

# COVID-19 Vaccine Facts

All of the vaccines are effective at protecting you from serious illness and hospitalization.

Should you get the vaccine if you don't feel at-risk for COVID-19?

**Yes. Even mild COVID-19 illness can harm a person's lungs and heart. Some people have symptoms for weeks or months.**

Do you need a vaccine if you have had COVID-19?

**Yes. Given the uncertainty about how long immunity lasts, it is important to still get the vaccine when it is available.**

Do you need two doses of vaccine?

**Yes. To be most effective, two doses of the Pfizer and Moderna vaccines are needed.**

Will the vaccine give you COVID-19?

**No. mRNA vaccines cannot make you sick with COVID-19.**

Is the vaccine safe?

**All of the approved mRNA vaccines have passed quality and safety standards.**
