Between April 6 and April 27, 2022, the City offered a survey to the public to provide their feedback regarding the upcoming playground replacement at Cherry Heights Park. The survey provided images of various playground components, which were grouped into their respective categories, allowing respondents to select their top 2 choices for each. Additionally, written responses were received, which contained feedback and information regarding the demographics of survey respondents. These written responses will be considered in both the Cherry Heights Park playground design, and for the continuous improvement of our playground replacement projects throughout the City.

City staff are currently in the process of completing the new playground design and will be incorporating the feedback received from the survey. The design is expected to be finalized in 2022 and will be shared on the project website www.hamilton.ca/playyourway once available. We encourage you to check back regularly to stay up-to-date on important project updates.

Here are the top choices for each category of the survey for the new Cherry Heights Park playground:

**Playground Style Options:**

**First Choice:** Hybrid Playground Style 2  
**Second Choice:** Hybrid Playground Style 3

*Final equipment selection and installation may vary from what is shown here. Community feedback will help to guide the design of the future play structure, and include elements similar to the examples shown in the survey.*
