

Notice of Completion

Centennial Neighbourhood Transportation Management Plan

The Study

The City of Hamilton has completed the Transportation Management Plan of the Centennial Neighbourhood area following Phases 1 and 2 of the Municipal Class Environmental Assessment process. The Plan assesses the transportation needs for the Centennial Neighbourhood including lands bounded by the QEW on the north, King Street on the south, Red Hill Valley Parkway on the west and Lake Avenue on the east, as shown on the map below.

THE PROCESS

This study has been undertaken in accordance with Section A.2.7. Master Plans Approach #2 as defined in the Municipal Engineers Association, Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011) and satisfied Phases 1 and 2 requirements of the planning process. The study was presented and public input obtained at three public information centres held on April 30, 2015, December 1, 2015 and April 28, 2016, and via project website.

The Transportation Management Plan has been coordinated with the Centennial Neighbourhoods Secondary Plan study. The transportation management study recommended several transportation solutions including:

- Improve traffic signal co-ordination and timings, including pedestrian walk times.
- Implement traffic calming on local streets where speeding, cut-through traffic volumes, collisions and safety concerns are ascertained

- Undertake transit priority study to determine appropriate transit priority measures for Centennial Neighbourhoods following adoption of a potential new transit priority policy under the City-wide Transportation Master Plan
- Improve transit rider experience by developing City-wide guidelines for bus stop placement and design, including installing passenger amenity features
- Through the City-wide Annual Transit Service Plans, consider extending or modifying HSR bus routes in the study area
- Extend rapid transit from the Eastgate Transit Hub to the Confederation GO Station. Transit Project Assessment Process required
- Implement Projects in the City of Hamilton's Recreational Trails Master Plan. Additional studies required
- Create neighbourhood greenways to calm traffic and improve walking and cycling connections
- Construct missing sections of sidewalk along Lake Avenue, Centennial Parkway and local streets
- Provide cycling facilities on Nash Road, Lake Avenue, Warrington Street and a section of the South Service Road
- Develop a pedestrian / cycling route between Confederation Park and Battlefield House Museum
- Identify traffic calming measures to reduce cut-through traffic, speeding, collisions or safety concerns as part of development applications
- Through future re-development of adjacent lands that support the Confederation GO Transit mobility hub, extend Goderich Road (with bikeway and sidewalks) to Kenora Avenue to support direct access. Additional studies to be undertaken

Please refer to the report for the complete study recommendations. The Schedule 'A' and 'A+' projects noted in the study report are pre-approved and can proceed to implementation.

The Transportation Management Plan Report will be on public record for a minimum of 30 calendar days in accordance with the Municipal Class EA process. The "Review Period" will begin on May 11, 2018 and end on June 12, 2018. The Study Report is available for public review on website www.hamilton.ca/centennialNTMP and at the following locations:
