- The proposed development is located at the intersection of a primary urban corridor and a minor arterial road, serviced by public transit and in proximity to active transportation networks, and will support the sustainability of these facilities;

- The proposed development satisfies all characteristics and requirements of the Strathcona Secondary Plan Mixed Use – Medium Density policies, save and except the prescribed building height for the multiple dwelling;

- The proposed development respects the existing built form of surrounding neighbourhoods by providing a gradation of building heights and densities which help to minimize the effects of shadow and overview;

- The proposed development enhances the character of the neighbourhood through an architectural style that is sympathetic and complementary to the existing character and heritage of the neighbourhood;

- The proposed development implements the Residential Intensification policies of the Urban Hamilton Official Plan; and,
