

## Notice of Project Completion Transportation Master Plan Review and Update (Municipal Class Environmental Assessment)

### BACKGROUND

Hamilton's City-wide **Transportation Master Plan (TMP)** Review and Update is a comprehensive review and update of the 2007 TMP that continues to plan and build for the 2031 planning horizon and beyond. Ultimately, the City is working toward achieving positive outcomes that align with the City's strategic plan and vision to be the best place to raise a child and age successfully. The TMP review and update establishes the framework (or lens) that future transportation-related projects will be viewed under.

### THE PROCESS

The TMP was completed under the Municipal Class Environmental Assessment (EA), October 2000, as amended 2007, 2011 and 2015 (Approach 1) process, which is an approved process under the Ontario Environmental Assessment Act.

Three desired outcomes for the transportation system were identified through the TMP review and update process and relate to four of the seven City Strategic Plan priorities, which are: a sustainable and balanced transportation system; healthy and safe communities; and, economic prosperity and growth. These outcomes are supported by 71 key specific actions. The TMP also validates the need and justification for the strategic road network improvements, transit and cycling networks within the City.

The TMP Review and Update produced a new TMP that was endorsed by City Council in August 2018. This notice places the new TMP on public record for a 30-day comment period to complete the requirements of the Municipal Class EA process. **Comments must be received by December 7, 2018 to become part of the public record for this study.**

You can download the TMP document from the study web site at [www.hamilton.ca/tmp](http://www.hamilton.ca/tmp). Copies are also available for review at 77 James Street North, Suite 400 as well as at the following locations:
