway. A new full functioning stop light is also being installed on Dundas St. at Riley Street, to be completed by the end of October. This will allow for the proper flow of traffic and access from Riley St. onto Dundas St. In Community Updates, you will see the upgrades to Parkside Drive coming in spring 2016, which will include additional stoplights and pedestrian crosswalks.

**Rural roads being upgraded.** Several rural roads will be resurfaced and upgraded, with bridge work, new stop signs and caution lights. These adjustments are being made in response to resident requests for added safety features. The upgrades to Centre Road/Carlisle Road will move forward to completion with construction to close William Street and final paving and curb work. New intersection lines will also be added to the Carlisle Road intersection at Highway 6.

**Police issuing speeding tickets in rural areas.** Hamilton Police are monitoring vehicle speeds on rural roads in Flamborough, Millgrove, Carlisle, and other areas of Ward 15. In meetings with police, I have expressed that speeding is a resident concern in this Ward, and should remain a priority. Speeders will be ticketed over the next several weeks - please slow down.

**Flamborough Chili Festival is fast approaching.** Mark your calendars for next Tuesday Sept. 22 from 4pm to 8pm to join your community for some great chili and entertainment in support of the Flamborough Women's Resource Centre. Ten local restaurants will prepare their best Chili to compete for awards, so please come and support them. All proceeds will directly support the various FWRC programs for disadvantaged women and their families in Flamborough. See Community Events for more details, and I hope to see you all there!

We have a number of exciting community developments in the works for 2015/2016, including road work, sidewalks, renovations, and new builds. For a detailed list, please click [here](#).

With warm regards,

Councillor Judi Partridge

Community Updates

Waterdown Transit
Tuesday Sept. 8 marked the first day Waterdown’s improved all-day bus service.

The new service includes two-way pickups running every 30-minutes on Waterdown Rd., Mill St., Dundas St., Horseshoe Cres., Clappison Ave., Hollybush Dr., Parkside Dr., Spring Creek Dr., Burke St., and service to the Walmart Supercentre. Small commuter buses will be used, and Saturday daytime service times have been added.

Both routes will travel to the Aldershot GO/VIA Station, with connections to Burlington Transit for trips into Burlington and Hamilton. More information and a transit map is available [here](#).

New Waterdown Library and Flamborough Seniors Recreation Centre
The grand opening of the new Waterdown Library and Flamborough Seniors Recreation Centre (163 Dundas Street East) has been delayed. Staff are currently awaiting a shipment of doors for the new facility, which could push the project’s expected completion date to November 2015.

The 23,500 square foot, multi-use facility will contain:

- Flamborough Seniors Recreation Centre
- Flamborough Archives run by the Flamborough Heritage Society
- Flamborough Information and Community Service
- Flamborough Municipal Service Centre

The new Waterdown Library’s facility has been described by some residents as “a jewel” with “exceptional lighting”. We look forward to the grand opening! More information and pictures of the construction are available [here](#).

The current Waterdown Library and the Millgrove Library will remain open until the new facility is ready to open. Once Millgrove Library closes, a Bookmobile will open every Tuesday from 6-8pm outside Millgrove Public School. More information can be found [here](#).

Road Improvements in Waterdown

Image removed by sender.

Parkside Drive Improvements
Construction for the Parkside Drive Improvement Plan will begin in 2015/2016. It will include a three-lane upgrade with continuous centre turning between Main Street West and Highway #6. Further updates will include new sidewalks, bike lanes, three new stoplight intersections and pedestrian crossings. Currently City staff members are designing the plan and negotiating land acquisitions. Click here for more information.

Waterdown East-West Corridor
Construction for the corridor will begin in 2016/2017 in phases. The corridor will run north from Dundas Street East with a new road up to Parkside Drive between Spring Creek and Evans Road. It will run west on Parkside Drive curving north behind Alexander Place, then west again over to connect with Highway #6 just south of the 5th Concession. The project is currently in the detail design phase. Click here for more information.

**Waterdown North-South Corridor**

Construction for the corridor will begin in 2016/2017. The corridor will run from Craven Avenue in Burlington to Dundas Street East in Waterdown. The project will initially widen Waterdown Road to three lanes, and will also widen Mountain Brow Road to four lanes. In order to complete the project, portions of land will need to be purchased along the corridor. Click here for more information.

**Replacing the Dundas St. CP Pacific bridge**

Construction will start in 2018/2019, and this will be the final phase of the corridor projects. Construction will require road closure, and therefore the construction above must be completed first. This project will include the resurfacing of Dundas St. from the bridge up Vinegar Hill.

**Highway 5 & 6 Interchange**

Twelve properties on the west side of Highway 6, south of Parkside Drive, have been purchased by the Ministry of Transportation in preparation for the future Highway 5 and 6 Interchange. The purpose of these improvements is to enhance traffic flow and address future capacity issues within the area. The project's completion is driven by the Ministry of Transportation's Provincial Budget, and therefore the City has no authority over construction timelines. The project is currently in the detail design phase. Click here for more information.

**Keep Hamilton Warm**

Fall is fast approaching, which means that cooler weather is on its way. As you go through your closets for the fall season and back to school, please keep in mind those in need.

If you have any new, gently loved or handmade clothing still in good shape that can be donated, please contact Keep Hamilton Warm. Men's clothing has been going to the Salvation Army Soup Truck. Women's and babies' clothing has been going to the Good Shepherd Women's and Family Shelters. Winter kids clothing will go to Lake Avenue School and Elizabeth Bagshaw School. Donations of wool and knitting supplies are also needed for the knitting group, who knit items for the Good Shepherd Shelters in Hamilton.

Please email keephamiltonwarm@gmail.com to discuss a donation, and thank you in advance for your support.

**Hamilton's One-Stop for Business**

Located on the first floor of City Hall (71 Main Street West), One-Stop for Business contains resources and assistance for small and medium-sized businesses looking to open and grow in Hamilton. One-Stop includes business licensing and facilitation staff, as well as the Small Business Enterprise Centre (SBEC).

The SBEC, a division of the Economic Development Department, offers guidance, programs and materials for entrepreneurs wishing to start, run or expand their businesses. Through a network of sponsors including the City of Hamilton and the Ministry of Economic Trade and Employment, the SBEC is able to offer access to professionals (lawyers, accountants, marketing consultants, etc.), free consultation sessions, business development seminars, workshops, and programs for entrepreneurs.

For more information on workshops and programs, click here.

**Community Events**

**Millgrove School Carnival**

**When:** Thursday September 17th, 2015

**Time:** 4pm - 8pm
Where: Millgrove Elementary School, 375 Concession 5 West

Everyone is invited to attend the Millgrove School Carnival on Thursday September 17th from 4 - 8pm! The school hopes to raise enough funds at the carnival for resources and school activities for the 2015-2016 school year. The School Council will use the money for school trip subsidies, educational resources and playground maintenance and improvement. Money will also be used to fund two long held Millgrove School traditions - the annual Christmas Dinner & Skate and the annual Go-for-Green Day.

So come on out for amazing food, games and inflatable fun in support of Millgrove students!

**Waterdown Farmers’ Market**

*When:* Every Saturday from May 30th to October 24th

*Time:* 8am - 1pm

*Where:* Parking lot of the Waterdown Royal Canadian Legion, 79 Hamilton Street North

The highly anticipated Waterdown Farmers’ Market will be back again this spring, bringing urban and rural communities together. Local vendors bring products ranging from fruit, vegetables, artisan cheese, organic wine, free-range eggs, tea, artisan bread, pastries and ethically raised antibiotic and hormone-free meat. The market offers an even mix of organic and conventional vendors, an on-site fair trade organic coffee cafe, live music and free parking. Come one, come all!

**Waterdown Rotary Memorial Park Ice Loop**

*When:* Saturday September 19th, 2015

*Time:* 11am

*Where:* Memorial Park, 200 Hamilton Street

Everyone is invited to attend a special Ground Breaking Ceremony for the much anticipated construction of the Waterdown Rotary Memorial Park Ice Loop on **Saturday Sept. 19 at 11am** in Memorial Park.

Construction of the Waterdown Rotary Memorial Park Ice Loop is being funded in partnership by the City of Hamilton and the Waterdown Rotary Club. The artificial Ice Loop is a multi-use recreational facility, which will host various seasonal activities throughout the year including skating in the winter and rollerblading/basketball in the warmer months. Following the ground breaking ceremony, please stay and enjoy a free barbecue hosted by the Waterdown Rotary to celebrate the Ice Loop!

**Waterdown Creative Crawl**

*When:* Saturday September 19th, 2015

*Time:* 10am - 4pm

*Where:* Creativworks Art Studio - 23 Main Street South, Waterdown

Everyone is invited to tour local businesses in downtown Waterdown this Saturday as part of the Waterdown Creative Crawl! Visit participating merchants to receive a passport and stamps at each location. All passports will be entered into a draw to receive 1 of 8 free fall programs!

**Participating merchants include:**
- Beanermonkey chocolates - chocolate making classes
- Yoga Shala - yoga classes
- Bliss Restaurant - health and wellness food
- The Creative Hub - Creative insight pottery - pottery classes
- Creativworks art studio - visual art classes
- Kinstruct Health - wellness services
- Waterdown Jewellers - jewelry classes
- Copper Kettle Cafe - entertainment
Ice cream from Laurel's freezer will be available at the Waterdown Farmers' Market. Face painting, henna, art and pottery demonstrations as well as food and refreshments will also be offered along the crawl. We hope to see you there!

**Waterdown Terry Fox Run**

**When:** Sunday September 20th, 2015  
**Time:** Registration will begin at 7:30am and the run will commence at 9am  
**Where:** Memorial Park, 200 Hamilton Street  

Join your community and run, walk, ride or wheel for cancer research in the annual Terry Fox Run. The route will begin at 9am at Memorial Park and run through Waterdown on a 2.5km and 5km path. All are welcome, and there is no entry fee or minimum pledge. For route information, click [here](#).

**The Flamborough Women's Resource Centre's Annual Chili Fest**

**When:** Tuesday Sept. 22nd, 2015  
**Time:** 4-8pm  
**Where:** The Waterdown Legion, 79 Hamilton St N, Waterdown  

Everyone is invited to join the Flamborough Women's Resource Centre for their 3rd annual Chili Fest on Tuesday September 22nd, 2015 at the Waterdown Legion. The funds raised will go directly to maintaining and advancing the resources, support, legal advocacy and counselling programs available at the FWRC for women in the Flamborough community.

Last year, over 500 people attended Chili Fest, and the FWRC received tremendous feedback about the evening. This year's event promises to be full of friendly competition and family fun. So please join us for an evening of delicious chili in support a great cause!

**2015 Annual Sport Volunteer Appreciation Awards Banquet**

**When:** Thursday September 24th, 2015  
**Time:** 6pm  
**Location:** Hamilton Convention Centre, 1 Summers Lane, Hamilton  

The City of Hamilton and SportHamilton are very happy to recognize the many dedicated sport volunteers in the Hamilton Community, including coaches, team builders and event contributors.

More about the event, its criteria, guidelines, nomination process and nomination form for these awards are listed on the SportHamilton Website under Awards & Recognition or by the link below:

**Carlisle Optimist Club's Learn to Skate Program**

**When:** Friday September 25th from 5-7pm & Saturday September 26th from 9-11am  
**Where:** Carlisle Arena, 1496 Centre Road  

Boys and girls aged 3-12 are invited to attend the Carlisle Optimist Club's Learn to Skate Program. Please bring your health card, and we look forward to seeing you there!

**Animal Adoptions of Flamborough 25th Anniversary Celebrations Fundraiser**
When: Saturday September 26th, 2015  
Time: 6pm - 11pm  
Location: Waterdown Legion Hall, 78 Hamilton St. North, Waterdown  

Everyone is invited to attend the Animal Adoptions of Flamborough's 25th Anniversary Celebration Fundraiser on September 26th at the Waterdown Legion! The night will include a dinner buffet, cash bar, silent auction and lots of dancing!  

Tickets are on sale for $20 until September 1st. All Tickets purchased will be eligible to win the door prize, a diamond ring valued at $2900.00!  

FOR TICKETS: contact either Anadoptflam@bell.net or call 905-689-4972  

So come on out and support an incredible cause!  

For more information click here.

Stride for Strays 2015!  
When: Saturday October 3rd, 2015  
Time: Registration begins at 10:30am and the walk begins at 11am  
Where: Joe Sam's Leisure Park, 752 Centre Road  

Clappison Animal Hospital is hosting its annual 5km charity dog walk on Saturday October 3rd. All dogs must be on a leash, and walkers without dogs are welcome. Participant bags will be given out at registration, and prizes will be awarded for several walking categories including first place, oldest dog, youngest dog, generosity award for top donor, underdog award for the last one to finish, and more.  

Following the dog walk, please join Clappison Animal Hospital for their Annual Open House from 1pm-4pm at their clinic at 780 Hwy 6 North, Waterdown. The Open House will include raffles, pet portraits, clinic tours, agility, dancing, and advanced demonstrations from McCann's and K9 Case.  

A shuttle service will be available from Clappison Animal Hospital, leaving at 10:30am to the park. It will then leave the park at 12:30pm to go back to Clappison Animal Hospital.  

More information available here. Come on out in support of a great cause!

Roast Beef Dinner at the Millgrove United Church  
When: Saturday October 3rd, 2015  
Time: 6pm  
Where: Millgrove United Church, 370 Concession 5 West, Millgrove  

Come on out and enjoy a delicious roast beef dinner at the Millgrove United Church! Tickets cost $18 for general admission and $8 for children under 10 years.  

Call Shirley at 905-689-8617 for tickets today!  

All Candidates Federal Election Debate - Waterdown High School  
When: Wednesday October 7th, 2015  
Time: 7pm  
Where: Waterdown District High School, 215 Parkside Drive  

Everyone is invited to attend the Federal Election All Candidates Debate hosted by the Flamborough Chamber of Commerce in partnership with
COGECO Community Television and the Flamborough Review. The debate will be taped for broadcast before the October 19 election by TV COGECO in Burlington, and has been timed purposely to allow extensive coverage in the last edition of the Flamborough Review before election day.

This is a community debate, and the public is invited to attend and participate with questions for the candidates.

**Flamborough Food Bank Thanksgiving Food Drive**

*When:* Thanksgiving weekend October 9th-12th  
*Time:* During Rockton World Fair hours  [details here]  
*Where:* Rockton World Fair - 812 Old Hwy 8, Rockton

The Flamborough Food Bank in partnership with the Rockton World Fair will be accepting food donations at the fair to support families in need. Please bring your donations to the fair in support of this great cause!

In addition, the Flamborough Food Bank is seeking volunteers for the weekend at the fair as well as a space to sort the food collected. Please call (905)-690-1036 or email flamborough1@hotmail.com if you can help!

**Flamborough AM Rotary Club’s 10th Annual Oktoberfest**

*When:* Saturday October 17th, 2015  
*Time:* 6pm  
*Where:* St. Thomas Churct Hall - 715 Centre Road

Have you picked up your tickets yet for the Flamborough AM Rotary Club’s 10th Annual Oktoberfest celebration? Join the Flamborough AM Rotary for great food, music and lots of fun. All funds raised go to support Rotary projects in our community and around the world.

Tickets are only $50 and are available at Canadian Tire (11 Clappison Avenue) or call 905-689-7479. For more information, click [here](#).

**Flamborough Horticultural Society Annual October Meeting**

*When:* Wednesday October 21st, 2015  
*Time:* 7:30pm  
*Where:* Strabane United Church Hall - 1565 Brock Rd

The Flamborough Horticultural Society meets once a month on the third Wednesday of every month except in July, August and December. They have speakers every month, bus trips, garden tours throughout the summer, and flower show contests for members. Membership is just $12.00 a year with an Early Bird special in October and November of $10.00. All ages over 15 are welcome - come one come all!

**Waterdown - East Flamborough Heritage Society Annual Book Fair**

*When:* Saturday November 7th, 2015  
*Time:* 9:30 am - 2:30 pm  
*Where:* St. James United Church Fellowship Hall, 306 Parkside Drive

Everyone is invited to attend the Waterdown-East Flamborough Heritage Society's Annual Book Fair. The event will include two seminars on Genealogy by Ruth Blair entitled ‘Beginning Your Genealogy’ and ‘Researching Your Halton and Wentworth County
Ancestors'. She will begin at 10am. Admission is free, parking is free and lunch will be made available. Hope to see you there!

**Pursapalooza!**

**When:** Thursday November 12th, 2015  
**Where:** The Bay City Music Hall - 50 Leander Drive, Hamilton

Hamilton's Phoenix Place would like to invite everyone to attend their fabulous fundraising event - Pursapalooza! All proceeds from the event will go directly to supporting their programs for disadvantaged women and children in Hamilton. The evening will consist of amazing food, entertainment, prizes and a celebrity purse auction! Hope to see everyone out in support of a great cause! For tickets and additional details, please contact the Phoenix Place at (905) 527-2238.

**Christmas Tree Lighting**

**When:** Saturday November 21st, 2015  
**Time:** 3pm - 7pm  
**Where:** Sobeys Plaza, 255 Dundas Street East

Join your community and the Waterdown BIA for the annual Christmas Tree Lighting celebration outside the Sobeys plaza. More details to come!

**Flamborough Santa Claus Parade**

**When:** Saturday November 28th, 2015  
**Time:** 6:30pm

**Where:** Click here for route information

Join your community for the annual Flamborough Santa Claus Parade! The parade starts at 6:30pm on Hamilton Street at Rockhaven Lane, and will wind through beautiful downtown Waterdown, ending at the corner of Hamilton Street and Parkside Drive. Bring your family, friends and blankets, and cozy up to enjoy holiday floats, entertainment and delicious treats.

The parade is always in need of volunteers and donors. To contribute, please click here.

**Flamborough Women's Resource Centre**

The Flamborough Women's Resource Centre (FWRC) has a variety of services and programs for women. To begin, individual Counselling supports women in making life decisions that are good for them. Specialized counselling for women who have, or are experiencing, mental or physical abuse is also available. The Transitional Support Program is available to link women to a variety of Flamborough community resources including assistance with housing supports. Legal advocacy assists women in navigating today's complicated legal systems including police, legal aid, family law, custody issues and immigration law. All of these services are private and confidential and located at the FWRC in Waterdown.

Contact Chelsea Clark-Martin for further details at (289)-895-8580.

**Flamborough Food Bank**

**Location:** Carlisle United Church  
1432 Centre Road, Carlisle

**Hours:** Every Wednesday from 1pm-3pm and 7pm-8:30pm

The Flamborough Food Bank (FFB) is a not-for-profit, community based organization that supplements individual and family household food and personal care needs through community donations and resources.

The FFB is open to anyone who is in need of food or personal care supplements. It also offers holiday assistance including Easter,
Thanksgiving and Christmas food hampers.

Clients can only be registered with one food bank in the Hamilton area. Clients are welcome to come in every two weeks.

To register as a client, please fill out a registration form at the Carlisle United Church. The registration process requires: Photo ID, proof of residency, proof of income and major expenses.

For more information, please click here.

**Food With Grace, Waterdown Food Bank**

**Location:** Grace Anglican Church  
157 Mill Street North, Waterdown

The Waterdown Food Bank is open to those in need every Tuesday from 2-6pm or by appointment. The Waterdown Food Bank has helped many residents over the years through difficult times, and continues to be a valued community service.

To contact the organization, please call (905)-966-7900 or email foodwgrace@graceanglicanwaterdown.org

**BizConX Networking**

BizConX - Waterdown is a FREE business to business networking group. Every month we host a FREE business networking event that gives you the opportunity to meet other local business professionals, executives, business owners and entrepreneurs.

If you are looking to grow your business, make new connections, and meet potential new clients, then this is the MUST ATTEND event for you!

At BizConX - Waterdown our goal is to connect, promote and support local Hamilton businesses by offering a no obligation, no pressure, FREE monthly networking event.

Join our MeetUp group today and come to our next event to see why this is the place for you!

To sign-up, please click here.

Highway 5 – Grindstone Creek Bridge Utility Relocation Class
Environmental Assessment and Conceptual Design

Appendix D – 9

Public Information Centre #2

Notice of Commencement

April 2016
Highway 5 Grindstone Creek
Bridge Utility Relocation
Schedule "B" Class Environmental Study

Project Background
The City of Hamilton has initiated a Schedule 'B' Class Environmental Assessment (EA) study for the Highway 5 Grindstone Creek Utility Relocation and Conceptual design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of the future bridge rehabilitation activities. This study includes public and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study a project File documenting the planning and decision making process followed, will be prepared and made available to the public.

The Study Process
This Study will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 2
alternative solutions and identify recommended solutions and is scheduled for:

Date: May 3, 2016
Time: 6:00 pm to 8:00 pm
Location: Knox Presbyterian Church
80 Mill Street North,
Waterdown, ON

We would like to hear from you
We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will be become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

Winston Wang, M. A. Sc., P. Eng.
Project Manager
City of Hamilton
77 James Street North, Suite 400
Hamilton, ON L8R 2K3
Phone: 905-546-2424 ext. 4092
Fax: 905-546-4491
Email: Winston.Wang@hamilton.ca

Please contact the Project Manager regarding disability accommodation requirements.

This Notice Issued April 21 and April 28, 2016.

The City Of Hamilton
Utility Relocation Schedule “B” Class Environmental Assessment

Public Information Centre #2

May 3, 2016
6:00 pm to 8:00 pm
Knox Presbyterian Church
80 Mill Street North
Waterdown, Ontario
Welcome to the Public Open House for The City Of Hamilton Utility Relocation Schedule “B” Class Environmental Assessment

The objective of this Class Environmental Assessment (EA) is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing utilities (water, wastewater, hydro, telecommunications utilities, etc.) as part of the future bridge rehabilitation activities.

Purpose of Tonight’s Meeting
Tonight’s Information Centre provides an opportunity for participants to review and provide comments on the alternatives and evaluation criteria. The staff of the City of Hamilton and the members of the Project Team are available to answer any questions that you may have about the project details and how the project may impact you.
The focus of the study is the Highway 5 Dundas Street (Vinegar Hill) bridge spanning Grindstone Creek and the utilities that run beside, beneath, and within the bridge.
This study is being undertaken as a Schedule B project under the Municipal Class Environmental Assessment (EA) Process. The flow chart illustrates the key steps to be undertaken as part of the Class EA process.

**Municipal Class Environmental Assessment Process**

1. **Background data collection and interpretation**
2. **Define project problems/opportunities**
3. **Determination of existing conditions**
4. **Develop list of alternatives and evaluation criteria**
5. **Evaluate alternatives and identify recommended solutions**
6. **Select preferred solution**
7. **Produce EA Report and file for 30-day review period**

Public Information Centre #1

Public Information Centre #2

We are here
Definition of the Problem

Constructed in 1966, the Highway 5 Grindstone Creek bridge in Waterdown is reaching the end of its life span. The City of Hamilton will initiate reconstruction or rehabilitation of the bridge within 10 years. Prior to the commencement of work, this Class EA will identify and evaluate the alternative solutions to permit the replacement and/or potential relocation of existing utilities (water, wastewater, hydro, telephone, etc.) as part of the future bridge rehabilitation works.

Completing these options will require making potential arrangements including consultation with approval agencies, new bridge construction, and land purchasing. Current City land ownership can be seen in the figure on the right.
Existing Infrastructure

Existing Utilities
• 500mm Ø insulated sanitary forcemain
• 200mm Ø insulated ductile iron pipe watermain supported below the deck
• 250mm Ø sanitary sewer
• Bell telecommunications
  • 8 embedded 108mm diameter Bell ducts in the north sidewalk
  • 89mm diameter Bell duct supported on the southern exterior girder that was installed in 2009
• One (1) 76mm diameter electrical duct (transite) in each sidewalk

Other Infrastructure Notes
• Existing pumping station approximately 300m upstream
• Sanitary system is relatively new
• Watermain - 1 of 4 feeds to the east side of Waterdown
• CP Rail infrastructure, includes CP communications lines and Fiber-optic located approximately 5 feet from the edge of the railway tie/rail
Existing Environmental Conditions

In 2015, Dougan and Associates completed a natural heritage feature characterization of lands within 120 metres of the bridge over Grindstone Creek. Supporting studies included surveys for breeding birds, reptiles, amphibians, odonates, vegetation communities, flora, fish, and fish habitat as well as an assessment of Significant Wildlife Habitat. In addition, available background information from the City of Hamilton, Conservation Halton, and Ministry of Natural Resources and Forestry (MNRF) were reviewed.

Key Findings

Biophysical Surveys
- 11 common species of breeding birds were recorded.
- All of the 3 vegetation communities recorded within the study area are common in Southern Ontario.
- Of the 109 species of flora documented, 4 are considered locally significant.
- Eastern Gartersnake was the only reptile species found in the study area.
- Frogs and toads are not breeding within the study area; red-backed salamanders are present in the forest north east of the bridge.
- 3 common species of odonates (dragonflies and damselflies) were recorded, indicating that minimal breeding habitat is present in the study area.
- Fish habitat in the vicinity of Bridge 451 exhibits low-medium fish diversity.

Natural Heritage Assessment
- Natural heritage features/functions associated with the study area include: Significant Wildlife Habitat, Fish Habitat, and potentially Significant Valleylands (pictured, right).
- A portion of the study area is designated as Escarpment Natural Area and is subject to the Niagara Escarpment Plan.

Recommendations and Next Steps
The preferred option under the EA will take into consideration the natural heritage features and functions of the surrounding environment and will seek to avoid, minimize, and mitigate potential impacts to the ecological form and function of natural heritage features.
Evaluation Criteria

The following criteria will be used to evaluate each alternative. It will help determine which alternative should be selected as the Preliminary Preferred Alternative. The Final Preferred Alternative will be selected based on agency and public input.

Natural Environment
• Impact on existing vegetation
• Impact on erosion & flooding
• Impact on fish & aquatic habitat
• Impact on wildlife & wildlife habitat
• Impact on groundwater

Legal/Jurisdictional
• Need for property acquisition
• Ease of approvals/potential for delays

Technical
• Impact on existing utilities
• Impact on bridge rehabilitation
• Ease of construction – including proposed bridge rehabilitation
• Construction risks (e.g., deep tunnels)
• Ease of maintenance
• Coordination with other capital projects

Social/Cultural
• Impact on traffic & transit
• Impact on businesses
• Impact on residents (e.g., noise, dust, mud)

Economic/Financial
• Estimated construction cost – including bridge rehabilitation
• Estimated operation & maintenance cost
• Potential cost for property acquisition
Alternative #1 – Existing Utilities Remain on Bridge

Description:
For this alternative, the existing utilities would be temporarily relocated during rehabilitation of the bridge. The utilities would then be relocated to the bridge during the construction process. As a result, the anticipated 10 month period to rehabilitate the bridge would take longer.

Approximate Cost: $3.8 million

<table>
<thead>
<tr>
<th>Opportunities</th>
<th>Constraints</th>
</tr>
</thead>
<tbody>
<tr>
<td>All works are completed during one period</td>
<td>Increased construction time during rehabilitation of bridge; thereby resulting in significant impact to business, residents and traffic</td>
</tr>
<tr>
<td>Potentially a more streamlined approvals process</td>
<td>Long term operation and maintenance of utilities least preferable</td>
</tr>
<tr>
<td></td>
<td>Higher capital cost as a result of lengthened construction process</td>
</tr>
</tbody>
</table>
Alternative #2 – Relocation of Existing Utilities

Description:
For this alternative, all existing utilities would be relocated to a separate utility bridge in advance of the bridge rehabilitation. Relocation of the utilities will allow for an expedited rehabilitation of the bridge.

Opportunities
- Reduced bridge closure time during rehabilitation thereby minimizing impact to businesses, residents and traffic
- Ease and cost of long term operation and maintenance of utilities is improved (or reduced)
- Lowest capital cost of the three alternatives

Constraints
- Short term partial closures of Grindstone Creek Bridge during construction of utility bridge
- Requires approval from Conservation Halton, Bell Utilities, Union Gas and Canadian Pacific Railway

Approximate Cost: $2.5 million
Alternative #3 – Relocation of Some of the Existing Utilities

Description:
For this alternative, the existing sanitary forcemain and watermain would be relocated subsurface (under Grindstone Creek) in advance of the bridge rehabilitation. Relocation of the other utilities (bell and sanitary sewer) would be placed on the utility bridge thus allowing for a somewhat expedited rehabilitation/replacement of the bridge.

Opportunities

• Somewhat reduced bridge closure time during rehabilitation thereby lessening impact to businesses, residents and traffic

• Ease and cost of long term operation and maintenance of utilities is improved (or reduced)

Constraints

• Higher Capital Cost

• Short term partial closures of Grindstone Creek Bridge during construction of utility bridge

• Requires approval from Conservation Halton and Canadian Pacific Railway

• Temporary or permanent acquisition of property may be required.

Approximate Cost: $3.8 million

City of Hamilton - Utility Relocation Schedule “B” Class Environmental Assessment (Grindstone Creek)  
Public Open House
Archaeological Findings

A Stage 1: Archaeological Background Research report for the Grindstone Creek bridge study area was completed in 2015 by Historic Horizon Inc. This stage of the archaeological assessment involves background research and property inspection, in order to determine the potential for the presence of archaeological heritage resources and known cultural heritage resources.

Key Findings

• The study area has intermittent archaeological potential in part of the creek ravine, around remaining 19th century buildings, and under old parking areas (as illustrated by green shading in the figure).
• A search of the Ontario Sites Database shows 42 registered archaeological sites or findspots within a one kilometre radius of the bridge, the majority being of Aboriginal origin.
• 19th century structures include:
  • Probable mills on the islands north and south of the bridge,
  • The Vances’ house and barn, and
  • A structure on the east bank of the ravine.

Recommendations and Next Steps

The proposed works will not result in subsurface impacts and therefore the Stage 2 archaeological assessment would not have to be completed before the conclusion of this Class EA study. This study will make a recommendation as to whether a Stage 2 study is required for areas that may have subsurface impacts.
Next Steps and Contact Information

After this Public Information Centre, the study team will consider verbal and written comments in order to refine the project problems and opportunities.

For more information on this project, or to submit your comments or feedback, and to be placed on our mailing list, please contact:

Re: Notice for Public Information Centre (PIC) #2
Schedule ‘B’ Municipal Class Environmental Assessment Study for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design

Dear «Title» «LastName»:

The City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment study (Class EA) for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge rehabilitation activities.

We have enclosed for your information a copy of the Notice for Public Information Centre #2 which will appear in the Flamborough Review on April 21 and April 28, 2016. If your agency/office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by May 25, 2016.

For further information or if you wish to provide input regarding this project, please contact the undersigned at 905-546-2424 ext. 4092 or via email at (winston.wang@hamilton.ca).

Yours truly,

Winston Wang, M. A. Sc., P. Eng.
Project Manager, Water & Wastewater Planning

Hi Councillor Partridge,

The City has decided the PIC2 for Grindstone Utility Relocation Class EA will be held on April 26 (Tuesday) at Knox Church from 6:00pm to 8:00pm. Hopefully it is good for you too.

See you there!

Winston

Thanks Councillor! So, will every day in the week from April 25 to April 29 be OK for you? I would guess that time will be 6:00pm to 8:00pm as usual??

Regards,
Winston

Hello Winston – Knox Church is the preferred location for the PIC – thanks so much

Councillor Judi Partridge
Ward 15 East Flamborough
Waterdown, Carlisle, Millgrove
West to Sydenham Rd ~ North to Conc. 14
City of Hamilton 905-546-2713
Admin Alison Morrison 905-546-3944

The city of Hamilton Lobbyist Registry is now in effect. Anyone who does not live or own a business in the Ward Councillors riding who wishes to communicate with that Councillor must first register as a Lobbyist.
More information: www.hamilton.ca/lobbyistregistry

Winston
Good Morning Councillor Partridge,

How are you doing?

I am touching base with you regarding the potential dates for the second Public Information Centre (PIC) for Grindstone Utility Relocation Class EA from **April 25 to April 29, 2016**. Please kindly let me know which date(s)/time are good for you during this last week of April. Also, please let me know which location(s) you prefer again as the PIC 2 venue as I know all PIC venues must meet AODA requirements according to the City’s policy.

Thanks,

Winston Wang, M.A.Sc., P. Eng.

winston.wang@hamilton.ca
To Whom It May Concern,

As you have been notified earlier, the City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment (Class EA) study for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge replacement activities.

I have enclosed for your information a copy of the second Notice of Public Information Centre (PIC), which will appear in Flamborough Review on April 21 and April 28, 2016. If you or your office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by May 6, 2016.

Thanks,

Highway 5 Grindstone Creek Bridge Utility Relocation Schedule "B" Class Environmental Study

Project Background
The City of Hamilton has initiated a Schedule ‘B’ Class Environmental Assessment (EA) study for the Highway 5 Grindstone Creek Utility Relocation and Conceptual design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities to facilitate future bridge replacement activities. This study includes public, First Nations and Aboriginal People, and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study a project File documenting the planning and decision making process followed, will be prepared and made available for public review.

The Study Process
This Study will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 2
Two (2) PIC sessions will be held in association with this Study. PIC No. 2 will present the evaluation of the alternative solutions and identify recommended solutions and is scheduled for:

Date: May 3, 2016
Time: 6:00 pm to 8:00 pm
Location: Knox Presbyterian Church
80 Mill Street North,
Waterdown, ON L0R 2H0

We would like to hear from you
We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

   Email: dan.minkin@ontario.ca  
4. Please note specific comments and/or concerns (please attach additional sheets if necessary):  
   General comments were sent Nov 20, 2016. Currently interested in whether any alternative solutions involve ground disturbance on land with archaeological potential; would require Stage 2 Archaeological Assessment during EA process if so, particularly if preliminary preferred alternative. Also, have the bridge and any other potentially impacted structures been screened for potential cultural heritage value or interest? Would require heritage impact assessment if deemed to have potential.  
5. Do you wish to be notified for continued involvement in the project process, up to and including project implementation?  
   Yes ☑ No ☐

Email: Winnson.Wang@hamilton.ca  

Thank you for your participation in this study.
Hi Dave/Chris,

Please see the concerns from NEC below. My understanding is that NEC would like to see both the plan view and cross-section view of all alternatives so that they can make a decision if a Development Permit is required or not. I believe the PIC2 boards are not enough. That’s why I have been requested those drawings for quite a while now. Could you provide me with your thoughts on this?

By the way, could you please also send me the PIC1 summary as the City needs to update the Project Website for the public and agencies?

Thanks,

Dear Winston:
The subject lands are partly in the Area of Development Control and a Development Permit from the Niagara Escarpment Commission may be required. As so little detailed information has been provided to us, we are unable to determine if the project might be exempt under our Regulation. Is it simply road and utility repair or more than that?

Can you provide a link to your website where we can view the alternative solutions? We need to assess whether the proposed construction is in conflict with the Niagara Escarpment Plan.

Thank you,

Nancy

Subject: RE: Notice of Public Information Centre 2 for Highway 5 Grindstone Bridge Utility Relocation Class EA and Conceptual Design

Good Morning Nancy,

Please see the project website for some background information and PIC 1 boards:

https://www.hamilton.ca/city-planning/master-plans-class-eas/highway-5-grindstone-creek-utility-relocation

This project is to assess the potential utility relocation alternatives away from the current Highway 5 Grindstone Creek Bridge. The utilities on/near the bridge include one 500 mm sewer forcemain, one 250mm gravity sanitary sewer, one 200mm watermain (which is buried under the creek as the City wants to upgrade it to 300mm at the same time), and Union Gas main and Bell ducts. A potential utility bridge may be proposed along existing bridge. Once this relocation has been done, the bridge will be replaced. So, my project is on the relocation part, not the bridge replacement part.

I am still waiting for the drawings from our consultants at Aquafor Beech for all alternatives to show where the potential utility relocation will be looked like and once I have these drawings, I will forward them to you for review and comment.

Regards,

Dear Winston:

The subject lands are partly in the Area of Development Control and a Development Permit from the Niagara Escarpment Commission may be required. As so little detailed information has been provided to us, we are unable to determine if the project might be exempt under our Regulation. Is it simply road and utility repair or more than that?

Can you provide a link to your website where we can view the alternative solutions? We need to assess whether the proposed construction is in conflict with the Niagara Escarpment Plan.

Thank you,

Nancy

Subject: Notice of Public Information Centre 2 for Highway 5 Grindstone Bridge Utility Relocation Class EA and Conceptual Design

To Whom It May Concern,

As you have been notified earlier, the City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment (Class EA) study for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge replacement activities.

I have enclosed for your information a copy of the second Notice of Public Information Centre (PIC), which will appear in Flamborough Review on April 21 and April 28, 2016. If you or your office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by May 6, 2016.
Thanks,

Subject: RE: Notice of Public Information Centre 2 for Highway 5 Grindstone Bridge Utility Relocation Class EA and Conceptual Design

Good Morning Dan,

This is the link to the project website. In this website you can find our PIC1 boards to get a better understanding of the background information. Since the proposed works will not result in some sort of subsurface impacts; therefore, a Stage 2 archaeological assessment would not be completed before the conclusion of this study.

https://www.hamilton.ca/city-planning/master-plans-class-eas/highway-5-grindstone-creek-utility-relocation

One of the potential alternatives is to build a utility bridge side by side to the south east side. I am not sure if a Stage 2 archaeological assessment is needed to confirm the feasibility of building the utility bridge or the utility bridge is just steel beams welded and put on the land??

Dave: do you have any thoughts or ideas to add in this regard?

As for the potential cultural heritage value, it has been screened and the conclusion is that there is not heritage value with this bridge. Please see the attached file extracted from the City of Hamilton’s Bridge Master Plan and hopefully you have already seen this report.

Bridge ID: 451

Street Name: HIGHWAY NO. 5 E

Location: 120 metres east of MILL ST S

Built Heritage Inventory Number: 602451

Longitude: -79.890778    Latitude: 43.335168

Former Municipality: Flamborough

Bridge Type: Concrete    Number of Spans: 3

Construction Period: Post 1955

Construction Date if known: 1966

Description:
Concrete piers support this multi-span concrete beam structure. There is a simple steel balustrade on the deck. The bridge has a straight horizontal soffit.

CHER Required: No    Figure Reference: 2.1

Completed by: James Sebele    Date of Site Visit: November 27, 2014

Rational for CHER Requirement: Does not satisfy criteria provided in Part B of MCEA Checklist.
Message I sent incomplete. Here is the full message:

As you can see from the attached maps, part of the study is within the Urban Area. Under our regulation (O.Reg. 828), “the maintenance, repair or renewal of sewers, pipes, mains, cables including fiber optic cables, wire or other apparatus connected with public utilities, including equipment shelters and lockers and the breaking open of any municipal road or highway or other land for this purpose” and “the construction or installation of sewers, pipes, mains, cables including fiber optic cables, wire or other apparatus connected with public utilities, including equipment shelters and lockers in an area designated as Urban Area in the Niagara Escarpment Plan” are exempt from development control. However, part of the subject lands are in the Escarpment Natural Area where only essential transportation and utility facilities are permitted.

Is Highway 5 still under MTO jurisdiction or is it under the City’s jurisdiction? If under MTO control, then no Development Permit would be required.

Regardless, we would be interested in more specific information about the location or re-location of the infrastructure to determine any effect in the NEP area.

Thank you,

Nancy

Please see the project website for some background information and PIC 1 boards:

https://www.hamilton.ca/city-planning/master-plans-class-eas/highway-5-grindstone-creek-utility-relocation

This project is to assess the potential utility relocation alternatives away from the current Highway 5 Grindstone Creek Bridge. The utilities on/near the bridge include one 500 mm sewer forcemain, one 250mm gravity sanitary sewer, one 200mm watermain (which is buried under the creek as the City wants to upgrade it to 300mm at the same time), and Union Gas main and Bell ducts. A potential utility bridge may be proposed along existing bridge. Once this relocation has been done, the bridge will be replaced. So, my project is on the relocation part, not the bridge replacement part.

I am still waiting for the drawings from our consultants at Aquafor Beech for all alternatives to show where the potential utility relocation will be looked like and once I have these drawings, I will forward them to you for review and comment.

Good Morning Councillor Partridge,

We would like to approach you before the Public Information Centre (PIC) 2 for my project “Highway 5 Grindstone Creek Bridge Utility Relocation Class Environmental Assessment and Conceptual Design”. We are planning to meet with you on April 21, 2016 at 10am to 11:30am, along with our Director Mark Bainbridge and Manager Udo Ehrenberg for updating you about the potential alternatives of utility relocation, and the preferred solution.

So we are wondering if you are available at this time? Or if other dates or times are better? If you are available, what is the meeting location?

I will follow up with your assistant regarding this meeting, even though it is short-noticed.

Utility Relocation Schedule “B” Class Environmental Assessment

Project Background
The City of Hamilton has initiated a Schedule ‘B’ Class Environmental Assessment (BIA) study for the Highway 5 Grindstone Creek Utility Relocation and Conceptual Design. The purpose of this Class BIA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities to facilitate future bridge replacement activities. This study includes public, First Nations and Aboriginal People, and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study a project file documenting the planning and decision making process followed will be prepared and made available for public review.

The Study Process
This Study will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 2
Two (2) PIC sessions will be held in association with this Study. PIC No. 2 will present the evaluation of the alternative solutions and identify recommended solutions and is scheduled for:

Date: May 3, 2016
Time: 6:00 pm to 8:00 pm
Location: Knox Presbyterian Church, 80 Mill Street North, Waterdown, ON L0R 2H0

We would like to hear from you
We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will be become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

Fraudsters continue to target seniors

By Laura Lamelo
MDMILLAND WEST MEDIA GROUP

While crimes against seniors are down overall, fraud-related incidents continue to rise, according to the latest Hamilton police statistics. An annual report presented to the police services board April 21 shows there were 555 crimes against seniors – defined as 60 and older – in 2015. That’s down from 608 incidents in 2014. But there were 82 fraud-related crimes last year compared to 62 in 2014. The incidents resulted in 15 of the 26 changes last year by the crimes against seniors unit.

Det. Sgt. Dave Dunbar told the board schemes like the grandparent scam remain a concern in Hamilton. The scam, believed to be run out of Quebec, typically entails con artists posing as grandparents to get seniors to send money to help them out of an alleged legal jam, like a car accident, while out of town. The con artists use open-ended questions, tricking seniors into divulging information such as the names of their grandchildren. Money is then requested and sent through wire transfer services.

Dunbar said the recent Canada Revenue Agency and immigration scams also are a major problem. The CRA scam involves individuals claiming to be representatives from the Canada Revenue Agency.

Good Afternoon Nancy,

FYI.............attached is the preferred alternative for Highway 5 Grindstone Creek Bridge Utility Relocation. The City had 2 Public Information Centres (PIC’s) already and is now in the process of gathering inputs and comments for the Class EA report writing. So, if you have any other questions or concerns, please let us know.

By the way, it is a fact that highway #5 belongs to the Ministry of Transportation of Ontario.

Thanks,

PLAN
Hello:

Thank you for the update. If the proposed works would be undertaken by or on behalf of MTO, then a Development Permit would not likely be required. We request however that prior to construction, you apply for a Development Permit and we can issue a formal Exemption for your records.

Best regards,

Nancy

Please consider the environment before printing this email.

Good Afternoon Nancy,

FYI...............attached is the preferred alternative for Highway 5 Grindstone Creek Bridge Utility Relocation. The City had 2 Public Information Centres (PIC’s) already and is now in the process of gathering inputs and comments for the Class EA report writing. So, if you have any other questions or concerns, please let us know.

By the way, it is a fact that highway #5 belongs to the Ministry of Transportation of Ontario.

Thanks,
Good Afternoon,

Please see attached, Conservation Halton’s comments regarding the Schedule ‘B’ EA for the Highway 5 Bridge in Waterdown and its proposed utility relocation.

If you have any questions, please do not hesitate to ask.

Best Regards,

Katie Jane

BY MAIL AND BY EMAIL

Dear Mr. Wang:

Re: Schedule ‘B’ Municipal Class Environmental Assessment (EA)
    Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design
    Conservation Halton File: MPR 686

Conservation Halton’s initial comments provided on November 2, 2015 noted that development within Conservation Halton’s regulated area can be restricted and, in some cases, not permitted subject to Conservation Halton’s regulatory policies as approved by the Board of Directors. Pursuant to Policy 3.51, Public Infrastructure, it is recognized that certain utilities and services such as watermains, storm and sanitary sewers, natural gas or oil pipelines, hydro and communication corridors, footpaths/trails and transportation links will, from time to time, be required to cross hazardous lands, valleylands, wetlands or shorelines. As such, it must be demonstrated through the EA process that there are no reasonable alternatives.

Staff have reviewed the Public Information Centre #2 Utility Relocation Schedule “B” Class Environmental Assessment Boards, prepared by Aquafor Beech, dated May 3, 2016, as well as the Bridge 451 – Highway 5 East, 120m east of Mill Street South, Ecological Characterization & Natural Heritage Assessment, prepared by Dougan and Associates, dated September 2015, received May 10, 2015 and offer the following comments.

It is understood that the draft EA will be provided for review. The draft EA is to include technical study/studies in order to assess presented alternatives prior to selecting a preferred alternative.
Regulatory Comments under Ontario Regulation 162/06

Staff note that only limited information has been presented at this time, however please see the following comments as they pertain to Conservation Halton’s regulatory requirements.

1) Staff note that a geotechnical assessment (study) is required for all alternatives to address slope stability and constructability.

2) In alternatives where a utility bridge is proposed, the span of the utility bridge is to be based on a geotechnical analysis of slope stability. This will impact bridge span and cost of construction, which may influence the evaluation matrix. The assessment is to consider the proposed utility bridge and future bridge reconstruction. Bridge abutments are to be placed outside of the slope hazard. If this is not feasible, the span is to be maximized to extent possible. Please ensure to provide supporting analysis in the draft EA.

3) As discussed in the pre-consultation held on May 10, 2016, the draft EA is to include drawing(s) outlining top of bank, floodplain, and stable slope line (based on input from qualified Professional Geotechnical Engineer).

4) Please explain how risks such as spills (pollution) have been considered in the review. The only impact listed is during construction i.e. “construction risks (e.g. deep tunnels).”

5) PIC Boards, pg. 7: Please note that the condition of the riparian habitat in the vicinity of Bridge 451 is dense and offers excellent thermal mitigation and cover. Conservation Halton staff recommends minimizing any disturbance to the valley and riparian vegetation. The rating in the Evaluation of Alternatives table of “impact on existing vegetation” should be partly based on the estimated area of disturbance as well as any increased public access to the valley system which could degrade the riparian area.

6) PIC Board, pg. 10, Alternative #2: Verification is required to confirm there is no impact to hydraulics (conveyance and Regulatory flood elevations) at the EA stage.

7) PIC Boards, pg. 10, Alternative #2: When evaluating the options in the EA please quantify any intrusion into the valley that is required/possible. Additional concerns that should be discuss for each option in the EA include appropriate erosion and sediment control measures, how future maintenance could impact the creek, and staging of the proposed work.

This option increases the number of valley crossings (two bridges) which is not desirable from an aquatic ecology perspective. One piece of infrastructure typically limits the potential area of impact.

8) PIC Boards, pg. 11, Alternative #3: The methods proposed to relocate the forcemain and watermain subsurface will need to be clearly stated in the EA and evaluated for potential impacts to the aquatic ecosystem. Any environmental mitigation methods recommended should also be defined.
This option increases the amount of infrastructure in the valley bottom which is not desirable from an aquatic ecology perspective. One piece of infrastructure typically limits the potential area of impact.

9) *PIC Boards, pg. 11, Alternative #3*: This alternative may require input from Fluvial Geomorphologist to support any utility crossing under Grindstone Creek, depending on depth of crossings considered.

10) *PIC Boards, pg. 12*: ‘Impact on Erosion & Flooding’ is ranked the same for all alternatives. Ranking should take into consideration:

   i. Likely relocation of existing storm sewer outfall for Alternative #2; and  
   ii. Potential creek crossing of partial or all utilities for Alternative #3.

11) *PIC Boards, pg. 12*: The ranking of the alternatives based on impact on fish and aquatic habitat is expected to change based on the detailed evaluation in the EA. The factors to consider include:

   - Number of separate valley crossings;  
   - Area of riparian disturbance;  
   - Potential impacts due to accessing the utilities to complete future work;  
   - Frequency and potential impact (valley or riparian area disturbance) of maintenance and emergency works;  
   - Public access to the valley; and,  
   - Mitigation measures recommended and the ease of their implementation.

12) *PIC Boards, page 13*: “Ease of Approvals/Potential for delays” is ranked the same for all alternatives. The basis is unclear. Ranking should take into consideration geotechnical requirements associated with each alternative.

**Advisory Comments under Hamilton/CH Memorandum of Agreement**

11) It is noted that a temporary redirection of traffic will be required as part of the proposed alternatives. Staff note with the relocation of traffic to a less urbanized road, there may be the potential for increased wildlife/vehicle collisions. Staff recommend that if mitigation measures are feasible to be implemented to reduce potential indirect impacts to the natural environment, they are considered.

12) *PIC Boards, pg. 7*: The Natural Heritage Assessment should also highlight that the bridge is located within the Grindstone Valley Environmentally Significant Area (ESA).

13) *PIC Boards, pg. 7*: Based on the review of the Ecological Characterization & Natural Heritage Assessment, staff recommend that bat habitat be assessed as per the Bat and Bat Habitat Surveys of Treed Habitats developed by Guelph District in May 2016.
14) *PIC Boards, pg. 7:* Based on the review of the Ecological Characterization & Natural Heritage Assessment, staff would like to know whether the bridge was assessed for nests such as those of cliff swallows?

15) Staff advise that mitigation measures to limit the spread of invasive species should be considered during the construction period.

**Future Bridge 451 Replacement**

Conservation Halton is of the understanding that in the future, the Highway 5 bridge that crosses Grindstone Creek in this location will be replaced. It is expected that at that time, the bridge replacement will be classified as a Schedule A+ EA.

As part of the current Schedule B EA, a geotechnical assessment is required for all alternatives to address slope stability and constructability. It is strongly recommended that during this geotechnical investigation, the future bridge replacement is incorporated into the geotechnical analysis to ensure that a like-for-like replacement is an acceptable approach and will not cause future risk to the structure and/or the public (i.e. stability, flooding, etc.).

Similarly, environmental characterization for this EA should evaluate the bridge and immediate vicinity, as the future bridge replacement has the potential to disturb wildlife using it as a nesting/roosting site, and access for replacement may also disturb habitat/vegetation that is sensitive to the future activities.

**Conclusion**

In summary, Conservation Halton looks forward to reviewing the Draft EA.

Staff trust the above is of assistance and would be pleased to meet with the Town to discuss our comments, should that be required.

Best Regards,

*Katie Jane Harris*

Good Afternoon Katie Jane,

The following are the responses to address those concerns raised in Conservation Halton’s letter for my project: Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design.

1) We do not feel that a geotechnical study is required at the EA stage. We will make note of the requirement and ensure the geotechnical study is completed prior to, or as part of the detail design. The sizing, depth and type of abutments will take into consideration the items noted in HCA’s letter.
2) See 1) above
3) We have requested the flood lines and top of bank. As noted above, the requirement for a stable slope line will be noted in the EA, as will a description as to the type of assessment required.
4) We will address in the EA
5) Will consider comment
6) Will consider comment, based on discussion in meeting the Regional level is well below the bottom of the proposed bridge.
7) Will consider comment in EA
8) Will consider comment in EA
9) Alternative 3 is not being brought forward as the preferred alternative
10) Will consider comment in EA
11) Factors provided seem too complex for this project but will consider the comment
12) See 1), 2) and 3) above
13) Advisory comments will be reviewed and incorporated as appropriate

Thanks and have a wonderful day!

Good Afternoon Winston,

The technical review team have had an opportunity to review the concise response provided by the City relating to our comment letter dated June 14, 2016 and offer the following:

Should the City choose to defer a geotechnical study to detailed design:

- Conservation Halton is of the opinion that it is in the City’s best interest to complete a Geotechnical Study at the Environmental Assessment stage, in order to confirm the preferred alternative and understand the requirements for the bridge span as well as the costs associated with construction. A similar/like-for-like span may not be appropriate;
- Based on information provided to date, Conservation Halton cannot advise whether or not we will be in a position to issue a permit for the proposed works;
- Conservation Halton needs a commitment that comments will be addressed appropriately at detailed design, with the understanding that modifications to select the preferred alternative and/or design may be required based on the outcome(s) of the Geotechnical Study in order to meet Regulatory requirements. (This may or may not lead to re-opening of the EA.)

Similarly, while a good deal of the City’s responses noted that the comment “would be considered in the EA”, staff would like to reiterate that all environmental factors (both terrestrial and aquatic) as well as hazards should be properly assessed prior to selecting a preferred approach.

With that in mind, a staking of the physical top of bank will be required in associated with the geotechnical assessment – a reference point is required to identify where the stable top of bank is in relation to the physical, and as per CH policy, “physical top of bank will be established in the field in conjunction with Conservation Halton staff”. When the City is ready, please contact me and I will attend on site with the City's retained Ontario Land Surveyor to complete that task.

I trust the above provides the direction the City was seeking.
If you have any questions, please do not hesitate to contact me.
Best Regards,
Katie Jane

Good Morning Katie Jane,

Please confirm item 1) below regarding the need for a geotechnical study as both the City and Aquafor Beech Ltd are in the opinion that this should be “completed prior to, or as a component of the detailed design”.

Subject: Notice of Public Information Centre 2 for Highway 5 Grindstone Bridge Utility Relocation Class EA and Conceptual Design

To Whom It May Concern,

As you have been notified earlier, the City of Hamilton has initiated a Schedule ‘B’ Municipal Class Environmental Assessment (Class EA) study for the Highway 5 Grindstone Creek Bridge Utility Relocation and Conceptual Design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities as part of future bridge replacement activities.

I have enclosed for your information a copy of the second Notice of Public Information Centre (PIC), which will appear in Flamborough Review on April 21 and April 28, 2016. If you or your office has any comments or input regarding this project, we invite you to complete and return the attached Response Form by May 6, 2016.

Thanks,
Highway 5 Grindstone Creek
Bridge Utility Relocation
Schedule "B" Class Environmental Study

Project Background
The City of Hamilton has initiated a Schedule 'B' Class Environmental Assessment (EA) study for the Highway 5 Grindstone Creek Utility Relocation and Conceptual design. The purpose of this Class EA is to identify and evaluate the alternative solutions to permit the replacement and potential relocation of existing water, wastewater, hydro and telecommunications utilities to facilitate future bridge replacement activities. This study includes public, First Nations and Aboriginal People, and review agency consultation, evaluation of alternatives, assessment of the impacts of the proposed works, and identification of measures to mitigate any adverse impacts. Upon completion of the study a project File documenting the planning and decision making process followed, will be prepared and made available for public review.

The Study Process
This Study will follow the planning and design process as defined in the Municipal Engineers Association Municipal Class Environmental Assessment document (October 2000, as amended in 2007 & 2011).

Public Information Centre (PIC) No. 2
Two (2) PIC sessions will be held in association with this Study. PIC No. 2 will present the evaluation of the alternative solutions and identify recommended solutions and is scheduled for:

Date: May 3, 2016
Time: 6:00 pm to 8:00 pm
Location: Knox Presbyterian Church
80 Mill Street North,
Waterdown, ON L0R 2H0

We would like to hear from you
We are interested in hearing any comments or concerns you may have with respect to this study. Comments received through the course of the study will be considered in selecting the preferred solution. Information will be collected in accordance with the Municipal Freedom of Information and Protection of Privacy Act. With the exception of personal information, all comments will be become part of the public record. If you would like more information or would like to be placed on the Study mailing list, please contact:

Winston Wang, M. A. Sc., P. Eng.
Project Manager
City of Hamilton
77 James Street North, Suite 400
Hamilton, ON L8R 2K3
Phone: 905-546-2424 ext. 4092
Fax: 905-546-4491
Email: Winston.Wang@hamilton.ca

Please contact the Project Manager regarding disability accommodation requirements.

This Notice Issued April 21 and April 28, 2016.
I understand that the bridge replacement will not occur until such time as the other road improvements in Waterdown have been completed (i.e. N-S and E-W corridors). Based on the information provided on the City website, the projected construction completion dates range up to 2020 and "unknown". Can you please confirm whether the Dundas Street bridge replacement can be delayed until 2020 or longer?

[Brad Bricker]
